How to Order

LEGGINGS, GARTER STOCKINGS

Measurements for Leggings and Garter Stockings (34) and (35) shown at right. Have someone else take your measurements in the morning before the leg begins to swell. Stand as shown in the diagram below, with your shoes removed, feet firmly on the floor.

How To Measure for Legging (34). Take 3 measurements: around C (ankle); around D (fullest part of the calf); from E (small part just below the knee) to C (ankle). The last measurement gives you the length you need for a Legging. Having found your measurements, consult size chart for Legging and order that size (Small, Medium, etc.) which is most similar to your measurements. If measurements are in between those shown on chart, order next smaller size.

How to Measure Garter Stocking. Take 3 measurements: around C (ankle); around D (fullest part of the calf); from E (small part below the knee) to the floor (last measurement gives length for Garter Stocking). Consult size chart for Garter Stockings; order the size most nearly like your three measurements.

Full Fashioned Elastic Hose . . . Braces, Supports

ELASTIC LEGGINGS, GARTER STOCKINGS

34 35 A Legging or Garter Stocking offers excellent support and relief in localized cases of varicose veins, for sprains, wrenches and other leg disorders. Seamless style, snugly form-fitting to give firm support to painful, swollen legs. Non-raveling surgical cotton elastic, cotton and rayon in two weights. Standard weight is heavy, firm, fits more tightly, gives more firm support. Lightweight is cooler, less tightly woven and slightly less noticeable under regular stockings.

ELASTIC LEGGINGS

(34) Supports the calf of the leg from just below the knee to just above the ankle. See "How to Order Legging" above; then consult following chart to find your size.

Size You Order	Around (C) Ankle	Around (D) Calf	(E) to (C) Length
Small	7⅝ in.	12 in.	11 in.
Medium	8¼ in.	13⅛ in.	11¾ in.
Large	8¾ in.	14¼ in.	12¼ in.
Extra Large	9¼ in.	15⅜ in.	12¾ in.

53 C 6629—Standard. Wt. 4 oz. *State size*.....Each 1.79

53 C 6607—Lightweight. Wt. 3 oz. *State size*...Each 2.39

GARTER STOCKINGS

(35) Open toe and heel, form-fitting instep. For support around ankle, instep, calf. Read "How to Order Garter Stocking"; consult following chart for correct size.

Size You Order	Around (C) Ankle	Around (D) Calf	(E) to Floor Length
Small	7⅝ in.	12 in.	14¼ in.
Medium	8¼ in.	13⅛ in.	15 in.
Large	8¾ in.	14¼ in.	15½ in.
Extra Large	9¼ in.	15⅜ in.	16 in.

53 C 6628—Standard. Wt. 5 oz. *State size*.....Each 1.79

53 C 6603—Lightweight. Wt. 4 oz. *State size*...Each 2.49

SHOULDER BRACES

How To Order. Have someone take snug measure around chest as close up under armpits as possible, underclothes on or off, as you'll wear brace. If measurement is odd number in., order next smaller even size.

41 Washable white cotton drill cloth. Sturdy, yet flexible enough to conform to body motions. Not bulky. Front straps adjust the back lacing. Ship. wts. each 5 oz. *Even Sizes:* 24 to 40-in. chest. *State Size.*

53 C 6652—For women and girls...2 for 3.46; Ea. 1.98

53 C 6653—For men and boys....2 for 3.46; Each 1.98

42 Corrector. Fine quality, gives sturdy support. Washable white cotton webbing. Flexible back stays adjust to body motion. Padded straps. Ship. wts. each 4 oz. *Even Sizes:* 24 to 40-in. chest. *State Size.*

53 C 6654—For women and girls...2 for 5.26; Ea. 2.98

53 C 6655—For men and boys....2 for 5.26; Each 2.98

ELASTIC KNEE AND ANKLE, ARCH BRACES

36 37 Braces below are helpful in cases of sprains, muscular pains in knee, ankle or arch. They offer comfort, support, help prevent swelling, yet will permit normal movement at the joint. Seamless, finished edges, lightweight, form-fitting—made of surgical elastic, cotton and rayon in 2 weights. Standard weight is heavier, gives firm pressure. Lightweight is cooler to wear, less firmly woven, less noticeable under stockings.

ELASTIC KNEE CAP

(36) To Order a Knee Cap: Measure around E (small part below the knee), around F (knee), G (4 inches above the knee). Use measuring diagram above. After measuring, consult size chart below. Choose measurements most similar to yours—if yours are in between those on chart, order next smaller size.

Size You Order	Small Part (E) Below Knee	Center Knee Joint (F)	4 In. Above Knee (G)
Small	11¼ in.	11¾ in.	13⅝ in.
Medium	12½ in.	13 in.	14¾ in.
Large	14¼ in.	14⅝ in.	16⅝ in.

53 C 6631—Standard. Wt. 4 oz. *State size*....Each 98c

53 C 6610—Lightweight. Wt. 3 oz. *State size*...Each 1.79

ELASTIC ANKLE AND ARCH BRACE

(37) To Order Ankle and Arch Brace: Measure around B (at instep) and C (ankle). Use the diagram above as a guide in measuring and consult chart below for your size. Choose size with measurements similar to yours.

Size You Order	Around (B) Instep	Around (C) Ankle
Small	8¾ in.	7⅝ in.
Medium	9¼ in.	8¼ in.
Large	10 in.	9 in.

53 C 6630—Standard. Wt. 3 oz. *State size*.....Each 98c

53 C 6613—Lightweight. Wt. 2 oz. *State size*...Each 1.79

WOMB SUPPORTER

43 UTERINE (WOMB) SUPPORTER. Lightweight strong leather, cloth lined. Heavily cushioned deep front pads. Elastic insert in front helps provide close fit. Side straps for easy adjustment. Standard size 2 7/16-in. diam. pessary has soft, sponge rubber ring around top. Rubber understraps hold pessary in place. May be worn as abdominal support. Front width of belt 5½ in.

How To Order: Stand relaxed—have someone measure you around fullest part of abdomen (see sketch, order information, Page 685). If odd no. of in., order next larger size. *Even Sizes:* 28 to 44 in. State size. Wt. 15 oz.

53 C 6715—Save $1.00—2 for 11.58.....Each 6.29

44 ADJUSTABLE UNDERSTRAPS. For womb supporter (43) or any womb support.

53 C 6725—Ship. wt. 3 oz.....Pair 39c

53 C 6726—Pessary Stem for (43) or any supporter. Ship. wt. 3 oz.....Each 1.98

FOR COMPLETE DETAILS OF WARDS MONTHLY PAYMENT PLAN AND THE ADD-ON PLAN SEE INSIDE BACK COVER.

FULL-FASHIONED NYLON OR COTTON ELASTIC HOSE

38 39 40 FULL LENGTH AND KNEE LENGTH. Full-Fashioned to fit correctly—no wrinkles at ankle or instep. Provide relief from discomforts of varicose veins and swelling of legs during pregnancy. Reinforced at points of greatest strain. Full length hose (38) fastens to garter. Knee length (39), stay securely on leg. Both have closed gored heel and open toe; available in 2 elastic fabrics. Bauer and Black full length hose (40) has closed toe and heel; entire foot made of Helanca stretch nylon. Neutral color of all 3 types makes them inconspicuous under regular hosiery. Easily laundered.

How To Order Elastic Hosiery. Have someone else take your measurement in the morning before the leg has begun to swell. Measure carefully around the fullest part of the calf.
Sizes: Small (8 to 10 in.); Medium (11 to 14 in.); Large (15 to 18 in.).

Compare Prices...Save on Wards Fine Quality Trusses

SURGICALLY CORRECT TRUSSES FOR ALL TYPES OF RUPTURES

COMPARE PRICES and you will find that Wards prices are lower for the same fine quality trusses. All trusses offered at these money saving prices are carefully selected, scientifically designed to provide correct surgical support. Made of the finest quality materials—strong, flexible steel springs, selected calf or kid leather, durable elastic webbing. Properly fitted, trusses will give maximum support, protection and comfort. Since some trusses, Spring Lever, for example, are suitable for specific types of rupture only, consult your physician for type you need.

HOW TO ORDER A TRUSS

Have someone measure you. Stand relaxed in natural position. Place tape measure next to skin abt. 2 in. below top of hip bones. Draw snugly (not tightly) to rupture spot. If measurement is odd number of in. order next larger even size. Don't give waist measurement. SPECIAL SIZES: If your size isn't listed order size you want at price shown. It will be shipped from factory in Phila. Allow one week. No specials (D) (M). No C.O.D.'s on specials.

HOOD STYLE TRUSSES

Hood style (A) (B) (C), generally recommended for large, hard-to-hold hernia.

(A) Plastic Hood Truss. Our finest, longest wearing hood style truss. Supports hernia even during strenuous exercise. Lightweight. With four plastic pads—two in front adjust to fit your need. Single style has dummy pad on unaffected side. Plastic covered springs, soft plastic strap. *Even sizes:* 32 to 42 inches. See "How to Order" at right above. *State size.*
53 C 6868—Right Side. Ship. wt. 12 oz...$10.98
53 C 6869—Left Side. Ship. wt. 12 oz.... 10.98
53 C 6870—Double. Ship. wt. 14 oz..... 11.98

(B) Sponge rubber pad on ruptured side gives comfortable, surgically correct support. Can be worn comfortably during exercise. Corrugated rubber dummy pad on unaffected side equalizes pressure. Leather-covered, padded springs. Corrugated rubber-covered back. Adjustable leather strap for a proper fit. *Even sizes:* 32 to 42 inches. See "How to Order" at right above. *State size wanted.*
53 C 6884—Right Side. Ship. wt. 1 lb. ...$8.98
53 C 6885—Left Side. Ship. wt. 1 lb..... 8.98
53 C 6886—Double. Ship. wt. 1 lb..... 9.98

(C) Soft, durable leather-covered adjustable pad for ruptured side protects you during very strenuous exercise. Dummy pad on the other side guards against double rupture. Padded steel springs covered with sweat-resistant leather for added comfort. *Even sizes:* 32 to 42 inches. See "How to Order" at right above. *State size wanted.*
53 C 6861—Right Side. Ship. wt. 15 oz...$7.98
53 C 6862—Left Side. Ship. wt. 15 oz..... 7.98
53 C 6863—Double. Ship. wt. 1 lb..... 8.49

WARDS ATHLETIC ELASTIC TRUSS

(D) Gives relief during sleep. Construction prevents pinching, binding. Leg straps won't interfere with body functions. Self-fitting, gives maximum retention of hernia, even during exercise. Strong elastic belt, understraps. Center support molded from high quality rubber, lined with fabric that eliminates chafing. Rubber inner pad pivots with body. Truss won't slip. See "How to Order" at right above. *Sizes:* Small (30–32 in.), Med. (34–36 in.), Lg. (38–40 in.), Extra Lg. (42–44 in.). *State size.*
53 C 6811—Single. *State Right Side or Left Side.* Ship. wt. 1 lb. 6 oz.....$8.49
53 C 6812—Double. Ship. wt. 1 lb. 8 oz... 9.49

FRENCH STYLE TRUSSES

French Style Trusses (E) (F) (G), are generally recommended for easy-to-hold hernia.

(E) Pad covered with corrugated rubber prevents slipping. Fits groin and locks at any angle insuring a comfortable fit. Two straps adjust pressure. Pad will not slip. Double-faced all elastic body-band and understrap allow freedom of body movement and hold pad securely in place. *Even sizes:* 32 to 42 inches. See "How to Order" at right, above. *State size wanted.*
53 C 6840—Right Side. Ship. wt. 11 oz....$4.98
53 C 6841—Left Side. Ship. wt. 11 oz..... 4.98
53 C 6842—Double. Ship. wt. 1 lb. 2 oz... 7.98

(F) Large, sturdy pad is firm and comfortable. Pad is soft, semi-flat and leather-covered. Rotates, adjusts to best suit your needs. Long-wearing, hardened, tempered steel spring is covered with durable leather that is both comfortable and long-wearing. *Even sizes:* 32 to 44 inches. See "How to Order" at right, above. *State size wanted.*
53 C 6878—Right Side. Ship. wt. 11 oz....$4.98
53 C 6879—Left Side. Ship. wt. 11 oz..... 4.98
53 C 6880—Double. Ship. wt. 1 lb. 4 oz... 7.98

(G) The durable leather-covered triangular pad fits the body curve, adjusts to most body positions giving maximum comfort and freedom of movement. The leather covered strong steel spring is properly tempered, hardened and padded for comfort. No understraps are needed with this truss. *Even sizes:* 32 to 42 inches. See "How to Order" at right, above. *State size wanted.*
53 C 6864—Right Side. Ship. wt. 10 oz....$3.98
53 C 6865—Left Side. Ship. wt. 10 oz..... 3.98
53 C 6866—Double. Ship. wt. 1 lb. 10 oz.. 7.98

SPRING LEVER TRUSS

(H) Provides surgically correct, very firm positive support to rupture. Spring lever across the wide, solid front adjusts to body movement; comfortably supports lower abdomen and rupture. Kid leather-covered pad on ruptured side. Leather-covered dummy pad on other side equalizes pressure, guards against possibility of double rupture. Four straps adjust pressure properly. Comfortable body band of strong, durable webbing. *Even sizes:* 32 to 42 inches. See "How to Order" at right above. *State size wanted.*
53 C 6837—Right Side. Ship. wt. 13 oz....$5.98
53 C 6838—Left Side. Ship. wt. 13 oz..... 5.98
53 C 6839—Double. Ship. wt. 14 oz..... 6.98

SCROTAL TRUSSES

Scrotal trusses (J) (K) (L), generally recommended for a large, hard-to-hold hernia.

(J) Best Quality Scrotal. The large rubber pad is soft and comfortable. Fits directly over the rupture spot for constant control. Adjustable pad may be set rigid in any position. Oil-tempered, hardened steel spring is padded and covered with sweat resistant leather for added comfort and durability. The soft understrap is made of rubber and is part of the pad itself. *Even sizes:* 32-44 inches. Read "How to Order a Truss," above. *State size wanted.*
53 C 6890—Right Side. Ship. wt. 1 lb.....$7.98
53 C 6891—Left Side. Ship. wt. 1 lb..... 7.98
53 C 6892—Double. Ship. wt. 1 lb. 9 oz...11.98

(K) Spring Style Scrotal. Large, soft leather-covered scrotal pad adjusts to suit your needs. Gives constant, comfortable support. Leather covered spring of tempered, hardened steel, padded and lined. Cloth understrap. *Even sizes:* 32 to 42 inches. Read "How to Order a Truss," above. *State size wanted.*
53 C 6855—Right Side. Ship. wt. 1 lb. 1 oz.$5.98
53 C 6856—Left Side. Ship. wt. 1 lb. 1 oz. 5.98
53 C 6857—Double. Ship. wt. 1 lb. 10 oz.. 8.98

(L) Elastic Scrotal Truss. Large, adjustable scrotal pad is very thin. Covered with soft, fine quality leather. Two straps hold pad firmly and comfortably. Adjust pressure at bottom of pad by tightening lower strap. Strong, double-faced body band of all-elastic webbing. Has pull-up attachment with cloth understrap for a comfortable, perfect fit. *Even sizes:* 32 to 42 inches. Read "How to Order a Truss" above. *State size wanted.*
53 C 6845—Right Side. Ship. wt. 12 oz....$5.98
53 C 6846—Left Side. Ship. wt. 12 oz..... 5.98
53 C 6847—Double. Ship. wt. 1 lb..... 7.98

RUPTURE EASER

(M) This lightweight, comfortable support permits freedom of movement. Strong, form-fitting, washable. Soft, flat groin pad fits easily—no steel or leather bands. May be worn under light clothing. Snaps in front make it easy to put on and take off. Adjustable back lacing and leg straps permits ease in individual fitting. *Even sizes:* 32 to 42 inches. Read "How to Order a Truss," above. *State size wanted.*
53 C 6815—Right Side. Ship. wt. 6 oz.....$3.95
53 C 6816—Left Side. Ship. wt. 6 oz..... 3.95
53 C 6817—Double. Ship. wt. 8 oz..... 4.95

PENMAR OVAL ELASTIC TRUSS

(N) For small hernia. Gives relief during sleep. Washable oval air cushion pad has soft rubber face, hard rubber back, fits groin. Understrap tips pad inward for proper support. All-elastic body-band gives free movement. *Even sizes:* 32 to 42 inches. Read "How to Order," above. *State size wanted.*
53 C 6834—Right Side. Ship. wt. 7 oz.....$4.98
53 C 6835—Left Side. Ship. wt. 7 oz..... 4.98
53 C 6836—Double. Ship. wt. 11 oz..... 5.98

BOSTON STYLE ELASTIC TRUSS

(P) For small hernia. Gives relief during sleep. 2 straps on front adjust soft leather-covered pad to best position for retention of hernia. Reversible—can be worn on either right or left side. Comfortable double-faced webbing type all-elastic body band, understrap. *Even sizes:* 32 to 42 inches. Read "How to Order," above. *State size wanted.*
53 C 6829—Single Reversible for Right or Left Side. Ship. wt. 8 oz.....$3.98
53 C 6830—Double. Ship. wt. 12 oz..... 6.49

CHASE STYLE TRUSS

(R) For easy-to-hold hernia. Comfortable, gives adequate protection. Soft, leather-covered pad is adjustable—attached to spring by special strong ball and socket fixture. Can be rotated and set rigid in most comfortable position. Strong steel spring is covered with soft, sweat resistant leather and padded for comfort. Reversible style—can be worn on either right or left side. *Even sizes:* 32 to 40 inches. See "How to Order" at right above. *State size wanted.*
53 C 6824—Single Reversible. For Right or Left Side. Ship. wt. 12 oz.....$4.98
53 C 6825—Double. Ship. wt. 1 lb. 1 oz.... 7.49

UMBILICAL STYLE TRUSS

(T) For navel ruptures. Soft, washable pad holds rupture comfortably, gives firm, constant support, stays in place. Elastic body band permits free movement, breathing. 2 buckle fasteners make belt easy to put on.

HOW TO ORDER AN UMBILICAL TRUSS. Take snug measurement (underclothes removed) around body at navel. If measurement is odd number of in., order next largest even size.
53 C 6844—Adults truss (shown above). *Sizes 34–46 in.* Ship. wt. 11 oz. *State size*.....$4.98
53 C 6843—Children's Truss (shown Pg. 303). *Sizes 12–24 in.* Ship. wt. 4 oz. *State size*...$1.98

Scientifically Designed Supports at Money-Saving Prices

BUY TWO BELTS AND SAVE

COMPARE PRICES to find that Wards fine quality belts save you money. If you buy 2 belts you save even more. Wear one—wash one and always have a belt ready to wear.

HOW TO ORDER BELTS

SIZED BY ABDOMINAL MEASUREMENT. Have someone else measure you. Do not take waist measurement except for belts (A) (B) (C) (M). Stand relaxed. Have someone else measure around 1 to 2 (fullest part of abdomen). Draw tape snugly (not tightly) with underclothes on or off (as you'll wear belt). If measurement is odd number of inches, order next larger even size. Unless otherwise stated, front depth on all size 36 belts is 8 in.—other sizes in proportion. If your size is not listed with belt, order size needed at price shown. It will be made to order, shipped to you from factory in Philadelphia. Allow Factory 1 week extra time. Special orders can't be sent C.O.D. No special orders on belts (A) (B) (C).

ELASTIC SUPPORT BELTS

Elastic supports (A) (B) (C) brace sagging abdominal muscles, give support for athletics.

(A) Marvelflex Elastic Support. Men's ideal support, made of finest quality two-way stretch, preshrunk, washable elastic. Smooth exterior. Front is reinforced with additional panel for added control. Stays prevent belt from rolling. Detachable fly-front pouch, snap fasteners. Extra pouches below. *Order by Waist Size:* Small (28–32 in.), Med. (34–36 in.), Large (38–40 in.), Extra Large (42–46 in.). Ship. wt. ea. 8 oz. *State size.*

Multiple Vitamins...Many With Minerals

WHAT IS A MULTIPLE VITAMIN PRODUCT? It is a combination of a number of vitamins in a single preparation providing an effective, economical protection against vitamin deficiencies when taken as a supplement to the daily diet.

1 WARDS VITAMIN DIET. One of our most popular products —all-around supplement to family's diet. Two capsules a day (1 light, 1 dark) provide 9 vitamins plus liver, iron.

Vitamins per Light Capsule:
Vitamin A—5000 USP units Vitamin D—1000 USP units
Vitamins per Dark Capsule:
Vitamin B_1—2 milligrams Vitamin C-30 milligrams
Vitamin B_2(G)—2 mgs. Iron—15 milligrams
Vitamin B_6—0.2 milligrams Niacinamide—20 milligrams
Vitamin B_{12}—1 microgram; Calcium Pantothenate—0.27 mg.
Liver Concentrate N.F.—25 mgs.
53 C 3006—150 Capsules (75-Day Supply). Wt. 1 lb...1.49
53 C 3007—2 (150-Cap.) Boxes. Economy Size. Wt. 2 lbs.2.69

2 WARDS HIGH POTENCY MULTIPLE VITAMINS. Formula meeting need for high potency where therapeutic dosage is not indicated. Capsule supplies 3⅛ times need for A; 2½ times that of D, B_2(G); 5 times that of B_1, C.

Vitamins per Capsule:
Vit. A—12,500 USP units Vitamin C—150 milligrams
Vitamin B_1—5 milligrams Vitamin D—1000 USP units
Vitamin B_2(G)—5 milligrams CalciumPantothenate—10mgs.
Vitamin B_6—1 milligram Niacinamide—50 milligrams
Vitamin B_{12}—3 micrograms Folic Acid—0.5 milligram
53 C 3066—100 Capsules. Ship. wt. 10 oz.....4.29
53 C 3067—250 Capsules. Economy Size. Ship. wt. 1 lb. 9.49

3 WARDS A, B_1, D, B_2(G) CAPSULES. An economical way (less than 1c each) to get more than daily need of A, 2½ times D need, full B_1, B_2(G) need in a capsule.

Vitamins per Capsule:
Vitamin A—5000 USP units Vitamin B_2(G)—2 milligrams
Vitamin B_1—1 milligram Vitamin D—1000 USP units
53 C 3034—200 Capsules. Ship. wt. 12 oz.....1.69
53 C 3033—500 Capsules. Economy Size. Wt. 1 lb.....3.89

WHO NEEDS A MULTIPLE VITAMIN PRODUCT? People of average good health, without a marked deficiency of any one vitamin. They help maintain good health, help prevent lowered resistance to disease when caused by a vitamin deficiency.

4 WARDS REGULAR HYBLEX. Excellent all-family dietary supplement for those who want vitamins only.

Vitamins per Capsule:
Vitamin A—5000 USP units Vitamin C—50 milligrams
Vitamin B_1—3 milligrams Vitamin D—1000 USP units
Vitamin B_2(G)—2 milligrams Calcium Pantothenate—3 mgs.
Vitamin B_6—0.2 milligram Niacinamide—20 milligrams
Vitamin B_{12}—1 microgram Vitamin E—8.24 Int. units
53 C 3003—100 Capsules. Ship. wt. 9 oz.....2.29
53 C 3004—250 Capsules. Economy Size.
1 Bottle. Wt. 1 lb.....4.49 2 Bottles. Wt. 2 lbs.....8.49

5 WARDS FORTIFIED HYBLEX. Higher potency in B Complex, C and Niacinamide than Regular Hyblex.

Vitamins per Capsule:
Vitamin A—5000 USP units Vitamin C—75 milligrams
Vitamin B_1—5 milligrams Vitamin D—1000 USP units
Vitamin B_2(G)—10 mgs. Niacinamide—30 milligrams
Vitamin B_6—1 milligram Calcium Pantothenate—3 mgs.
Vitamin B_{12}—1 microgram Vitamin E—8.24 Int. units
53 C 3000—100 Capsules. Ship. wt. 6 oz.....2.98
53 C 3001—250 Capsules. Economy Size.
1 Bottle. Wt. 1 lb.....6.19 2 Bottles. Wt. 2 lbs.....11.49

6 WARDS THERAPEUTIC VITAMINS. Recommended for multiple vitamin deficiencies often found with certain acute and chronic illnesses. Your doctor can tell you whether you need vitamins in such high potencies.

Vitamins per Capsule:
Vitamin A—25,000 USP units Vitamin B_{12}—2 micrograms
Vitamin B_1—10 milligrams Vitamin C—150 milligrams
Vitamin B_2(G)—5 milligrams Vitamin D—1000 USP units.
Niacinamide—150 milligrams
53 C 3025—100 Capsules. Ship. wt. 9 oz.....4.98
53 C 3026—250 Capsules. Economy Size. Wt. 1 lb. 5 oz.10.98

WHO NEEDS MULTIPLE VITAMINS WITH MINERALS? People who want all-around protection against vitamin deficiencies, plus need for mineral increase such as during pregnancy or lactation. Products below have benefits of valuable minerals plus important vitamins at economical prices.

7 WARDS VITAMIN DIET WITH MINERALS. Same vitamin potency per light, dark capsule as (1) at left, plus minerals. Children under 12 take on physician's advice.

Magnesium—1 milligram Manganese—1.25 milligrams
Potassium—7.5 milligrams Zinc—0.75 milligram
53 C 3058—150 Capsules (75-Day Supply). Wt. 1 lb.....1.89
53 C 3059—2 (150 Cap.) Boxes. Economy Size. Wt. 2 lbs.3.39

8 WARDS VITAMIN AND MINERAL CAPSULES. Excellent during pregnancy or lactation when mineral needs increase. 1 capsule supplies daily need of A, B_1, B_2(G), C, D, Iron, Iodine, about ⅓ Calcium need; ¼ that of Phosphorus. Dose during pregnancy: 2 capsules, three times a day.

Vitamins and Minerals per Capsule:
Vitamin A—6000 USP units Niacinamide—25 milligrams
Vitamin B_1—1.5 milligrams Iron—15 milligrams
Vitamin B_2(G)—3 mgs. Folic Acid—1 milligram
Vitamin B_6—0.5 milligram Calcium Pantothenate—2 mgs.
Vitamin B_{12}—1 microgram Calcium—258 milligrams
Vitamin C—45 milligrams Iodine—0.1 milligram
Vitamin D—600 USP units Phosphorus—200 milligram
53 C 3037—100 Capsules. Ship. wt. 8 oz.....2.49
53 C 3018—250 Capsules. Economy Size. Wt. 1 lb. 12 oz.5.59

9 SECURITY MINIATURE VITAMINS AND MINERALS. More than daily adult need of A, B_1, B_2(G), C, D, Iron, Iodine in each capsule. Dosage: 1 to 2 cap. daily.

Vitamins and Minerals per Capsule:
Vitamin A—5000 USP units Folic Acid—0.17 milligram
Vitamin B_1—3 milligrams Iron—13.4 milligrams
Vitamin B_2(G)—2.5 mgs. Manganese—1.5 milligrams
Vitamin B_6—0.5 milligram Copper—1 milligram
Vitamin B_{12}—1 microgram Magnesium—1 milligram
Vitamin B_{12}—1/15 Oral Unit Phosphorus—35 milligrams
Vitamin C—50 milligrams Iodine—0.1 milligram
Vitamin D—500 USP units Cobalt—0.1 milligram
Niacinamide—20 milligrams Zinc—1.4 milligram
Calcium—46 milligrams Potassium—5 milligrams
Calcium Pantothenate—2 milligrams
53 C 3013—100 Capsules. Ship. wt. 10 oz.....3.49
53 C 3002—250 Capsules. Economy Size. Wt. 1 lb. 2 oz.6.98

10 WARDS LIREX WITH VITAMINS, MINERALS. One capsule gives more than full need of essential vitamins plus ⅓ Calcium, ¼ Phosphorus, 1 3/10 Iron needs; full Iodine need.

Vitamins and Minerals per Capsule:
Vitamin A—5000 USP units Magnesium—7.5 milligrams
Vitamin B_1—3 milligrams Molybdenum—0.4 milligram
Vitamin B_2(G)—2.5 mgs. Potassium—5 milligrams
Vitamin B_6—0.75 milligram Vitamin E—3 Int. units
Vitamin B_{12}—1.5micrograms Calcium—215 milligrams

Geriatrics...Minerals...Vitamins A and D, C, E

WHO NEEDS GERIATRIC VITAMINS? Men and women 35 and over who feel older than they are due to a nutritional deficiency. Sometimes, in later life, diets are restricted, exercise is limited, proper foods aren't eaten—vitamin deficiencies may occur. Wards Geriatric Vitamins are designed as a dietary supplement to help combat feeling tired, old.

20 SECURITY BRAND GERIATRIC CAPSULES. Important protection at reasonable cost. Supply 3⅛ times the minimum daily need for A and D, 10 times that of B_1, 2½ times that of B_2(G), 1½ times that of C and Iron, the full daily need of Iodine, ⅓ that of Calcium and ¼ that of Phosphorus. Plus Dried Liver and other valuable vitamins, minerals.

Vit. A—12,500 USP units	Biotin—25 micrograms
Vitamin B_1—10 milligrams	Calcium—83 milligrams
Vitamin B_2(G)—5 milligrams	Calcium Pantothenate—5 mgs.
Vitamin B_6—0.5 milligram	Phosphorus—64 milligrams
Vitamin B_{12}—3 micrograms	Iodine—0.1 milligram
Vitamin C—75 milligrams	Copper—0.5 milligram
Vitamin D—1,250 USP units	Potassium—5 milligrams
Niacinamide—50 milligrams	Zinc—0.5 milligram
Folic Acid—0.75 milligram	Iron—15 milligrams
dl-Methionine—15 mgs.	Manganese—0.5 milligram
Choline Bitartrate—25 mgs.	Cobalt—0.05 milligram
Rutin—5 milligrams	Magnesium—3 milligrams
Betaine—10 milligrams	Vitamin E—2 International units
Inositol—15 milligrams	

Liver Desiccated (Undefatted)—50 milligrams

53 C 3063—100 Capsules. Ship. wt. 10 oz. 5.98
53 C 3057—250 Capsules. Economy Size. Wt. 1 lb. 11.98

SECURITY BRAND VITAMIN E

The minimum daily need for Vitamin E in human nutrition has not been set. Your doctor can tell you whether you have a deficiency in E and what potency you should take.

21 SECURITY BRAND WHEAT GERM OIL CAPSULES (SOLVENT EXTRACTED). Ea. 6-minim Capsule—0.78 International Units of E. A supplement to the daily diet.

53 C 3050—200 Capsules. Ship. Wt. 7 oz. 1.98

22 SECURITY BRAND EXTRA POTENCY VITAMIN E CONCENTRATE. Each capsule contains d-alpha Tocopheryl Acetate (extracted from vegetable oils) equivalent by biological assay to 100 International Units of Vitamin E.

53 C 3038—100 Capsules. Ship. wt. 8 oz. 5.69

23 SECURITY BRAND HIGH POTENCY VITAMIN E CONCENTRATE. Each capsule contains d-alpha Tocopheryl Acetate (extracted from vegetable oils) equivalent by biological assay to 30 International Units of Vitamin E.

53 C 3053—100 Capsules. Ship. wt. 5 oz. 2.29
53 C 3054—250 Capsules. Economy Size. Wt. 1 lb. 4.98

WHO NEEDS MINERAL PRODUCTS? Minerals and vitamins work hand-in-hand—one does not function properly without the other. Mothers-to-be need an increased amount of calcium and phosphorus, not supplied in the average daily diet. Also, during lactation mineral requirements are increased.

24 WARDS MINERAL WAFERS. Two wafers provide daily need for Calcium, Phosphorus, Iron, Iodine. During pregnancy and lactation, 2 wafers provide ½ need of Calcium, Phosphorus, and ⅔ of Iron. Minerals per Wafer:

Calcium—375 milligrams	Magnesium—69 milligrams
Copper—0.9 milligram	Manganese—0.6 milligram
Iodine—0.05 milligram	Phosphorus—375 milligrams
Iron—5 milligrams	Zinc—1.1 milligrams

53 C 3100—200 Mint-flavored Wafers. Ship. wt. 1 lb. ... 1.79

25 WARDS CALCIUM, IRON, VITAMIN CAPSULES. Three capsules daily provide 1½ times need for Vitamins A,D; full need of Calcium, Iron, ¾ need of Phosphorus. During pregnancy and lactation, 6 cap. daily provide 3 times need of A and D, full need of Calcium, ¾ that of Phosphorus.

Minerals and Vitamins per Capsule:

Vit. A—2000 USP units	Vitamin D—200 USP units
Iron—3.5 milligrams	Phosphorus—194 milligrams

Calcium—250 milligrams

53 C 3042—250 Capsules. Ship. wt. 10 oz. 2.98

26 WARDS DICALCIUM PHOSPHATE WITH VISOTEROL. 4 cap. daily provide 3 times daily D need, ½ that of Calcium, ⅓ Phosphorus need. During pregnancy and lactation 4 daily provide ¼ Calcium need, ⅙ Phosphorus need. Per Capsule:

Dicalcium Phosphate—5 grains Vit. D—333 USP units
Calcium Gluconate—162 milligrams

53 C 3102—200 Capsules. Ship. wt. 8 oz. 1.29

27 SECURITY BRAND LECITHIN GRANULES. A dietary source of phosphorus, Choline and Inositol. One tablespoonful daily provides 225 mgs. of Phosphorus (30% of the minimum adult daily requirement), and 250 mgs. each of Choline and Inositol. Palatable granular solid, mix with any regular food.

53 C 3069—8-oz. Bottle. Ship. wt. 1 lb. 6 oz. 2.49

VITAMIN C

The minimum daily adult need of Vitamin C is 30 milligrams. Laboratory-made Vitamin C (Ascorbic Acid) is equally effective as the natural form found in foods.

28 WARDS ASCORBIC ACID (VITAMIN C) TABLETS USP. Your doctor can tell if you need high potencies listed.

53 C 3019—200 (30-milligram ea.) Tablets. Wt. 12 oz. ... 89c
53 C 3020—100 (100 milligram ea.) Tablets.
1 Bottle. Wt. 9 oz. ..... 1.29 2 Bottles. Wt. 1 lb. 2 oz. .. 2.29
53 C 3021—100 (250-milligram ea.) Tablets. Wt. 9 oz. .. 1.98
53 C 3032—250 (250-milligram ea.) Tablets. Wt. 14 oz. .. 3.98

WHO NEEDS VITAMIN A AND D PRODUCTS? Infants and children need A and D to aid development, build energy, and to act as a diet supplement. Vitamins A and D are usually prepared in combination because a deficiency in one is frequently accompanied by a deficiency of the other.

29 WARDS COD LIVER OIL. Super-rich—2⅓ times vitamin content of ordinary USP Cod Liver Oil. ¼ teaspoon daily provides infants with A need, ¼ the D need; ½ teaspoon gives those from 1 to 11 the full need of A, ¾ need for D.

Vitamins per Gram:
Vitamin A—2000 USP units Vitamin D—200 USP units

53 C 3108—Pint Bottle. Ship. wt. 2 lbs. 10 oz. 93c
53 C 3109—Quart Bottles. Ship. wt. 5 lbs. 1.69

WARDS COD LIVER OIL CAPSULES WITH VISOTEROL. (not shown). Tasteless way of taking cod liver oil. 2 capsules daily supply 1¼ times minimum daily need of A and D.

Vitamins per Capsule:
Vitamin A—2500 USP units Vitamin D—250 USP units

53 C 3101—200 Capsules. Ship. wt. 1 lb. 8 oz. 2.19

30 WARDS HALIBUT LIVER OIL WITH VIOSTEROL CAPSULES. One capsule daily suggested for children over 6 and adults. Supplies 1¼ times daily need of A, over 4 times for D. For children under 6, consult doctor for proper dosage.

Vitamins per Capsule:
Vitamin A—5000 USP units Vitamin D—1700 USP units

53 C 3043—250 Capsules. Ship. wt. 1 lb. 2 oz. 1.59
53 C 3044—500 Capsules. Economy. Size. Wt. 1 lb. 6 oz. 2.98

31 WARDS VITAMIN A AND D CAPSULES. One daily supplies 1¼ times minimum need of A; 2½ times that of D. Consult physician for dosage for those under 6.

Vitamins per Capsule:
Vitamin A—5000 USP units Vitamin D—1000 USP units

53 C 3035—100 Capsules. Ship. wt. 10 oz. 69c
53 C 3036—250 Capsules. Economy Size.
1 Bottle. Wt. 1 lb. 2 oz. 1.49 2 Btles. Wt. 2 lbs. 4 oz. .. 2.68

32 WARDS HIGH POTENCY VITAMIN A CAPSULES. Extremely high potency (synthetic A) for those who have a marked deficiency. Take only on your doctor's advice.

25,000 USP Units Vitamin A Per Capsule
53 C 3039—100 Capsules. Ship. wt. 10 oz. 1.59
53 C 3022—250 Capsules. Economy Size. Wt. 13 oz. .. 3.49

50,000 USP Units Vitamin A Per Capsule
53 C 3048—100 Capsules. Ship. wt. 10 oz. 2.59
53 C 3046—250 Capsules. Economy Size. Wt. 13 oz. .. 5.79

33 SECURITY IODINE RATION TABLETS. A dietary aid prepared from Kelp. Each tablet contains 0.1 milligram of Iodine, the minimum daily requirement for children and adults. Dosage: 3 tablets daily or as directed by physician.

53 C 3068—500 Tablets. Ship. wt. 9 oz. 1.59

VITAMINS FOR INFANTS, CHILDREN

Insulated Steel Floor Safes...UL Approved

"HERCULES" FLOOR SAFES 58.95 TO 259.00

MEILINK "HERCULES" STEEL FLOOR SAFES. Ideal for home and office. Built and tested to conform with heat specifications of the U.S. Government and Safe Manufacturers' National Assn. Will withstand heat up to 1700°F. for one hour with ample margin of safety to contents. Special features are:

THERMO-CEL INSULATION is solid cast and reinforced by "U" channels. Has greater resistance to heat, preserves metal.

INTERLOCKING TONGUE AND GROOVE DOOR JOINTS insure snug fit and prevent entrance of heat during fire.

DROP-FORGED STEEL HINGES are welded to angle frames and door plates permitting ease of operation.

DRILL-RESISTANT STEEL PLATES reinforce door for greater strength and protection against forced entry.

COMPOUND ACTION BOLT MOVEMENT for ease in operation of locking bolts. Built into locking mechanism to prevent safe from being forced open even if hinges are knocked off.

Sturdily constructed with electrically welded double steel walls. Durable wrinkle baked-on enamel finish.

Floor Safes below shipped from Factory in Toledo, Ohio. You pay shipping charges from there. Shipped by Freight, Truck or Express. Allow Factory 2 weeks extra for handling.

(A) MEILINK "HERCULES" FLOOR SAFES carry the Underwriters' Laboratory Approved one-hour label, relocking device label and "T-20" label. "T-20" label states safes resisted laboratory attempts of forced entry—qualifies for 20% reduction of burglary insurance by majority of insurance companies. Bank-type changeable combination lock protected by relocking device (tampering with lock makes locking mechanism inoperative)—qualifies for additional 10% insurance reduction. Doors can be closed even when combination is unlocked. Streamlined steel skirt covers wheels and base of safe. Inside cabinet: one locker with keys, one drawer with handle and two compartments.

53 C 2636 F—Size outside 30⅞x25½x22⅞ in. deep. Inside 20x18½x15 in. deep. Ship. wt. 485 lbs. $165.00

Easy-to-Play Phonographs for Children, Adults

PHONOGRAPHS ON THIS PAGE have good true tone, are easily operated and priced to enjoy record playing at reasonable cost. Play 78-rpm records, manual record change—easy and fun for children to change after each play. Constant speed motors for 110–120 volts, AC. UL Approved. Phonographs (4) to (13) are sold alone or in a special combination with the ten 6-in. children's records in Record Pack (1).

CHILDREN'S RECORD PACK

(1) Ten colorful, 6-in. vinylite records of well-known nursery rhyme tunes and other favorites of children. Record pack may be purchased alone or in our combination offer with any of the phonographs, (4) to (13), listed at right, at a special saving. Selections include: Cinderella; London Bridge; Lucy Locket; Pat A Cake; Alouette; Jack and The Beanstalk; Peter Pan; Trip to the Zoo; Peter and the Wolf; Rain Rain Go Away; Old Women; Jack Horner; Three Blind Mice; Ding Dong Bell; Alice In Wonderland. These vinylite records are unbreakable in normal usage. Ship. wt. 1 lb.

53 C 9162—Ten 6-in. 78-rpm records.... $2.29

MICKEY MOUSE CLUB PORTABLE

(2) PORTABLE PHONOGRAPH WITH RECORD of the Mickey Mouse Club March and Song. Inspired by Television's popular "Mickey Mouse Club" Show, the authentic Mickey Mouse Club insignia decorates the red and white striped lid. Solid blue base, washable covering. Electric acoustic phonograph, sturdily built for rugged handling by children, heavy duty motor for 110–120 V, AC-DC. UL Approved. Plays 78-rpm records, manual record change. Special mechanical adjustment on reproducer head, the Vanitone control, to vary volume. Mechanically amplified—no tubes. Volume and tone may also be varied by the use of soft, medium or loud needles. On-off switch, rubber-covered cord with plug. Package of needles included. Size about 12½x10½x6 in. *Mailable.*

53 C 8068 L—Phonograph with 6-in. 78-rpm vinylite record. Ship. wt. 7 lbs..... $9.98

SPRING WOUND PORTABLE

(3) DE LUXE ACOUSTIC SPRING WOUND PORTABLE PHONOGRAPH with heavy-duty, wind-up spring motor and speed regulator. Plays 78-rpm records, manual record change. Mechanically amplified—no tubes. Volume and tone may be controlled by the use of soft, medium or loud needles. Durable wood case with artificial leather covering, 14⅝x11¾x6⅞ in. Start-stop switch. Package of needles included. *Mailable.*

53 C 8138 L—Ship. wt. 12 lbs..... $14.98

DE LUXE ELECTRIC ACOUSTIC PORTABLE PHONOGRAPH (not shown). Like Phonograph (3) above except electrically operated instead of spring wound motor. For 110–120 volts, AC. UL Approved. On-Off switch, rubber-covered cord with plug. Package of needles included. *Mailable.*

53 C 8139 L—Ship. wt. 12 lbs..... $14.98

ELECTRIC ACOUSTIC PHONOGRAPHS SOLD ALONE OR WITH CHILDREN'S RECORD PACK

53 C 9913—Ship. wt. 2 oz. $1.69

CARTRIDGE TYPE NEEDLES ... DIAMOND, SAPPHIRE OR OSMIUM TIPS

CARTRIDGE TYPE NEEDLES (not shown). Just send us the information listed at right, we will supply you with the correct needle for your phonograph, single or double tip, and instructions for inserting. If your phonograph has a flip-type cartridge (2 needle heads) you need a double tip. *Exception:* Zenith phonographs require replacement of complete cartridge—see listing.

THERE ARE THREE QUALITIES OF NEEDLE TIPS: Osmium, precious metal; Sapphire, precious jewel; and Diamond, precious stone. The Diamond tip is longest wearing and least harmful to fine records.

BE SURE TO STATE: the cartridge number on the tone arm of your machine, plus the name of the cartridge and the name of your phonograph. Shipped promptly from Factory near Trenton, N.J. *Postpaid.*

53 CP 9917 K—Single, Osmium tip needle..... $1.29

Francini Accordions by Foremost Italian Maker

Buy a Francini at Wards at a real money-saving price. Some dealers sell the same Accordions, under a different name, with different grill designs, and ask as much as $35 to $230 more. Francinis are made in Italy by the world's largest accordion manufacturer. They have the tone of fine Italian instruments as well as the mechanical perfection so desirable to American players. Beautifully designed, lightweight, made from finest quality seasoned plywoods covered with gleaming plastic, permanently secured. All aluminum treble keyboard; aluminum rods run length of keys to prevent warping. Bass mechanism is most efficient, noiseless ever developed. Reeds are finest Swedish steel, scientifically tempered to stay in tune; hand-finished, hand-tuned; reed blocks laminated, treated to prevent warping. Treble valves on (A) (F) are plastic instead of wood—lightweight, warp-proof. Switch slides, mounted between duraluminum plates, will not bind or stick. Positive switch mechanisms provide feather-light action. Metal bellows straps; padded leather shoulder straps; artificial leather-covered, plush-lined luggage type carrying cases, except flannel-lined case for (G). With Lesson Book. (A)-(F) have over three octaves, play in any key; (G) has two octaves, plays in four keys.

(A) 19-SWITCH ARTIST MODEL PROFESSIONAL ACCORDION OUTFIT. Our finest. With built-in Microphone. Some dealers ask as much as $550.00, without a Microphone. 41 treble keys, 120 bass. 19 switches: 13 treble (piccolo, oboe, violin, organ, tenor sax, clarinet, master, bassoon, celeste, bandoneon, flute, accordion, trombone); 6 bass switches. 4 sets treble reeds including piccolo, 5 sets bass reeds. Beautiful black plastic finish. Permanently installed Microphone brings out every note from deepest bass to highest treble, sounds like an electric organ, makes playing easier. Two tone controls (for brilliance, depth), 1 volume control. Actual wt. 23 lbs. 19¼x16¼x7¼ in. For Amplifiers see 53 C 8438R or 53 C 8437R, Page 711. Express.

53 C 8783 R–Ship. wt. 43 lbs. $35 Down, or Cash 349.50

TROMBONES, TRUMPETS, CORNETS

THREE QUALITIES . . . ALL AT SUBSTANTIAL SAVINGS

ARTIST QUALITY "Grenadier" Brass Instruments (shown right), are made for Wards by the Ohio Band Instrument Co. of Cleveland, O. They will satisfy the exacting student who wants an instrument moderately priced but high in playing qualities. They have been electronically checked as well as thoroughly tested by competent professional musicians. Sturdily built of highest quality materials, noted for accurate intonation, excellent clear tone, perfect balance.

PROFESSIONAL QUALITY BRASSES are made by a manufacturer of high grade Band Instruments, designed for the musician who requires a more moderate price than Artist Quality but who demands clear tone, rapid action, perfect intonation.

STUDENT QUALITY Brass Instruments, made in France, are designed particularly for young school musicians. Not so finely made as our Artist and Professional Quality, yet they have good clear tone, are built in tune, will adequately meet the needs of those who want moderate price in a good instrument.

WARDS FREE 1956 PHOTOGRAPHIC BOOK

It's easy to catch up on all the latest developments in photography when you have a Ward Camera Book . . . Reserve your copy of the new 1956 Ward Camera Book—104-page catalog containing selected cameras, accessories, photographic equipment (some available only at Wards) and information digest . . . It'll be ready about April 1st.

"Popular" is the word for the Ward Camera Book and no wonder—see all the advantages it offers you.

CENTRALIZED SHOPPING GUIDE. No more searching for a place to get that new "hard to find item"—Wards carry one of the most complete lines of quality, precision-made photographic equipment; including versatile 35mm cameras, reliable press cameras, fine focusing reflex cameras, latest 8 and 16mm silent and sound movie equipment, useful accessories, optically correct movie and slide projectors and quality darkroom equipment. Wards also has selected Binoculars and Telescopes.

PERSONAL SHOPPING SERVICE. Is there a special photo item you can't find? If you need any piece of hard to locate photo equipment write Bob Adams in care of Wards—he'll be glad to give you the help you want and do your personal shopping.

DIGEST OF PHOTOGRAPHIC INFORMATION. The 1956 Camera Book is loaded with helpful tested advice to both the novice and the advanced amateur—how to edit your movies, effect of different types of filters, the advantages of different types of cameras, how to set up portrait lighting, how to develop your own films . . . and many, many more. If the solution to your particular problem isn't found in the Camera Book just write to Bob Adams in care of Wards, he'll be glad to help you.

NO CREDIT CHARGE ON MANY ITEMS. Much of the photo equipment is available on low down payments and convenient monthly payments without any charge for credit. On other items there is a slight charge which is more than made up for by the convenience of being able to use the equipment while you pay for it and by the add-on privilege—after you buy a camera, for example, you can get a flash unit or similar item and spread the additional cost over the remaining payments at little increase.

TRADE IN YOUR OLD CAMERA. Your old camera may be worth more than you think. When you've selected the new camera you want write Bob Adams—he'll give you fair value for your old camera on a new one, which usually more than covers the down payment.

WARDS OWN BRAND of cameras are made in Germany and Japan by the same skilled craftsmen that make the worlds finest cameras. Wards own cameras have the selected, most used features of the higher priced cameras but sell at a low, popular price—and their performance is comparable to that of cameras selling for two to three times as much. Rigidly tested both abroad and in Wards own laboratory, their quality is steadily maintained. All these features, plus Wards guarantee of complete satisfaction, make Wards own cameras one of todays best buys—see them in the 1956 Ward Camera Book.

It's a real education in photography—this 104-page 1956 Ward Camera Book. It will help you select equipment that will best serve your needs.

Be sure to get your copy . . . mail the coupon, below, TODAY.

REFLEX CAMERA

Imported from Japan this precision-made reflex camera is quality controlled by tests of Japanese Camera Institute and Wards own laboratory. Your money back if not equal to reflex cameras costing $60 to $70. You'll like its "big camera" feel and solid construction. The pictures you take will show you why we think the Wardflex is so outstanding a camera. See the picture in the ground glass before you take it—full size eliminates focusing errors.

Lens is 80mm coated f/3.5 anastigmat, stops to f/22, focuses from 3½ ft. to inf. Shutter speeds from 1 to 1/200 plus bulb uses flash (34) with "PC" fitting. Self erecting hood has built-in magnifier for accurate focusing—sport type viewfinder. Focusing knob has depth of field scale. All metal body with black leather-like covering, chromed trim. 12 pictures 2¼x2¼ in. on roll of 120 film.
67 C 245 L—Camera, case, flash. Wt. 3 lbs. . . $37.50
67 C 224 L—Camera with case. Wt. 2 lbs. 8 oz. 32.95

BUILDING MATERIALS. Wards Best Quality, rot-resistant, water-repellent, canvas covers serve many purposes—ideal for protecting all your building material from the effects of wet weather.

FARM MACHINERY. Protect your tractor and other expensive farm machinery with Wards covers. Keep them operating longer. All Ward covers have rust-resistant grommets for longer service.

TRUCKS, TRAILERS. Protect your valuable truck and trailer cargoes with Wards rot-resistant, water-repellent covers. Wards Laboratory tests prove these covers last 5 times longer.

CROP PROTECTION. Use Wards covers to provide extra temporary storage protection for hay, corn, and other perishable crops. All covers have reinforced patches for anchoring grommets.

Canvas By-the-Yard

IMPORTANT FACTS ABOUT WARDS CANVAS COVERS, MATERIALS

Wards Best Quality 18-oz. rot-resistant canvas covers are your best buy for continuous service on trucks, trailers, etc. Wards Best Quality rot-resistant 14.90-oz. and 12-oz. covers are used for covering machinery, materials, grains, etc. Wards Better and Good Quality Standard covers are fine for general use where low cost protection is desired.

The heavier canvas covers at right and heavier canvas material below are made from heavier threads and therefore have greater tensile strength. They also absorb more of the wax water-repellent and rot-resistant treatment to give you more protection and longer service.

CANVAS MATERIALS BY THE YARD—UNTREATED AND TREATED

(A) UNTREATED SINGLE FILLING DUCK. Not water-repellent treated. Practical for grain bags, cotton pick sacks, irrigation, sails, drop-cloths, and utility job covers. Natural color. *State length wanted.*

Cat. No.	Wt. per sq. yd.	Width	Ship. wt. per yd.	Price per yd.

NOTICE ABOUT CANVAS COVER AND MATERIAL SIZES

All canvas, whether treated or untreated, will shrink in use up to 1 inch per foot in both length and width due to climatic changes. When ordering canvas covers or canvas material, allow for this shrinkage. Canvas covers are sold by cut sizes. Finished sizes are slightly smaller due to seams, hems and tensions applied during the manufacturing process. Some color may rub off but this will not affect their service life.

SHIPPING NOTICE: Items keyed "M" are mailed from Stock. Items keyed "K" are mailed promptly from Factory. Items keyed "F" are shipped promptly from Factory by Freight, Express or Truck. Check with your local express or freight agent for delivery time required—allow this extra time in transit. You pay transportation costs from Mail Order House.

(C) WARDS CANVASEAL. Treats canvas, hunting clothing etc. for water-repellency. Non-oily, won't rub off. Clear color. Ready-mixed, apply with brush. Gallon covers about 100 square feet.

Rot-resistant Canvas Covers

6 REASONS WHY WARDS BEST QUALITY CANVAS COVERS ARE YOUR BEST BUY

(G) WATER-REPELLENT—treated with finest wax available under firm pressure to penetrate the closely woven fiber. ROT-RESISTANT—resist mold, mildew and fungus rot. Treated covers last 5 times longer than untreated covers. TESTED AND APPROVED—under U.S. Gov. Spec. No. CCC-T-191b. Strong single filling duck from American grown cotton. DOUBLE-STITCHED SEAMS—covers sewn with rot-resistant treated thread. Raw edges are turned and lockstitched. GROMMETS SET IN LEATHER PATCHES—2 rust-resistant grommets in each corner; single grommets around all edges. EACH COVER STAMPED FOR YOUR PROTECTION—with minimum finished size and weight of material before treatment.

BEST QUALITY MEDIUM-WEIGHT ROT-RESISTANT, WATER-REPELLENT CANVAS COVERS. 12-oz. per sq. yd. before treatment. For many farm, home and camping uses. Grommets 4 ft. apart along edges. Brown color. 10% Dn.

STANDARD CANVAS COVERS

(H) GOOD AND BETTER QUALITY CANVAS COVERS. Choice of 10-oz. or 12-oz. materials. Moderately priced and ideal for general use where low cost protection is desired. Covers are water-repellent treated but not rot-resistant treated. All raw edges are turned and lockstitched, and all seams are securely double stitched for longer service. Rust-resistant grommets are set in canvas reinforcing patches, spaced about 5 feet apart along edges. Single grommets are set in each corner. Corners are cut square and turned back to give added reinforcement for longer wear.

60 C 9730 M—GOOD COVERS. 10-oz. per sq. yd. before treatment.
60 C 9729 M—BETTER COVERS. 12-oz. per sq. yd. before treatment.

WARDS MADE-TO-MEASURE FLAT CANVAS COVERS FOR SPECIAL USES

Made up in any size you need—suitable for many purposes where special size covers are needed. "How to Order": (1) Multiply width in ft. by length in ft. for total area in sq. ft. (2) Multiply cost per sq. ft. by number of sq. ft. in cover to find the price. (3) To find ship. wt.: multiply total sq. ft. by ship. wt. per square foot. Covers are shipped in about two weeks from Philadelphia Factory. Allow transit time.

Read "Size Notice" at left before ordering, make adequate allowance for shrinkage. *State width and length wanted.*

Rawlings Pro-Endorsed Gloves, Mitts for Every Baseball

ONLY AMERICA'S FINEST GLOVES HAVE THESE FEATURES

A

B

The majority of Wards gloves and mitts are made by Rawlings, recognized as the No. 1 manufacturer of Major League equipment. Top quality gloves have Rawlings "Patented Features" for individual fit and sure, fast ball handling. Check construction features listed below.

A "SNUGGER WRIST ADJUSTMENT." A patented Rawlings feature on gloves 1, 2, 3 and 17.

GIVES PERFECT FIT, adjusts to fit any size hand—from Little Leaguers to Major Leaguers.

"V" ANCHORED WEB adds trap strength, support to thumb and fingers—gives natural hugging action.

B "STREAMLINED BACK" FEATURE. Full welted backs on gloves 1, 2, 3, 4, 5, 6, 17, 18, 19 conform to curve of hand giving better "feel."—holds shape for longer glove life.

FACTS ABOUT GLOVE CONSTRUCTION

LEATHER—Wards gloves are Top Grain cowhide in good, better, best qualities.

PADDING—3 grades . . Jute in low priced, Sewn Felt in medium priced and Asbestos Felt in higher priced models.

LINING—Half sheepskin lined in low priced, full sheepskin in medium and full cowhide lining in higher priced models.

BINDINGS—flat or rolled imitation leather in low, medium priced. Long wearing rolled leather bindings in best models.

LEATHER LACED POCKET holds natural deep ball-hugging shape for life of glove.

HOW TO ORDER SHOES

GAME SHOES: If you wear C, D or E width street shoe, order game shoes ½ size larger to allow room for heavy socks. If you wear A or B width street shoe, order regular shoe size. Track shoes may feel small but for best performance they must be snug fitting.

MEN'S BOWLING SHOES: Order street shoe size through D width, except sizes 11, 11½ or 12—order ½ size larger. Order ½ size larger for E, full size larger for EE or wider.

WOMEN'S BOWLING SHOES: Order regular street shoe size if B or C width. If A or narrower, order ½ size smaller.

Chicago, Cleveland Rink Favorites . . . Sidewalk Skates

Plastic Wheels

CHICAGO RINK SKATES WITH PLASTIC OR MAPLE WHEELS

PLASTIC WHEELS on (A) and (B). HAVE THESE ADVANTAGES.
(1) QUIET ROLLING—Reduce skating noise up to 50%.
(2) GRIP THE FLOOR—Reduce side-slip and give better traction.
(3) LONG EVEN-WEARING—outlast wood wheels 4 times.

(A) CHICAGO PRECISION-TYPE RINK SKATES. Choice of Jumbo size Maple or amazing new "Duryte" plastic wheels. Each wheel rolls on 2 semi-precision retained bearing and cone units. Rubber cushioned, plated trucks have adj. 10° rocker action plus pivot ball and socket for max. flexibility. Chromed aluminum footplate reduces weight. Top grain leather Hyde shoe has lock-stitched double sole, sponge rubber padded leather innersole, 2-pc. tongue. Includes booklet, wrench. Mailed promptly from Chicago Factory. Allow transit time.

WOMEN'S RINK SKATES. White, closed toe lined shoes. Half sizes 3 to 10 and 11.

America's Leading Professionals Endorse These

WILSON SAM SNEAD "DYNAMIC SWING" CLUBS

1 2 Incorporate Wilson's well-known stroke-saving features built right into these popular Professional Quality clubs. Designed by Sam Snead—golf's all-time leading money winner, made by Wilson, nationally known manufacturer. Built on "Swing-Weight" principle, each club scientifically related in head weight, loft, lie and length to provide more power, greater distance—for lower scores. Matched and registered in sets. Finest quality dark red calfskin, edge-fold perforated grip has Wilson "Reminder" feature (See (A))—positions your left hand and keeps it there. True Temper "Rocket" chrome plated step down shafts are designed to put more snap in club head speed at impact—give more head "feel" for greater accuracy and a longer ball. For right-hand players.

(1) SAM SNEAD "DYNAMIC SWING" WOODS. Rich walnut finished, laminated "Strata-Bloc" heads. Deep natural face has white-line scoring, black and red keystone fiber insert. 1-pc. streamlined sole plate. Black plastic collar, red trim. Driver 43 in. long.

60 C 4341M—Men's Set—3 Woods: No. 1 Driver, No. 2 Brassie, No. 3 Spoon. Ship. wt. 6 lbs. *Mailable*. $5 Down on Terms. Cash 46.50

HOW TO ORDER TIRES, SPOKES, WHEEL PARTS.

TIRES: Check the size marking on your old tire, or measure the outside diameter of the rim. Order measurement in inches. Table shows rim and tire sizes.

WHEELS AND RIMS: Measure diameter between outside edges of old wheel. Order same diameter. State: sprocket teeth 1/2 or 1-in. pitch.

SPOKES: Measure old spoke, order in inches.

PITCH: Diagram at right shows brake sprocket and measurement. The upper illustration shows 1-in. pitch, and a rear wheel sprocket of this type has 7 to 12 teeth. A 1/2-in. pitch sprocket (lower sketch) has 16 to 20 teeth. When ordering rear wheel state 1/2 or 1-in. pitch.

RUST RESISTING SPOKES. Sparkling chrome plated steel spokes with detachable nipples. Spoke wrench included. Sold in lots of 3 doz. Ship. wt. 1 lb. 8 oz.....3 doz. 69c

English Lightweight and American-Made Bikes

IMPORTED HERCULES AND HAWTHORNE BIKES IN 40 DIFFERENT MODELS

HERCULES "TOURIST" SPORTS DESIGN LIGHTWEIGHTS IN DE LUXE, EQUIPPED, AND STANDARD MODELS

EXCLUSIVE "TOURIST" FEATURES

HERCULES LIGHTWEIGHT BIKES are the leading favorites of American cyclists today. Imported from England, authentic Hercules "Tourist" bikes are sold exclusively by Wards.

HER-CU-MATIC 3-SPEED HUB lets you shift gears like a car (see right).

CALIPER RIM BRAKES with controls right at your fingertips. Independent front and rear brakes.

STURDY SPORTS TYPE FRAME of narrow gauge lightweight steel—double steel tubing at all stress points.

FLEXIBLE COIL SPRING saddle seat.

FULL LENGTH chain guard.

SIDE KICKSTANDS on all models.

LESS ROAD FRICTION with high-pressure Dunlop tires. Butyl tubes are equipped with American valves.

MINIMUM LEG REACH: Adult sizes 31 in.; Junior sizes 24 in. Girls corresponding models are 1 inch less.

WARDS BICYCLE GUARANTEE

All bicycles sold by Wards are fully guaranteed. Any parts which might fail due to defective materials or workmanship under normal care and usage will be replaced by Montgomery Ward & Company.

(A) DE LUXE 3-SPEED HERCULES "TOURIST". This full size 26-in. English DeLuxe lightweight bike is one of the finest available—and sold exclusively by Wards. Its richly designed sports frame and complete quality equipment offer you full cycling pleasure at its best. In addition to all of the "Tourist" features at left, this authentic imported bike comes complete with these DeLuxe extras:

MILLER GENERATOR SET. Heavily chrome plated headlamp, taillight and generator. No batteries needed. New Hi-lo beam lamp provides extra-bright beam or normal light.

OVERSIZED "TOURIST" BAG. Holds tools (wrench and oil can included). Plenty of room too, for carrying books and school supplies.

TIRE PUMP. Chrome plated, clamp-on type.

"HIGH LUSTER" CHROME plated chain guard, fenders—reflector mounted on rear fender.

WHITE WALL TIRES. 3-piece crank hanger.

MEN'S 3-SPEED "DELUXE TOURIST". Finished in Black enamel with Cream trim edged in gold color. Black saddle, rubber grips and "Tourist" bag. Tire size: 26x1⅜ in. Act. wt. 42 lbs. $6.00 Down on Convenient Terms.

HERCULES 3-SPEED HUB

Now you can shift gears with your fingertips—makes pedaling easier, cuts down waste motion. All Hercules Bikes on this page are equipped with Hercules 3-Speed Hub and Gearshift. Her-cu-matic handlebar switch lets you select proper gear for easier riding—low gear for climbing hills, normal gear for flat surfaces, and high gear for fast level runs or fast down-hill speed.

AMERICAN-MADE LIGHTWEIGHT, MIDDLEWEIGHT AND STANDARD BIKES IN 3 SIZES

BENDIX 2-SPEED POWER BRAKE

Gives you a choice of 2 gear ratios—low or high—coupled with power braking. Low gear makes hill climbing ⅓ easier, high gear for quick getaway, easier pedaling. Handlebar control lets you shift gears at any time without damage. 2-speed hub, non-stretch steel cable—completely installed. Internal expanding automotive-type brake, in low gear gives 32% increase in braking power from normal pedal pressure. Brake is applied by back pedaling with feet, like regular bikes.

HOW TO ORDER BIKE WITH BENDIX BRAKE. Bendix 2-speed power brake is now optional on any 26 or 24-in. Hawthorne bike completely installed in factory. Order the bike listed. Write "with Bendix 2-speed power brake" after name of bike. Add $7.95 to the regular price of the bike you are ordering. All bikes equipped with Bendix brake are shipped from Factory near South Bend, Ind. or Utica, N.Y., whichever is nearer. You pay charges only from nearest house. Allow 1 week extra time plus time in transit.

IMPORTANT SHIPPING NOTICE

All bikes on this page, except American bikes equipped with Bendix 2-speed power brake, are shipped promptly from Stock by Freight, Truck, or Express. Pay shipping charges from nearest house. *State transportation desired.*

AUTO-TYPE SPRING RIDE

COIL SPRING FORK on deluxe equipped tank bike (G) absorbs road shocks and smoothes the bumps on roughest roads. Double action spring is built like the coil spring action on modern automobiles. Enjoy cushioned comfort and a floating ride regardless of road conditions.

(D) SINGLE-SPEED LIGHTWEIGHT. Rugged American-made construction with the extra safety of the New Departure brake.

Modern Sports Type Frame of narrow gauge steel tubing. English type spring saddle. Narrow section fenders. Chain guard, kickstand. Optional Bendix power brake on 24- and 26-in. bikes. (See details at left.)

1956 Sea Kings...New Power, Convenience, Beauty

CONVENIENT PUSH BUTTON starts motor like your auto. Now you can enjoy electric-starting with the all-new powerful 25 and versatile 12 H.P. Sea Kings. You'll command instant performance from any desired operating position because the 25, 12, and 5 H.P. models are engineered for use with remote gearshift-throttle control, steering wheel and fuel system.

QUIET: New Aircraft Motor Cushion Mounts, at left, are built into all Sea Kings (except 5 HP) to stop "boat shake" and sounding board noise. Other silencing features include Quiet-Bevel Gears and Underwater Exhausts on all Sea Kings, plus Sealed-in Power-Heads and Carburetor Air Intake Silencers on all Sea King motors except the 3 HP model.

Wards proudly present 6 exciting, new Sea King Motors for 1956. Each has classic new contour styling with popular 2-tone color beauty; each gives a powerful, spirited performance with Sea King's long-established dependability. Every convenient and safety feature you've ever wanted, including lightning acceleration, quiet, dependable performance, and economy of operation, all backed by Wards Guarantee, have been built into these rugged Sea Kings. Choose a popular Sea King for greater motor pleasure on any size outboard hull—from a small fishing boat to a family cruiser.

Sea Kings bring you boating's most advanced features with guaranteed performance. Electric Starting on 12, 25-HP models—all have Automatic Rewind, pull cord starter. Synchronized Twist-Grip Throttle and Spark Control on all models except the 3 HP. Automotive-type Carburetor for instant get-away. Automatic Lubrication System. Co-pilot Pivot Bearing. Transom Adjustment Lever. Underwater units Corrosion Proofed. Horsepower Certified by Outboard Boating Club. Finished in Sea King Blue and Foam White baked-on enamel. Owners' Guide, Parts List. *State: Freight, Truck or Express Shipment.*

DE LUXE SEA KING "25" GEARSHIFT TWIN 459.00

(A) INTRODUCING THE POWERFUL NEW 25 HP SEA KING in both Electric Starting (shown on Back Cover) and Automatic Rewind Models. You'll command more thrilling driving power, easier operating and safety features with this brand new "Sonic-Quiet" Sea King "25" than ever before. Rich new contoured styling is accented by its sparkling 2-tone finish. Here's flashing speeds up to 30 MPH, yet motor throttles smoothly down to a slow 2 MPH for trolling. Ideal for hydroplaning, water-skiing and cruising fun on larger boats.

FULL GEARSHIFT ACTION—Neutral, Forward and Reverse, is designed for optional use with Bo'sun Remote Control at right. Safety locking feature allows shifting only at safe speeds. New Safety-Tilt lock holds motor down when decelerating, etc.—automatically releases when an underwater obstruction is met.

"SONIC-QUIET" DESIGN includes the full-range of silencing features above, newly engineered for more boating fun.

FUEL SYSTEM. Motor operates with separate 6-gal. fuel tank which is included—runs 2 hrs. at top speed. Automotive-type suction system—no pressure leaks. Handy snap-on connectors.

CHOICE OF TWO MODELS, one with Push Button Electric Starter—operates on 6-volt storage battery (not incl., see Pg. 900). Both have new automatic rewind, pull cord starter.

60 C 9023 R—ELECTRIC STARTER MODEL with 6-gal. fuel tank and Push Button Starting and Choke Panel. See Specification Table below. Only $46.00 Down on Terms....Cash $459.00

60 C 9022 R—AUTOMATIC REWIND MODEL with 6-gal. fuel tank. See Specification Table below. Only $38.00 Dn. Cash $379.00

NEW SEA KING "5" GEARSHIFT TWIN 171.00

(E) This new quiet 5 HP. Sea King is the "fishing favorite" and ideal too, for family fun. It's economical to operate, easy to start, and it's extra-wide balanced handle makes it easy to carry. Spring Overload Clutch—absorbs shocks by disengaging propeller, thus eliminating the need of shear pins. Average speeds from 1½ MPH slow troll to a full 12 MPH.

FULL GEARSHIFT ACTION, Neutral, Forward and Reverse, plus synchronized throttle-spark control makes it easy to maneuver. Adaptable to both Remote Control unit using special kit and Bo'sun Fuel System at right. This rugged "5" has all the engineered features above, but is mounted in springs to isolate noise and vibration for a truly quiet, enjoyable performance. Gas tank holds 9/10 gallon—runs motor 1 hour at top speed.

60 C 9002 R—See Specification Table below. Only $17.50 Down on Wards Monthly Payment Plan. See Pg. 981...Cash $171.00

DE LUXE SEA KING "12" GEARSHIFT TWIN 367.50

(B) (C) Now you can enjoy the thrill and added convenience of Push Button Electric Starting with this versatile new 12 HP. Sea King. Starter button panel can be positioned anywhere, and with the optional Remote Control unit at right, you can skipper your boat from any forward steering position. This classic designed Sea King has ample power for speeds up to 22 MPH, yet slows to 2 MPH for trolling. Ideal for family pleasure cruising, fast utility boats or fishing in large lakes.

FULL GEARSHIFT ACTION furnishes smooth, instant power for economical operation. Safety-locking feature allows shifting only at safe speeds. New Safety-Tilt lock holds motor down when decelerating—automatically releases for obstructions.

"SONIC-QUIET" DESIGN includes the full-range of silencing features listed above to bring you exciting new fun afloat.

FUEL SYSTEM. Motor operates with separate 6-gal. fuel tank which is included—runs 3 hrs. at top speed. Automotive-type suction system—no pressure leaks. Easy snap-on connectors.

CHOICE OF TWO MODELS, one with Push Button Electric Starter—now offered for the first time. Both have new automatic rewind, Nylon pull-cord starter. Electric Starter model operates on 6-volt storage battery (not included, see Page 900).

(B) 60 C 9024 R—ELECTRIC STARTER MODEL with 6-gal. fuel tank and Push Button Starting and Choke Panel. See Specification Table below. Only $37.00 Down on Terms.....Cash $367.50

(C) 60 C 9021R—AUTOMATIC REWIND MODEL with 6-gal. fuel tank. See Specification Table below. Only $29.00 Down on Wards Monthly Payment Plan. See Pg. 981. Cash....$287.50

NEW SEA KING "3" DE LUXE SINGLE 106.00

(F) There's smoother power and more economical operation built into this lightweight Single than ever before. This sturdily built "3" has many of the fine operating features listed above. Has single lever synchronized spark and throttle control. It's new compact design compliments any boat, and makes it easier to carry and stow in your car—only 30 lbs. A dependable motor with new balanced starting ease the entire family can operate and enjoy. Just right for use on smaller fishing boats, rowboats, dinghies or bracketed canoes.

FULL 360° PIVOT allows you to reverse, back away from pier, turn sharply, stop quickly, and maneuver safely in crowded waters. Gas tank holds ½ gal.—runs 1¼ hrs. at top speed. Average speeds up to 10 MPH, yet throttles down to a slow, steady 1½ MPH for the finest trolling. Only $11.00 Down.

60 C 9000 R—See Specification Table below.....Cash $106.00

REMOTE SHIFT—THROTTLE CONTROL

(D) Operates gearshift and throttle from forward steering position. Reversible for port or starboard installation. Fits 1956 5 HP. model (request 5 HP. kit). Fits 1954 and later Sea King 12, 22, and 25 models. Also following 1954 and later 12, 22, and 25-HP. models of Buccaneer, Sea Bee, Royal, Hiawatha, Brooklure plus 1953 and later Evinrude, Johnson 10, 15, 25, and 30 HP models. *Ppd.*

60 CP 9100—12 and 13-ft. cables.....$40.00

WARDS PERFORMANCE GUARANTEE ON SEA KING OUTBOARD MOTORS

SEA KING MOTORS are made by the outstanding manufacturer of outboard motors in the country. They are thoroughly dependable and satisfactory performance is guaranteed. Any part which might fail due to defective materials or workmanship under normal care and usage will be replaced by Montgomery Ward & Company.

BO'SUN FUEL SYSTEM 24.50

(G) Enjoy additional hours of outboard motoring fun without stopping to refuel. Includes 6-gal. tank, diaphragm pump, 6-ft. neoprene hose, and fittings. Designed for 1956, 5-HP Sea King, and for 1954 and later 12, 22, and 25-HP models of Sea King, Sea Bee, Royal, Hiawatha, Buccaneer, and Brooklure outboard motors.

Marine Accessories for More Boating Comfort, Safety

FIBER-GLASS BOAT COVERING KIT

(1) Gives a rot-proof, fiber-glass hull to your boat. Smooth surface gives added speed and strength. Finishes to a hard, glossy, colorless semi-clear, leak-proof covering not affected by sunlight. Will not support marine growth. Includes supplies to cover transom, plus overlap at spray rails or gunwales, and extra material for practice. With 10-oz. per sq. yd. fiber-glass cloth, liquid glass, hardening agent, hand and brush cleaner, complete instructions. Can be drilled or sawed. If color is desired, *State*, red, green, blue, black, or white. Shipped from Chicago Factory. Allow about 5 days plus time in transit for delivery.

60 C 9255 KB—Fiber-Glass Kit to finish 12-ft. boat to gunwales. Ship. wt. 28 lbs.....$29.95

60 C 9111KB—Fiber-Glass Kit to finish 12-ft. boat to spray rails. Ship. wt. 20 lbs.....$24.95

60 C 9256 KB—Fiber-Glass Kit to finish 14-ft. boat to gunwales. Ship. wt. 35 lbs.....$37.50

60 C 9121KB—Fiber-Glass Kit to finish 14-ft. boat to spray rails. Ship. wt. 25 lbs.....$33.50

60 C 9177 KB—Fiber-Glass Kit to finish 16-ft. boat to gunwales. Ship. wt. 44 lbs.....$51.50

60 C 9136 KB—Fiber-Glass Kit to finish 16-ft. boat to spray rails. Ship. wt. 30 lbs.....$40.95

60 C 9257 KB—Patching or Customizing Kit. Enough material for 450 sq. in. Ship. wt. 1 lb. 6 oz.....$3.49

(2) BOAT COVERS. Heavy drill. Dry wax Pearl Gray finish. With draw rope. Grommets at each seam. Width allows for approx. 5-in. overlap on each side—they will fit wider boats allowing less overlap. *Example:* 12-ft. cover fits 56-in. beam (5-in. overlap); also fits up to 64-in. beam (1-in. overlap).

Cat. No.	Fits Boats	Approx. Cover Width	Ship. wt.	Price
60 C 9185	12 ft.	68-in. beam, 58-in. stern	6 lbs.	$9.95
60 C 9186	14 ft.	69-in. beam, 58-in. stern	7 lbs.	12.50
60 C 9187	16 ft.	75-in. beam, 66-in. stern	8 lbs.	15.95

(3) CURVED WINDSHIELD. Ready to install. Fits any boat regardless of deck curve or contour. Consists of 1 pc. clear Plexiglass 12 in. high, Plastic-Chrome molding, rubber deck channel. With chromed brass wing brackets, hardware, instructions.

60 C 9226 MO—*State windshield width;*
44-in. width. 50-in. width. Ship. wt. 12 lbs.....$25.95

Wards Roomy Cottage and Umbrella Tents for Family

(1) Big door of tent (A) guyed out makes a protective sun canopy shelter.

(AA) Add-A-Room extension for tents (A) give additional sheltered space.

(2) Rear wall of tent (B) can be rolled up to get cooling cross ventilation.

IMPORTANT SHIPPING NOTICE

Tents above finished to full sizes listed. Tents and poles with "M" after Catalog No. are *Mailable*. "R" indicates items shipped by Freight, Truck or Express; "F" means shipped promptly from Philadelphia Factory—you pay charges from there. *State Transportation* desired. Allow transit time. Remember you can purchase tents or any of Wards merchandise on Monthly Terms—Pay only 10% Down. See Inside Back Cover for detailed information.

WARDS SCREENED PICTURE WINDOW TENT 84.50 9⅓x7¼ ft.

(A) FULL LENGTH SCREEN PICTURE WINDOWS across both sides of tent plus the wide screened front door gives 3 way cross ventilation for cool restful sleeping. Plenty of space for family or group camping—Add-A-Room Extension (AA) (sold separately below) makes an extra room, provides extra space for cooking, eating, etc.

PLASTIC SCREEN WINDOWS AND DOOR. Both picture windows are about 2 ft. high and covered with outside curtains that can be rolled up in hot weather or easily tied down in case of rain or cold weather. Zipper screen door has an overlapping storm door or canopy (1).

ROOF IS MADE OF EXTRA-STRONG ARMY DUCK. This heavy closely woven material weighs 10.10-oz. per sq. yard. The side walls, ends of tent and sewed-in floor are heavy closely woven 7.68-oz. boat sail drill. Entire tent chemically treated to repell water. Green color.

MAXIMUM ROOM, STURDY CONSTRUCTION. High 5½-ft. side walls and 7½-ft. center height gives you more space for sleeping, eating and recreation. Overhanging eaves to direct water away from tent. All poles, ropes, stakes and complete instructions for setting up tents included. Only 10% Down on Terms—See Inside Back Cover.

60 C 9653 R—Base Size 9⅓ ft. wide, 7¼ ft. long. Ship. wt. 75 lbs. . $84.50

60 C 9654 R—Base Size 9⅓ ft. wide, 11⅔ ft. long. Ship. wt. 98 lbs. 107.95

(AA) ADD-A-ROOM EXTENSION for tents (A) above. Shown at left. Gives sheltered, screened extra space for cooking, recreation, etc. Zipper opening entrance. Ropes, poles, included.

60 C 9658 MB—Adds 9⅓x5 ft. *Mailable*. Ship. wt. 28 lbs. $38.95

WARDS DE LUXE SCREEN WALL BUNGALOW TENT 47.95 7x7 ft.

(C) Perfect for all climate camping. Full screened sides and door. Sleep comfortably in hot weather with sides and door tied up. Sides can be guyed out to give ventilation and privacy.

ARMY DUCK ROOF MATERIAL is tightly woven, weighs full 10.10 oz. per sq. yd. before treatment to repel water. Walls and sewed-in floor cloth of heavy 6.74-oz. medium-weight drill. Green color.

SCREENED SIDES AND DOOR give you three-way cross ventilation. Sides are screened with sewed-in-fine mesh plastic netting. Divided plastic netting door curtain snaps down center, fastens across bottom to front door riser to keep out small animals and insects.

SEWED-IN ROPE RIDGE—permits pitching tent between 2 trees without poles. Ridge openings with flaps also allow you to use a five-pole pitch using saplings cut at campsite or you can pitch with poles below.

CHOICE OF THREE SIZES for small or larger groups. Eave height of all tents 3 ft. Tent comes complete with stakes, guy ropes, and rope keys included. Finished to full dimensions listed. Poles not included—order poles separately below. Ship. wts. 31, 42, 63 lbs. *Mailable*.

IMPORTANT NOTICE. Wards Camping Tents are water-repellent treated with the best penetrating wax treatment available. They will repel water as well as or better than any other tents made of like materials, but no tent is absolutely waterproof in severe weather. Some wax finishes may rub off but colors will not run. Do not set up tents when wearing dress clothing. Tent materials will shrink in use about 1 in. per ft. due to change in climatic conditions. Return of used or soiled adult camping tents will not be accepted except for defects in material or workmanship.

Camping Lightweight 2-Man Tents

STANDARD CENTER POLE UMBRELLA TENT 44.95

(E) ENJOY THE CONVENIENCE OF AN UMBRELLA TENT AT LOW COST. It's an easy tent to set up and take down. Made of rugged high count boat sail drill material that weighs 7.68 oz. per sq. yd. before chemical treatment to make material water-resistant. Smooth, dry finish. Green color. The tent has a sewed-in floor that is also made of water-resistant treated material to add to your outdoor living fun.

JOINTED CENTER AND CANOPY POLES COME APART FOR COMPACT CARRYING. The collapsible metal assembly inside at eaves holds roof taut for good watershed. The complete tent folds compactly and can be readily carried in the trunk of your car.

PLASTIC SCREENED DOOR CURTAIN AND REAR WINDOW—to keep out insects, provides cross ventilation. Screen door is sewed-in along top and down one side, ties with tapes on opposite side. Front canopy lowers over door—can be tied down in cold or rainy weather. The 15x15-in. rear window is screened with durable plastic screening for protection from insects. It also has a flap that can be raised or lowered easily and quickly from inside tent for protection from weather and to shut out light.

RUGGED CONSTRUCTION, ROOMY DESIGN — Tie tapes and seams are double stitched with heavy cotton thread to give long wear and resist deterioration. Center height 7 ft. Eaves height 5½ ft. 4 ft. square at eaves. Finished base size 9 by 9 feet. Sewed-in floor protects occupants from insects, small ground animals; blocks out drafts. Jointed center pole, awning poles, metal eaves assembly, ropes, stakes and instructions included.

60 C 9616 MO—*Mailable*. Ship. wt. 40 lbs. $4.50 Down on Terms....or Cash $44.95

OVERSIZE CENTER POLE UMBRELLA TENT (not shown). Same construction features as (E) above except made to oversize proportions to give you more space. 11 ft. wide, 9 ft. deep at the base. Center height 7 ft. Eaves are 5¾ ft. high—4½ ft. square. Poles, metal eaves assembly, guy ropes, and stakes included. *Mailable*.

60 C 9625 MO—Ship. wt. 49 lbs. $5 Down on Terms.....or Cash $49.95

OVERSIZE REAR EXTENSION UMBRELLA TENT 72.95

(F) IDEAL FOR THE CAMPER WHO NEEDS EXTRA ROOM. 12 ft. 5 in. from front to rear at the base and 10 ft. wide. Has over 120 sq. ft. of floor space. Has a center height of 7½ ft.—plenty of room to stretch in. This, plus its roomy rear extension (see Fig. 3) makes it the perfect tent for family camping. Has up to 42 more square ft. of floor space, and is 6 in. to 1 foot higher than the average umbrella tent.

HIGH COUNT RUGGED BOAT SAIL DRILL MATERIAL weighs 7.68 oz. per sq. yd. before chemical treatment to repel water. Tent is Green color. Sewed-in floor of tent is also made of water-resistant treated material.

LARGE PLASTIC SCREEN WINDOWS AND DOOR. One 16x30-in. screened rear window (see Fig. 3), two 16x16-in. side windows and the screened front door provide 4 way cross ventilation and protection from insects. Window flaps that can be raised or lowered from inside the tent are used for protection from the weather. Zipper door of half plastic screen, half material zips down center from inside or out . . . prevents entry of small animals, yet gives 4-way cross ventilation and privacy. Front canopy can be lowered over door and tied to close the entrance.

METAL EAVES ASSEMBLY . . . holds roof taut for a good watershed. Jointed center and awning poles come apart for easy, compact carrying. One man can easily set tent up or take it down. Tent and poles can be rolled and readily carried in car trunk. Rear wall is supported tautly by two poles and guy ropes.

RUGGED ROOMY CONSTRUCTION. All seams and tie tapes are double stitched with heavy cotton thread for long wear and to resist deterioration. Tent is 7½ ft. high at center, 6 ft. high at eaves and 5 ft. square at eaves. Rear extension is 4 ft. high. Complete with jointed center pole, two rear poles, jointed canopy poles, metal eaves assembly, stakes, ropes, and instructions included.

60 C 9610 R—Ship. wt. 66 lbs. $7.50 Down on Terms.....or Cash $72.95

DE LUXE STEEL CORNER UMBRELLA TENT 67.95

(G) An excellent tent for the entire family. Extra netting room (H) above or easily attached drill curtains (sold separately below—see fig. (GG) right), can be attached to make an extra room of approx. 35-sq. ft. floor area. High count boat sail drill material. Weighs 7.68 oz. per sq. yd. before treatment to repel water. Sewed-in floor is also made of water repellent treated material. Tent is attractive Green color.

TELESCOPING STEEL CORNER AND AWNING POLES—Steel corner pole frame holds roof, sides taut, eliminates center pole, provides unobstructed interior space. Frame telescopes and folds for compact carrying. V-shaped canopy frame supports front awning, gives a peak for better watershed, more headroom. Guy ropes from eave corners give added rigidity.

PLASTIC SCREENED REAR WINDOW provides controlled ventilation. Inside flap can be raised or lowered for privacy, weather protection. Divided zipper door of half material, half plastic screen gives both ventilation and privacy. Front canopy can be dropped, tied over screened entrance.

ROOMY DESIGN—Center ht. 7 ft., eave ht. 5¾ ft., base size 9⅓x9⅓ ft. square, 4½ ft. square at eaves to give more interior room. Frame, poles, guy ropes, stakes, bag and instructions included.

60 C 9611 R—Ship. wt. 65 lbs. $7 Down.....Cash $67.95

(H) PLASTIC MOSQUITO NETTING ROOM. Curtains clip under front awning to make screened-in room. Sod cloth around bottom provides extra protection against insects.

60 C 9618 M—Ship. wt. 6 lbs. *Mailable*.....$19.95

(GG) WATER REPELLENT DRILL CURTAINS (at right). Curtains clip under awning for second room. Same material as tent.

60 C 9619 M—Ship. wt. 20 lbs. *Mailable*.....$16.95

TWO-MAN OVERSIZE PUP TENT 18.75

(J) Has more floor space and inside room than the usual pup tent. Green finished, water-repellent treated drill material. Material weighs 7.68 oz. per sq. yd. before treatment. Tent is 5 ft. wide and 86 in. long. Center height 3 ft. 6 in. Sewed-in floor of lighter 5.90 oz. drill reduces overall weight. Plastic screen door snaps down center, across bottom for insect protection. Storm flaps lower, tie over entrance in cold or rainy weather. Incl. ropes, poles, stakes.

60 C 9605 M—Ship. wt. 16 lbs. *Mailable*.....$18.75

(GG) Extra drill curtains give De Luxe Umbrella Tent (G) an extra room.

(3) Roomy rear extension on umbrella tent (F) gives extra interior space.

(4) Fly Top Ventilator—Tent (K).

Gives double protection from weather, may be left open even during rain.

POPULAR "DRAW-TITE" PORTABLE TWO-MAN TENT 44.95

(K) Can be erected in less than 5 minutes—no stakes, or guy ropes necessary—no inside poles used. Self-supporting frame of jointed aluminum rods attach to top spanner tubes; tent suspends from outside frame. Can be pitched on desert sand, solid rock, ice or in deep snow. Weighs only 16 lbs.—can be easily picked up and moved as a unit even while assembled.

RUGGED, LIGHTWEIGHT CONSTRUCTION—high count 7.68 oz. boat sail drill—water repellent and mildew resistant treated. Sewed-in moisture resistant floor. Mineral dyed pearl gray color. More interior space than other two-man tents—front ht. 44 in.; rear ht. 31 in.; base or floor size 57 in. wide by 96 in. long.

SCREENED PROTECTION—3-way zippers close Nylon mesh screen door, top ventilator. Separate top fly (see fig. (4) above), ties to outside frame. Protective door flap gives all weather comfort. *Mailable*.

60 C 9639 M—Ship. wt. 17 lbs. $4.50 Dn.....Cash $44.95

IMPORTANT INFORMATION ON TENTS

Scout-size and Pup tents (A) to (D) are water-repellent treated with the best penetrating wax available. They repel water as well as any other tents of like materials, but no tent is absolutely waterproof in severe weather. Some wax finishes may rub off but colors will not run. Tent materials shrink in use about 1 in. per ft. due to climatic changes. Used or soiled tents are not returnable except for defects in workmanship.

SCOUT-SIZE WALL TENT 13.45

D A practical, inexpensive tent for young campers, suitable for overnight camping. Similar in design and shape to adult Standard Wall Tents, but smaller size and lighter in weight for easier carrying and packing. Made of 6.74 oz. per sq. yd. drill material that is wax treated to repel water. Finished in attractive Green color that most campers prefer.

Front flaps can be tied open for ventilation or closed in rainy or cool weather for more comfort. Tent is finished to full size, 5 ft. high at the peak, 2 ft. at eave. Base size is 5x7 ft.

Complete with ropes, upright poles, jointed ridge pole, anchoring stakes, and instructions.

60 C 9635 MO—Ship. wt. 16 lbs. *Mailable*.$13.45
Buy in lots of 3 or more and save 7%. Ea. 12.45

IMPORTANT NOTICE ABOUT PLAY TENTS

Play tents (E) to (H) listed below are not designed to be camping tents, but are ideal for children's playtime hours. They are made of lighter weight materials and are not water-repellent. Tents come complete with ropes, stakes, poles—easy to put up or take down.

Adult camping tents are larger, made of heavier, sturdier materials—See Pgs. 742–743.

Straight Ladders for Amateur or Professional

VERSATILE 2-IN-1 COMBINATION 9.25 5 Ft.

FOLDS to form rigid stepladder.
OPENS to straight ladder.
FOR ALL USES indoors or out.

1 Excellent for home, shop or farm. Opens to almost twice folded height. Positive locking hinge adjusts ladder easily and quickly to either position; holds ladder rigid.

Use for cleaning, painting, repairing. For one story houses the 5- or 6-ft. length, extended, is usually adequate for exterior work.

Made of select ladder-stock wood. Grooved steps, 3¾ in. wide on front (or lower) section, give firm footing. Back (or top) section has rungs mortised into side rails. Both steps and rungs are braced by bolted steel rods for extra support. All metal parts are rust-resistant. *Not Mailable.* Shipped, Freight, Truck or Express. See Ladder Facts, opposite page.

5-FT. LENGTH. Opens to 10 Ft.
75 C 6708 R—Ship. wt. 20 lbs. $9.25

6-FT. LENGTH. Opens to 12 Ft.
75 C 6709 R—Ship. wt. 24 lbs. $10.95

7-FT. LENGTH. Opens to 14 Ft.
75 C 6711R—Ship. wt. 28 lbs. $13.25

8-FT. LENGTH. Opens to 16 Ft.
75 C 6712 R—Ship. wt. 32 lbs. $14.95

IMPORTANT LADDER SHIPPING INFORMATION. All ladders on this page are shipped from Stock by Freight, Truck or Express. *Not Mailable.* You pay shipping charges. See Pages 970 to 972.

CONVENIENT TERMS—10% Down. See Page 981.

LIGHTWEIGHT MAGNESIUM 43.50; ALUMINUM 38.50 20 Ft.

EASY TO HANDLE—One person can carry and place.
STRONG—Will hold static weight up to 1000 pounds.
NEED LITTLE CARE—Will not rust, splinter or warp.

2 3 For home, farm, business or industry. Sections come apart easily for use as single ladders—just slide end off end. Rounded ends prevent scarring walls. Do NOT use near electricity or in electrical storms. *Not Mailable*, shipped Freight, Truck or Express. See Facts on next page.

(2) MAGNESIUM. Lightest structural metal. Chromate dipped; resists corrosion. Tubular, grooved rungs extend through and welded to "I" type side rails.

Extension slides in channel (picture above) for easy raising; lowering; can't come apart in use. Rope, pulley included. Spring lock secures extension. Order Shoes (11 below) for added safety.

(3) ALUMINUM. Slightly heavier than Magnesium, but costs less. Like (2), but with rungs flanged to modified "I" type side rails.

Gravity hooks secure extension. Rubber shoes included.

STANDARD QUALITY WOOD 18.50 20 Ft.

5 Same high quality ladder-stock wood as used in Supreme ladders above, but without steel rods. Rungs tightly mortised into side rails and then nailed for added strength. Parallel rail type.

Metal hooks lock automatically and firmly on rung. Four steel guides keep extension aligned for easier raising. Rope and pulley included help raise and lower extension. Metal parts, rust-resistant. Shipped by Freight, Truck or Express. See Ladder Facts, next page. Terms, 10% Down.

WORK-SAVING LADDER ACCESSORIES

6 LAD-R-LOC. Acts like top shelf of stepladder. You stand directly in front of work. Holds ladder away from building. Rubber pads protect wall. Tray to hold tools. Rust-resistant finish. With tie-rope.
75 C 6893 M—Shipping weight 10 lbs. ..... Each $4.19

7 STEEL PLATFORM FORMS STEPLADDER. Reduces foot strain, leg fatigue. Hooks over rungs for wider step. Welded steel rods. Size, 9½ by 10½ in. wide.
75 C 6876 L—Shipping weight 4 lbs. ..... Each $2.59

8 ROPE AND PULLEY ATTACHMENT. Raise and lower extension easily. Steel pulley. Rope ⅜-in. diam.
75 C 6796—FOR 20 TO 26-FT. Ship. wt. 1 lb. 8 oz. ... $1.35
75 C 6797—FOR 28 TO 34-FT. Ship. wt. 1 lb. 12 oz. ... 1.95
75 C 6798—FOR 36- TO 40-FT. Ship. wt. 2 lbs. $2.35

LADDER HOOK, BRACKETS, SHOES FOR ADDED SAFETY

9 ADJUSTABLE LADDER HOOK. Attaches quickly to rungs of any ladder. Hooks over peak of roof. Steel, 1 by 5/16 in.
75 C 6894 L—Shipping weight 2 lbs. 8 oz. ..... Each 89c

10 LADDER BRACKETS. Use with extension or solid planks up to 18 in. wide. Use instead of scaffold. Adjust to any angle ladder may be inclined. Steel, 1¼ by 5/16 in. Sold in pairs only.
75 C 6896 MB—Shipping weight 21 lbs. ..... Pair $5.45

11 SHOES FOR MAGNESIUM LADDERS. Non-slip rubber tread. Attach easily. In pairs only. Ship. wt. 1 lb.
75 C 6888—FOR 20- TO 28-FT. EXTENSION LADDERS ..... Pair $2.95
75 C 6889—FOR 32- TO 40-FT. EXTENSION LADDERS ..... Pair 2.95
75 C 6887—FOR 12- TO 16-FT. SINGLE-SECTION LADDERS. Pair 2.95

12 SHOES FOR WOOD LADDERS. Steel body. Cord and rubber treads for wet, dry or oily surface; steel spike end for ice.
75 C 6890—Not for 2-in-1 ladder. Ship. wt. 1 lb. 4 oz. . Pair $2.89

LADDER LEGS, ROOF PLANK BRACKET, PAINTING AIDS

13 EXTENSION LEGS. To level off wood ladders on steps or uneven ground. Treaded safety shoes for sturdy grip. Positive-lock Wing-nut for easy raising or lowering. Full 10-in. adjustment.
75 C 6877 M—Shipping weight 7 lbs. ..... Pair $5.95

14 ROOF PLANK BRACKETS. Nail without damage on nearly any roof except tile, metal or slate. Center bar flanged for extra strength. Holds plank up to 6 in. wide. Made of 2-in. steel.
75 C 6895 L—Shipping weight 4 lbs. ..... Pair $1.75

15 PAINT BUCKET HOLDER. Keeps paint bucket handy yet out of way. Use on either side of ladder. Hooks on rungs.
75 C 5447—Shipping weight 1 lb. ..... Each 59c

16 STEEL PAINT AND UTILITY BUCKET. Easy to carry paint to the job. Also for easier mixing, color blending. Many other uses.
75 C 5448—Shipping weight 1 lb. 4 oz. .... Each 47c; 2 for 89c

Step and Platform Ladders for Home or Shop

LIGHTWEIGHT, DURABLE ALUMINUM 14.95 4 Ft.

EASY TO CARRY—almost anyone can handle.

WEIGHS ONLY 2½ LBS. per ladder foot.

CHANNEL-TYPE RAILS AND RUNGS for greater support.

17 Excellent for household or professional use. Made of strong aluminum with riveted construction. Won't snap or break; rust or corrode. Back section braced for extra strength. Positive hinge type lock keeps ladder rigid. Steps grooved for firm footing. Non-skid rubber shoes on all legs hold ladder in place; prevent slipping. Large paint shelf. Folds compactly for storage. *Not Mailable;* shipped Freight, Truck or Express. See Ladder Facts below.

75 C 6870 R—4-Ft. Size. Ship. wt. 10 lbs. $14.95
75 C 6871 R—5-Ft. Size. Ship. wt. 12 lbs. 16.95
75 C 6872 R—6-Ft. Size. Ship. wt. 15 lbs. 20.95
75 C 6874 R—8-Ft. Size. Ship. wt. 20 lbs. 28.95

WOOD PLATFORM FOR HOME USE 7.95 4 Ft.

18 Comfortable. Stable. Wide, rigidly braced work platform (15 by 13 in. on 5-ft. height), permits you to stand "inside" of ladder. Allows freedom of movement; permits you to work more efficiently. Side rails act as steadying brace (see Picture under 21 for example). Because both feet rest on platform, leg and foot fatigue is reduced. Steps serrated for firm footing; reinforced with steel rods.

Select ladder-stock wood. Platform (2 ft. high on 4-Ft. ladders; 3 ft. high on 5 ft.) acts as rigid brace to hold ladder open. All hardware rust-resistant. Five-foot *Not Mailable.* Shipped Freight, Truck or Express. See Ladder Facts below.

75 C 6866 MO—4-Ft. Size. Ship. wt. 14 lbs. $7.95
75 C 6867 R—5-Ft. Size. Ship. wt. 17 lbs. 9.25

FACTS ABOUT LADDERS

BASIC TYPES: 1) Step and Platform. Primarily for interior use. Practical heights for most amateur or professional uses vary from 24-in. step stool (23, 24 below), to 8-ft. ladder (17, 19, 20, 21, above). 2) Straight. (Single or Extension; opposite page.) Primarily for exterior use. Extension ladder is two overlapping single ladders. Practical heights vary from 10 to 40 ft. For one-story houses, 12- or 16-ft. single section is usually adequate. 3) Combination. (No. 1, opposite page.) For interior or exterior work. One ladder serves as two. Excellent for one-story houses.

Construction; Wood. Side rails and steps of high quality ladders are made of kiln-dried, excellent "ladder stock" with straight grain and correct strength in relation to weight. Rails and steps equal or exceed dimensions for safety established by the industry. These sizes are given in tables listing wood straight ladders. Dimensions and type of wood vary depending on wood available.

Steel rods underneath each rung or step and inserted through side rails, with washers to secure, offer best reinforcement. Back bracing on step or combination ladder usually consists of rungs, or slats in "X" or "V" shape for extra rigidity.

Metal: Magnesium or Aluminum. Magnesium is slightly lighter in weight than aluminum, but both are easy to handle; long-lasting. Require little care; resist corrosion; won't rot or splinter. (Don't use too near electricity or in electrical storms.)

Tubular rungs, on straight type, inserted through "I" type side rails. Aluminum rungs flanged into side rails; magnesium rungs welded in. Step type usually riveted.

Correct Size. For step ladders, your height plus distance from second ladder step to floor should about equal ceiling height.

To determine extension ladder length, subtract about 3 ft. from nominal (or given) length to allow for overlap, and one foot for slant. (Place bottom of ladder ⅓ of ladder height away from wall for safety angle.) Tables on opposite page give height to which ladder will reach. Average man can work to 2 ft. or more above ladder.

REINFORCED WOOD 6.59 5 Ft.

DURABLE—Can take rough handling.

CONSTRUCTED OF LADDER-STOCK WOOD for years of wear.

BACK BRACED BY RUNGS and stabilizer bar for sturdiness.

19 For professional or household use. Grooved steps mortised into extra-wide side rails. Ladder folds compactly for storage. Hinge-type lock keeps ladder stable when open. Large pail shelf. Rust-resistant hardware. *Not Mailable;* shipped Freight, Truck or Express. See Facts below.

75 C 6969 R— 5-Ft. Size. Ship. wt. 20 lbs. $6.59
75 C 6970 R— 6-Ft. Size. Ship. wt. 24 lbs. 7.69
75 C 6972 R— 8-Ft. Size. Ship. wt. 32 lbs. 9.95
75 C 6973 R—10-Ft. Size. Ship. wt. 40 lbs. 12.50
75 C 6974 R—12-Ft. Size. Ship. wt. 48 lbs. 17.95

STANDARD WOOD 3.69 4 Ft.

20 Easy to Handle. Low Priced. Excellent for household use. Made of warp-resistant ladder-stock wood. Back section "X-braced" for strength. Spreader type steel safety locks keep ladder open; permit compact folding for storage. Steps reinforced with steel rods fastened through side rails with washers; grooved to give firm footing. Convenient pail shelf. Rust-resistant hardware. *Not Mailable.* Shipped Freight, Truck or Express. See Ladder Facts below.

75 C 6958 R—4-Ft. Size. Ship. wt. 14 lbs. $3.69
75 C 6959 R—5-Ft. Size. Ship. wt. 17 lbs. 4.59
75 C 6960 R—6-Ft. Size. Ship. wt. 21 lbs. 5.59
75 C 6962 R—8-Ft. Size. Ship. wt. 28 lbs. 7.95

LADDER SHIPPING INFORMATION

Ladders and Planks on this page (except Step Stools Nos. 6826, 6927 and ladder 6866) *Not mailable;* shipped Freight, Truck or Express. You pay shipping charges. See Pages 970, 971.

HEAVY-DUTY WOOD PLATFORM 8.95 4½ Ft.

WIDE PLATFORM reduces foot fatigue.

SAFER—You stand "in" ladder.

REINFORCED for long, hard service.

21 For home, farm, industrial, professional use. Both feet rest firmly on large, stable platform steps that help reduce foot and leg fatigue, even during prolonged ladder work.

By swinging those hinged platforms not in use up and out of the way, as shown in small picture, you can step farther "into" ladder—even turn around and stand backward to reach difficult angles with greater safety and comfort. Puts you closer to job. Side rails act as guards to steady you (small picture at right).

Made of select ladder-stock wood with wood-riveted-to-steel construction. Back braces are steel trussed with heavy steel rods through side rails for reinforcement. Platform and side rails joined by steel braces and plates for support.

Ladder folds compactly for storage. Legs reinforced to keep ladder resting firmly on surface; help prevent teetering. Handy folding tray for buckets, brushes, etc. *Not Mailable.* Shipped Freight, Truck or Express. See Facts below, left.

75 C 6860 R—4½-Ft. Size. Ship. wt. 19 lbs. $8.95
75 C 6861 R—5½-Ft. Size. Ship. wt. 24 lbs. 9.95

HEAVIER-DUTY WOOD PLATFORM 15.50 6½ Ft.

PROFESSIONAL TYPE with extra sway braces. Same seasoned ladder-stock wood and quality construction as (21) above. Approved by UL. *Not Mailable.* Shipped Freight, Truck or Express.

75 C 6863 R—6½-Ft. Size. Ship. wt. 31 lbs. $15.50
75 C 6864 R—8½-Ft. Size. Ship. wt. 40 lbs. 19.95

WOOD EXTENSION PLANKS 7.95 TO 11.95

22 For Faster, Safer Ceiling Work, Etc. Telescopic type. Place plank between two stepladders (small picture above) or use with Ladder Brackets (10) and two extension ladders. Eliminates constant moving of ladder. Enables you to work faster and in a more relaxed position. Safer, more efficient than makeshift extensions.

Made of select, seasoned wood rails. Two heavy steel adjustable rods at each end hold rails rigidly together. Wrap-around straps of 1¼-in. steel, securely riveted to each rail, give dependable security, balance and rigidity at all times. Smooth almost effortless extending. *Not Mailable.*

75 C 6897 R—5-Ft. Length. Extends from 5¼ to 8¼ ft. Shipping weight 25 lbs. $7.95

75 C 6898 R—6-Ft. Length. Extends from 6¼ to 10¼ ft. Shipping weight 30 lbs. $9.25

75 C 6899 R—8-Ft. Length. Extends from 8¼ to 14 ft. Shipping weight 45 lbs. $11.95

COMPACT LADDER STOOLS 1.79, 7.95

23 24 Handy in Home or Shop. For quickly reaching upper kitchen cabinets, high shelves, etc.; for washing windows, washing car. Fold compactly for easy carrying and storage in minimum space.

(23) High-Strength Aluminum Alloy. Will not rust or corrode. Back "X-braced". Grooved steps, 2½ in. wide, give firm footing. No sharp corners or edges, protruding screws or rivets. Non-skid rubber feet. *Mailable.*

75 C 6826 MO—27-In. Ship. wt. 5 lbs. $7.95

(24) High Quality Wood. Riveted. Back "V-braced" for rigidity. Spreader-type, rust-resistant steel safety locks. Reinforced steps, 3½ in. wide, same as on tall ladders. *Mailable.*

75 C 6927 MO—24 In. Ship. wt. 3 lbs. $1.79

Convenient Terms. Pay 10% Down. Use Wards Monthly Payment Plan. See Inside Back Cover for complete details.

Fine Interior Finishes to Brighten Any Room

THIXOTROPIC . . . SILICONES . . . ALKYDS . . . ACRYLICS . . . WHAT DO SUCH WORDS ON PAINT MEAN TO YOU?

Paint technology is moving forward fast today. And chemists in Wards own paint factory are out in front. Wards pioneered the use of *Silicones*, *Acrylic* and *Alkyd* resins in paint. And now, *Thixotropic* Interior Finishes.

What do such scientific words mean to you when you buy paint, and when you put it on your walls? They all add up to better paint.

THIXOTROPIC. Designates new *ready-to-use* oil base finishes that come gel-like in the can, but liquefy as they are spread (Wards Thixotropic brand). Will not "settle out"; need no stirring; easily handled to avoid sagging on walls; to avoid dripping and flowing back into brush heel and onto hands.

An added ingredient makes various oil-base paints gel and stay mixed—"Thixotropic" does not indicate the quality of the paint. However, Wards Thixotropic comes only in First Quality, Flat Paint and Satin Enamel, listed below.

ALKYD RESINS. Make paints tough, scrubbable, self-sealing. Alkyds make practical the soft beauty of Flat Finishes, preferred by so many for living and bedrooms. Wards Thixotropic and Super Wall Finishes on this page are all compounded with alkyd resins.

SILICONES. Synthetics chemically related to glass. Ward chemists led in their use to make fine enamel smoother, tougher, without brittleness. Wards Thixotropic Satin, All-Purpose and Porcelain White Enamels are "siliconized."

ACRYLIC RESIN. Chemically related to Plexiglas. Another Ward "first." See water-thinned Rubberflex, below. (Acrylics not now used by Wards for oil paints.)

All Ward oil-base finishes are compounded with finest oils, resins, pigments, thinners, driers, etc. Linseed Oil is still the basic vehicle of many fine oil paints. But even Linseed Oil today is "polymerized" and otherwise processed to make it better. Other processed oils, from tung nuts, soy beans, etc., are used for their special properties. Paint making today is a science. The Ward paint chemist's constant aim is to make paints, enamels and clear finishes that apply more easily; require less "clean-up"; provide more beauty and protection longer.

RUBBERFLEX...WARDS BEST FLAT WALL PAINT

NO PAINT-LIKE ODOR. No ventilating. Use room same day.

HIGHER COVERAGE; HIGHER HIDING. Usually only 1 coat.

DRIES IN AN HOUR. No delay for second coat, if needed.

USE ON MOST DRY SURFACES. No primer or sealer required.

Save without sacrificing quality; only $4.75 gallon. Starts beautiful and stays beautiful. The inert acrylic resin base (chemically related to Plexiglas) preserves the original color and satin-like finish.

Easier and faster to apply. Flows on smoothly and evenly from roller or brush. Developed by Wards to meet present-day needs of both amateur and master-painter. Easily touched up—no lap or brush marks will show when dry.

Rubberflex is the most nearly odorless paint on the market today. This new pure acrylic resin base paint has only the slightest detectable odor—not "paint-like"; not unpleasant or irritating; not lasting. No ventilation required.

Extra tough; extra scrubbable. You can scrub Rubberflex almost at once, repeatedly and hard.

Rubberflex comes in 23 popular, decorator-approved colors listed at right. Easy to intermix for additional colors. Requires only moderate stirring.

And Rubberflex comes in the same colors as Wards Thixotropic Satin, listed below. You can do the walls and ceilings in Rubberflex Flat—the woodwork and other trim in Thixotropic Satin Enamel—matching or contrasting colors. Send for FREE Color Card No. 100—coupon on Page 760.

Clean tools, hands easily with soapy water. Rubberflex dries fast; wipe splatters at once with damp cloth.

Use on interior plaster, wall-board, dry-wall construction, wallpaper, brick, stone, concrete, tile, metal—bare or painted. (Modify glossy surfaces with sandpaper, steel wool or Excel-Prep—Page 766. Any kalsomine must be thoroughly removed before applying any paint.) To stipple walls, add Ready-Mix Joint Cement, Page 766. For sand plastered wall finish, add Sand-Kote, Page 760.

A gallon of Rubberflex will finish close to 600 sq. ft. on most surfaces, often more, one coat—usually all that is needed. If increased hiding is needed, Rubberflex is one paint that can be coated on more heavily. Two coats may be needed, for light colors; no waiting between coats.

THIXOTROPIC...NEW, READY-TO-USE, GEL-TYPE OIL-BASE FINISHES

NO STIRRING OR SHAKING. Stays mixed. No thinning.

EASIER TO APPLY. "Flows" on without pull or drag.

LESS DRIPPING, RUNNING. Easier to carry to surface.

Wards new gel-form, non-settling oil-base finishes, in choice of Flat or Satin. Ward "Lo-Odor"—as nearly odorless as fine oil paints can be made today.

Tailored for the amateur who wants a truly professional looking oil-base finish with minimum effort and "mess."

It comes ready-to-use. Just open the can, dip the brush into the gel-like paint and apply. Finish begins to turn liquid with the first stroke. So simple, so neat.

Gel-form makes it much easier to transfer paint from can to wall (even ceiling) without dripping; less-tendency to run down into the brush heel and onto the hands. Less splattering and dripping. Easier to "clean-up." (Use turpentine or paint and varnish thinner, listed on Page 758.)

Rolls on smoothly, too. For roller application, transfer paint from can to roller tray with putty knife or similar tool.

Thixotropic Satin and Flat each comes in an array of up-to-the-minute decorator colors. Satin comes in most of the same colors as Wards exclusive Rubberflex Flat (above). Now you can do the walls and ceiling in Rubberflex Flat; the woodwork or other trim in this soft-sheen, so-easy-to-clean luxury enamel. Satin comes also in the 5 nationally advertised General Electric (GE) Kitchen Colors.

For additional colors, tint White Thixotropic with Oil Color Concentrate (Page 760); or intermix 2 or more colors of Thixotropic Satin or Thixotropic Flat.

THIXOTROPIC FLAT WALL PAINT IN 12 COLORS. $4.39 gallon. Read information at left, also. One coat usually covers a similar color. Use on registers, radiators, etc., as well as walls and ceilings. No sealer or primer needed. Dries to touch in 2 hours; completely in 4 to 8 hours. Gallon covers up to 600 square feet, 1 coat. Ask for FREE Color Card No. 300—coupon on Page 760.

HOW MUCH PAINT TO BUY

FOR CEILING. Multiply length by width, in feet. (If drop type, add areas of four wall strips—if to be same color.) Divide area by square feet gallon of paint covers.

FOR WALLS. Measure total distance around four walls of room; multiply by height from baseboard to ceiling, or to molding in case of drop ceiling. Subtract areas not to be painted—doors, windows, etc. Divide by square feet one gallon of the paint being used will cover.

Allow 1 pint for every 100 running feet of average door and window frames, woodwork. Increase if extra wide.

THIXOTROPIC SILICONIZED SATIN ENAMEL. $5.35 gallon. In 23 rich colors. Be sure to read information at left and above, also. One coat usually covers a similar color. Excellent for walls in kitchens, bathrooms and nurseries. Fine for woodwork in any room. Easy to apply. Easy to clean.

Over new plaster or wallboard or over old, porous paint, first apply Primer and Sealer, Page 766. Over new wood or metal first apply Enamel Undercoat Page 760 (or Chromate primer, Page 757). Dries in 4 to 7 hours. Gal. covers up to 600 sq. ft., 1 coat. Send for FREE Color Cord No. 100; coupon, Page 760.

WARDS SUPER...FIRST QUALITY OIL-BASE FINISHES

SELF-SEALING SUPER FLAT WITH ALKYD RESINS to give it a tough, mar-resistant surface that is actually scrubbable. When you paint with Super Flat, you'll find the non-penetrating sealed-in oils make it easy to apply; and it is as nearly odorless as a fine oil-base paint can be made.

The velvet-flat finish softens light, eliminates glare, beautifies rooms. Dirt, grease, finger marks do not penetrate. One coat usually covers a similar coat on walls and ceiling of living and dining rooms, bedrooms, halls; also radiators and registers. No primer needed on any surface. Intermix colors or use Oil Color Concentrates (Page 760) for other hues. Dries in 4 to 6 hours. Gallon covers up to 600 sq. ft., 1 coat. Order from table at right.

SUPER SEMI-GLOSS ENAMEL. Its soft glow gives less reflection than gloss. Dirt and stain, grease and smoke do not penetrate its tough, hard surface. Retains its color and sheen after repeated washings. Dries overnight.

For kitchen, bathroom, laundry room; on walls, ceilings, woodwork of other rooms. Also for radiators, registers, or wherever extra washing is required. Over new plaster, first apply Dry-Fast Primer or Oil-Base Primer (Page 766). On new wood or metal, Enamel Undercoat (Page 760). Gal. covers to 600 sq. ft., 1 coat. Order from table, right.

SUPER GLOSS ENAMEL. Independent tests have proved that this enamel excels in hiding power, high gloss, washability, brush ease, leveling and resistance to cracking. Use it where water splashing, steam, grease and frequent washings would discolor or wear away other finishes. Dirt, grease, household stains will not penetrate its hard surface. All colors have high resistance to streaking, fading.

Excellent for kitchen, bathroom, utility, laundry rooms. Popular for woodwork in all rooms. One coat usually covers a similar color. Over new plaster, porous old paint or flat paint, first use Dry-Fast or Oil-Base Primer (Page 766). On new wood or metal, Enamel Undercoat (Page 760). Gallon covers to 600 sq. ft., 1 coat. Order from table below.

The Truth About

PAINT ODOR, WASHABILITY, COVERAGE, HIDING

Many claims are made for various interior paints, including "odorless," "scrubbable"; also "coverage" and "hiding" claims. The facts as Ward paint chemists see them are:

1) There Is No Such Thing as A Truly Odorless Paint. Strength and duration of oil-base paint odors have been greatly reduced, but none of them should be applied except in a well ventilated room. An odor will linger for at least a few hours. Various "latex-base" and "rubber-base" (Rubberflex) paints, have less odor than oil-base.

2) Fine Oil Finishes—alkyd flats and enamels—and rubber-base finishes withstand considerable actual scrubbing (not just washing) after proper curing. Pure Acrylic Finish (Rubberflex)—not a mere acrylic blend—is most scrubbable, usually about an hour or two after application.

3) "Coverage" Is Not The Same as "Hiding." A good paint coat may be as heavy as it should be and yet not hide the surface. Hiding depends on pigment; coverage more on "vehicle" or "binder." For example, clear finishes cover without hiding. The intense white pigment, titanium dioxide, often hides better than darker colors.

Labels usually state that a given amount of paint will cover up to a stated number of sq. ft. The figure usually applies to a smooth surface in good condition. On rough or poorly sealed surfaces, the area covered will be less.

Ward paints, type for type, are as "odorless," "scrubbable," "one-coat" as any on the market today. See "Truth About One-Coat" and "Durability" on Page 756.

The Truth About

"ONE-COAT" PAINTS AND DURABILITY

Various paints (including some Ward paints) are advertised as "one-coat" finishes, implying a big saving in labor and material.

Any one of a number of quality paints will give an excellent finish with one coat properly applied over a previously painted or correctly primed surface of suitable color in good condition.

On the basis of extensive testing and observation of scores of leading brands of house paint and experimental formulas, Wards laboratory experts believe: a) For one-coat re-painting over a good surface, Wardwhite gives results unexcelled by any other today. b) There is NO house paint today that will give a satisfactory one-coat finish over a painted surface in poor condition, or over unpainted wood.

Ward chemists do not believe there is an interior paint which will always give a satisfactory one-coat finish. Wards Rubberflex will often give an excellent one-coat finish even on a "new" wood surface and is closer to being a "one-coat" than any tested.

White or light yellow usually requires 2 coats. Over old paint, need of a second coat depends on colors involved and surface condition.

PAINT DURABILITY CLAIMS are often made—in general terms or for a number of years. Durability varies as to application and exposure.

Whether a paint is called "5-year" or "3-year", or it is merely stated as "durable," Ward tests show Ward Paints type-for-type last as long or longer in uses for which formulated, as any paints today.

Wardwhite or Wards Super House Paint will give 5 years or more service under suitable conditions, leaving a good re-painting surface.

Any paint may flake or peel if moisture comes through from the back due to condensation or leaks. Paint cracking or checking is due to improper preparation or application, or poor or incorrect paint. Paints may also wear out or wear through from rubbing or "chalking." For details, send for FREE copy of Wards "How To Paint" book—coupon on Page 760—or get one at a Ward Catalog Office.

SUPER BARN PAINT FOR PROTECTION
2.39 Gal. in 5's

SHINGLE PAINT IN MEADOW GREEN
2.59 Gal. in 5's

First-Quality Exterior Paints that Protect and Beautify

Painting is plain good business for home, farm or factory. Protection is especially important today due to the high building costs.

Because labor is the big factor, whether you do the painting yourself or have it done, regular painting with Wards Top Quality Paints is an investment, not an expense. It takes no more labor (often less) to apply the best paint.

Wards Exterior Paints have the right ingredients, properly compounded and proportioned to preserve and beautify. Because paint eventually wears out when sun, rain, heat, cold and fumes break down the oils, Wards formulates pigments in proper balance to rich Linseed and other oils to give longer lasting coverage.

The whitest paint pigment that can be used (the one that "hides" the best) is Titanium Dioxide, used in Wards White Exterior Paints. Ward pigments are micronized; ground extra fine. Smaller, more uniform particles give better blending; better finish; durability. Other agents bind the pigments securely together and to surface. Also regulate "chalking", self-cleaning action of white house paints.

HOW MUCH PAINT OR UNDERCOAT TO ORDER. Figure square foot area to be covered. Multiply distance around building by height to eaves. Then add square feet of each gable (½ gable height times width at base of gable). Next divide total by number of square feet 1 gallon of the paint to be used covers (given in description). Result is gallons needed for ONE COAT.

HOW MANY COATS– If surface is new or renewed (old finish removed) or old finish is in poor condition, apply 2, preferably 3, coats; first coat must seal—use proper undercoat or thinned finish paint (see individual descriptions). Over previously painted surfaces in good condition: *White House paint*—use 1 coat of Wardwhite, or 1 or 2 coats of Titanium White Super, as needed (choice of two methods is matter of preference); *Colors*—use 1 or 2 coats as needed for good hiding, to be determined by colors and surfaces involved. See "Truth About One-Coat Paints" opposite page.

WARDS SUPER BARN PAINT AND CREOSOTE PAINT CONTAIN NO LEAD; when dry they will not cause serious effects if licked or chewed by animals.

HOUSE FINISHES FOR WOOD, BRICK, MASONRY, SHINGLE SIDING...FOR TRIM

1-COAT WARDWHITE 5.59 Gal.

FOR 1-COAT REPAINTING. Best hiding power.
HIGHEST QUALITY. With 35% Titanium.
STAIN AND MILDEW-RESISTANT. Stays white.

Formulated by Wards own paint chemists to meet exactly the requirements of the more than half of Wards House Paint customers who want top-quality paint they can apply themselves over a previously painted surface in good condition—and obtain with one coat an intense white that stays white.

Field- and laboratory-tested and now available to you at less than most ordinary "first-quality" house paints.

Not only self-cleaning, but does not collect dirt under siding edges, below eaves, etc. Resists copper screen stains. Discourages rust stains from nail heads, hinges, other steel or iron. Properly applied, will not itself make white stains on brick, stone or screens.

More than 35% titanium-dioxide for maximum hiding. No other white pigment hides as well. Intense white reflects heat—means appreciably cooler house in summer. Compare the titanium content.

Discoloration is often not dirt but mildew. Wardwhite is believed as mildew-resistant as it is now possible to make a paint. (If mildew in locality is severe, use Ad-It Mildew Control, listed at right.)

Read general information at top of page and "Truth About One-Coat Finishes," opposite page. "How Much Paint To Order," above. Gallon covers up to 450 sq. ft. 1 coat.

SUPER HOUSE PAINT 4.29 Gal.

FINEST 2-COAT FINISH. Coverage. Hiding.
11 BEAUTIFUL COLORS and Titanium White.
COSTS LESS Than Most House Paints.

A first-quality paint by any standard. Meets a somewhat different need from Wardwhite (left). Aside from being recommended wherever color is desired, it is generally preferred in white as well over new or renewed wood or where old paint is in poor condition.

In such cases Wards Super House Paint Undercoat should be applied first. Follow with preferably two coats of Super.

Tests show this improved paint wears more slowly and evenly; leaves a better surface for repainting than most paints.

Recent check showed Wards Super costs less per gallon (including transportation) than most nationally known house paints.

Gallon covers up to 600 sq. ft., 1 coat (to 450 sq. ft., 2 coats). For 2 coats without undercoat, thin first—1 pint Linseed Oil to gal. of paint.

FOR SHINGLE STAIN, add 1 quart Boiled Linseed Oil, 3 quarts Paint Thinner to 1 gal. House Paint. Get Color Card No. 20, Page 760.

Aluminum Paint Protects and Insulates

Asbestos Roof Coating Forms Tough Film

Plastic Roof Cement Seals Flashings

Cement Down Loose or Bent Shingles

Roof Paints and Patching Materials

ASPHALT ALUMINUM PAINT 3.15 Gal.

PROTECTS THE SURFACE from weather, light and heat.

WITHSTANDS HIGH TEMPERATURES—won't crack, chip, peel.

KEEPS BUILDING COOLER in summer; cuts winter heat loss.

An all-purpose paint for asphalt coatings, composition roofing, steel and masonry surfaces. Ideal for brick; slate-surfaced, built-up and asbestos roofs; concrete; pipes; tanks; bridges; machinery; most industrial uses.

Made of high grade asphalts and powdered aluminum bronze. Asphalt vehicle is highly adhesive and water resistant. Aluminum bronze reflects heat and light rays, remains bright for many years. When applied, aluminum floats to surface of paint and forms metallic film of overlapping particles that protects paint base from weather, light and heat.

Apply with brush or spray gun. One coat hides any surface. Before application, surface should be clean, free of dust, dirt, rust and other foreign materials. Make sure surface temperature is under 100° F. (If extreme heat is likely, use Red Hot Aluminum Paint, Page 766.) (Chromate Metal Primer, Page 757, excellent undercoat on metal.) Gal. covers to 250 sq. ft., 1 coat on composition; to 600 sq. ft. on metal. Read Facts below.

FACTS ABOUT ROOF COATINGS

FOR WORN AND LEAKY COMPOSITION ROOFS, either flat or pitched, use Asphalt Roof and Foundation Coating to restore asphalt content. To patch and seal holes and cracks, apply Plastic Roof Cement and Roof Patching Membrane. When dry apply Asbestos Roof Coating.

FOR WORN COMPOSITION ROOFS, either flat or pitched, use Asbestos Roof Coating or for a bright finish, Asphalt Aluminum Paint. *Colored Roof Paint* for ROLL roofs only.

FOR METAL ROOFS. If rusted and worn, remove rust and apply Chromate Metal Primer, Page 757. Next, apply any one of the following roof coatings: 1) Asphalt Aluminum Paint. 2) Metal and Composition Roof Paint. 3) Asphalt Roof and Foundation Coating. 4) Asbestos Roof Coating (can be applied directly to metal in good condition).

FOR CONCRETE ROOFS, FOUNDATIONS, WALLS, SILOS, TANKS, use Asphalt Roof and Foundation Coating. Use in- or outside to check water absorption. Will not taint water. For extra protection on roofs, apply Asbestos Roof Coating as second coat.

FOR COMPLETE ROOFING INSTRUCTIONS, send for your FREE copy of Wards "How To Paint" Book—coupon on Page 760.

IMPORTANT SHIPPING INFORMATION

Barrels, 30- and 55-gal., shipped promptly by Freight from Factories in Chicago, Ill.; Cleveland, O.; Minneapolis, Minn.; Kansas City, Mo.; Denver, Colo.; near Dallas, Tex.; near New York City. You pay shipping charges from nearest point. Additional Shipping Information on Pages 970, 971.

PAY 10% DOWN. See Wards Monthly Payment Plan, Page 981.

THINNERS, LINSEED OILS

TYPES OF PAINT AND VARNISH THINNERS

Thinners are essential for most paint jobs—preparing the surface, reducing paint, cleaning brushes and equipment, wiping up spatters, etc. Proper selection is important. Follow directions given in catalog descriptions or on the label. Basic thinners used today are:

PAINT AND VARNISH THINNER. A mineral product. Same uses as turpentine, but has less odor and costs less.

TURPENTINE. Two types: GUM SPIRITS and STEAM-DISTILLED. Source and performance of both are same. Gum type is distilled from the gum after it has been bled from the tree. Steam-type is distilled directly from the wood, thereby eliminating the gum-bleeding process.

LINSEED OIL. Extracted from flax seeds. Two types: BOILED and RAW. Raw used in thinning house and barn paints. Boiled is made of raw linseed oil with driers cooked into it. This process makes oil dry better. Boiled is used when faster, harder drying is required. Too much linseed oil creates excessive dirt collection and is not recommended.

SHELLAC, LACQUER THINNERS (Page 761). Use with shellac, lacquer only. Clean brushes, hands.

WOOD TURPENTINE 34c Qt.

STEAM-DISTILLED. Top quality. Low-priced. Use with oil-base paints, enamels and varnishes. See Facts above.

75 C 1230 L—QUART. Shipping weight 2 lbs.....34c

75 C 1231 L—GALLON. Shipping weight 11 lbs.....97c

PAINT AND VARNISH THINNERS 29c AND 45c Qt.

NU-PURPOSE. High solvent—thins any oil-base paint, enamel or varnish. Cleans brushes, rollers, hands. Strong—less needed. *Required* for Rubberized Stucco Paints, Rubber-base Floor Enamels, Pale Trim Varnishes, Plastic Wipe-on Finishes. See Facts left.

75 C 1246 L—QUART. Shipping weight 2 lbs.....

75 C 1247 L—GALLON. Shipping weight 11 lbs.....$1.

MINERAL SPIRITS. Good quality. Low priced. Use with oil-base paints, enamels, varnishes. Pure and clear. See Facts left.

75 C 1220 L—QUART. Shipping weight 2 lbs. 4 oz.....

75 C 1221 L—GALLON. Shipping weight 11 lbs.....

LINSEED OILS 55c AND 57c Qt.

RAW. Pure. Finest quality. For thinning paint. Also for refinishing antiques, gun stocks; protecting wood ladders, soil; treating fence posts; retarding rust. See Facts left.

To use Wards Super House Paint (without undercoat), 2-coat application, order ½ pint linseed oil, Raw or Boiled (and ½ pint thinner or turpentine) per gallon, for first coat.

75 C 1201 L—QUART. Shipping weight 2 lbs.....

75 C 1202 L—GALLON. Shipping Weight 11 lbs.....$1.

75 C 1203 MO—5-GAL. CAN. Shipping weight 43 lbs.....

BOILED. Same as above but better for cold weather. See Facts.

75 C 1206 L—QUART. Shipping weight 2 lbs.....

Customer Services

PAINT SELECTING AIDS

By doing your own planning and painting the Ward way, you'll save time, money and effort without sacrificing quality.

EVERY WARD PAINT IS GUARANTEED to cover as much surface, hide as well, apply as easily, last as long, and look as well as any comparable paint, regardless of name or price.

Ward paints will give satisfactory results when applied by either professional or amateur, according to instructions furnished. Should they fail Wards will refund your money, including shipping charges.

To help you select the proper finishes and tools, read the "Fact" stories and buying guides throughout this section of the Catalog, as well as the product descriptions.

Then plan your color schemes. Cards listed below show ready-mixed and intermix colors. No. 100 is arranged by harmonizing groups to help you plan color schemes. They are available without charge at any Ward Catalog Office or by sending in the coupon below. Just check your selection.

COLOR CARD No. 100 shows 21 matching interior colors in which Rubberflex Flat and Thixotropic Satin are offered, plus 49 colors that can be created by simple inter-mixing of the *same type* of paint. All colors arranged in decorator co-ordinated groups to help you plan entire color scheme. Includes 5 nationally advertised General Electric kitchen colors, offered in Thixotropic Satin.

COLOR CARD No. 20 shows colors for: House; Barn; Trim and Shutter; Shingle and Shake; Stucco and Masonry paints.

COLOR CARD No. 300 shows super interior paint colors in Flat, Semi-Gloss and Gloss; also Thixotropic in Flat; Ready-mix and Powdered Texture Paints; Casein Paint.

COLOR CARD No. 40 shows colors for interior and exterior finishes in: All-Purpose Enamel; Tred-Pruf Porch and Floor Paint; Rubber-base Floor Enamel; Color Varnish.

COLOR CARD No. 50 shows Pigmented Wiping Stain.

SPECIAL CARDS for Super Kem-Tone; Bondex. See coupon.

EASY PAINTING INSTRUCTIONS

For best methods of decorating and repairing the interior or exterior surfaces of your home, farm or shop, ask or send for your FREE copy of Wards "How To Paint" book—44 pages packed with information, from planning color schemes to repairing roofs. Use coupon below.

DO YOU HAVE A SPECIAL PAINTING PROBLEM?

If so, consult Ward experts, without charge. Write to Paint Advisory Service, Montgomery Ward, 10th and Washington Streets, Chicago Heights, Illinois. State problem fully.

HOW TO SAVE MORE ON WARD PAINTS

QUICK AND EASY. If you live in a Ward Metropolitan Delivery area, purchase your paint and paint supplies in minutes—without leaving your home. Orders phoned before noon delivered to local addresses usually next day—to suburban addresses second day. You save on C.O.D. charges.

Or, phone for and pick-up your paint at nearest Ward Catalog Office. Save as much as 75% of the delivery charges. See Pages 954, 955 for further information.

Quart and Gallon size cans may be sent by mail and have easy-to-open Ring Seals to meet Postal regulations. Orders over 50 lbs. and all 5-gal. cans shipped by freight.

SUPER TEXTURE FINISH 3.65 Gal.

RENEWS AND REDECORATES WALLS in one simple application.

HIDES SMALL HOLES, CRACKS. Covers dents and tape joints.

ECONOMICAL. Compare coverage; compare price.

RUBBER BASE FINISH for use on wallboard, plaster, brick, paint or primed metal. Excellent for dry wall construction. One coat gives surface the look of expensive plaster or textured effect. Tough and durable; truly scrubbable.

Apply with paint brush, then texture with roller (75C4746, Page 763), brush, sponge, wadded paper, or whisk broom. There is no limit to variety of textures. For badly cracked walls add one quart Sand-Kote per gallon.

Comes ready mixed, ready to apply; no primer needed. Gallon covers to 300 sq. ft., depending upon texture and surface. Send for FREE Color Card No. 300 at left. *State size.*

Choose the Right Brush for Each Paint Job

FACTS ABOUT PAINT BRUSHES

BUY QUALITY. Good paint brushes mean less work, better finish, long-run economy.

BRISTLE. Natural black Chinese hog bristles now almost unobtainable. Other natural and synthetic bristles make excellent brushes:

1) NATURAL. Split, tapered ends ("flags") hold good paint load, give smooth finish. "Natural" (light color) stays more flexible, durable than dyed (black). "Bristleox" is soft, flexible, resilient mixture of French bristle and ox hair—natural red.

2) NEOCETA. Bristles grooved, tapered for good load, smooth finish. Not for lacquer.

3) TYNEX NYLON. Tapered, flagged, for good load, smooth finish.

SIZE AND TYPE. *Varnish and Enamel Brushes* have quite tapered ("chisel") edges for smoother application of varnish, enamel.

Wall Brushes, fuller-bodied, less tapered, for fast application of paint, etc., on large surfaces—siding, walls, ceilings, floors—on wood, plaster, stucco, brick, etc.

Trim Brushes, for window dividers, molding, rungs, etc. Angular edge type excellent for sharp "cutting in" at corners, edges, etc.

Width depends on type, shape, width of surface to be finished. For fastest application, use widest brush suitable for surface, though brush over 3, 3½ in. may tire arm.

CONSTRUCTION. Ward brushes have following features: 1) Bristles vulcanized in rubber or plastic—can't come out (brush 17) is staple-set). 2) Smooth hardwood handles, shaped and balanced for comfort, performance. 3) Stainless steel or nickel plated ferrules, firmly crimped, riveted, soldered. 4) Jackets for protection in storage; instructions for care on back.

VARNISH-ENAMEL BRUSHES FOR DOORS, FURNITURE, ETC. 23c TO 4.98

1 TO 7 Chisel edge gives smoother finish, improved paint flow. For professional or amateur. Use on woodwork, moldings, windows and furniture. Full body of long, firmly-set bristles hold good paint load, save dipping.

Properly tapered and soft, they have firm snap and elasticity. Balanced mixture of bristle lengths for good paint pick-up and working capacity. Bristles vulcanized in rubber—won't shed while painting. Strong steel ferrules prevent warping. Balanced wood handles sanded and lacquered. Each brush has jacket for storing. Guaranteed as below.

1 PURE HOG. For oil-base paints, varnishes.

Cat. No.	Width	Bristle	Ship. wt.	Price
75 C 5005	1 in.	1⅞ in.	5 oz.	23c

Roller Coaters Paint Large Areas Faster

PORTABLE PRESSURE TYPE SET 18.95

19 Paints large areas, indoors or out, faster, easier, cleaner. Pour paint in 2½-gal. tank, pump a few strokes, push button on aluminum handle. No drip or splatter. Roller 6 in. wide; sheepswool cover. Cotton sleeve for enamel. For enamel, oil-or water-base paint.

SET: Tank, Roller, Cover, Sleeve, 12-ft. rubber hose.
75 C 4765 M—Ship. wt. 10 lbs. $18.95
75 C 4766—EXTRA ROLLER COVER. Ship. wt. 8 oz. 1.59
EXTENSION HANDLE. (Not shown.) For above. Lgth. 24 in.
75 C 4767 L—Metal tubing. Ship. wt. 12 oz. $1.39

WORK-SAVING SELF-FEED APPLICATOR 2.98

20 Requires slight pressure to roll paint on—no dipping. Holds pint—covers to 65 sq. ft., 1 filling. Rust-resistant cylinder. Won't drip. Roller 6 in. wide; easy to remove, clean. Metal handle, threaded inside—use mop handle for extension to paint ceilings, floors.

75 C 4760—SELF-FEED APPLICATOR with Cover for OIL-BASE Paint and Enamel. Ship. wt. 1 lb. 4 oz. $2.98
75 C 4759—SELF-FEED APPLICATOR with Cover for RUBBER BASE, Water-thinned Paints. Wt. 1 lb. 4 oz. $2.98
75 C 4761—EXTRA OIL-BASE COVER. Ship. wt. 4 oz. 75c
75 C 4762—EXTRA RUBBER-BASE COVER. Wt. 4 oz. 75c

21 ROLLER-MATE FOR "CUT-IN", CORNER PAINTING. Use for sharp, clean lines at ceiling, moldings etc. where large roller won't reach. Spreads paint evenly. Pad (replacements below) snaps on or off plastic base.
75 C 4785—Ship. wt. 6 oz. ..... Each 63c

REPLACEMENT PAD. For (21) above. Clean and reuse.
75 C 4786—Ship. wt. 3 oz. ..... Each 43c

22 "SASHIE." KEEPS PAINT OFF GLASS, WALLS. For window cross pieces, sash, moldings; etc. Saves scraping, cleaning. Plastic with mohair pad. Reusable.
75 C 4790—Ship. wt. 3 oz. ..... Each 30c

23 EDGE ROLLER. Use for corners, around woodwork, etc.
75 C 4756—2 in.; Wool-Covered. Ship. wt. 8 oz. 69c

COMPLETE ROLLER APPLICATOR SETS ... REGULAR 1.89 ... PROFESSIONAL 2.39 ... LARGE DIAM. 2.98

FACTS ABOUT ROLLER APPLICATORS. A roller is excellent for painting large interior surfaces. It requires less dipping; is less tiring; lessens risk of lap marks. Best for ceilings.

Rollers spread paint evenly over surface, often allowing greater coverage per gallon; costs less to decorate.

THREE TYPES available for amateur or professional are:
1) TRAY FED (24 to 26 below). Dipped into tray of paint.
2) SELF-FEED (20 left). Do not have to be dipped. Covering absorbs paint from center reservoir as pressure applied.
3) PRESSURE (19 left). Receives paint through hose from pressurized supply tank. For extensive painting.

ROLLER SIZE. Tray-fed rollers 1½- or 3-in. inside diam. and 7 or 9 in. long. Most amateurs use 1½ by 7 in. The 3 by 9 in. is faster, heavier. Use EDGE ROLLER (23, left) or ROLLER-MATE (21, left) around moldings, in corners.

ROLLERS WITH STEEL OR BRASS BEARINGS inserted in end caps turn easier; are steadier and last longer. Low-priced rollers use mere holes in end caps for bearings.

KINDS OF ROLLER COVERS: 1) *Slip-on.* Slip over drum permanently affixed to handle. 2) *End-cap.* Cover held in place with cap at each end. Caps form wheel which rides on carriage. Several types of fabric are available; each for specific purposes. These can be interchanged.

SHORT-NAP MOHAIR gives smooth finish with any paint; especially for enamels, rubber-base, acrylic paints.

WOOL NAP. Suitable for flat finish oil-base or water-thinned paints. Recommended for rough surfaces.

DYNEL NAP. Synthetic. For most paints. Lower-priced.

WOOL PILE; RUBBER. For stipple or texture.

COVER CORES. Most are fiber. Those impregnated with waterproof phenolic resin are best. Will not buckle or soften from water or solvents. Better performance; longer life.

PAINT TRAYS. Tin plated type recommended. Painted trays may flake off in paint being applied. All 3-qt. trays have practical working capacity of about 1½ qts.; 2-qt. size, about 1 qt. Trays hook onto stepladder.

24 25 26 See Facts above. Order from table. All with Phenolic core.

(24) REGULAR SIZE. Slip-on 7-in. type. Steel insert bearings. Tray "2 qt.".

(25) PROFESSIONAL SIZE. Wider; paints faster. Slip-on 9-in. type. Steel insert bearings. Tray "3-qt." size.

(26) LARGE DIAM. Paints fast with slower rotation—less spray. Slip-on 9-in. type. Brass insert bearings. Threaded to fit 14-in. extension handle included with set. Tray "3-qt." size.

28 SAV-A-ROLLER. Cleans and stores rollers quickly without mess. Fits standard 7- and 9-in. by 1½-in. diam. rollers. With 1 qt. solvent for oil paints—re-use over and over. For re-fill use 1 qt. Nu-Purpose Thinner, Page 758.
75 C 5809 L—Ship. wt. 2 lbs. 8 oz. 79c

HANDLE EXTENSION. (Not shown.) For floors, ceilings. Use with any hand-dip roller, above.
75 C 4750 M—48 in. long. Ship. wt. 1 lb. 8 oz. 79c

TEXTURE ROLLERS. (Not shown.) WOOL PILE for fine stipple; RUBBER for stipple, or can be cut or gouged to various designs. Apply Texture Paint with short brush, then roll. Use tray above.

WOOL PILE. Width 7 in. With phenolic resin core.
75 C 4746—ROLLER ONLY. Ship. wt. 1 lb. $1.19
75 C 4747—EXTRA COVER. Ship. wt. 5 oz. 98c

SPONGE RUBBER. Width 7 in. Phenolic resin core.
75 C 4751—Ship. wt. 1 lb. $1.25

FOLDING WALLPAPER PASTE TABLE 11.45

29 FOLDS TO 11¼ IN. for carrying; allows for tools. Made of seasoned wood. Steel cross braces. Brackets hold extension board (order below) for wider paper. Zinc cutting strip (below) included. Height 32¾ in.
75 C 5393 R—LENGTH 6 FT. Ship. wt. 30 lbs. $11.45

EXTENSION BOARD. For table above. Size 6 ft. by 7½ in.
75 C 5340 R—Ship. wt. 5 lbs. $1.89

ZINC CUTTING STRIP. For (29) (31) (37) (38). Width 3 in.
75 C 5383—LENGTH 6 FT. Ship. wt. 1 lb. 55c

30 WOOD TRESTLES. Use as legs for Board (31) below. Height adjusts from 31 to 33¾ in. Fold for carrying.
75 C 5396 M—Ship. wt. 8 lbs. ..... Pair $2.69

31 HINGED PASTE BOARD. ½ in. thick. Reinforced cutting edge. Zinc cutting strip (above) included. Width 2½ in. open. Use Trestles (30) above for legs.
75 C 5388 R—LENGTH 6 FT. Ship. wt. 18 lbs. $5.95

PAPER HANGING KIT 1.55, 2.19 ... WALLPAPER TRIMMERS, PAPER HANGING TOOLS AND ACCESSORIES

32 PAPERING KITS. Each contains: 12-in. smoothing brush; 6-in. paste brush; steel scraper; 1½-in. wheel knife; 1½-in. maple seam roller; plumb bob; cord; chalk. Wood handles; nickled frames.

BETTER QUALITY. Palma fiber brushes. Ship. wt. 2 lbs. 8 oz.
75 C 5348 ..... Kit $2.19

GOOD QUALITY. Tampico fiber brushes. Ship. wt. 2 lbs. 4 oz.
75 C 5350 ..... Kit $1.55

33 SMOOTHING BRUSH. 12 in. 2⅛ in. pure bristle. Wt. 12 oz.
75 C 5314—BEST QUALITY ... $3.69
75 C 5319—GOOD QUALITY. Same but with horsehair $1.29

34 WALLPAPER CLEANER. Non-crumbly. Also cleans window shades. 40-oz. can.
75 C 5910—Ship. wt. 3 lbs. 57c

35 WALLPAPER WHEAT PASTE. Spreads evenly. Pound pastes 6 double rolls.
75 C 5300—2-lb. Bag. Ship. wt. 3 lbs. ... 37c
75 C 5301—5-lb. Bag. Ship. wt. 6 lbs. ... 85c

UNITED WALLPAPER PASTE. Non-staining; odorless. Package pastes 6 double rolls.
75 C 5302—5¾-oz. Pkg. Ship. wt. 6 oz. . 69c

36 WALL SIZE. Use before papering; paper sticks better. Pound does 10x12-ft. room.
75 C 5931—Ship. wt. 1 lb. 8 oz. 29c

37 6-FT. WALLPAPER TRIMMER. Laminated 5-ply wood. Plated cutter; steel blade.
75C5381MO—With Zinc Strip. Wt. 6 lbs. $9.89

38 5-FT. TRIMMER. Wheel cutter. Zinc strip.
75 C 5367 M—Ship. wt. 3 lbs. $1.79

39 WALLPAPER REMOVER. One pint bottle with scraper or steamer does average room.
75 C 5304—Ship. wt. 2 lbs. 6 oz. 45c

40 MAPLE SEAM ROLLER. Prevents seam bulge.
75 C 5334—Oval 2-in. face. Wt. 9 oz. 55c

41 PASTE BRUSH. Width 7 in. Set in rubber.
BEST QUALITY. With 60% Horsehair; 40% fiber.
75 C 5311—Ship. wt. 1 lb. 8 oz. $1.69
GOOD QUALITY. With 100% Tampico fiber.
75 C 5308—Ship. wt. 8 oz. 65c

42 SHEARS, 12-IN. Spring steel. 7½-in. blades.
75 C 5337—Ship. wt. 1 lb. 14 oz. . $2.45

The Truth About

PAINT SPRAYERS AND SPRAY GUNS

PAINT SPRAYERS. Tests prove you can spray paint 4 to 10 times faster than you can brush it on. In selecting the Sprayer and accessories suitable for your needs, consider these important factors:

AIR CAPACITY. Sprayers are rated by "air displacement"—cu. ft. of air produced per minute. However, due to friction, heat loss, etc., not all air displaced can be used.

The usable cu. ft. of air per min. is called "air delivery." The greater the air delivery at a given working pressure, the larger output gun you can use and the faster you can spray, within limits. Compare air delivery before you buy a sprayer.

TYPES OF AIR COMPRESSORS. Two types in general use on quality sprayers are *Diaphragm* and *Piston*. Diaphragm type operates by the pulsation of a flexible disc in cylinder, while piston type has metal piston sliding within cylinder. Both are effective. Measured in air delivery, diaphragm type is generally lower in cost; practical for small and medium size equipment. Diaphragm wears out after considerable use; easily replaced at low cost.

The piston type should operate much longer without servicing, but eventual overhaul is more costly. Wards basically new OIL-LESS piston sprayers (1) and (2) and all diaphragm types need no lubrication; conventional piston types do.

The diaphragm type is popular, within its capacity limits, for intermittent use for short periods. Piston type is best for steady or heavy work in shop, on farm, etc.

SIZE TO BUY. For home or light shop work, a compressor with a ½- or ⅓-HP electric motor gives good results at moderate cost. Select ½-HP or larger for farms, painting buildings, autos; any sustained use.

PAINT SPRAY GUNS. Conventional guns usually classified: Internal-mix or External mix; and Bleeder or Non-Bleeder.

Internal-Mix atomizes air and paint inside spray nozzle; External-Mix atomizes outside of the nozzle.

Principles applicable to all guns except those with outfits (1) to (3) are: (a) For maximum efficiency, use Internal-Mix with pressure feed; External-Mix with siphon feed. (b) Use Internal-Mix for slow-drying finishes; External-Mix for fast drying lacquer, shellac.

Wards outstanding oil-less piston sprayers, (1) to (3), have guns with a new-type nozzle that not only adjusts for round, fan or angle spray, but also will spray heavy or light; fast- or slow-drying finishes equally well. Quick, simple adjustment.

BLEEDER gun is necessary for all sprayers used without air pressure tank and automatic pressure switch. Trigger controls only materials sprayed; air flow is continuous so that pressure does not build up.

NON-BLEEDER gun is used with compressed air lines or with pressure tank type sprayer having automatic pressure control switch. Trigger controls flow of both material and air at the same time; conserves air supply.

Spray gun listed under each spray outfit may be used with similar outfits.

Oil-Less and Conventional Piston Type Paint Sprayers

COMPACT OIL-LESS PISTON SPRAYERS 52.95 TO 87.95

GRAPHITE RINGS NEED NO OIL. Assure oil-free air.

EASY-TO-HANDLE UNIT DESIGN of aluminum alloy.

ALL-PURPOSE GUN FOR ALL JOBS; with any fluid.

1 TO 3 For amateur, professional or industrial use. Laboratory- and field-tested (regular production models) for 7000 hours of continuous operation without appreciable wear.

COMPRESSOR AND MOTOR HOUSING with blue and red baked-on enamel finish, polished aluminum trim. Six models—five direct drive; one belt drive. (See also (8) below.) No. 6540 has base plate for mounting ¼-HP motor; motor not included.

Graphite piston rings and skirts lower friction. Offer oil-free air without oil extractors on air lines. Short horizontal piston stroke—opposed in twin models for smoother operation. Positive sealing, self-cleaning valves eliminate carbon build-up. Sealed-in ball bearings, lubricated for life.

Built-in "after-cooler". Crankcase designed to perform multiple functions of after-cooler, pulsation chamber, moisture separator. Reduces moisture in air line, cleans air, increased efficiency.

For protection of compressor and motor, each cylinder head is equipped with safety valve and renewable in-let air filter. Leakproof moisture drain is easily accessible. Air inlets, ¼-in.

HEAVY-DUTY CAPACITOR MOTOR on 6458; others have split-phase. All for 110- to 120-volt, 60-cycle AC. Motor not included with No. 6540.

UNIVERSAL EXTERNAL MIX GUN with aluminum quart paint cup. For heavy or light fluids; slow or fast drying. Adjusts to coarse or fine spray in round, fan or angle pattern. Use with siphon, pressure or tank feed. See Facts on Guns, above.

OUTFIT: Compressor, gun (bleeder type with ¼-HP; combination bleeder and non-bleeder with others), 15-ft. air hose, tire chuck, instructions.

Key	Cat. No.	Pistons	HP	Displaces	At RPM	Delivers	Work. Pressure	Ship. wt.	Pay Down	Cash
(1)	75 C 6540 M	2	..	3.87 CFM*	1650	2.3 CFM*	35 lbs.	24 lbs.	$11.50	$55.95
(1)	75 C 6541 YB	2	¼	3.87 CFM*	1650	2.3 CFM*	35 lbs.	44 lbs.	14.00	68.95
(2)	75 C 6458 MO	2	½	5.35 CFM*	1690	3.7 CFM*	37 lbs.	47 lbs.	18.00	87.95
(3)	75 C 6455 MB	1	¼	2.7 CFM*	1700	1.8 CFM*	30 lbs.	37 lbs.	11.00	52.95
(3)	75 C 6456 MB	2	¼	3.87 CFM*	1650	2.3 CFM*	35 lbs.	38 lbs.	13.50	65.95
(3)	75 C 6464 MO	2	⅓	4.72 CFM*	1700	3.0 CFM*	35 lbs.	45 lbs.	15.50	76.95

*CFM means cubic feet of air per minute.

4 SPRAYER CART. For (2) or (3) above. Semi-pneumatic, 6-in. rubber tires. Steel axle. Oilite bearings.
75 C 6461M—With Aluminum handle, rubber grip. Shipping weight 7 lbs. $9.95

CONVENTIONAL PISTON SPRAYERS 41.50 TO 119.50

AUTOMOTIVE TYPE PISTONS, EACH WITH 2 RINGS, reduce oil pumping.

ENCLOSED OIL SEPARATORS AND AIR FILTERS provide clean, dry air.

ONE GUN FOR ALL JOBS. Can be used with any types of materials.

5 6 Heat-treated aluminum alloy pistons in precision-honed cylinders, give added power, air supply. Pistons joined to connecting rods with ground piston pins for quiet operation. Splash-type lubrication system completely bathes pistons for longer wear. Extra capacity ball bearings reduce friction. Oversize air pulsation chamber. Automatic safety valve. Convenient oil level check plug. Air gauges on heavy-duty models.

Balanced, lightweight spray gun with quart aluminum paint cup. Easy to adjust for all jobs. Can be converted for use with material tank. See Facts.

(5) SINGLE PISTON ELECTRIC. Belt drive. For home, farm or light shop use. Displaces 3.5 cu. ft., delivers 2.45 cu. ft., air per minute at 35 lbs. working pressure. Motor ⅓ HP for 110- to 120-volt, 60-cycle AC. Size: 14½x9x9½ in. high. Includes: Gun (18), opposite page, 15-ft. hose, 8-ft. cord, belt, pulleys.

75 C 6420 YB—OUTFIT. Ship. wt. 39 lbs. $11.50 Down ..... or Cash $56.45
75 C 6421M—OUTFIT LESS MOTOR. Ship. wt. 18 lbs. *Mailable* 41.50

(6) HEAVY-DUTY TWIN PISTON GASOLINE POWERED. Belt drive. For house, barn, fence or intermittent professional use. Displaces 8 cu. ft., delivers 5.6 cu. ft. air per minute at 40 lbs. working pressure. Paint anywhere; no electric power needed.

Air-cooled 1½-HP Clinton Gasoline Engine. Four cycle, single cylinder, L-head. Air passes through deep fins to maintain correct operating temperature for long periods of running. Easy to start with rope. Moisture and dustproof. With fully enclosed ignition points. Visible oil-bath type air cleaner. Oil filler conveniently located for easy checking and filling. One quart capacity fuel tank with strainer and shut off. Engine can be substituted with any gas engine up to 1¾ HP with pulley ratio to develop 1800 RPM on compressor.

Size: 16x11⅛x11¼ in. high. Includes: Gun No. 6402 (19), opposite page; 15-ft. air hose; belt; pulleys. Order Cart (7) below for easy mobility.

75 C 6505 R—OUTFIT. Ship. wt. 48 lbs. $23 Down ..... or Cash $114.50
75 C 6506 R—COMPRESSOR WITH ENGINE ONLY. Ship. wt. 44 lbs. 99.50
75 C 6507 R—OUTFIT LESS ENGINE. Ship. wt. 29 lbs. 72.50

HEAVY-DUTY TWIN-PISTON ELECTRIC. Belt drive. Compressor like (6) above. Displaces 7.2 cu. ft., delivers 5.04 cu. ft. air per minute at 40 lbs. working pressure. Capacitor ¾-HP motor for 110- to 120-volt, 60-cycle AC. Size: 16x11⅛x11¼ in. high. Includes: Gun No. 6402, (19) opposite page; 15-ft. hose; 10-ft. cord; belt and pulley. Order Cart (7) below for easy mobility.

75 C 6511 R—OUTFIT. Ship. wt. 82 lbs. $24 Down ..... or Cash $119.50
75 C 6512 R—COMPRESSOR WITH MOTOR ONLY. Ship. wt. 79 lbs. 104.50
75 C 6513 R—OUTFIT LESS MOTOR. Ship. wt. 29 lbs. 72.50

7 CART. For (5) or (6) above. Rubber 8-in. wheels. Steel axle and handle.
75 C 6517 M—Shipping weight 10 pounds $9.95

TANK MOUNTED COMPRESSOR 119.95

8 OIL-LESS PISTON COMPRESSOR. Like (2) above. For automatic operation in low-pressure applications. Automatic pressure switch (with relief valve) starts at 35 lbs. pressure, stops at 50 lbs. Check valve on compressor outlet.

Mounted on 10-gal. non-code welded steel tank where compressed air is stored for use until required. Shut-off valve on tank outlet. Tank drain valve. Pressure gauge. Safety valve. With 8-ft. cord. Size overall: 31½x12¼x20½ in. high.

Order Spray Gun (20), Air Hose (21), opposite page. Shipped from Factory near Chicago. Allow 10 days extra for preparation, plus time in transit. Pay $24 Down. Terms on Inside Back Cover.

75 C 6590 F—Ship. wt. 78 lbs. ..... Cash $119.95

SIMPLE SPRAYING INSTRUCTIONS

Send for your FREE copy of Wards "How To Paint" Book—coupon on Page 760.

BURGESS VIBRO UTILITY SPRAYER 12.95

9 FOR TOUCH-UP AND SMALL PAINT JOBS around home, farm, or shop. Also for insect and garden spraying. Plug into any 110- to 120-volt, 50- to 60-cycle AC outlet and spray.

Pattern and volume adjustable. Stainless steel spinner. Sapphire nozzle and pump can be quickly cleaned. All other mechanism sealed in. With quart glass jar, 8-ft. cord.

75 CP 6451—*Postpaid* $12.95

10 AIR DUSTER BLOW GUN. Cleans, dusts, dries. Handy trigger control. Snout 3 in. long. Nozzle diam. 5/64 in. Male ¼-in. pipe threads. Use with any compressor on this or opposite page.

75 C 6290—Ship. wt. 3 oz. $1.39

11 QUICK-SNAP AIR HOSE COUPLING. Snap coupling apart; air automatically shuts off. Male body, female plug. Male ¼-in. pipe threads.

75 C 6277—Ship. wt. 6 oz. $1.49

PAINTERS' RESPIRATOR 2.19

12 PROTECTS LUNGS. Exhalation valve for easy breathing. Soft rubber face-piece fits snugly. Adjustable. Includes 5 wool felt filters.

75 C 6201—Ship. wt. 10 oz. $2.19

EXTRA FILTERS. For above. 2 pkgs. of 10 each.

75 C 6205—Ship. wt. 4 oz. ..... Two Pkgs. for 35c

BELT WATER TRAP. (Not shown.) Removes water from spray gun air line. Excellent for siphon feed guns when used where humidity is high. Mounts on air line 4 ft. from gun. Clips on operator's belt. Has ¼-in. pipe thread connection. With 4-ft. air hose.

75 C 6235—Ship. wt. 1 lb. 8 oz. $3.98

INSECTICIDE GUN. (Not shown.) Inexpensive, external-mix gun. With over-shot siphon feed for spraying insecticides, or for small paint jobs. Operates on 15 to 40 lbs. air pressure.

75 C 6236—Ship. wt. 2 lbs. $3.95

Low-Cost Diaphragm Type Provides Oil-Free Air

PORTABLE OR PERMANENT-MOUNT PAINT SPRAYERS . . . SINGLE AND TWIN MODELS 25.00 TO 102.00

NO PISTONS; NO OIL—deliver clean, dry, oil-free air.
REASONABLY PRICED. Fine for home or limited industrial use.
LOW-COST MAINTENANCE, OPERATION. Parts interchangeable.
Elimination of pistons reduces compression loss due to "piston-slipping" Multiple 8-ply diaphragms of heat-resisting material give long service—can be easily replaced. Oversize "built-in" Surge-Chamber eliminates pulsation, keeps air at proper working pressure. No connections or piping to cause leakage.

No off-center weights to set up vibrations. Permanently greased and sealed ball bearings need no oil. See Sprayer Facts, opposite page.

PORTABLE TANK MODEL 95.75

13 EASY MANEUVERABILITY TO JOB. Wheels and handle can easily be removed for anchoring to floor. For shops, garages, farm maintenance, etc.

COMPRESSOR: Belt drive. Displaces 3.3 cu. ft., delivers 2 cu. ft. air per minute at 30 lbs. working pressure. Electric motor ¼-HP capacitor with 10-ft. cord. For 110- to 120-volt, 60-cycle AC.

Mounted on 11½-gallon welded steel tank. Automatic switch starts compressor at 30 lbs., stops at 45 lbs. With safety valve, moisture trap, pressure gauge. Size overall: 23x12x25 in. high.

OUTFIT: Compressor; motor; tank with steel handle, axle, rubber wheels, feet; internal mix, non-bleeder gun with fan and round heads; qt. aluminum paint cup; 15-ft. hose; V-belt; pulleys; tire chuck. Can be used with Paint Tank (23) below. Pay $19.50 Down.

75 C 6362 R—Ship. wt. 95 lbs.....Cash $95.75
75 C 6363 R—LESS GUN, HOSE. Wt. 90 lbs. 85.45

HEAVY-DUTY ½-HP TWIN 102.00

14 EASILY MOVED WITH WHEELS AND HANDLE or securely affixed. For heavy farm and home use or moderate production work.

COMPRESSOR. Belt drive. Displaces 6.7 cu. ft., delivers 3.3 cu. ft., air per minute at 40 lbs. working pressure. Air intake filters for clean air. Electric motor ½ HP capacitor for 110- to 120-volt, 60-cycle AC; 8-ft. cord; switch. With pressure gauge, adjustable safety valve, built-in moisture trap. Size overall: 23x15x15½ in. high.

OUTFIT: Compressor; motor; steel handle, axle with rubber wheels; internal mix bleeder gun with fan and round spray heads, qt. aluminum paint cup; 15-ft. hose; V-belt; pulleys; tire chuck. Usable with Paint Tank (23) below. Pay $20.50 Down.

75 C 6208 R—OUTFIT. Wt. 76 lbs..Cash $102.00
75 C 6209 R—OUTFIT LESS MOTOR.
Shipping wt. 48 lbs.....$75.00

DE VILBISS ⅓-HP 84.17

17 COMPACT; LIGHTWEIGHT. Made by one of the world's leading paint sprayer manufacturers.

Housing of aluminum alloy, enameled in brown and orange. One-unit design for easy carrying. Good air source for tire inflation, dusting, operating small air tools as well as spray painting—for farm, home or professional use. (FREE Catalog of other De Vilbiss equipment—see below, left.)

DIRECT-DRIVE COMPRESSOR displaces 4.15 cu. ft. (at 1725 RPM), delivers 2.5 cu. ft. air per minute at 35 lbs. working pressure; maximum pressure 50 lbs.

Counter-balance, precision ball bearings, air-blast cooling, mean years of smooth, trouble-free use. Tough synthetic, replaceable diaphragm, gives clean oil-free air. Split-phase ⅓-HP motor for 110- to 120-volt, 60-cycle AC with 8-ft. cord.

OUTFIT: Compressor; motor; pressure feed gun with fluid adjustment, quart aluminum paint cup; 12-ft. hose. $17 Down. *Postpaid.*

75 CP 6305 MO.....Cash $84.17

DE VILBISS HEAVY-DUTY EQUIPMENT

BUY DIRECT FROM WARDS, nationally known De Vilbiss specialized heavy-duty equipment for spray painting. Use in automotive, metal shops; for production; on farm; for other heavy-duty jobs.

A FREE comprehensive catalog illustrating this complete line of equipment and a price list will be sent to you on request.

Send a post card or letter requesting *De Vilbiss Professional Equipment Catalog to Engineering Service Department* at your regular Ward Mail Order House.

COMBINATION ALUMINUM SPRAY GUNS 8.95 TO 17.95

18 TO 20 ONE GUN FOR ALL JOBS. Gun (18) with fan and round internal mix spray heads; (19) with fan external, round and fan internal mix. Gun (20) with external mix (pattern adjustable); bleeder or non-bleeder and fan internal mix. Each with quart paint cup.

Cat. No.	Operating Pressure	HP	Displacement	Ship. wt.	Price
Internal-Mix Only; Bleeder Only					
(18) 75 C 6400	25–35 lbs.	¼–⅓	3 cu. ft.	2½ lbs.	$ 8.95
Combination Internal- or External-Mix; Bleeder Only					
(19) 75 C 6401	30–45 lbs.	⅓ to ½	4 cu. ft.	2½ lbs.	12.45
75 C 6402	30–45 lbs.	¾ to 1½	5–6 cu. ft.	2½ lbs.	12.45
Combination In- or External-Mix; Bleeder or Non-Bleeder					
(20) 75 C 6403	30–45 lbs.	⅓ to ½	4 cu. ft.	2½ lbs.	17.95
75 C 6404	30–45 lbs.	¾ to 1½	6 cu. ft.	2½ lbs.	17.95

21 RUBBER AIR HOSE. Use 15-ft. length for replacement (no coupler); 25-ft. for extension (with coupler). Connections ¼ inch.

75 C 6244—15-FT. LENGTH. Ship. wt. 1 lb.....$1.69
75 C 6245—25-FT. LENGTH. Ship. wt. 1 lb. 8 oz..... 2.69

HEAVY-DUTY MATERIAL HOSE. Rubber. 15 ft. long. Pipe fitting ⅜ in.
75 C 6276—Shipping weight 2 lbs. 8 oz.....$3.25

AIR LINE SPRAY UNIT 21.95

22 SPRAY DIRECTLY FROM AIR SUPPLY LINE. Regulator with gauge reduces air line or tank pressure of up to 250 lbs. down to 0 to 140 lbs. Separator removes oil, water, dust. Condensation chamber; drain cock at bottom. Connections: outlet ¼-in.; inlet ⅜-in.

External mix, siphon feed spray gun with fan and round spray heads, usable as bleeder or non-bleeder. Gun uses 2 to 4 cu. ft. of air per minute at 25 to 50 lbs. pressure. Includes 15-ft. air hose.

COMPLETE UNIT. Gun, hose, regulator, gauge, separator.
75 C 6206—Shipping weight 7 lbs.....$21.95

REGULATOR, GAUGE AND SEPARATOR ONLY. (No hose or gun.)
75 C 6221—Shipping weight 4 lbs.....$9.25

REGULATOR AND GAUGE ONLY. For air lines or tank (23) below.
75 C 6220—Shipping weight 2 lbs.....$5.95

23 TIME- AND WORK-SAVING PAINT TANK. Replaces cup. Holds 3 gals. Saves re-filling time on large jobs. Use with any Ward gun or sprayer except (9); see adapters, right. Lightweight corrosion-resistant steel with 6-in. opening. Cast-iron top. Brass relief valve (45 lbs. pressure). Hook for carrying or hanging on ladder. *Mailable.*
75 C 6222 M—With 10-ft. air hose, 10-ft. paint hose. Ship. wt. 15 lbs. $22.95

21

MATERIAL HOSE ADAPTER. Use with Tank (23) at left. Adjusts material hose coupler threads to guns listed. Use both 6410 and 6411 with guns (18), (19).

FOR GUNS OF SPRAYERS (1) TO (3).
75 C 6411—Ship. wt. 4 oz.....75c
FOR ALL OTHER GUNS LISTED (Except 20).
75 C 6410—Ship. wt. 4 oz.....35c

THINNERS FOR CLEANING spray guns listed on Page 758.

The Truth About

PAINT SPRAYERS AND SPRAY GUNS

PAINT SPRAYERS. Tests prove you can spray paint 4 to 10 times faster than you can brush it on. In selecting the Sprayer and accessories suitable for your needs, consider these important factors:

AIR CAPACITY. Sprayers are rated by "air displacement"—cu. ft. of air produced per minute. However, due to friction, heat loss, etc., not all air displaced can be used.

The usable cu. ft. of air per min. is called "air delivery." The greater the air delivery at a given working pressure, the larger output gun you can use and the faster you can spray, within limits. Compare air delivery before you buy a sprayer.

TYPES OF AIR COMPRESSORS. Two types in general use on quality sprayers are *Diaphragm* and *Piston*. Diaphragm type operates by the pulsation of a flexible disc in cylinder, while piston type has metal piston sliding within cylinder. Both are effective. Measured in air delivery, diaphragm type is generally lower in cost; practical for small and medium size equipment. Diaphragm wears out after considerable use; easily replaced at low cost.

The piston type should operate much longer without servicing, but eventual overhaul is more costly. Wards basically new OIL-LESS piston sprayers (1) and (2) and all diaphragm types need no lubrication; conventional piston types do.

The diaphragm type is popular, within its capacity limits, for intermittent use for short periods. Piston type is best for steady or heavy work in shop, on farm, etc.

SIZE TO BUY. For home or light shop work, a compressor with a ½- or ⅓-HP electric motor gives good results at moderate cost. Select ½-HP or larger for farms, painting buildings, autos; any sustained use.

PAINT SPRAY GUNS. Conventional guns usually classified: Internal-mix or External mix and Bleeder or Non-Bleeder.

Internal-Mix atomizes air and paint inside spray nozzle; External-Mix atomizes outside of the nozzle.

Principles applicable to all guns except those with outfits (1) to (3) are: (a) For maximum efficiency, use Internal-Mix with pressure feed; External-Mix with siphon feed. (b) Use Internal-Mix for slow-drying finishes; External-Mix for fast drying lacquer, shellac.

Wards outstanding oil-less piston sprayers (1) to (3), have guns with a new-type nozzle that not only adjusts for round, fan or angle spray, but also will spray heavy or light; fast- or slow-drying finishes equally well. Quick, simple adjustment.

BLEEDER gun is necessary for all sprayers used without air pressure tank and automatic pressure switch. Trigger controls only materials sprayed; air flow is continuous so that pressure does not build up.

NON-BLEEDER gun is used with compressed air lines or with pressure tank type sprayer having automatic pressure control switch. Trigger controls flow of both material and air at the same time; conserves air supply.

Spray gun listed under each spray outfit may be used with similar outfits.

Oil-Less and Conventional Piston Type Paint Sprayers

COMPACT OIL-LESS PISTON SPRAYERS 52.95 TO 87.95

GRAPHITE RINGS NEED NO OIL. Assure oil-free air.

EASY-TO-HANDLE UNIT DESIGN of aluminum alloy.

ALL-PURPOSE GUN FOR ALL JOBS: with any fluid.

1 TO 3 For amateur, professional or industrial use. Laboratory- and field-tested (regular production models) for 7000 hours of continuous operation without appreciable wear.

COMPRESSOR AND MOTOR HOUSING with blue and red baked-on enamel finish, polished aluminum trim. Six models—five direct drive; one belt drive. (See also (8) below.) No. 6540 has base plate for mounting ¼-HP motor; motor not included.

Graphite piston rings and skirts lower friction. Offer oil-free air without oil extractors on air lines. Short horizontal piston stroke—opposed in twin models for smoother operation. Positive sealing, self-cleaning valves eliminate carbon build-up. Sealed-in ball bearings, lubricated for life.

Built-in "after-cooler". Crankcase designed to perform multiple functions of after-cooler, pulsation chamber, moisture separator. Reduces moisture in air line, cleans air, increased efficiency.

For protection of compressor and motor, each cylinder head is equipped with safety valve and renewable in-let air filter. Leakproof moisture drain is easily accessible. Air inlets, ¼-in.

HEAVY-DUTY CAPACITOR MOTOR on 6458; others have split-phase. All for 110- to 120-volt, 60-cycle AC. Motor not included with No. 6540.

UNIVERSAL EXTERNAL MIX GUN with aluminum quart paint cup. For heavy or light fluids; slow or fast drying. Adjusts to coarse or fine spray in round, fan or angle pattern. Use with siphon, pressure or tank feed. See Facts on Guns, above.

OUTFIT: Compressor, gun (bleeder type with ¼-HP; combination bleeder and non-bleeder with others), 15-ft. air hose, tire chuck, instructions.

Key	Cat. No.	Pistons	HP	Displaces	At RPM	Delivers	Work. Pressure	Ship. wt.	Pay Down	Cash
(1)	75 C 6540 M	2	..	3.87 CFM*	1650	2.3 CFM*	35 lbs.	24 lbs.	$11.50	$55.95
(1)	75 C 6541 YB	2	¼	3.87 CFM*	1650	2.3 CFM*	35 lbs.	44 lbs.	14.00	68.95
(2)	75 C 6458 MO	2	½	5.35 CFM*	1690	3.7 CFM*	37 lbs.	47 lbs.	18.00	87.95
(3)	75 C 6455 MB	1	¼	2.7 CFM*	1700	1.8 CFM*	30 lbs.	37 lbs.	11.00	52.95
(3)	75 C 6456 MB	2	¼	3.87 CFM*	1650	2.3 CFM*	35 lbs.	38 lbs.	13.50	65.95
(3)	75 C 6464 MO	2	⅓	4.72 CFM*	1700	3.0 CFM*	35 lbs.	45 lbs.	15.50	76.95

*CFM means cubic feet of air per minute.

4 SPRAYER CART. For (2) or (3) above. Semi-pneumatic, 6-in. rubber tires. Steel axle. Oilite bearings.
75 C 6461M—With Aluminum handle, rubber grip. Shipping weight 7 lbs. $9.95

CONVENTIONAL PISTON SPRAYERS 41.50 TO 119.50

AUTOMOTIVE TYPE PISTONS, EACH WITH 2 RINGS, reduce oil pumping.

ENCLOSED OIL SEPARATORS AND AIR FILTERS provide clean, dry air.

ONE GUN FOR ALL JOBS. Can be used with any types of materials.

5 6 Heat-treated aluminum alloy pistons in precision-honed cylinders, give added power, air supply. Pistons joined to connecting rods with ground piston pins for quiet operation. Splash-type lubrication system completely bathes pistons for longer wear. Extra capacity ball bearings reduce friction. Oversize air pulsation chamber. Automatic safety valve. Convenient oil level check plug. Air gauges on heavy-duty models.

Balanced, lightweight spray gun with quart aluminum paint cup. Easy to adjust for all jobs. Can be converted for use with material tank. See Facts.

(5) SINGLE PISTON ELECTRIC. Belt drive. For home, farm or light shop use. Displaces 3.5 cu. ft., delivers 2.45 cu. ft., air per minute at 35 lbs. working pressure. Motor ⅓ HP for 110- to 120-volt, 60-cycle AC. Size: 14½x9x9½ in. high. Includes: Gun (18), opposite page, 15-ft. hose, 8-ft. cord, belt, pulleys.

75 C 6420 YB—OUTFIT. Ship. wt. 39 lbs. $11.50 Down ..... or Cash $56.45
75 C 6421M—OUTFIT LESS MOTOR. Ship. wt. 18 lbs. *Mailable* 41.50

(6) HEAVY-DUTY TWIN PISTON GASOLINE POWERED. Belt drive. For house, barn, fence or intermittent professional use. Displaces 8 cu. ft., delivers 5.6 cu. ft. air per minute at 40 lbs. working pressure. Paint anywhere; no electric power needed.

Air-cooled 1½-HP Clinton Gasoline Engine. Four cycle, single cylinder, L-head. Air passes through deep fins to maintain correct operating temperature for long periods of running. Easy to start with rope. Moisture and dustproof. With fully enclosed ignition points. Visible oil-bath type air cleaner. Oil filler conveniently located for easy checking and filling. One quart capacity fuel tank with strainer and shut off. Engine can be substituted with any gas engine up to 1¾ HP with pulley ratio to develop 1800 RPM on compressor.

Size: 16x11⅛x11¼ in. high. Includes: Gun No. 6402 (19), opposite page; 15-ft. air hose; belt; pulleys. Order Cart (7) below for easy mobility.

75 C 6505 R—OUTFIT. Ship. wt. 48 lbs. $23 Down ..... or Cash $114.50
75 C 6506 R—COMPRESSOR WITH ENGINE ONLY. Ship. wt. 44 lbs. 99.50
75 C 6507 R—OUTFIT LESS ENGINE. Ship. wt. 29 lbs. 72.50

HEAVY-DUTY TWIN-PISTON ELECTRIC. Belt drive. Compressor like (6) above. Displaces 7.2 cu. ft., delivers 5.04 cu. ft. air per minute at 40 lbs. working pressure. Capacitor ¾-HP motor for 110- to 120-volt, 60-cycle AC. Size: 16x11⅛x11¼ in. high. Includes: Gun No. 6402, (19) opposite page; 15-ft. hose; 10-ft. cord; belt and pulley. Order Cart (7) below for easy mobility.

75 C 6511 R—OUTFIT. Ship. wt. 82 lbs. $24 Down ..... or Cash $119.50
75 C 6512 R—COMPRESSOR WITH MOTOR ONLY. Ship. wt. 79 lbs. 104.50
75 C 6513 R—OUTFIT LESS MOTOR. Ship. wt. 29 lbs. 72.50

7 CART. For (5) or (6) above. Rubber 8-in. wheels. Steel axle and handle.
75 C 6517 M—Shipping weight 10 pounds $9.95

TANK MOUNTED COMPRESSOR 119.95

8 OIL-LESS PISTON COMPRESSOR. Like (2) above. For automatic operation in low-pressure applications. Automatic pressure switch (with relief valve) starts at 35 lbs. pressure, stops at 50 lbs. Check valve on compressor outlet.

Mounted on 10-gal. non-code welded steel tank where compressed air is stored for use until required. Shut-off valve on tank outlet. Tank drain valve. Pressure gauge. Safety valve. With 8-ft. cord. Size overall: 31½x12¼x20½ in. high.

Order Spray Gun (20), Air Hose (21), opposite page. Shipped from Factory near Chicago. Allow 10 days extra for preparation, plus time in transit. Pay $24 Down. Terms on Inside Back Cover.

75 C 6590 F—Ship. wt. 78 lbs. ..... Cash $119.95

SIMPLE SPRAYING INSTRUCTIONS

Send for your FREE copy of Wards "How To Paint" Book—coupon on Page 760.

BURGESS VIBRO UTILITY SPRAYER 12.95

9 FOR TOUCH-UP AND SMALL PAINT JOBS around home, farm, or shop. Also for insect and garden spraying. Plug into any 110- to 120-volt, 50- to 60-cycle AC outlet and spray.

Pattern and volume adjustable. Stainless steel spinner. Sapphire nozzle and pump can be quickly cleaned. All other mechanism sealed in. With quart glass jar, 8-ft. cord.

75 CP 6451—*Postpaid* $12.95

10 AIR DUSTER BLOW GUN. Cleans, dusts, dries. Handy trigger control. Snout 3 in. long. Nozzle diam. 5/64 in. Male ¼-in. pipe threads. Use with any compressor on this or opposite page.

75 C 6290—Ship. wt. 3 oz. $1.39

11 QUICK-SNAP AIR HOSE COUPLING. Snap coupling apart; air automatically shuts off. Male body, female plug. Male ¼-in. pipe threads.

75 C 6277—Ship. wt. 6 oz. $1.49

PAINTERS' RESPIRATOR 2.19

12 PROTECTS LUNGS. Exhalation valve for easy breathing. Soft rubber face-piece fits snugly. Adjustable. Includes 5 wool felt filters.

75 C 6201—Ship. wt. 10 oz. $2.19

EXTRA FILTERS. For above. 2 pkgs. of 10 each.

75 C 6205—Ship. wt. 4 oz. ..... Two Pkgs. for 35c

BELT WATER TRAP. (Not shown.) Removes water from spray gun air line. Excellent for siphon feed guns when used where humidity is high. Mounts on air line 4 ft. from gun. Clips on operator's belt. Has ¼-in. pipe thread connection. With 4-ft. air hose.

75 C 6235—Ship. wt. 1 lb. 8 oz. $3.98

INSECTICIDE GUN. (Not shown.) Inexpensive, external-mix gun. With over-shot siphon feed for spraying insecticides, or for small paint jobs. Operates on 15 to 40 lbs. air pressure.

75 C 6236—Ship. wt. 2 lbs. $3.95

Low-Cost Diaphragm Type Provides Oil-Free Air

PORTABLE OR PERMANENT-MOUNT PAINT SPRAYERS . . . SINGLE AND TWIN MODELS 25.00 TO 102.00

NO PISTONS; NO OIL—deliver clean, dry, oil-free air.
REASONABLY PRICED. Fine for home or limited industrial use.
LOW-COST MAINTENANCE, OPERATION. Parts interchangeable.
Elimination of pistons reduces compression loss due to "piston-slipping" Multiple 8-ply diaphragms of heat-resisting material give long service—can be easily replaced. Oversize "built-in" Surge-Chamber eliminates pulsation, keeps air at proper working pressure. No connections or piping to cause leakage.

No off-center weights to set up vibrations. Permanently greased and sealed ball bearings need no oil. See Sprayer Facts, opposite page.

PORTABLE TANK MODEL 95.75

13 EASY MANEUVERABILITY TO JOB. Wheels and handle can easily be removed for anchoring to floor. For shops, garages, farm maintenance, etc.

COMPRESSOR: Belt drive. Displaces 3.3 cu. ft., delivers 2 cu. ft. air per minute at 30 lbs. working pressure. Electric motor ¼-HP capacitor with 10-ft. cord. For 110- to 120-volt, 60-cycle AC.

Mounted on 11½-gallon welded steel tank. Automatic switch starts compressor at 30 lbs., stops at 45 lbs. With safety valve, moisture trap, pressure gauge. Size overall: 23x12x25 in. high.

OUTFIT: Compressor; motor; tank with steel handle, axle, rubber wheels, feet; internal mix, non-bleeder gun with fan and round heads; qt. aluminum paint cup; 15-ft. hose; V-belt; pulleys; tire chuck. Can be used with Paint Tank (23) below. Pay $19.50 Down.

75 C 6362 R—Ship. wt. 95 lbs.....Cash $95.75
75 C 6363 R—LESS GUN, HOSE. Wt. 90 lbs. 85.45

HEAVY-DUTY ½-HP TWIN 102.00

14 EASILY MOVED WITH WHEELS AND HANDLE or securely affixed. For heavy farm and home use or moderate production work.

COMPRESSOR. Belt drive. Displaces 6.7 cu. ft., delivers 3.3 cu. ft., air per minute at 40 lbs. working pressure. Air intake filters for clean air. Electric motor ½ HP capacitor for 110- to 120-volt, 60-cycle AC; 8-ft. cord; switch. With pressure gauge, adjustable safety valve, built-in moisture trap. Size overall: 23x15x15½ in. high.

OUTFIT: Compressor; motor; steel handle, axle with rubber wheels; internal mix bleeder gun with fan and round spray heads, qt. aluminum paint cup; 15-ft. hose; V-belt; pulleys; tire chuck. Usable with Paint Tank (23) below. Pay $20.50 Down.

21 RUBBER AIR HOSE. Use 15-ft. length for replacement (no coupler); 25-ft. for extension (with coupler). Connections ¼ inch.

75 C 6244—15-FT. LENGTH. Ship. wt. 1 lb.....$1.69
75 C 6245—25-FT. LENGTH. Ship. wt. 1 lb. 8 oz..... 2.69

HEAVY-DUTY MATERIAL HOSE. Rubber. 15 ft. long. Pipe fitting ⅜ in.
75 C 6276—Shipping weight 2 lbs. 8 oz.....$3.25

AIR LINE SPRAY UNIT 21.95

22 SPRAY DIRECTLY FROM AIR SUPPLY LINE. Regulator with gauge reduces air line or tank pressure of up to 250 lbs. down to 0 to 140 lbs. Separator removes oil, water, dust. Condensation chamber; drain cock at bottom. Connections: outlet ¼-in.; inlet ⅜-in.

External mix, siphon feed spray gun with fan and round spray heads, usable as bleeder or non-bleeder. Gun uses 2 to 4 cu. ft. of air per minute at 25 to 50 lbs. pressure. Includes 15-ft. air hose.

COMPLETE UNIT. Gun, hose, regulator, gauge, separator.
75 C 6206—Shipping weight 7 lbs.....$21.95

REGULATOR, GAUGE AND SEPARATOR ONLY. (No hose or gun.)
75 C 6221—Shipping weight 4 lbs.....$9.25

REGULATOR AND GAUGE ONLY. For air lines or tank (23) below.
75 C 6220—Shipping weight 2 lbs.....$5.95

23 TIME- AND WORK-SAVING PAINT TANK. Replaces cup. Holds 3 gals. Saves re-filling time on large jobs. Use with any Ward gun or sprayer except (9); see adapters, right. Lightweight corrosion-resistant steel with 6-in. opening. Cast-iron top. Brass relief valve (45 lbs. pressure). Hook for carrying or hanging on ladder. *Mailable.*
75 C 6222 M—With 10-ft. air hose, 10-ft. paint hose. Ship. wt. 15 lbs. $22.95

MATERIAL HOSE ADAPTER. Use with Tank (23) at left. Adjusts material hose coupler threads to guns listed. Use both 6410 and 6411 with guns (18), (19).

FOR GUNS OF SPRAYERS (1) TO (3).
75 C 6411—Ship. wt. 4 oz.....75c

FOR ALL OTHER GUNS LISTED (Except 20).
75 C 6410—Ship. wt. 4 oz.....35c

THINNERS FOR CLEANING spray guns listed on Page 758.

Painting Preparation Needs, Tools . . . Special Finishes

SURFACE PREPARATION IS IMPORTANT. No finish is better than the surface to which applied. See Wards "How To Paint" book (coupon, Page 760) for instructions on surface preparation, then select materials from this page.

(1) PAINT, VARNISH REMOVER. Non-flammable, heavy liquid for horizontal or vertical surfaces. Fast-acting. No after wash required. Quart does up to 50 sq. ft.
75 C 5942 L—QUART. Ship. wt. 3 lbs. 95c
75 C 5943 L—GALLON. Ship. wt. 11 lbs. $2.98

(2) CONCRETE FLOOR ETCHER. Removes grease; roughens for painting. No mixing. No fumes. Gal. does 200 sq. ft.
75 C 5432 L—QUART. Ship. wt. 4 lbs. 75c
75 C 5433 L—GALLON. Ship. wt. 14 lbs. $2.89

(3) WOOD BLEACH. Removes natural color from all types of wood. No neutralizing. No deposit left on surface. Will not warp or raise grain. 2-solution kit does 60 sq. ft.
75 CP 5920 L—KIT. *Postpaid* $1.40

DRY WALL CONSTRUCTION KIT 3.69

INCLUDES 15 lbs. Joint Cement; Broad Knife; 250 sq. ft. of Joint Tape—enough for average room. With instructions.
75 C 5344 L—Ship. wt. 19 lbs. . . . . Complete Kit $3.69

(4) READY MIXED JOINT CEMENT. Siliconized. Use on taped joints, to cover nails, level and patch new or painted walls. Not for wallpaper. Gal. covers to 75 ft. tape, 2 coats.
To seal and stipple-finish walls at same time, mix with equal parts of Rubberflex. Gal. covers to 300 sq. ft., 1 coat.
75 C 5374 L—GALLON. Ship. wt. 16 lbs. $1.79

(5) JOINT CEMENT. Fills cracks; holds tape. Mix with water; apply with broad knife below. Use 5 lbs. to 75 ft. tape.
75 C 5375 L—5 POUNDS. Ship. wt. 6 lbs. 69c
75 C 5376 L—15 POUNDS. Ship. wt. 16 lbs. $1.89

(6) BROAD KNIFE. Flexible steel blade. Shaped metal handle.
75 C 5399—6-IN. WIDTH. Ship. wt. 8 oz. 69c

(7) JOINT TAPE. Use with cement and broad knife to cover and reinforce butt or channel joints on wallboard, etc.
75 C 5438— 75-FT. x 2-IN. ROLL. Ship. wt. 10 oz. 39c
75 C 5439—250-FT. x 2-IN. ROLL. Ship. wt. 2 lbs. 95c

(8) SOILAX. Cleans painted surfaces, walls, woodwork. Dissolves grease. Mix with water. Won't harm hands.
75 C 5923—16-OZ. PACKAGE. Ship. wt. 17 oz. 23c

(9) CELLULOSE SPONGE. Absorbent, "streak-free" cleaning.
75 C 5906—*Size:* 1¾ x 4⅜ x 6¼ in. Ship. wt. 3 oz 57c

(10) REX-O WATERLESS CLEANSER. Dissolves grease. Won't harm hands. For interior or exterior use. In reusable pail.
75 C 5904 L—5-POUND PAIL. Ship. wt. 6 lbs. 85c

(11) (13) PAINT SOAP and HAND GROOM. Waterless hand cleaners that remove paint, grease, tar from skin. Non-irritating; contain lanolin.
(11) 75 C 5849—PAINT SOAP. Liquid. 4 oz. Wt. 5 oz. 35c
(13) 75 C 5845—HAND GROOM. Paste. Pint. Wt. 1 lb. 59c

(12) BRUSH CLEANER. Non-flammable. Restores old bristles.
75 C 5811—PINT. Ship. wt. 2 lbs. 39c
75 C 5812L—QUART. Ship. wt. 4 lbs. 69c

(14) TACK RAG. Use after sanding, for dust, lint-free surfaces.
75 C 5960—*Size:* 18 x 36 in. Ship. wt. 3 oz. . . . . 3 for 69c

(15) PATCHING PLASTER. Fills large holes. Mix with water.
75 C 5830 L—5-LB. BOX. Ship. wt. 6 lbs. . . . . 38c; 2 for 72c

PATCHING COMPOUND, READY-MIXED. Self-sizing. For cracks.
75 C 5884 L—QUART. Ship. wt. 4 lbs. 12 oz. 75c

(16) SPACHTLING COMPOUND. Fills small holes, cracks in plaster. Mix with water. Dries in 2 hours.
75 C 5831 L—2½-LB. BOX. Ship. wt. 3 lbs. 37c
Two 2½-LB. BOXES. Ship. wt. 6 lbs. 62c

(17) CRACK, HOLE FILLER. Won't shrink. For floors, furniture.
75 C 5834 L—QUART. Ship. wt. 5 lbs. 75c

(18) WOOD FILLER, PASTE. Fills to 140 sq. ft. of open grain wood pores. Neutral color; tint with Oil Stain if desired.
75 C 5435 L—QUART. Ship. wt. 5 lbs. 89c

(19) PATCHWOOD. Real wood. Fills chips, cracks in furniture.
75 C 5819—PASTE. ½-LB. CAN. Ship. wt. 14 oz. 35c

(20) KWIK-SEAL. Seals cracks around bathtubs, sinks, etc.; closes tile joints. Plastic; won't crack or crumble. White.
75 C 5879—6-OZ. TUBE. Ship. wt. 6 oz. 65c

(21) LEPAGES LIQUID GLUE. 8-oz. Can.
75 C 6025—Ship. wt. 12 oz. 79c

(22) DUCO CEMENT. Clear. Waterproof. For anything but rubber.
75 CP 6030—1¾ oz. *Postpaid* 35c

(23) SCREEN PAINTER, TRAY SET. Won't block mesh. Plastic.
75 C 5813—Will not spatter paint. Shipping weight 5 oz. 35c

SCREEN ROLLER. (Not shown.) Paints wire and frame. Saves paint.
75 C 5805—With wire handle. Ship. wt. 4 oz. 23c

(24) (25) PAINT DROPCLOTHS. Size 9 x 12 ft. Protect furniture, floor, shrubbery, walks, etc. (Canvas type, Page 719.)
(24) 75 C 5932—HEAVY PAPER. Ship. wt. 2 lbs. 8 oz. 89c
(25) HEAVY PLASTIC. Dry paint shakes off. Less fire risk.
75 C 5938—Polyethelene. Ship. wt. 1 lb. 8 oz. $1.98

(26) RED HOT ALUMINUM PAINT. For areas of up to 1600°F. Qt. covers to 125 sq. ft., 1 coat. Ship. wts. 1 lb.; 2 lbs. 4 oz.
75 C 1096—PINT. . . . . 69c 75 C 1097 L—QUART. $1.25

(27) STOVEPIPE ENAMEL. For stoves, boilers, Resists rust, heat.
75 C 2414—GLOSS BLACK. PINT. Ship. wt. 2 lbs. 37c

(28) (29) SILVER, GOLD COLOR FINISHES. Use inside. Wt. 10 oz.
75 C 2440—SILVER, ½ PT. 55c 75 C 2432—GOLD, ½ PT. 85c

(30) STRIPE PAINTING SET. Includes 1/32, 1/16, and 3/32-in. striping wheels; two ½-oz. bottles, body socket; 2 sets wheel jaws.
75 C 5800—Use as shown (A) above. Ship. wt. 9 oz. $1.50

(31) LIQUID MASKING TAPE. For painting window sash. Brush on glass next to wood; apply paint; when dry, score; peel off.
75 C 5970—4-OZ. CAN. Ship. wt. 5 oz. 75c

(32) MASKING TAPE. Covers, protects surfaces not being painted.
75 C 5977—25-FT. LENGTH. Width ¾ in. Ship. wt. 3 oz. 25c
75 C 5979—180-FT. LENGTH. Width 1 in. Ship. wt. 1 lb. $1.35

(33) MYSTIK SELF-STICKING TAPE. Decorate, repair, seal any surface. Strong cloth, plastic coated. *State width.*

74 C 4285 M—Iron, black enamel finish. Ship. wt. 5 lbs.....Each 1.95

PRECISION BUILT PONDEROSA PINE STORM WINDOWS . . . LOW AS 2.98

(K) Storm Windows cut your fuel costs, pay for themselves in fuel savings. Keep home warmer by resisting drafts through windows and providing more even temperatures throughout your home. Rooms stay much more comfortable all winter long. Excellent for air-conditioned homes. Give better humidity control. Standard 2-light design harmonizes with all architecture. Precision machined from Ponderosa Pine, kiln-dried to proper moisture content. Chemically treated to resist rot, blue stain and termites. Sanded smooth, readily finished. 1⅛ in. thick. Has mortise and tenon construction. Fitted with clear glass, sealed with putty and securely held with wood moldings. Hangers and fasteners, see (4) incl. If ventilator wanted, see (5), state "With Ventilator" and add 50c per window. Top and side rails 2 in. wide, bottom rail 4½ in. wide. Width can be trimmed ¾ in., height 1½ in. Order only sizes below. See "How to Measure" above.

Aluminum Combination Doors, Custom-Made Windows

FOR RUSTPROOF ALL-SEASON WEATHER PROTECTION, LONG LIFE

Complete hardware for installing combination doors.

ALUMINUM COMBINATION DOORS 38.95 Any size

STRONG, EXTRUDED ALUMINUM construction for long, carefree service. Absolutely rustproof.

MODERN DESIGN with slim-line frame enhances appearance of any home. Smooth, satin finish.

QUICK, EASY SEASONAL CHANGEOVER. Lightweight storm and screen panels removed from inside.

(A) Finest quality, heavy-gauge aluminum, heat-hardened to prevent pitting. Can't rust, will not warp, shrink or swell. Occasional waxing keeps door bright and new-looking for years. Slim lines provide an attractive, inviting entrance to your home.

YEAR 'ROUND PROTECTION. In winter, it's a snug-fitting exterior door for protection against wind and cold; in summer, it's a screened-in entrance. Actually, two doors at one low price. If your home is air conditioned, it will help to cut operating cost. Seasonal changeover in a jiffy—only a screwdriver is required. Lightweight panels removed from inside, no heavy lifting; minimum storage space required.

Z-BAR FRAME simplifies installation; no overlapping channels to cut. Provides new frame setting for your door for beauty and perfect fit. Design permits custom fitting to frame openings varying up to 1 in. wide and 1½ in. high.

DOOR SHIPPED COMPLETE. Includes two storm inserts glazed with clear glass, two screen inserts, adjustable pneumatic door closer with built-in wind guard, latch set with inside night lock, 3 stainless steel hinges (see (1) at left), 3-piece Z-bar frame, adjustable bottom sweep with vinyl weather-seal, storm chain, template for attaching hinge to door, ¼-in. and ⅛-in. drill bits, all necessary aluminum and stainless steel screws. Shipped in heavy protective carton to insure safe arrival.

HIGHEST QUALITY MATERIALS and workmanship. See cut-away view above. Door itself is full ⅞ in. thick, (same as so-called 1-inch expander type doors which include overlapping channel in 1-in. measurement). Heavy extruded aluminum corner braces for maximum strength and rigidity—a hidden, but important quality feature. Screen inserts fitted with 14x18-mesh aluminum; rolled into frame with vinyl spline.

EASY TO INSTALL. Detailed instructions provided, describe each step clearly.

ALUMINUM COMBINATION WINDOWS . . . LOW AS 18.45

CUSTOM-MADE FOR GUARANTEED PERFECT FIT . . . at prices lower than asked for most "stock-size" combination windows.

COMPLETELY SELF-STORING. Triple track type—each insert rides on its own track. Screened ventilation top or bottom.

FINEST QUALITY CONSTRUCTION. Fully weatherstripped. Shipped fully assembled; easiest of all windows to install.

(C) Never before offered by Wards—a new, custom-made, Triple-Track Combination Window made of heavy extruded aluminum, fully assembled, ready to install. Just send specifications; windows custom-made to your order at factory. To assure perfect fit, windows are made with built-in expanders—adjust exactly to out-of-square openings.

NOW IS THE TIME TO ELIMINATE SEASONAL CHANGEOVER. No dangerous ladder climbing—no storage problem. Each insert in separate track see cut-away at right; just slide unused insert up, slide other one down. No gadgets to tinker with. Trim lines designed to enhance the beauty of your home; distinctive appearance—no bulkiness. Design provides maximum light and ventilation. Glass easily cleaned from inside house. Just lift out lower track sections, slide inserts into room. Top or bottom ventilation obtained by sliding screen insert up or down.

COMPLETELY WEATHERSTRIPPED. Insert frames overlap running tracks on top, bottom and sides; eliminate window rattling in high winds.

SHIPPED COMPLETE, READY TO INSTALL. Inserts glazed with clear glass, weatherproofed with gasket held firmly with aluminum spline. Can be reglazed easily if necessary. Screen insert fitted with 14x18-mesh Aluminum wire rolled into frame, held by vinyl spline. Complete, instructions. Shipped from Factory near New York City; pay freight from Albany, New York or Boston, whichever is nearer. Allow 3 weeks for delivery, plus transit time. Average Ship. wt. 30 lbs.

74 C 5413 F—*State exact glass and opening sizes in inches.*

HOW TO ORDER CUSTOM-MADE WINDOWS. First measure width of frame between side exterior casings (3) and height between top casing and sill (2). Then measure glass separately giving width (5) and height (4). Prices are determined by glass size, see table below.

ALUMINUM COMBINATION BASEMENT WINDOWS . . . LOW AS 6.65

(D) Fit any standard wood or postwar steel or aluminum basement window, including (E) at right. Keep basements more comfortable year 'round. Protect against dampness and dust. Extruded aluminum with natural finish—rustproof; requires little maintenance. Storm sash can be swung out and locked firmly in variable positions for ventilating. Has sliding clips for easy installation on wood or steel window frames. Frame (fitted with 18 x 14 mesh aluminum wire) fastens permanently to exterior of your present basement window. Storm panel glazed with clear glass, detachable for storage during summer. All screws, instr. included. Shipped promptly from Stock.

74 C 5421R—*State Actual Size. Not Mailable.*

Actual Size of Window	Glass Size	Ship. wt.	Each

SHIPPING NOTICE

Steel basement windows and screens shipped in 1 week from factories near New York City, Boston, or Cleveland. Aluminum windows and screens shipped promptly from Stock.

All glazing material shipped promptly from factory in Albany. Pay freight from shipping point. Be sure to give all information necessary for sizes. Allow transit time on all items shipped from factories.

Economical Wood Combination Windows and Doors

BUILT OF TREATED PONDEROSA PINE FOR LONGER SERVICE

COMBINATION WOOD WINDOWS . . . LOW AS 6.39

(F) (G) Low-Cost Storm-Screen Wood Units cost little more than separate screens and storm sash. Interchangeable screen and glass panels are easily removed from inside for seasonal changeover and cleaning. Fits any double-hung window opening listed below. Turn button screws hold panels neatly in place; can be removed from inside house with only a screwdriver. (See View 6, at left). Screen panel has built-in ventilator in bottom rail. Ventilation easily obtained even in driving rains. Just lower top sash of house window. Air comes in through bottom screen, rises and enters house through top sash. Offers effective protection against insects during summer.

Sturdily Built of Ponderosa Pine, treated with Nationally-known WOODLIFE® to resist dry rot, blue stain and termites. 1⅛ in. thick. Can be trimmed ½ inch in width or 1 inch in height. Mortise and tenon joints—sanded smooth ready to finish. Clear glass in frame and storm panel held firmly by wood moldings.

To Measure. Use dimensions (2) and (3) on opposite page. Order sizes below that fit or can be trimmed to fit opening in which unit is to be placed. Can be trimmed ½ inch in width and 1 inch in height. Shipped in 1 week from Factory near Detroit, Mich. Pay freight from there. Allow transit time. Choice of 2 models.

(F) Permanent Top Window. Includes frame with top glass panel permanently installed, 1 glass panel and 1 screen panel for lower section (interchangeable). Screen panel has 14x18-mesh rust-resistant galvanized wire.

(G) New Removable Top Window. Has all features of (F) above, plus removable top glass panel . . . all panels removable for easy cleaning. Rustproof aluminum screen wire. Extra screen panel for upper section can be ordered separately below if desired.

WOOD COMBINATION DOORS . . . LOW AS 14.75

(H) to (L) Save Time and Work with low-cost combination storm and screen doors—change just panels instead of entire doors. Avoid time-consuming seasonal changeover and storage problems. One low price gives you a screen door in summer and a storm door in winter. Nothing to store but the out-of-season panel. Save on valuable storage space.

Just Interchange storm and screen panels from inside the house—no need for heavy lifting or carrying door up stairs. Combination doors cut drafts and loss of heat, resulting in lower fuel bills. Your home will stay warmer in winter because of the excellent insulating qualities of this wood door, thus saving fuel costs.

Lock Screw Inserts operate with only a screw-driver, yet cannot be opened from the outside. Doors may be used with hardware set (M) at bottom of page.

Styles for Every Entrance. Views (H) to (L) at top of page show well-proportioned doors in choice of 4 styles. All are designed for maximum light and vision; can be finished in any color scheme desired.

Finest Quality Construction. Expertly made from kiln-dried Ponderosa Pine. All doors are 1⅛ inch thick. Have interlocking mortise and tenon joints for rigidity, reinforced with steel pins. Stiles and rails wide for ease of trimming in case they must fit irregular openings. Treated with nationally known WOODLIFE® for longer life—resist dry rot, blue stain, termites.

Doors Machined Smooth. Ready to finish by staining, varnishing or painting. Your choice of galvanized wire or (on some styles) bronze wire. Select from table.

Complete Unit Includes: door with 2 interchangeable panels, 1 storm panel fitted with clear glass, screen panel with 18x14-mesh galvanized or bronze wire.

Width can be trimmed 1 inch, height can be trimmed 2 inches. Doors shipped promptly from Stock by Freight or Express. Only 10% Down on orders totalling $20 or more on Wards Convenient Credit Terms.

HOW TO ENCLOSE OPEN PORCHES OR BREEZEWAYS

Use Wards low-cost combination doors and windows pictured on this page to convert your open porch or breezeway into a year 'round extra room like those shown above (7) and (8). Combination windows, (F) and (G) easily installed to make a screened porch in summer; an enclosed porch in winter. Doors also make economical enclosures, let in maximum light and air.

(M) Includes everything you need to install the wood combination storm-screen doors (H) to (L) listed above.

Pneumatic door closer (keeps door from slamming shut), safety-chain stop, aluminum latch set, three cadmium-plated hinges (for rust-resistance, brightness and greater durability), screws and complete installing instructions. Ship. wt. 4 lbs.

74 C 1663—*Mailable*. . . . . Per Set $4.85

See OTHER HARDWARE FOR DOORS WINDOWS ON PAGE 816.

WOOD BASEMENT WINDOW UNIT AND WOOD COMBINATIONS 3.75 TO 10.95

(N) Complete Window Unit. Includes frame, window, storm sash and screen—all four items for one low price. For seasonal changes, just interchange storm and screen panels. Converts in seconds from Winter to Summer with nothing to store except extra panel. Trim, horizontal lines give compact, modern look; use for new construction, or remodeling purposes. Blends equally well with modern or traditional homes.

Window Opens In toward basement, has 2 open positions for controlled ventilation one 45°, the other 90°. Admits more light and air, helps control odor and dampness. Screens and storm sash fit on outside.

Quality Ponderosa Pine Construction. Chemically treated to resist warping, dry rot and termites. Bronze pressure-type weatherstripping on all sides. Glazed with single pane of clear glass, size 28x12 in. held with zinc points and elastic glazing compound. Rust resistant hardware. Completely assembled, ready to set in concrete block, brick or frame construction.

Exterior surfaces grooved to provide firm hold with mortar in masonry walls. Screens have 18x14-mesh rustproof aluminum screen wire. Size overall 2 ft. 8 in.x 1 ft. 4 in. high. Complete unit shipped promptly from Stock by Freight Truck, or Express.

74 C 6681R—Ship. wt. 25 lbs. . . . . Complete $10.95

(P) Wood Basement Combination Unit. Especially designed for steel windows, but can also be used on wood or aluminum. Frame with screen panel is installed permanently on exterior of your basement window. Gives year 'round protection. Enjoy a warmer basement, free from drafts and dust.

Add Storm Panel. For winter season, simply add tight-fitting storm panel to permanently installed frame. Storm panel is fitted with clear glass, easily stored in summer.

Kiln-Dried Ponderosa Pine. Milled from Ponderosa Pine, chemically treated to resist dry rot, blue stain and termites; 1⅛ in. thick. Has strong mortise and tenon joints. Can be trimmed up to ¾ in. in both ht. and width if desired. Sturdy pine frame has 18x14-mesh aluminum screening. Long wearing aluminum screen-wire resists rust. Shipped promptly from Stock by Frt., Trk. or Exp. *Not Mail.*

Modern Casement Windows in Aluminum or Steel

SMOOTH FINGER-TIP CONTROL WITH ROTO GEAR OPERATOR

RUSTPROOF ALUMINUM CASEMENTS . . . LOW AS 14.75

A Aluminum Casements offer timeless styling plus full rust-protection. Built of heavy extruded aluminum by a leading nationally known manufacturer. Offered in 11 styles (shown in large and small illustrations above) for every size room. Designed to give you more light, better ventilation and minimum upkeep. Ventilators swing away from frame—make it easy to wash both sides from inside house. Adjust to any angle from closed position to full 90°.

Top Quality Construction. Casements have attractive satin finish which blends with any color scheme. Additional protective coat of baked-on clear lacquer resists lime, etc. Aluminum never needs painting—resists rust and corrosion Full-length drip-cap at top of frame and watertight lip on ventilators prevent water seepage. Double-contact frame assures weathertight fit on all 4 sides of ventilator—reduces drafts, etc. Corners are electrically flash-welded for strong, smooth joints. Built for years and years of life, minimum upkeep.

Modern Styling allows you to use casements in any room. 2-light high units are ideal for smaller rooms, while 3 and 4-light units provide large areas of glass for picture windows in living rooms, etc. Roto-type adjuster—see (2) at right—makes operation easy. Opens and closes ventilators with easy wrist-action, holds them firmly in any position up to 90° angle. Handle in center of window locks each ventilator securely when fully closed.

Casement Accessories. Glaze windows after installation with Glazing Material—includes glass panels (precut for exact fit), glazing compound and clips. Use Fin Sets for installation in brick veneer or solid masonry construction. Set contains 1 head, 2 jamb fins. "Tongue" located near each end of fin serves as location guide for plaster grounds. Fins provide anchorage to each wall and act as windbreak between sash and building construction. Holes predrilled for screens, storm sash—install on inside for easy cleaning. Order Screens, Storm Sash below. 10% Down—see Terms, Inside Back Cover.

BONDERIZED STEEL CASEMENTS . . . NOW LOW AS 10.25

B C Now the lowest prices we know of for steel casements of this fine quality. Save up to 13% from Fall General Catalog. Made for Wards by a leading nationally known manufacturer. Top quality—fabricated from low carbon, hot rolled, new billet steel. Special "weathering baffle" rolled into frame sections provides double contact between sash and frame—insures positive weather protection. Sturdy ⅛-in. thick casement sections have electrically welded corners. Each style available with or without all-steel window frame for easiest installation; no need for wood surrounds, trim, etc. Deluxe Roto type hardware (2) included.

Casements are Mechanically Bonderized under strict temperature controls, then prime-coated with baked-on gray paint. Provides rust-resistant finish on steel plus an excellent base if finish paint is desired.

Blend with All Styles of Architecture; give more light, air. Vents swing out to deflect breezes into your rooms—hold at any angle up to 90°. Heavy steel hinges swing vents away from frame so both sides may be washed from inside house. Use in any room—2-light high styles save floor space in smaller rooms; largest styles make ideal picture windows.

All-Purpose Steel Frame (1) at right fits any standard construction: frame, brick, brick veneer, etc. Comes in 4 easy-to-assemble pieces. Just nail to outside sheathing (holes predrilled) or set in mortar line. Serves as stop for outside finish, trims inside for plaster or dry wall construction. Head and jamb sections 18-gauge steel, sill 16-gauge.

Casement with Frame (B) includes unglazed casement, drip-cap hardware and all-purpose frame. Casement Only (C) does not include frame. Glazing Material includes glass (precut to exact size), glazing compound and clips. Casements drilled and tapped on inside for screens, storm sash.

1 Steel frame on (B) above completes your all-steel window installation. Neater, more weather tight — eliminates caulking around sash.

2 De luxe roto operator for easy opening and closing.

SHIPPING NOTICE

Aluminum Casements and Accessories shipped promptly from Stock except Glazing Material shipped promptly from Factory in Albany, N.Y. Pay freight charges from shipping point.

Steel Casements and Screens shipped from Factories near New York City, Boston or Cleveland—pay freight charges from nearest. Allow Factory 1 week plus time in transit. Glazing Material shipped promptly from Factory in Albany, N.Y. Storm Sash shipped promptly from Stock. As little as 10% Down on Terms—see inside back cover.

To Order Note: "Left" or "Right" indicates position of hinge on frame, as viewed from outside the house. Steel Casement with Frame requires rough opening 2 in. wider and 1½ in. higher than dimensions in table—see (1) above. Rough opening for Casement Only will vary with installation.

See F.H.A. Loan Plan, Page 972.

Jalousies for New Window Beauty

BUILT FOR ALL-WEATHER COMFORT

STANDARD JALOUSIE WINDOW . . . LOW AS 7.95

(F) Wards jamb-type jalousie windows with aluminum hardware and crystal glass louvers provide an economical way to add an extra room to your home. Install on any flat jamb surface. Simple 2x4-in. framing is satisfactory. Excellent for use on breezeways, patios, greenhouses, etc.—the low-cost answer to porch remodeling. Give modern styling and ventilation of more expensive units. View (8) at right shows how standard jalousies can be used to convert a porch into year 'round room—providing extra light and controlled ventilation for use in any weather. New aluminum mullions and weather-stripping for head and sill are now available to make these standard units even more versatile (see (H) and (G) below). Easy-to-install, no puttying, special tools or skills needed.

STANDARD JALOUSIES are all-aluminum construction for minimum upkeep—never need paint, are rustproof and corrosion-resistant for permanent beauty. Lever operator (4) opens louvers to any angle up to 90°. When closed, louvers overlap ½ inch to provide tight seal against cold weather. Both sides of glass can be cleaned from inside the house. Single lever control except on 15 and 18 louver sizes which have 2 levers. Levers lock securely when window is closed, windows can't be opened from outside. Aluminum side jambs have stainless steel "cushion" weather-stripping for draft resistance. If desired, weather-stripping for top and bottom may be installed, (see (G) below). Crystal louver glass 7/32 inch thick, 4½ in. wide pre-cut to exact size.

EASY TO INSTALL. Just fasten aluminum jambs to flat wood jambs, insert glass louvers into slots (see view (5) above). Glass held by metal clips, no putty needed. Finished window opening height should be same as over-all height listed in table below. But remember, width is completely adjustable—glass can be cut to fit any openings narrower than widths listed below. Minimum stud depth of 3⅝ in. is needed when used with outside screens or storm sash to permit operation of louvers. All sizes shipped promptly from Stock. *Not Mailable.* Only 10% Down on Terms.

(H) WEATHERSTRIPPING AND MULLIONS FOR (F). For added protection, easier installation. Aluminum mullion holds frames of 2 jalousies firmly together in straight line, adds ⅛ in. to width. Non-load bearing. New aluminum sill screws directly to wood sill, spring-type weatherstripping of stainless steel makes positive contact against bottom glass louver. Head weatherstrip works similarly with top glass louver. Can be easily cut with hacksaw.

(G) SILL STRIP. Wt. 2 lbs.

DE LUXE JALOUSIE WINDOWS . . . LOW AS 13.45

(J) Now priced up to 10% below Fall General Catalog. Wards Deluxe Jalousies offer modern styling, welcome ventilation in summer; *draft-free, weatherstripped protection in winter.* Do not confuse with Jalousies designed only for warm climates. Ideal for any room in your home. Two jalousies make a popular corner window arrangement. Designed for maximum ventilation—when fully open, Jalousies admit nearly twice as much air as conventional double-hung windows. Controlled ventilation eliminates stuffy, "close" rooms in rainy weather. All louvers open to full 90° angle, deflect cool air inside. Easy turns of roto handle—view (7) above—open and close louvers; hold them firmly at any angle without rattles. Cannot be opened from outside.

SCIENTIFICALLY WEATHERSTRIPPED with hardened, durable, stainless steel, full-length weatherstripping on head, sill and jambs. Special triple crown along side jambs and raised edges of glass holders assure tight closure at sides of windows. Spring-type strips on head and sill make positive contact with top and bottom louvers. Stainless steel clips in glass holders fix louvers tightly in place. Louvers close under "cushion" spring pressure, each louver overlaps the next a full half inch, forming a weather-tight seal that will not admit drafts.

FINEST CONSTRUCTION. Precision-engineered design assures long life, minimum maintenance. Sturdy 2⅞-in. deep frame—see view (6)—provides strength and rigidity. Made of rustproof extruded aluminum; frame fits all types of standard wall construction. Easy to assemble and install—instructions included.

NEW HEAVY-DUTY ROTO-TYPE HARDWARE (7) above. Jalousies have instantaneous control—easy turns of the roto handle adjust the glass louvers. Handles are removable—no hardware to interfere with curtains, drapes or blinds. Concealed steel worm and gear are treated to withstand hard use. Window units 74 1/16 in. high have two operators, permit ventilation from top or bottom half of sash as desired. Roto operator turns easily—makes jalousies ideal for hard to reach locations such as over kitchen and bathroom sinks (view (9)), on porches (view (8)), etc.

GLASS LOUVER SETS INCLUDED. 7/32 in. thick, 4½ in. wide. Made of clear crystal glass for minimum distortion. Have smooth rounded edges for safer and easier cleaning—wash both sides of louvers from inside your house. Louvers lock in place without putty or special tools. Aluminum screens and storm sash (K), (L) attach on inside of Jalousie windows and doors for quick seasonal change-overs—fasten with special clips. Both have rustproof aluminum frames. Screen has 18x14-mesh aluminum wire. Insulating gasket around storm sash for tight closure.

SHIPPING INFORMATION. Jalousie Windows, Doors and Accessories shipped promptly from Stock by Freight, Truck or Express; shipping rates on Page 970. Only 10% Down on Wards Monthly Payment Plan; complete details on inside back cover.

ALUMINUM MULLIONS

Join De Luxe Jalousies in straight line to fill wider openings—see views (8) and (9) above to see jalousies joined on a porch installation and as double windows over a sink. Each Mullion adds ⅛-in. to Jalousie width. Windows bolt together through mullions (necessary connecting bolts included). *Do not use mullions as structural support.*

Modern Stacking Windows Feature New Versatility

DO YOUR OWN WINDOW STYLING...EASY TO INSTALL

PRECISION-MADE NATIONALLY ADVERTISED "CRESTLINE"® STACKING UNITS . . . LOW AS 9.45

(A) (B) (C) Now you can make window arrangements to suit your own personal tastes and needs. Versatile "Crestline"® window units "stack" on top of each other, or side-by-side to form any combination of picture, fixed or ventilating sash you desire. Grouped, they form attractive rectangular or irregular glass areas for modern open effect. You can make large "glass walls", or place windows side by side in ribbon fashion above sinks or in bedrooms for more privacy and more usable wall space. Small drawings above show just a few of the many possible window combinations you can make with just 3 basic window types: Picture unit (A), Fixed Sash (B) and Ventilating Sash (C).

Used singly or in combinations, these precision-built windows go well with any type architecture, in any room and in any climate. Simple to install, instructions included. For inside trim see Molded (M) and Oval (T) ((P) for mullion casing) trim on Page 778. (For exterior moldings see (D) to (G) below). Install them easily yourself and save high labor costs.

FINEST QUALITY CONSTRUCTION THROUGHOUT. Precision-machined from Western Ponderosa Pine, chemically treated to prevent warping, swelling, termites, blue stain, rot, etc. Extra-narrow mullions, only 1 5/16 in. wide, add beauty to glass wall areas, give broadened vision. Ventilating units are fully weatherstripped with continuous bronze strip on all four sides. Seals against drafts or water leakage when window is closed—enjoy a draft-free winter. Jamb frame width on all units is 5¼ in. Thickness of ventilating and picture sash is 1¾ in.; fixed sash is 1⅜ in.

VENTILATING UNITS (C) open to 90° to permit full view and ventilation. Admit almost twice as much air as double hung windows—open them even when it rains. Rotary crank opens and closes vents noiselessly, smoothly and with minimum effort. Both sides of pane can be washed easily from inside room. Hinges are designed to hold vents rigidly open in any position. Nylon bearing surfaces on all moving parts of gear-controlled hinges eliminate abrasive wear. No bars or extensions to mar front view or interfere with drapes and blinds. All gear-operating hardware is hidden when unit is closed. Snugger-type latch provides positive security lock, is designed to give outward thrust to break any ice, or paint friction, prevents window sticking. Exposed controls have brown enamel finish. Each ventilating unit includes removable aluminum screen, securely mounted on inside; easily removed for cleaning.

(A) MODERN PICTURE WINDOW UNITS. Fixed units of Crestopane insulating glass sash. Gives large glass areas—for broader vision, better light and beauty. Ideally used, in any combination you desire, with regular units (B) and (C); see examples of arrangements above. Same construction as units above. Order at right.

SINGLE GLAZING OR INSULATING GLASS. All units available with Crestopane insulating glass—two double strength "A" quality sheets of glass with ¼ in. of sealed air between. Ideal year-'round—provides warmth in winter, coolness in summer. No need for storm sash. All units except Picture Windows (A) also available with single glazing; storm sash listed separately.

ECONOMY WINDOW UNIT LOW AS 8.95 . . . SASH ONLY LOW AS 3.35

(H) (J) (K) Now available assembled or unassembled. Unit includes window, frame and sash balances—priced right for low-cost remodeling. Use also for new work. Quality construction features check rail design and pressure-type balances. Precision-machined from kiln-dried Ponderosa Pine. Machined smooth. 1⅜-in. sash fitted with clear glass. All-purpose frame fits standard frame, brick veneer or masonry construction. Jamb width including blindstop is 5¼ in., has ¼-in. removable jamb liner for ½-in. plasterboard interior wall finish. Two or three units can be joined with 2x4 as filler between units; width of two exterior casings (each 1 11/16x1⅝ in.) will cover stud. Unit requires rough opening 2 in. wider and 4 in. higher than opening size. Locks and lifts not incl., see Pg. 812.

UNASSEMBLED UNITS have glazed sash; other parts prefitted for easy assembly. ASSEMBLED UNITS are completely set up, ready to be placed in wall. *Specify "assembled"* on order and add $1.75 to prices in table below; allow 1 week extra for Assembled Units.

CHECK RAIL WINDOWS ONLY include upper and lower sash (like above but without frame or balance). Designed for replacement purpose—use with pulleys, sash cords and weights.

Now. . .Weatherstripped Windows with Removable Sash

NEW FEATURES ALLOW EASIER CLEANING, SMOOTHER OPERATION

NATIONALLY ADVERTISED "CRESTLINE"® REMOVABLE . . . OUR BEST WOOD WINDOWS . . . LOW AS 15.50

(M) (N) You can't afford to be without these wonderful windows—save window washing and painting time, save fuel. To remove, simply release balance . . . press sash gently to the left and out comes the window. Fully weatherstripped (view (2)) . . . wintry blasts are halted before they can chill your rooms and use up expensive fuel. Patented one-piece, dual-purpose Alumaflex weatherstrip (2), anchored on left jamb, keeps out cold drafts, dust, and permits instant removal of sash. Flexible aluminum alloy "wings" automatically compensate for swelling and shrinking due to damp weather. Both jambs sheathed in metal—a rustproof zinc alloy engineered for perfect fit. Sash slide easily in metal tracks—no wood to wood contact to cause sticking and rattling. Cushion bronze weatherstrip installed on top, bottom and check rails of each sash for weathertight seal, easy installation. Fully counter-balanced in all positions on stainless steel cables—the kind used for aircraft controls. Ingenious hook at end of cable disengages sash without use of tools (view (1)). Clip automatically re-engages sash providing instant counter-balance when sash is replaced. Sash lock, lifts included (3).

FINEST CONSTRUCTION THROUGHOUT. Kiln-dried Ponderosa Pine, toxic-treated to resist warping, termites, etc. Extra-thick, 1⅜x2 in., exterior casing molded for modern picture window beauty. Glass held by zinc points, elastic compound. All-purpose frame fits brick, brick veneer or standard 2x4 stud construction. Highly recommended for new construction or remodeling.

UNASSEMBLED UNITS have frame parts prefitted; weatherstrip and balances installed. Sash assembled and glazed. ASSEMBLED UNITS completely set up, ready to be easily and quickly installed, *specify "assembled"* on order—add $2.20 for singles, $4.40 for doubles, to prices at right. All-purpose frame adapts to any wall construction. Needs rough opening 2½ in. wider (Double 4½ in.), 4 in. higher than total window opening size. Jamb 5¼ in. wide overall including filler strip, may be trimmed for dry wall construction. Allow 1 week extra for Assembled units. Interior trim listed below. For sizes not listed order next largest listed size and cut to fit. Storm Windows, Screens on Pg. 767.

Modern Sliding Windows Give More Wall Space

CHOICE OF WOOD OR ALUMINUM...BOTH WEATHERSTRIPPED

"CRESTLINE"...NEW REMOVABLE WOOD...LOW AS 17.30

(A) Nationally advertised "Crestline"® Sliding Window Units now with the convenience of removable sash. Sliding windows improve appearance of any room—allow better use of wall space, permit greater privacy. Perfect for use in any home, enhance any style of architecture. Ideal for ranch type homes but fit well into conventional types, too. In view above note how windows give seclusion to bedroom, make placing of furniture easier. Windows are high on wall for more relaxed living.

EASILY REMOVED FOR CLEANING. No more leaning outdoors to clean. Sash swings quickly out of frame by pushing upwards against head (see view 1). Flexible aluminum weatherstripping "gives" as you push so that bottom of sash clears aluminum track in sill (view 2). Sash then swings out easily for removal. Strong, spring-like quality of flexible weatherstripping in top keeps constant pressure downwards on sash to assure tight fit—yet windows are surprisingly easy to slide open or closed. Nylon sliders, aluminum channeling make windows "glide" along track. Changes in weather have no effect on smooth, noiseless operation; no adjust. needed.

COMPLETELY WEATHERSTRIPPED. Check rails meet tightly at center—held firmly with latch. Unit is weatherstripped throughout at factory with metal channeling. Head has flexible aluminum strip described completely above. Heavy extruded aluminum sill is properly pitched to drain rainwater through seepage holes. Sides of sash have bronze compression type weatherstripping.

EASILY INSTALLED. Sash precision-machined; glass held with zinc points, elastic glazing compound. Milled from clear Ponderosa Pine, kiln-dried, chemically treated to resist rot, blue stain, termites. Frame semi-assembled—parts pre-fit—just nail together, insert sash. Frame fits standard brick veneer, masonry or frame construction. Jamb including blind stop 5¼ in. wide. Hardware (sash lock, flush pulls) included. Masonry opening should be 2 in. wider, ¾ in. higher than rough opening.

NOTE: Prices are for Unassembled Units. For Assembled Units, *specify on order* and add $1.75 per unit. Allow 1 week for assembling, plus transit time. Order Screens, Storm Sash, and Trim separately. Screens have 18x14-mesh rust-resistant aluminum wire. 1⅛-in. storm sash are glazed.

State Catalog No. and Sash Opening Size. Shipped promptly from Stock.

ALUMINUM SLIDING WINDOWS...LOW AS 21.95

(B) Extruded Aluminum Window Unit adds modern, up-to-date style and convenience to your home. Easily installed high on walls for more privacy—more wall space in bedrooms, etc. Economical . . . a minimum of maintenance with rust-proof aluminum; no painting necessary. Completely weatherstripped for more comfort winter or summer. Screens included; order storm sash separately below.

EASY-TO-OPERATE. Both panels slide easily to either side of window for ventilation on right or left side. Panels can be removed from the inside for 100% ventilation when desired. All-aluminum screens and storms can be easily installed and removed from inside your home. Design of window frame provides attractive trim.

TOP QUALITY CONSTRUCTION. Windows come assembled and glazed, ready to be installed. Frame corners are electrically welded for strong joints. Each sash has stainless steel weatherstripping on side and top. Interlocking meeting rails give weathertight seal. Glass in window unit and storm sash held securely in place by weather-resistant plastic spline—makes reglazing (if ever necessary) easier. Sash slide easily on zinc liner in bottom tracks—gives smooth, non-stick operation. Liner can be easily removed for cleaning of sill. Drip Cap is actually part of frame, also acts as track for Screen and Storm. Frame sill has outlets for drain-off of condensation. Installation instructions included.

Window Unit includes aluminum frame; glazed sash; all-aluminum screen. Storm Sash comes glazed; order separately. Shipped in 5 days from Factory near New York City.

Be Sure to State Catalog Number and Style wanted. Allow transit time.

F.H.A. HOME IMPROVEMENT LOAN

If you own your own home and want to make permanent improvements costing more than $100—finance the cost through your local bank with an F.H.A. Loan. Whether you are installing windows; garage doors or a car port; Wards quality building materials may be purchased on F.H.A. terms. Enjoy needed improvements now while repaying your loan in monthly payments extended over 3 years, details on Page 972. Ward Monthly Payment Plan details on Inside Back Cover.

ECONOMICAL ALL-PURPOSE WOOD SASH...LOW AS 1.79

(C) TO (H) Inexpensive sash for new work or replacement use. (C), (D), (E) 1⅜ inch thick; (F), (G), (H) are 1⅛ inch thick. Excellent for cottages, porch enclosures, cellars, attics, garages, barns, etc. Sash (C) widely used for porch enclosures; Sash (G) for basements, transoms, etc.

Easily and quickly installed. Require no special frame; just set between studs and headers. May be used as stationary window or hinged to swing in or out. Precision made from kiln-dried Ponderosa Pine; chemically treated to resist warping, rotting, blue stain and termites. Strong mortise and tenon joints reinforced with steel pins. Fitted with clear glass held with zinc points and putty.

Top rails and stiles are 2 in. wide; bottom rail 3 in. wide except (G) which has 2-in. bottom rail. Sash can be trimmed ¾ in. in width, 1-in. height to fit undersize or slightly out of square openings. Shipped promptly from Stock. *State Catalog Number and Size.*

IMPORTANT NOTICE. Special low truck delivery rates on building materials available in many metropolitan areas. See information and details on Page 955.

Easy-Operating Garage Doors

WOOD OR METAL OVERHEAD TYPES

Modernize your garage with one of Wards easy-operating overhead Garage Doors . . . for convenience, protection, appearance. Sturdily constructed to give years of trouble-free service. Can easily be finished to match garage and house. Easy to operate in any weather. Will open and close with a light pull—strong springs do the heavy lifting. When open, doors are up out of the way; eliminates danger of wind blowing door against car when driving in or out of garage. Doors remain securely overhead. Can be opened easily in any weather—ice or snow in winter cannot prevent doors from opening. Shipped complete with rust-resistant hardware. Easy-to-follow installation instructions—install garage door yourself and save.

WOOD GARAGE DOOR 52.95 With Hardware

(L) Attractive swing-up plywood garage door features modern horizontal lines—blends well with popular Ranch Type homes . . . will also harmonize with most any other style home. All necessary hardware for doors is included.

SIMPLE, TROUBLE-FREE OPERATION. Door is counterbalanced to permit easy opening and closing. Swings up in one piece and recedes completely inside garage (see (3), (4) and (5) above). Raises and lowers easily—only a light pull is necessary to open or close the door. Strong springs do the heavy lifting for you. Fits single-door garage opening 8 ft. wide by 7 ft. high—door can be trimmed to fit slightly irregular openings. When open, door is held securely overhead. Requires only 2 in. of overhead clearance.

TOP QUALITY CONSTRUCTION. 1⅜ in. thick Ponderosa Pine Frame has rigid mortise and tenon joints reinforced with hardwood dowels for strength. Kiln-dried, chemically treated to resist rot, blue stain, termites. Panels are 3-ply Fir Plywood, weather-resistant, ¼ in. thick. 2 sections have tongue and groove joint, bolt securely together to withstand heavy use. Machined smooth, ready to be painted or stained.

RUST-RESISTANT HARDWARE includes: two heavy-duty springs, track and auto-type handle with cylinder lock. Opens from outside with key, from inside with latch. Locks on both sides at bottom of door.

Door is easily assembled—do-it-yourself. Complete installation instructions included. Holes are factory drilled for easier joining of sections and installing of hardware. Doors are shipped promptly from Stock in Mail Order House. 8 ft. wide, 7 ft. high.

74 C 4685 R—Ship. wt. 150 lbs. $5.50 Dn. or Cash $52.95

STEEL DOORS LOW AS 57.95 With Hardware

(M) (N) Doors assembled in 1 complete unit. Steel sheets, welded into rigid 1-piece panel, provide long-lasting construction. Horizontal lines blend with almost any home architecture. All available with or without two 6x12-in. openings with rubber gaskets (glass not incl.).

EASY TO OPERATE. Heavy springs swing door up on steel over-head track—recedes completely inside garage. Needs only 2 in. of overhead clearance. Steel ball-bearing rollers give smooth operation. Light pull lowers door—locks automatically when closed. Easy to push up.

RUGGED STEEL BRACING FOR EXTRA STRENGTH. Strong, grooved 25-ga. steel sheets made to uniform specifications, welded to heavy 14 and 18-ga. steel frame. Made of galvannealed steel—steel galvanized for lasting rust protection—bonded to provide clinging base for paint. Heavy 20-ga. steel braces in V-type form electrically welded to frame for added strength (see view (6)). Tubular steel operating arms. Rubber sealing strip on bottom; metal weather-stripping on sides. Includes: springs, track, auto-type handle with cylinder lock.

SHIPPING NOTICE: Doors from stock shipped promptly from Albany Mail Order House. Doors from Factory similar to (M) and (N) except have X frame of 18 ga. steel. Shipped in 1 week from Boston, New York City or Cleveland. Pay Freight from nearest. Allow transit time.

(M) SINGLE DOORS. 7 feet high. *State Catalog Number.* 10% Down.

Aluminum Carport

EASY TO INSTALL

REDUCED 20% . . . NOW ONLY 199.50 (less columns)

(P) Was $249.50 in Fall General Catalog. A beautiful addition to your home for much less than you'd expect to pay. Provides needed protection for car besides increasing value of your home and giving it a more expansive, finished appearance—a major addition at minimum cost. Modern horizontal lines blend with most any architecture. Can be quickly attached directly to house wall, saving substantially on labor costs.

YEAR 'ROUND PROTECTION YOU NEED. Shelters car from sun, rain, snow—elements that impair appearance and value of your automobile. In summer, heat-reflecting aluminum roof keeps your car up to 20° cooler—no reason for stepping into a stifling hot car. Extremely versatile—carport can also be used as a patio (7), breezeway (8), play area and for backyard barbecues. Even if you have a garage, you can add a sheltered recreation area for your family.

BUILT TO LAST IN ANY CLIMATE. Rigid cross-bracing gives more support than actually required. Rafters are special aluminum alloy, engineered for maximum strength. Roofing sheets are heavy-gauge 2½-in. corrugated aluminum with beautiful embossed surface—softens harsh glare of sun common to ordinary aluminum. Extra-high 10-in. ribbed aluminum sides provide smart, impressive appearance. Rust-proof aluminum construction throughout eliminates maintenance expense. Hidden drain trough at front.

POPULAR IN NEW CONSTRUCTION. Many architects include carports on original plans—it's just as easy to add one to your home or garage. Use on any construction: brick, frame, etc. Floor may be concrete, gravel; any material desired.

INSTALLS QUICKLY, EASILY. Lightweight pieces easy to handle. No cutting; use just hand drill, screwdriver. Shipped unassembled with hardware, instructions. For supports, order iron columns listed separately below. Terms, Inside Back Cover. F.H.A. Loans Page 972. Shipped from Stock.

74 C 4599 R—Size: 10x20 ft. Wt. 194 lbs. $20 Down. Cash $199.50

ORNAMENTAL WROUGHT IRON COLUMNS. Support carport above. Bolt directly to concrete floor or to small concrete footings. 8 ft. high, predrilled. Can be cut to 6 ft. 10 in.

74 C 4763 R—3 recommended. Ship. wt. 35 lbs. . . Each $13.95

WINDOW WELL UNIT . . . 4.25 12 in.

(R) For modern design homes or any homes where basement windows are below ground level. Holds earth away from windows—permits light and air to enter basement. Rugged 16-gauge steel. Has full, deep corrugations for strength and rigidity, not shallow rolled as in cheaper construction. Rolled on top bead for safety. Rust-resistant, hot-dip galvanized coating; can be painted after weathering. Easily installed—holes predrilled for anchoring window well to foundation. Shipped promptly from Stock.

INTERIOR FRENCH DOORS 13.30 TO 18.20

(E) TO (K) Traditional French Doors feature symmetrical patterning of clear glass—make your rooms lighter; add pleasant charm and beauty to home interiors. Modern 5-lt. design (E) blends well with contemporary modern architecture. Designs (F) and (G) harmonize with conventional and colonial architectural motifs. Excellent for closing off sun porches or unheated rooms; use also in hallways, kitchens, dining and living rooms, etc. All three designs available in Single and Double Doors. Flat astragal strip included with double door sets.

Expertly built from clear Ponderosa Pine, kiln-dried to proper moisture content. Clear glass bedded in putty and held with wood moldings. Stiles and rails joined with hardwood dowels and waterproof glue. All doors are 1⅜ in. thick. Stiles and top rails are 4¾ in. wide; bottom rails 9⅝ in. wide; Muntins ½ in. wide. Shipped promptly from Stock by Freight or Truck.

DOOR FRAMES

Y Z Choice of metal weatherstripped or regular types. Both frames are precision machined from clear Ponderosa Pine, kiln-dried to proper moisture content. Chemically treated to resist rot, blue stain and termites; ready for painting. For standard frame, brick veneer or masonry construction; have 5¼-in. jambs, 1⅛ x 2-in. exterior casings. Drip cap included. Easily and quickly assembled; just nail together. Rough opening should be 2½ in. wider and 3½ in. higher than inside measurements shown below.

Weatherstripped frames (Z) have extruded aluminum strip reinforcements in wood sill for long wear. Weatherstripping is applied—will not interfere with installing door hinges or latches.

DISAPPEARING STAIRWAY 25.95

AA Folds down for instant access to attic when you need it; disappears overhead out of the way with a light lift when not in use. Folds on adjustable heavy duty hangers—strong springs do most of the lifting for you, hold it tightly in jamb when not in use. (See Views 1, 2, 3 Above.)

Completely assembled, yet costs less, requires less space than stationary stairway. Has handrail for extra safety. Makes attic easily accessible. Built from select vertical-grain Fir, sanded smooth. Ceiling panel is Fir plywood. (Wood molding not incl.). Safety grooved treads dovetailed and nailed into sides for rigidity. Side rails cannot separate. Has 9-in. rise with treads 4 in. by 18 in. Bottom of stairs projects 14 in. beyond ceiling opening when resting on floor. Fully assembled with steel hardware and fittings attached. Fits ceiling heights 7 ft. 5 in. to 8 ft. 4 in. Rough opening: 26x54 in. Shipped from Stock.

FOLDING LADDER 17.95

BB Gives immediate access to attic or loft—removes the hazard of unstable ladders. Folding, disappearing ladder is permanently installed, pushes up out of the way when not in use. Adds storage space at lowest cost. Excellent for homes, workshops, utility buildings, garages, etc.

Operates as shown in small pictures 4, 5, and 6 above. Operating dowel (furnished) has steel rod in end, is used to push cover open. Rod is then inserted into hole in bottom tread, and ladder is lowered easily to floor. Ladder is partly counterbalanced by its own weight—easy to open.

Made of select vertical grain Fir. Grooved treads are 15 in. wide, reinforced with steel rods for rigidity. Fits any opening 18 x 24 in. or larger. Fits heights up to 9 ft. 2 in. Needs 4 ft. 7-in. space above ceiling opening. Shipped promptly from Stock. Includes full instructions. Ship. wt. 30 lbs.

Corner Cabinets

PROVIDE EXTRA STORAGE SPACE

CHOICE OF 3 POPULAR STYLES

Beautiful Ponderosa Pine corner cabinets, priced to save you money on single units—with even greater savings when purchased in pairs. Cabinets utilize wasted space in corners, add to beauty of any room. Especially attractive when used in pairs, flanking windows, as illustrated in view at left. Authentic colonial styling adds distinction to home interiors.

GIVE COMPACT, EFFICIENT STORAGE. Fit compactly into unused room space forming attractive display cases for china, glassware, etc. Perfect for dining or breakfast rooms; glass doors protect dishes from dust and breakage while allowing them to be seen. Shelves grooved to hold plates in upright position. Lower section has roomy shelves for storing silverware, table linens, serving dishes, etc. When used in living room or den, cabinets hold trophies, games, record albums or provide easily reached space to put away children's toys.

TOP QUALITY CONSTRUCTION. Built of clear, Ponderosa Pine, kiln-dried to proper moisture content, sanded smooth—ready to finish to match your furniture, woodwork, etc. No back panels necessary—walls of room serve as sides of cabinet. Shipped with front frame completely assembled and glazed at the factory; other parts are easy to assemble, using ordinary household tools. All parts precision machined for exact fit. Cabinets include: front frame with glass, shelves, doors, back shelf support, filler strips, hardware, assembly instructions. If back panel is desired, order 4 by 7-ft. sheet of ¼-inch thick Plypanel Plywood from Page 789. Cabinets shipped promptly from Stock by Freight, Truck or Express.

TRANSITIONAL DESIGN CABINET 27.95 each, 26.95 in Pairs

(A) Simplicity of design makes this beautifully proportioned popular cabinet blend with either traditional or modern interiors. Equally appropriate for ranch-type or colonial homes. Not as large as Colonial or Tudor cabinets; best suited for apartments or smaller rooms. Square top upper door is fitted with 9 panes of clear glass, Lower section has single door ¾ in. thick. Three shelf spaces in upper section, two in lower. Cabinet has total shelf space of approximately 8 square feet.

Height overall 6 feet 6 inches. Width at front of cabinet 33 inches. Maximum depth at corner 16½ inches. Requires 23½ inches along each wall. Ship. wt. each 56 lbs. *Not Mail.*

74 C 9802 R—$3.00 Down on Terms. Cash $27.95....When purchased in pairs, Each $26.95

TUDOR DESIGN CABINET 33.95 Each, 32.75 Each in Pairs

(B) Popular size and style for average rooms. Small view at top of page shows pair of Tudor cabinets installed on either side of picture window, lending attractive symmetry to room. Fits well in colonial homes; designed to complement traditional furniture. Arched upper door fitted with 12 panes of clear glass. Lower section has two doors for easier access to storage space. Doors are ¾ in. thick, have solid raised panels for more massive apearance. Four shelves in upper section provide more display area than in cabinet above. Two shelves in lower section. Total shelf space approximately 9½ square feet.

Height overall 7 feet 1 inch. Width at front of cabinet 33 inches. Maximum depth 16½ inches. Requires 24 inches along each wall. Ship. wt. each 70 lbs. *Not Mailable.*

74 C 9801R—$3.50 Down on Terms. Cash $33.95....When purchased in pairs, Each $32.75

COLONIAL DESIGN CABINET 48.95 Each, only 47.50 Each in Pairs

(C) Largest and roomiest of all cabinets. Combines fine craftsmanship with authentic Colonial styling in every detail. Complements Early American or Traditional furnishings. Large arched upper door fitted with 18 individual panes of clear glass. Lower section has two 1⅛ inch thick doors with solid raised panels for added beauty. Four shelf spaces in upper section provide extra storage height for vases, candlesticks, etc. Two shelves in lower section. Total shelf area approximately 10½ square feet.

Height overall 7 feet 4½ inches. Width at front of cabinet 38 inches. Maximum depth at corner 17 inches. Requires 27 inches along each wall. Ship. wt. ea. 95 lbs. *Not Mail.*

74 C 9800 R—$5 Down on Terms. Cash $48.95.....When purchased in pairs, Each $47.50

Build Your Own Cabinets

PRECISION MADE DOORS, DRAWERS, FRAMES

SAVE BY ASSEMBLING YOUR OWN CABINETS ... Parts from 1.40 TO 3.95

Add storage space where you need it most—in kitchen, basement, workshop, garage, attic—by building and installing your own custom-made cabinets. Make your own plans then assemble cabinets with Wards easy-to-follow instructions. Can be done in 4 simple operations. First attach shelves to walls, then fasten frames to front of shelves. Attach doors and insert drawers. All parts are precision-milled for exact fit; wide choice of sizes enables you to make a custom fit for any room. For counter tops see Wards selection of Plywood, Hardboard, Formica Beauty Board, Linoleum, etc. (See Index for page numbers.)

(D) TO (F) FRAMES. Kiln-dried Ponderosa Pine with mortise and tenon construction. Easy to assemble. Use as cabinet fronts with doors and drawers below—may also be used to construct sides. Cabinets (D) and (E) have drawer runners and metal drawer guides.

(G) CABINET DRAWERS. Precision-milled from kiln-dried western wood, with Fir plywood bottoms; easy to assemble. Sanded smooth, ready to finish as desires. Modern lipped front acts as stop. Drawers measure 18 in. overall front to back. Allowing for lip, size overall is ¾ in. wider and ⅜ in. higher than sizes shown in table at right.

(H) PLYWOOD FLUSH DOORS. Modern design harmonizes with modern kitchen motifs. ⅝ in. thick, made from 5-ply Fir plywood. ⅜-in. lipped edge overlaps door frame, keeps out dust. Smooth front is easy to clean. Door face sanded smooth. Size overall ½ in. wider and higher than opening size in table. Use hinges 84 C 831 or 84 C 820, listed on Page 813.

(J) PANEL DOORS. Made from kiln-dried Western Pine, ¾ in. thick. Panel is Fir plywood. May also be used as sides of cabinet. Top and side rails 2 in. wide; bottom rail 4¼ in. wise. Sanded smooth, ready to finish as desird. Size overall given in table at right.

HOW TO ORDER CABINET PARTS. Overall width of Frames is given in table below. When ordering doors and drawers, order them 3 inches narrower than frame. FOR EXAMPLE: for 17-in. wide frames, order doors and drawers in 14-in. size.

Frame (D) requires one 4-in. high drawer and one 24-in. high door. Frame (E) requires four drawers: two 9 in. high and two 4 in. high. Frame (F) requires one door 3 in. shorter and 3 in. narrow than size of frame. Order all parts from listings below.

Firluxe Cabinets with Factory Wood-Tone Finish

COMBINE KITCHEN BEAUTY AND ECONOMY, EASILY ASSEMBLED

66-IN. CABINET GROUP ABOVE . . . JUST 82.85 (Cabinets only)

Beautiful natural wood cabinets, completely pre-finished at the factory—at prices less than you'd expect to pay for unfinished cabinets. Ultra-modern smooth-front design of these rotary-cut Firluxe units will add a distinctive new look to your kitchen—make it more efficient, too. Cabinets are sealed and toned at the factory for matching beauty, then sprayed with finish coat of clear lacquer; no further finish is required. Wide choice of styles and sizes can be combined to fit almost any kitchen arrangement. New cabinets now available for Presteline gas and electric built-in wall ovens, and range top units. Cabinets are semi-assembled at the factory—require only minutes to set them up, ready to install.

STREAMLINED DOOR AND DRAWER FRONTS ARE EASY TO CLEAN. No need for exposed pulls or knobs—doors and drawers have special easy-to-grip edges for fingertip operation. Modern bronze-toned hinges are semi-concealed. Shelf height of wall units adjusts to your needs; shelves in base cabinets are removable for cleaning ease. Doors close quietly on rubber-roller catches; drawers slide smoothly on metal center guides. Concealed safety catch makes drawers spill-proof—can't pull out accidentally; catch flips back to release drawer for cleaning. Toe space finished in glossy black enamel to minimize scuff marks.

BUILT FOR YEARS OF SERVICE. Door and drawer fronts are 5/8 in. thick, 5-ply Fir plywood; framing members are kiln-dried Ponderosa Pine. Sides and backs of cabinets are brown-toned hardboard to harmonize with fronts. All joints interlock for firm support; frames have strong tongue and groove construction. Drawers are dovetailed, grooved and tenoned at all four corners. All parts are precision-machined for exact fit. To set up, just slip side panels into slotted, pre-assembled front and rear frames; then screw cross members in place. Insert drawers and mount doors. Easy-to-follow assembly instructions and all necessary hardware included with cabinets. Single door units (V), (BB), (CC) can be hinged easily on right or left side, whichever is more convenient; open easily with fingertips.

All joints in drawers are dovetailed for permanent holding and may be glued when assembled if desired. Glueing is not necessary, however, as drawer is very rigid after bottom is in place. Assembly instructions include large clear drawings of each step.

WALL CABINET SPECIFICATIONS. All wall cabinets are 13 in. deep, have individual sides, tops and backs. Use 30-in. high units for maximum storage; use 18-in. high units over sink, refrigerator, range top, etc. Special over-oven cabinets match oven base cabinets; separate sizes needed for gas and electric models. Shelves in wall cabinets may be installed at varying heights to suit your needs. Order from table at right above.

BASE CABINET SPECIFICATIONS. All base cabinets are 34½ in. high, have individual backs and sides. Tops of all base cabinets (except oven cabinets) are left open; order 25-in. wide custom-made Formica Countertops (shown on next page), or make your own countertop using Formica Beauty Board or linoleum. See Index for page numbers. Oven Cabinet and Range Base Cabinet are specially designed to fit nationally-known Presteline electric and gas ovens and ranges, listed on next page. Be sure to order countertop, oven or range separately, if desired. Order from table at right.

(2) CLOSE-UP EXPLODED VIEW shows details for making simple assembly.

PAYMENT PLANS

Use Wards Monthly Payment plan, with as little as 10% Down. See Inside Back Cover.

Cabinets may also be financed through the F.H.A. Loan Plan with up to 3 years to pay. See Page 972.

ORDERING AND SHIPPING INFORMATION ON FIRLUXE CABINETS

HOW TO ORDER: Make a simple sketch of your kitchen to help in placing cabinets. (1) Measure wall space 36 in. from floor. (2) Locate sink cabinet, then choose other base cabinets to fill space. (3) Line up wall cabinets directly over base units for best appearance. Wide choice of cabinets makes fitting easy. Straight base and wall fillers can be trimmed down for exact wall-to-wall fit. To turn corner, either use Base Corner (AA) or join front edges of two cabinets with Base Corner Filler (this leaves vacant area in corner to be covered by counter top for added working space); allow 27 inches along each wall for Base Corner Filler. Base cabinets for electric and gas ovens are different heights; be sure to order correct over-oven cabinets so that total height is 84 inches. Order Ovens, Range Top Units and Formica Countertops separately from next page. Be sure to state Style No. of units.

SHIPPING INFORMATION. Firluxe cabinets are shipped promptly from Stock by Freight or Truck; pay transportation charges from Mail Order House. See Page 970 for freight rates and distances and other information on shipments.

Birch Cabinets Add New Beauty to Any Kitchen

GIVE YOUR KITCHEN THAT CUSTOM-DESIGN LOOK WITH QUALITY CABINETS

(1) Drawer fronts are solid Birch, molded to a curve. Built-in finger wells.

(2) Sliding Shelf in cabinets (H) and (K) may be removed and used as trays.

(3) Sturdy construction, reinforced by corner blocks, glue, screws for strength.

(4) Door Pulls above may be purchased from Pg. 813 if hardware is desired.

(5) Sink Basin with sink rim and sealing mastic.

FULLY ASSEMBLED, BEAUTIFULLY FINISHED

Cabinets are fully assembled, ready to install. All parts sprayed with two coats of penetrating water-resistant sealer, then sanded smooth. Final coat of high-grade clear lacquer applied to bring out natural beauty of graining. Fronts are hand rubbed and polished. Two light waxings a year maintain beautiful finish for many years. Built-in pulls make exposed hardware unnecessary—if you wish to order metal pulls see (4) at left.

Tops of base cabinets are left open to permit installation of a continuous counter top. Wards have a wide selection of colors available in Counter Tops (W) and (X), shown on opposite page. Monthly Terms are available for your entire cabinet order. Details on Inside Back Cover.

IT'S EASY TO ORDER WARDS CABINETS . . . WIDE CHOICE OF SIZES

Send diagram of room showing how cabinets will be placed. Include room measurements.

BASE CABINETS. Choose ends, corners (M) has stationary shelf—available for right or left corner. (N) fits either corner—available with stationary or revolving "Lazy Susan" shelves.

SINK UNIT. Try to place sink under window for more light, air. Sink Front (L) in 36. or 42-in. widths. Combination Sink Base (R)—60, 66 or 72 in. wide. Maximum storage space in 1 compact unit. Fill remaining space between sink and end with base cabinets in your choice of widths.

End Shelf (P) forms attractive setting for display of your favorite plants, cookbooks, nicknacks, etc.

WALL CABINETS. Center over base cabinets. Start with end and corner units. Use any cabinet as end unit. If sink is under window, End Shelves (F) or Bracket Shelves (E) with Valance provide a pleasing arrangement—see view on opp. page. Fill in remaining space with wall cabinets.

Corner (C) is equipped with revolving or stationary shelves. Combination Wall Cabinet (G) matches Base Cabinet (R). 18-in. high unit (D) is available for use over sink, refrigerator, stove, etc. to form a compact, step-saving arrangement. NOTE: Use fillers for wall to wall fit, though careful planning often makes them unnecessary. 1-door units can be hinged right or left as desired. See "Shipping Notice" on opposite page.

WALL CABINETS LOW AS 19.95 (A) 12 in.

(A) (B) 30-IN. CABINETS. 1-door (A), 2-door (B)—widths for easy fitting. 3 shelves of smooth hardwood plywood give full utility for storage.

(C) 30-IN. CORNER CABINETS. CW26 has stationary shelves, RCW26 has revolving "Lazy-Susan" shelves—just spin to bring contents of shelf within fingertip reach. *Specify right or left hand hinge.*

(D) 18-IN. CABINETS. 2-door units, 1 shelf. Use over stove, refrigerator, sink, etc., for efficient use of wall space. If you desire maximum storage, place 18-in. cabinets over 30-in. units instead of using a soffit.

(E) (F) END SHELVES add decorative touch, extra space for plants, cookbooks, etc. Combine with Valance for window use.

74 C 8152 F—Wall Cabinets. 12 in. deep. *State Cat. No., Style No.*

THIS MODERN, WORK-SAVING CABINET KITCHEN CAN BE YOURS...AT WARDS

PICTURE YOURSELF IN THIS MODERN KITCHEN, enjoying the warm beauty of rich-grain Birch cabinets—made by a nationally-known firm and shown in leading home magazines. Imagine the cleaning ease of a sparkling, full-length Formica counter top in your choice of 12 colors. What a wonderful change it would be to have all the roomy storage space you need . . . with a built-in oven at convenient waist height, and a really easy-to-clean stainless steel range top built right into the counter. You'd proudly invite your friends to see a kitchen like this. You'd be a happier, more efficient homemaker in such a setting. And all of it can be yours at Wards. The initial cost is small, compared to the years of service you'll expect, and get, from these top quality wood cabinets. Fine furniture construction throughout.

TOP QUALITY SOLID CONSTRUCTION. All exposed frame parts select Northern Birch or Hard Maple, thoroughly seasoned and kiln-dried. Rigid mortise and tenon joints for strong support; no nailing on exterior face of cabinet. All cabinets carefully squared, base cabinets further reinforced with corner blocks, held with glue and screws—see (3) on opposite page—just as in the finest furniture. Modern flush surfaces are easy to clean; recessed pulls eliminate exposed hardware. Doors are 7-ply Birch hollow core, laminated under hydraulic pressure with waterproof adhesive—lightweight yet sturdy. Drawer fronts are solid Birch with molded design—see (1) opposite page. Sides of drawers dovetailed into fronts, backs, bottoms glue-blocked for lasting strength; drawer bottoms have plastic coating for added cleaning ease. Sides of cabinets are hardwood plywood panels, electrically bonded to ¾-in. lumber frame—provide strong bracing, keep cabinets rigid. Backs of base units are light-grained hardboard; wall cabinets have plywood backs. Shelves are 5-ply ½-in. hardwood plywood. Base cabinets (H), (K) have sliding shelf tray (2) on opp. pg. may be removed for serving—has hard maple sides. Hard maple or birch drawer runners are slotted into front and side panel frames; reinforced with glue blocks and screws. Runners have permanent-type slide lubricant—never need oiling, insures easy action even when drawer is full. Rubber roller catches produce smooth, noiseless door action. Extra-heavy hinges are semi-concealed for modern appearance and easy cleaning. Recessed toe space on base cabinets gives necessary foot room. Molded drawer front leaves extra knee space, eliminates leaning, rests your back.

YOUR KITCHEN IS MORE THAN JUST ANOTHER ROOM—it's a work center as important to you as the office or shop is to your husband. Research proves you spend many hours every day in meal planning, serving, clean-up. An efficient new kitchen can make these hours more enjoyable—can actually shorten them to give you more leisure time to spend with family and friends.

CHOOSE ANY CABINETS, ANY ARRANGEMENT YOU LIKE. Individual cabinets below come in many widths for easy room planning. Order one cabinet or a group, whichever you need. Presteline gas or electric ovens in stainless steel or copper. Cabinets fully assembled and lacquered (see opposite page). Tops of base units left open for full-length Counter Top (W) or (X).

SHIPPING NOTICE. Cabinets shipped by Freight or Express from Factory near York, Pa. Allow 10 days plus time in transit. Freight rates on Page 970.

Decorator Styled Folding Doors in Luxury Fabrics

NOW IN FOUR PRICE RANGES...WIDE CHOICE OF ARTISTIC COLORS

IMPERIAL FOLDING DOOR . . . NO FINER MADE . . . 37.45 30 in.

(A) Finest we know of! And in the long run, best for value too. Superior in every detail—fashion-right for the most exquisitely furnished homes. As room divider for living-dining areas, as door to bedroom, closet or bath, Imperial assures modern, functional beauty—saves valuable floor space taken by ordinary swinging doors. Also recommended for commercial installations: offices, stores, restaurants, clubs, etc.

COVER IS HEAVY 27-OUNCE MATERIAL for fullest most attractive drape—over 30% heavier than on many nationally-advertised doors. Fabric is durable plastic, reinforced with preshrunk cotton backing. Available in subtle Antique Pattern (4) in soft shades of Lime (A), Russet (2), Gray (1), or in Deep Red (3). Aluminum handle has satin finish.

UNDERNEATH ITS ATTRACTIVE COVER is rugged, all-steel framing; engineered for smooth operation and proper fold alignment. Hinges, the most important operating parts, are steel channel type—many times stronger than hinges used on other folding doors. Door glides easily on squeak-free nylon rollers.

INSTALLS QUICKLY, EASILY. Need only screwdriver and level. Steel channel track at top—no bottom track used. Door with latch lock (locks with key on either side) shipped in 4 weeks from Factory in Detroit; allow transit time. All others shipped promptly from Stock. Fit standard door openings 6 ft. 8½ in. high. *State Color:* Lime (A), Gray (1), Red (3), Russet (2). *State Cat. No., Width and Single* or *Double.* 10% Down, on Terms.

NEW AMBASSADOR FOLDING DOOR 22.95 30 in.

(B) New low-priced way to save space in almost every room: bedrooms, kitchens, clothes closets, linen closets. You'll find places to use the Ambassador and gain floor space taken up by regular swinging doors—and you can utilize this extra space for placing furniture or appliances. The Ambassador is a modern door designed for today's smaller homes and apartments. Install in pairs for wider openings.

STEEL FRAME CONSTRUCTION. Steel vertical rods keep attractive folds in position. Scissors hinges insure smooth action. Nylon rollers glide on overhead steel channel track—no bottom track. Beautiful plastic cover backed by cotton, cleans with damp cloth. Fabric has smart grained finish in two neutral colors. Door can be painted any color with Wards Rubberflex paint, if ever desired. Install with just screwdriver and level.

74 C 7570R—*State Size, Color:* Beige (B) or Gray (8). Shipped from Stock.

Size	Fits openings	Ship. wt.	Each
30 in. wide x 80 in. high	27 to 33 in. wide	24 lbs.	$22.95

NEW ESQUIRE FOLDING DOOR . . . ONLY 8.25

(C) Shop and compare this low price with any similar nationally-advertised product. Lightweight space saver—takes only minutes to install. Ideal for linen closets, pantries, clothes closets—or use in childrens rooms, dens, basements. Smart plastic fabric in neutral Gray cloud pattern, can be painted if you desire. Folds formed by double weight heat-sealed seams and by position of nylon glides. Plastic handle attaches to full-length concealed steel channel. Stainless steel latch. Overhead steel track. Instructions. *Mailable.*

74 C 7565 M—30 by 80 in. (fits openings to 32 in. wide). Ship. wt. 7 lbs..$8.25

CUSTOM-BUILT DINETTE LOUNGES IN BLENDING OR CONTRASTING COLORS

DESIGNED FOR kitchens, breakfast nooks, recreation rooms. Offers you the open floor arrangement featured in the latest interior decorator schemes. Ready-made lounge available in two shapes—"L" shape (D) for use in corners or as modern room divider; and Straight length (9) for use in pairs or singly (see below). Booth back, front and sides completely covered in heavyweight 20-gauge Duran—durable, long-lasting plastic that resembles leather. Duran resists scuffing, cannot chip or peel; flame-resistant and completely colorfast. Grease, alcohol and most household stains wipe off easily with a damp, sudsy cloth. Lounge comes in 5 colors and two patterns; table in 4 colors and 2 patterns. Mix or match the colors, either way you'll have a bright, cheerful room in fashion-right colors. Order lounge and table together and save additional dollars. Only 10% Down, see Inside Back Cover for details.

SHIPPING NOTE: Lounges and tables below shipped in about 2 weeks by Freight or Truck from factories in St. Louis, Mo. or Baltimore, Md. whichever is nearer. Allow transit time.

CUSTOM MADE LOUNGES ARE AVAILABLE. Only $12.50 per ft. (wall measurement). Have your dinette lounge custom made to fit your exact room dimensions. Expert craftsmanship assures you of high quality. Available in 3 shapes—"L" shape (D), Straight (9) and "U" shape (10). Come in same colors and fabrics as regular lounges (see below). Can be built for special situations like low window sills, air ducts, corner water pipes, etc. For estimate, send Wards a floorplan sketch of your room showing all dimensions in inches.

Smooth Yellow

Nubby Red

(D) DINETTE LOUNGE consists of base, cushioned back, and removable cushioned seat. Seat has rubberized hair and cotton padding over strong "No-Sag" springs. Back has true-form shape; extends 18 in. above seat, supports your whole back in restful comfort. Constructed with sturdy hardwood frame with all joints firmly glued and corner blocked for long wear. Base, 6 in. wide, covered in black—eliminates unsightly scuff marks from shoes, etc. Lounge back is 36 in. high overall (NOTE: if window sill or other obstruction is less than 36 in. from floor, order Custom Made Lounge. Show floor plan with all dimensions). Seat is 18 in. high. Front to back depth of booth is 22 in. in all sizes. Make your choice from ten coverings—two textures of finish and five colors. Choose from smooth Duran—fine grained leather-like quality or Nubby Duran—tufted upholstery-like quality. Each texture in: Red, Yellow, Chartreuse, Green or Gray. Color samples on request. Important Notice: 48x60-in. and 48x72-in. sizes have short side on left (as you face lounge); 60x48 in. and 72x48-in. have long side on left. Measurements taken at back of lounge (along wall). Order from table below.

(E) DINETTE TABLE is specially designed to match lounge. Table top is 29 in. high, 15/16-inch thick, built for long wear. Has surface of genuine Formica bonded to ¾-in. waterproof plywood; bottom side of table top is finished with ⅛-in. hardboard. Top completely edged with silver-gray plastic molding specially shaped under pressure for tight seal at all points. Formica is a high-pressure laminate . . . resists fruit acids, boiling water, household cleaners; won't crack, withstands heat up to 275° F. Cleans with a damp cloth. Stays bright through hardest wear. Chrome plated pedestal attaches easily to base; table top and pedestal shipped unassembled, instructions included. Octagon-shaped steel pedestal base holds table steady yet table is easy to move when desired. Base has scuff-resistant black crackle finish. Choice of 4 table top colors: Yellow Linen (E), Red Linen (1), Green Linen (9), Gray Pearl. See Page 784, item (K) for actual table top colors.

Wards Plastic Tile in Today's Smartest Colors

NEW LOW PRICE FOR TILE OF GENUINE STYRON PLASTICS

MAKE YOUR HOME FRESH AS SPRING WITH WARDS MODERN TILE . . . NOW ONLY 37c sq. ft.

Select your favorites from this gallery of modern colors—the same smart shades featured in leading home magazines. You'll be delighted to see how modern your kitchen or bath can be with easy-care plastic tile. Now you can select even more attractive color schemes because Wards plastic trim and moldings now come in same colors as tile (see (E) through (X) below). Wards tile made only from plastic with nationally-known STYRON label, assures you of top quality, all virgin Polystyrene. Slow molded for extra strength.

HERE IS DELUXE QUALITY. Every tile meets Government specifications for thickness, uniformity, heat resistance and color fastness. Every color is permanent. High crown gives deep, rich shadow lines. Colors are molded right into tile—all the way through—can't scratch off or wear off. Corners perfectly square—tile can be set in straight pattern (as shown above) or in staggered pattern, whichever you desire.

MUCH WIDER RANGE OF INTERIOR DECORATING SCHEMES is possible. Wards trim (caps, stripes, half tiles, corners, bases) is now available in all marbleized and solid colors shown on 4¼x4¼-in. tiles at right. Now choose from 19 trim colors to contrast or blend with tile. See room scenes above for ideas.

TILING IS A LASTING HOME IMPROVEMENT. Approved by F.H.A. for new construction. Ends peeling paint, cracking plaster and yearly redecorating. You need tiling in the bathroom to protect walls from steam and hot water—in the kitchen for really washable walls. Cooking stains wipe off in a jiffy. Remember that tile, unlike ordinary painted walls, keeps its luster after countless cleanings. Soft, livable colors stay beautiful for many years, blend with many accessories.

IT'S EASY TO TILE—we send full instructions. Just spread Cement over smooth walls, then apply tile. Cut around fixtures with Cutter (below) or coping saw. Use Half Tiles or Stripes as trim. To find sq. ft. area of walls to be tiled, multiply height by width. Then divide by 5 to find how many packages of full tile to order. For a free estimate, write Wards Engineering Dept. For free samples, write stating colors wanted.

MODERN KING SIZE TILE IN SOLID PASTEL COLORS

King size tile has all features of regular tile listed above. Larger 8½x8½-in. tile contrasts smartly with regular-size tile—provides the striking combination shown in bathroom scene above. In solid pastel colors only (not marbleized)—use with regular-size tile in either marbleized or solid colors. Tiling with 8½x8½-in. king size is quicker—each tile covers the area of four regular 4¼x4¼-in. tiles. Apply just like regular tile.

(18) 74 C 2066 M—Pastel Green
(19) 74 C 2063 M—Pastel Yellow
(20) 74 C 2065 M—Pastel Gray
(21) 74 C 2061M—White
(22) 74 C 2067 M—Pastel Blue

KING SIZE TILE. 8½x8½-in. Package of 10 covers 5 sq. ft. Ship. wt. 2 lbs. 4 oz. *State Catalog No.* ..... Package $2.15

WARDS NEW PLASTIC BULL NOSE CAP AND BASE COVE MOLDINGS . . . SAME COLORS AS TILE ABOVE

TO X Now plan any color combination you wish—Wards plastic moldings and trim pieces are available in the colors as regular tile above—both marbleized and solid tone. Use the long-popular combination of contrasting tile and trim, or meet the modern trend by using one-color installations. See pictures at top of page for ideas. Laundry scene shows marbleized tile with solid-tone Base Cove and Bull Nose Cap. Kitchen scene shows a similar combination—marbleized tile with solid-tone Base Cove but with solid-tone Half Tile used as stripe. Bath scene shows marbleized tile with marbleized trim—note how Bull Nose Cap Up Corners and Down Corners are used to go around shower enclosure. Cap Inside/Outside Corner is in 1 piece—cut apart with saw to use both corners. Available in all marbleized colors listed above and all solid-tone colors (11) through (17)—no king size colors. *State Catalog No., Color.*

Aluminum Awnings for Modern Beauty and Protection

(A) (B) DELUXE VENTILATED AWNINGS. Newest design in aluminum awnings—engineered to protect and beautify your home longer than any metal awning we know of—because Wards DeLuxe Awnings feature three important improvements: (1) New crown-shaped panels—each has 3 sides so that no part is subjected to direct sun rays all day long. Keeps your home cooler, reduces sun-fade common to ordinary flat-panel awnings. (2) New automobile-type finish applied by modern roller coating process assures you of the finest, most lasting awning finish available. (3) New interlocking panels just slip together—easier to assemble, no nuts and bolts needed along panel joints.

100% ALUMINUM CONSTRUCTION. Heavy 1/8-in. extruded braces; even nuts and bolts are rustproof aluminum. Other outstanding features include: weatherproof ventilation; light-reflecting white undersides; large 5½-in. scalloped valance; equalized drop and projection for better appearance. Awnings are White with choice of Green, Yellow or Red trim. Hardware and assembly instructions included. See "How to Order" at right. *State Catalog No., Width and Color. Not Mailable.*

NOTE: For other sizes including carport and patio covers, camelbacks, mitred corners, special colors, etc.—write Wards Mail Order House.

(C) (D) HORIZONTAL AWNINGS—modern ranch style priced for outstanding value. Blend with many style homes because slope adjusts for best appearance. Rustproof aluminum construction, stainless steel braces.

ADMIT MORE LIGHT AND AIR yet offer full awning protection. Individual horizontal panels overlap but are held apart by spacer clips—gives better ventilation, soft, diffused light filters through, keeping rooms bright and cheerful. Gently curved panels have beautiful enamel finish applied by modern roller-coat process. The two colored panels can be shifted to other positions without tools. Bottom panel has built-in drip cap.

ADJUSTABLE SLOPE. Amount of drop and projection listed below can be increased or decreased 1½ in. to suit your home. Awnings are White with choice of Green or Burgundy trim. Hardware and assembly instructions included. See "How to Order" at right. *State Catalog Number, Width and Color. Not Mailable.*

Width In.	Wt. Lbs	(C) WINDOW AWNING Drop	Project	74C4865 R	(D) DOOR AWNING Drop	Project	74C4880 R

72	17	30¼ in.	28 in.	31.45	.....	.....	.....

IMPORTANT when measuring—allow for overlap. Mounting brackets are indented 2 inches from both sides.

(E) ECONOMICAL ALUMINUM CANOPY. Adds beauty and protection to your doorway. Modern design combines lightweight aluminum panels with steel mounting brackets for extra strength. Blends harmoniously with most architecture. Shelters doorway from sun and rain in summer; snow and sleet in winter. Face panel enameled in three popular colors—Red, Green or Blue. Side panels and supporting brackets have sparkling white finish. Canopy 48 in. wide with 32-in. projection, 10-in. drop. Hardware and assembly instructions included. *State Color.*

74 C 4810 R—Ship. wt. 13 lbs. *Not Mail*....$14.25

HOW TO ORDER ALUMINUM AWNINGS

Awnings and canopies may be mounted on window or door frame casings, or on side of house as desired. To measure width, first determine where awning will be mounted. Distance (1) in picture at right is "drop" of awning; distance (2) is "projection". "Drop" should extend to about middle of window.

TRANSLUCENT FIBER GLASS PANELS FOR INTERIOR AND EXTERIOR USE

(F) Brilliantly colored Fiber Glass panels transmit diffused light—soften harsh glare of sun, yet offer complete privacy. Use this remarkable material indoors or outdoors—its "do-it-yourself" possibilities are endless. Beautify your home by adding a cool, glare-free patio, carport or breezeway (see view of patio on opposite page). Save money by making your own protective awnings and canopies—with Brackets (G) and (H) at right. Or use in place of conventional building materials for wind breaks, green houses, sky lights (2½-in. corrugations match Wards metal roofing Page 792). Ideal for modernizing home, store or office.

For interiors, Fiber Glass adds new color and interest too. Use for attractive room dividers, sliding cupboard doors, waterproof shower stalls, window ventilators, sliding doors, modern counter fronts. These are just a few applications of remarkable Fiber Glass—you can add many more. And you'll find it easy to use—Fiber glass is durable, yet light and easy for 1 man to handle—can be nailed, sawed, screwed, bolted and drilled just like lumber.

SOLD UNDER MANUFACTURER'S NAME FOR 10 TO 15% MORE. Made for Wards by leader in the industry. Best quality crinkle finish on both sides. Constructed by fusing glass fibers and Polyester resins under pressure. Completely weatherproof. Extra strong, extra rigid—withstands 75 lbs. per sq. ft. snow load over 4-ft. unsupported span. Choice of two widths in five striking colors shown on opposite page. Shipped promptly from Stock. Low as 10% Down on Terms, see Inside Back Cover. *State Width, Length.*

74 C 4847—Wt. 6 lbs. Pr. $8.25

ECONOMICAL TILEBOARD PANELS FOR WALLS AND CEILINGS

(J) SOFT PASTEL COLORS in three mix-or-match patterns. Colorful, easy-to-clean panels make durable inexpensive covering for both walls and ceilings in kitchen, bath, basement, utility and game rooms, restaurants, stores, offices, etc. Tileboard is 1/8 in. thick Masonite Presdwood, a specially processed warp-resistant hardboard with a hard gloss plastic finish of scientifically-balanced resins including tough, durable Melamine. Beautiful high-luster finish is impervious to grease and stains, cleans easily with a damp cloth. Tileboard can't warp, crack or peel—it has the finest finish obtainable.

CHOICE OF THREE PATTERNS, SIX LOVELY COLORS to blend with home and store furnishings. Tile-Scored Pattern (shown on lower walls of room on opposite page) has 4 by 4 in. squares. Panel-Scored Pattern (shown on upper walls of room) has score lines 8 in. apart, running lengthwise of sheet—panels may be installed horizontally or vertically; provides pleasing modern effect. Plain-Surface Pattern has no score lines—ideal for ceilings as well as for walls. Score lines on Colonial White panels are in Black; all other score lines are White. Color samples on opposite page show how panels resemble actual tiles. Score lines have rounded edges—easy to clean with just soap and water—no square corners to trap dirt or dust.

EASY TO INSTALL. Apply to any smooth firm wall such as plaster, plasterboard, etc. Cut to fit with a sharp fine-toothed saw; apply Tileboard Cement (at right) to back of panel and press firmly in place. Spreader and full instructions included with each order. For pleasing effects combine patterns as at left or use with Plastic Tile on Page 783. Free sample on request—*state Colors wanted.* For a finished job order Moldings and Trim listed at right. Shipped promptly from Stock. *Not Mailable.* Use Wards Convenient Terms—low as 10% Down.

GENUINE FORMICA BEAUTY BOARD...CHOOSE FROM 3 PATTERNS, 7 SPARKLING COLORS

(K) Modern, lustrous Formica in rigid 5/32-inch thick sheets for do-it-yourself projects. Three patterns to choose from: Linen, Pearl and new, modern Skylark. Formica is the most economical countertop covering you can buy because of its long lasting melamine surface—unharmed by fruit acids, boiling water or household alkalies. Colors are sealed in—stay beautiful and bright for years. Heat resistant—withstands heat up to 275° F. (direct contact with extremely hot metal surfaces is not recommended). Easy to keep clean—just wipe with a damp cloth. Hard-gloss plastic surface won't crack or craze.

AT HOME IN EVERY ROOM. Save money by building your own durable kitchen counter top—it's easy to make a continuous top, complete with matching backsplash (see cabinet scene on opposite page). Formica also makes a beautiful addition to dinette nooks, bathrooms, powder rooms, bedrooms and workshops. Easy to keep clean—especially popular for kitchen tables, shelves, bars, desks, cosmetic tables, coffee tables and other furniture, as well as counter tops; any place subject to frequent scuffs or bumps. Ideal for covering walls or wainscoting in kitchens, bathrooms, and recreation rooms—excellent for stores, restaurants and offices. Use blending or contrasting shades as you desire.

APPLY FORMICA YOURSELF. Beauty Board comes in tough, colorful sheets bonded to a solid core material. 5/32-in. thick sheets are easy to glue to any smooth surface (use glue at right). Cut to any shape or size with fine tooth saw. Cover exposed edges with stainless steel molding. See beautiful patterns in actual colors on opposite page. Order at right.

Insulated Asphalt Siding

PROTECTION, BEAUTY AT LOW COST

SIDING IN A CHOICE OF THREE ATTRACTIVE DESIGNS LOW AS 7.80 50 sq. ft.

ALL-WEATHER PROTECTION. Rigid ½-in. thick panels provide effective insulation, control temperature summer and winter.
A PERMANENT SOLUTION TO SIDING PROBLEMS. Panels are rot-resistant, weatherproof. Insulated siding is highly resistant to fire.
LOW-COST, PRACTICAL WAY TO MODERNIZE. Never needs painting, expensive exterior upkeep is eliminated. Long lasting.
ADD NEW CHARM AND BEAUTY TO YOUR HOME. Increases the value of your property. Three modern patterns to choose from.

(A) (B) (C) At one low cost and in one simple operation you can insulate, protect and add beauty to your home. Wards Asphalt Siding features great structural strength, colorful design, and high insulation value. Excellent for remodeling or new construction—meets the requirements of the Federal Housing Administration.

CONSTRUCTION FEATURES. Strong insulating board panels ½ in. thick. Double coating of weatherproof mineral-stabilized asphalt protects panels. Panels shiplapped on all 4 edges for tight fit. Specially designed corners act as trim and seal corners to assure weathertight installation. Lightweight panels are easy to install—no piece weighs more than 8 pounds. Insulating value equal to 8 inches of brick masonry, 18 inches of poured concrete or 9 thicknesses of asbestos shingles.

Finely-screened Ceramic-rock granules have colors fused on at high temperatures. Duplicates appearance of real masonry and shingled walls. Suitable for homes, churches, stores, factories, farm buildings. Apply directly to any type of frame walls, or directly to sheathing. Instructions are included. Order nails and mastic below. Shipped promptly from Stock.

(A) RIBBED STONE PANELS. Sculptured texture gives the long, narrow appearance of chiseled stone. Mortar-lines are covered with fine granules to screen out panel joints. Carton contains 12 panels, 14⅜x43¾ in.; covers 50 sq. ft. Shipping weight carton 100 lbs.
74 C 801 R—Pastel Green. Use 74 C 7M Nails.....Carton $8.65
74 C 803 R—Pastel Brown. Use 74 C 5M Nails.....Carton 8.65

(AA) RIBBED STONE CORNERS. Made of same ½-in. insulating board as ribbed stone panels (A) above. Each corner 14⅜x4⅛ in.
74 C 811 M—Pastel Green. Ship. wt. 2 lbs.....Each 43c
74 C 813 M—Pastel Brown. Ship. wt. 2 lbs.....Each 43c

(B) CEDAR GRAIN SIDING PANELS. Texture gives appearance of authentic cedar grain. (See installed view above.) Carton contains 16 panels, 10x48 inches; covers 50-sq. ft. area. Ship. wt. carton 100 lbs.
74 C 807 R—Pastel Green. Use 74 C 7M Nails..... Carton $8.75
74 C 808 R—Pastel Gray. Use 74 C 8M Nails.....Carton 8.75
74 C 809 R—Dawn (Med.) Gray. Use 74 C 8M Nails.....Carton 8.75

(BB) CEDAR GRAIN CORNERS. Aluminum, baked-on finish. 10 in. long.
74 C 817 M—Pastel Green. Ship. wt. 2 oz.....Each 22c

Prepainted Insulating Boards for Easy Remodeling

"DO-IT-YOURSELF" WITH READY-TO-INSTALL BOARD, PLANK AND TILE

BEVELED EDGES ALSO PAINTED TO GIVE YOU BETTER DECORATED, MORE ATTRACTIVE ROOMS . . . INTERLOCKING JOINTS COMPLETELY CONCEAL NAILING

It's easier now than ever to turn attics or basements into modern, insulated rooms. Unused space anywhere in your home can be made into attractive show places. It's easier and quicker now because (1) Wards Plank and Tile have painted bevelled edges as well as face surface (2) tongue and groove joints interlock, as shown at left, completely hiding nail heads, and (3) you can install with quick-action staplers as well as nails. Design your own decorating scheme with combinations of plank, tile and plain board. You'll find it's both easy and economical.

Wards insulating board, plank and tile are durably constructed to provide a strong covering surface for walls and ceilings. Chemically treated to guard against dry rot, deterioration and insect attack. Will not twist or split—made to give years of dependable service. In addition, these modern building materials offer important insulation and acoustical values. Factory tests prove effectiveness in resisting passage of heat—helps keep summer heat out and reduces heat loss in winter. Also retards passage of sound. Ivory painted face side may be repainted.

ACOUSTICAL, INSULATING TILE LOW AS 11c sq. ft.

M ACOUSTICAL TILE. Absorbs about 50% of all sound waves striking surface. New decorative random-drilled pattern. Triple-coat white finish. Interlocking edges conceal nailing, stapling. May also apply with cement (below). Same high quality materials as tile below. Full ½-in. thickness has insulating effect. Easy to install. 12x12-in. tiles. Wt. Carton 54 lbs. *Not Mail.* Min. order 1 carton. *State quantity.*

74 C 3334 R—Carton of 64 tiles, covers 64 sq. ft. . . Carton $9.89

INDIVIDUAL TILES. Ship. wt. each 14 oz. *Mail*. . . . Each 16½c

N WARDS INSULATING CEILING TILE. Does more than decorate. Gives you increased insulation; low cost installation. Cover unsightly cracked plaster. Unpainted beveled edges match wall planks at right. For modern effects: apply tile in diamond shaped designs, stagger tile or place on one or two walls of room. Ivory-white finish. Each tile full ½-in. thick. Easy to install—apply 16-in. tile direct to joists; 12-in. tile over furring strips—use staplers or 1¼-in. brads (see Index). When installing directly over plaster use Cement (below) and brads. Tongue and groove edges.

74 C 3323 R—*State size, quantity. Not Mail.* Min. order 1 carton.

INSULATING WALL PLANKS LOW AS 11¼c sq. ft.

P Modernize your present living areas; build new rooms in attics, basements, etc. with Wards economical lightweight Wall Planks. Ideal in living rooms, dens, recreation rooms, etc. Excellent also for offices, shops, restaurants. Covers old, unsightly, cracked plaster. Full ½-in. thickness for effective insulation; makes rooms more comfortable—helps reduce fuel bills.

Smart decorative lines — unpainted beveled edges give pleasing contrast to ivory-white painted surface, permit greater variety in appearance. Planks can be applied either horizontally (as shown above) or vertically. Use same or varying widths as desired. Ideal for use on ceilings and walls. Can be repainted. Combine with tile or plain board to create other pleasing effects. 10 planks per carton. To apply over furring strips use Staplers or 1¼-in. brads (see Index). Directly over plaster, use cement (listed below) and brads. Tongue and groove edges permit concealed nailing.

4-PLY FIBER WALLBOARD LOW AS 4½c sq. ft.

Z Attractive yet inexpensive covering for walls and ceilings. Converts attic into extra room; provides easy way to hide plaster cracks, etc. or to line garages, poultry houses, etc. One side ivory color.

CONSTRUCTION. Wood fibers compressed into 4-ply sheets, 5/32 in. thick. If desired paint with oil base or casein paint—no sizing is needed. Not recommended as a wallpaper base or in bathrooms—wallboard not water-resistant.

INSTALLATION. Large-size lightweight panels go up easily. No special tools—requires only hammer, saw, nails. Nail directly to studding (each panel covers three studs with standard 16-in. spacing) or nail over old plaster. Saw like lumber to fit odd spaces. Use 1 lb. of 1⅜-in. nails 84 C 9958 (P. 814) for 200 sq. ft. To cover joints, use Gummed Tape below or Wood Panel and Cove Molding, Page 778.

74 C 3275 R—Minimum Order: 4 sheets. *Not Mailable. State Size.*

VERSATILE ALL-WOOD PANELS FOR INTERIOR, EXTERIOR USE

DURABLE, LOW-COST BOARDS . . . EXCELLENT FOR HUNDREDS OF "DO-IT-YOURSELF" PROJECTS

SUPERIOR QUALITY, ALL-WOOD HARDBOARD produced for Wards by a leader in the industry. Versatile, pressed wood panels are designed for both inside and outside uses. Really economical—make it easy to convert attic space into attractive living quarters. Ideal for walls, ceilings, partitions, counter tops, built-in furniture, kitchen cabinets, doors, children's play-yards, toys, etc. Tempered hardboard makes ideal farm buildings, home exteriors, etc. Home handymen will find literally dozens of uses for this strong, easy-to-work material.

HARDBOARD Is "WOOD-MADE-BETTER"—built of wood fibers pressed together under tremendous pressure. Wood fibers are formed into hard, dense panels. Extra-strong and rigid—unusually resistant to surface scars; no knots or grain to splinter or crack. Attractive natural-wood color. Beautiful as is, or may be lacquered, stained, painted or waxed to match your color scheme. Easy to work—can be sawed, nailed, drilled; applied with nails, adhesives, bolts, screws, etc. Shipped promptly from Stock in Mail Order House. *Not Mailable.*

STANDARD HARDBOARD . . . LOW AS 7c sq. ft.

(A) Standard Hardboard—the perfect building material for most interior uses where normal moisture conditions exist. All-wood hardboard—no artificial binders or fillers are added. Denser than most woods but not as dense as hardboards listed at right. Ideal for walls, ceilings, partitions, etc. Use smaller size panels for many home projects such as cabinets, shelves, bookcases, etc. (see picture above). Where extreme or fluctuating humidity conditions or exceptional hard use are encountered, Tempered Hardboards at right are recommended. Use ⅛-in. panels over solid backing; nail ¼-in. panels directly to studs or use where greater rigidity is required. Both have hard extra-smooth face side with finely screened back surface.

74 C 2801R—⅛ in. thick. *State Cat. No., Size.*

4x3-ft. panel. Ship. wt. 9 lbs. 8 oz. . . . . Each 84c

4x4-ft. panel. Ship. wt. 13 lbs. . . . . Each $1.15

4x8-ft. panel. Ship. wt. 25 lbs. . . . . Each 2.53

74 C 2803 R—¼-in. thick. 4x8-ft. panel. Wt. 44 lbs. . . . Each 4.25

UTILITY HARDBOARD. Similar to ¼-in. Standard Hardboard above but lighter in weight, has less dense construction. Economical, use for most wallboard uses and dry wall construction.

74 C 2813 R—¼-in. thick. 4x8 ft. panel. Wt. 37 lbs. . . . Each $3.10

RIDGE TEXTURED HARDBOARD . . . LOW AS 16½c sq. ft.

(B) Modern combed-surface wall panels of tempered exterior grade hardboard. Excellent in high humidity conditions or for excessive wear. Beautify your home exterior by using this hardboard as paneling, bevel or shingle type siding. For interior use in homes, apartments, offices, stores, etc.—ideal in living rooms, dining rooms, bedrooms, attics, rumpus rooms—as shown above. Makes a really attractive store front; use for signs, display purposes, etc. Grooved lines running lengthwise on panels add interesting texture and modern third-dimensional effect to walls and ceilings. Install horizontally or vertically to achieve a look of spaciousness. Two-toned finish can be easily achieved by painting panels the desired color, then applying contrasting coat. Wipe paint off top surface of grooves, leaving second coat only in valleys of the boards.

Excellent for use as wall panels—squared edges and striated surface conceal joints. May also be easily cut into desired size squares for wall or ceiling tiles. View above shows 16x16-in. wall tiles installed and grooves running in alternate directions for interesting modern effect.

74 C 2847 R—¼ in. thick. *State Cat. No., Size.*

4x3-ft. panel. Ship. wt. 17 lbs. . . . . Each $1.98

4x8-ft. panel. Ship. wt. 44 lbs. . . . . Each 6.15

TEMPERED HARDBOARD . . . LOW AS 10c sq. ft.

(C) All-purpose Tempered board for many interior and exterior uses—especially where high humidity is a factor . . . in kitchens, basements, bathrooms, etc. Durable material for farm buildings, exterior signs, counter and table tops as well as interior walls and ceilings. You can even use it on floors as interior and exterior doors, garage doors, shutters, etc. Farmers—use ¼-in. for lining feed troughs; for chicken houses. Tempered hardboard is Standard Hardboard that has been impregnated with a special tempering compound which improves all its physical properties incl. strength, rate of moisture absorption, abrasion resistance. Has hard, extra-smooth face side with a finely screen back surface. Use ⅛-in. panels over solid backing, nail ¼-in. panels directly to studs or use where greater rigidity is required.

74 C 2821R—⅛ in. thick. Wt. 26 lbs. 4x8-ft. panel. $3.30

74 C 2823 R—¼ in. thick. Wt. 46 lbs. 4x8-ft. panel. 5.55

TEMPERED DELUXE HARDBOARD. Same as Tempered Hardboard above but has hard, extra-smooth finish on both sides. Use where both sides are exposed—cabinets, furniture, etc.

74 C 2831R—⅛ inch thick. *State Size.*

4x4-ft. panel. Ship. wt. 13 lbs. . . . . Each $1.60

4x8-ft. panel. Ship. wt. 27 lbs. . . . . Each 3.40

GROOVED PANEL HARDBOARD 23c sq. ft.

(D) New, attractive exterior hardboard with ⅜ in. wide grooves every 4 inches to give a smart shadow effect. Modernize your home inside and outside; makes a perfect exterior siding. Ideal for gable ends, interior walls and ceilings, fences, etc. Hardboard is wood-made-better (see description of Hardboard above). Tempered for added strength and resistance to nicks and dents—excellent in high humidity conditions. Resists extreme weather—stays the same for years to come. Extra-hard, smooth surface withstands excessive wear. Can be sawed, nailed, drilled, bent, etc. 4x8-ft. panels are easy to handle and apply—do the job yourself and save money. Install panels vertically; shiplapped edges conceal nailed vertical joints. Where horizontal joints are required, the panel end should be beveled to 45° and caulked. Panel is 5/16 in. thick. Shipped promptly from Stock by Freight, Truck or Express. *Not Mailable.*

74 C 2844 R—Ship. wt. 44 lbs. . . . . 4x8-ft. panel $7.36

SPECIAL LOW METROPOLITAN DELIVERY RATES are available on Building Materials in many metropolitan areas. See Page 955.

WARDS MONTHLY PAYMENT PLAN. If cash is not available, use our Monthly Payment Plan. Only 10% Down on orders totaling $20 or more; see complete details on Inside Back Cover. F. H. A. Loan Plan is also available; up to 3 years to pay; details on Page 972.

UNDERLAYMENT HARDBOARD 9½c sq.ft.

(E) Floor coverings last longer over Underlayment Hardboard. Use over old existing wood floors or over wood sub-floors in new construction. Provides smooth, flat surface for application of linoleum; asphalt, rubber, cork tile; carpeting (see Pages 532 to 535, 542, 543, 546) or other flooring material. Helps insulate floors, deaden sound, cushion walking; gives greater strength and stiffness. Made from wood fibers pressed into extra-strong, ¼-in. thick rigid panels (see description of hardboard above). Planed on screen side to uniform .215 in. thickness—eliminates high ridges which mar beauty and wear out floor surfacing material.

EASY TO APPLY YOURSELF. Underlayment hardboard can be applied over dry wood finish floor or sub-floor—will bridge small irregularities and cracks. No sanding required—can be easily sawed and nailed. No special tools are needed. For permanent installation use underlayment nails (84 C 9955L, Pg. 814) and space nails 6 in. on center each way. Underlayment can also be applied satisfactorily with an adhesive. Ship. wt. 14 lbs. panel. Shipped from Stock by Freight, Truck or Express.

74 C 2812 R—*Not Mailable* . . . . . 4x3-ft. panel $1.14

PREFINISHED OAK BLOCK FLOORING 29c Block

(F) Less than 51¾c sq. ft. Laminated, beautiful one-piece face Appalachian Oak—a durable wood, completely finished, waxed and polished by proven factory methods to bring out and preserve the natural beauty of grain and color. Perfect hardwood flooring for homes, offices, etc. May also be used as a wall covering.

Prefinished—saves time, money. Easy to install over any smooth sound sub-surface—concrete, plywood or solid wood sub-floor. Interlocking tongue-and-groove joints with slightly beveled edges. Laminated in accordance with approved industry methods. 1-ply face of Appalachian Oak; center ply of Poplar; back of Appalachian Oak. Finish-sealed to assure stability. No nailing needed, use adhesive below. For finishing edge at doorway see threshold below. Each block 9 in. sq., 7/16 in. thick. Carton contains 48 pieces, covers 27 sq. ft. Flooring, accessories shipped from Fact. in Louisville, Ky.

74 C 7982 KB—*Mailable.* Ship. wt. 35 lbs . . . . . Per Carton $13.

WATERPROOF ADHESIVE for installing Flooring above.

74 C 7989 K—Use gallon for 60 to 70 sq. ft. Wt. 8 lbs. . . . . Gallon $4.

OAK THRESHOLD. Use in doorway to taper off to floor in next room.

74 C 7984 K—Prefinished. 2 in. x ⅜ in. x 3 ft. Wt. 1 lb. 4 oz. . . . Ea.

INSTALLATION KIT (not shown). Contains metal spreader, chalk, chalkline, instructions for installing flooring above.

74 C 7995 K—Ship. wt. 1 lb. 2 oz. . . . . Each

Build or Remodel Easily with Douglas Fir Plywood

GRADE-MARKED EXTERIOR AND INTERIOR GRADES FOR EVERY JOB

PLYWOOD IN LARGE, EXACT-SIZE PANELS REDUCES BUILDING TIME AND LABOR . . . SPECIAL SIZES FOR THE HOME WORKSHOP

Douglas Fir Plywood—the modern building board of a thousand uses. Real wood in panel form, engineered for greater service. A combination of wood veneers bonded with strong adhesives. Plywood can often do work of other thicker, heavier materials. Cross-ply construction of Douglas Fir gives Plywood 4 times the strength of solid lumber of same thickness.

Large panels cut to exact size reduce building time and labor, require less individual cutting and fitting. Excellent insulating and sound deadening qualities. Easy to handle and apply. Plywood is easily sawed and nailed. Can be planed, grooved, beveled and worked with ordinary hand tools or power-driven equipment. Easy to glue and sand. Will not split like ordinary lumber. Can be painted, stained, varnished, etc. Each piece made according to industry standards, bears grade mark of the Douglas Fir Plywood Association.

Plywood is available in a variety of types. Plypanel (A) is an interior wallboard designed for economical use where only one side is to be exposed. Grained Plywood Panels (B) have a beautiful rich-textured surface for interior decorative purposes. Use waterproof Plyshield (C) for permanent outdoor exposure or where moisture is a factor. Handy Plywood Panels (G), at bottom of page, aid the home workshop hobbyist—available in a variety of special sizes. Use plywood Sheathing (H) for wall, roof sheathing, subflooring. *Not Mailable.*

PLYPANEL FOR INDOOR USE 14c sq. ft. (1/4 in.)

(A) Plywood panels add beauty and structural strength. Economical—designed for use where only one side of panel is exposed. For wallboard or paneling in rooms, basements, attics, etc. Inexpensive material for cabinets, shelves, furniture, etc. Use as base for tile, linoleum or wallpaper. Seasoned, kiln-dried Douglas Fir veneers are bonded with water-resistant glue. One side sanded smooth, ready to paint. Large sheets save work and time.

Face side of panel Grade A—sound, beautifully grained, free from knots, splits or pitch pockets. Other side Grade D—has wood imperfections which do not impair overall panel strength. Install vertically or horizontally. Use 3/8 and 3/4-inch where greater strength is required. Order from listings below.

To cover joints order Panel Molding listed on Page 778. Shipped promptly from Stock. *State Catalog Number, Size and Quantity.*

Catalog No.	Size	Thickness	Ship. wt.	Panel
74 C 3000 R	4 by 6 ft.	1/4 in.	21 lbs.	$3.36
	4 by 7 ft.	1/4 in.	24 lbs.	3.92
	4 by 8 ft.	1/4 in.	27 lbs.	4.48
74 C 3001 R	4 by 8 ft.	3/8 in.	37 lbs.	5.68
74 C 3004 R	4 by 8 ft.	3/4 in.	73 lbs.	9.98

RAISED GRAINED PLYWOOD PANELS 25c sq. ft.

(B) New rich-textured surface in natural Douglas Fir. Plywood surface is brushed, accentuating beautiful natural grain patterns of the wood. Raised grain surface allows light to cast shadows that add charm and beauty to paneled walls, revealing the true beauty of Douglas Fir graining. Gives unique decorative effects, a modern third-dimensional feeling. For dozens of interior uses in homes, offices, restaurants, stores, etc. 3-ply construction bonded with strong water-resistant glue to resist warping. Panels have hard, scuff-resistant, patch-free surface.

Grained Plywood can be finished in a variety of beautiful ways. Many home owners prefer the warm, natural beauty of the fir grain to show through; for this effect finish panels with a clear flat lacquer. Or you may stain, enamel or paint panels as you desire to harmonize with room interior. For a really striking finish that your guests will admire, paint the wood 2 tones—first apply a coat of paint; then apply a second coat of paint, wiping it off top surface leaving second coat only in valleys of the grain. Shipped promptly from Stock. 5/16 in. thick.

74 C 3080 R—Ship. wt. 26 lbs. . . . . 4x8-ft. panel $7.98

PLYSHIELD FOR EXTERIOR USE 15¼c sq. ft. (1/4 in.)

(C) Waterproof, weatherproof—designed for permanent outdoor exposure. Bonded with waterproof, phenolic resin adhesive; will not separate under water soaking or extreme temperature changes. Easy to handle and work. Face sanded smooth, ready to be finished as you desire. Face of panel is Grade A—beautifully grained, free from knots. Back is Grade C—has knots and other minor wood defects which do not impair strength.

EXTREMELY VERSATILE. For exterior of homes, stores, farm and utility buildings, etc. Combines with other building materials to give modern effect. Use also for small boats, trailers, dormers, shutters, etc. Easy to work with ordinary hand or power tools. Can be beveled, plowed, dadoed, rabbeted, tongued, grooved, etc. Nailing close to edge will not cause panel to split. Can be bent by steaming to construct counter corners, rounded furniture corners, etc. Use 3/8 in. and 3/4 in. for greater strength and rigidity. Shipped promptly from Stock.

74 C 3050 R—1/4-in. 3-ply. Wt. 26 lbs. . . 4x8-ft. Panel $4.88
74 C 3051 R—3/8-in. 3-ply. Wt. 36 lbs. . . 4x8-ft. Panel 6.24
74 C 3054 R—3/4-in. 5-ply. Wt. 72 lbs. . . 4x8-ft. Panel 10.80

FINISHED OAK FLOORING LOW AS 26½c bd. ft.

(D) (E) Easy to clean, retains its beauty. Ready for use as soon as it's laid. Kiln-dried to proper moisture content, precision milled for smooth finish. Impregnated with moisture-resistant sealer, then waxed and finished to a medium brown tone. Strong and durable, resists scratching. Tongue and groove joints assure solid installation. Rounded edges form slender groove between adjacent flooring strips. 3/8x2-in. size (D) has square ends; use over old floors. 25/32x2¼-in. size (E) has matched ends; for new construction. Shipped promptly from Factory near Scranton, Pa. Pay freight from there.

BEST—*Clear and Prime Grades:* have uniform color and beauty.

BETTER—*Economy; Utility:* more color variation than Best.

State Catalog Number and Number of Board Feet Needed.

Catalog Number	Size Inches	Grade	To Find Board Ft.	Average Length	Wt. lbs.	Per Bd. Foot

(E) 74 C 7961 F	25/32x2¼	Utility	sq. ft. area	4 ft.	2	29c

(F) BASE SHOE. Finished to match Oak Flooring above. Conceals joints where flooring meets wall. Random lengths 6 to 16 ft. Size 3/8 x 3/4 in. Same shipping point as (D), (E) above.

74 C 7964 F—Ship. wt. per ft., 6 oz. . . . . Per ft. 4½c

PLYWOOD PANELS . . . LOW AS 19½c sq. ft.

(G) Specially selected for workshop enthusiasts. Choose from four sizes, three thicknesses below—special-size sheets meet individual needs. Variety of sizes allows you to buy economically—save time, labor and material costs. Panels need little or no fitting when used as cabinet backs or sides, furniture paneling, etc. Easily handled with hand or power tools—see complete selection on Pages 817–823, 826–833. With these special size sheets, you can build cabinets, tables, doors, wardrobes, shelves, etc. Both sides of panel are Grade A, beautifully grained and free from knots. Sanded smooth, ready to be painted or finished as you desire. Shipped promptly from Stock by Freight or Express. *Not Mailable.*

PLYWOOD SHEATHING 12¼c sq. ft. (5/16-in.)

(H) For wall or roof sheathing, subflooring, etc.—wherever long, heavy duty service is desired and appearance not important. Cross-ply construction gives twice as much bracing strength as ordinary diagonal sheathing. Resists swelling, shrinking; provides rigid subsurface for finishing materials. Seals against drafts, dust and dampness. Prevents damage to roofing from updrafts in partially open structures. Will not split even when nailed close to edge. Both sides unsanded, grade CD—have wood imperfections which do not seriously impair strength. Moisture-resistant but not weatherproof—should not be installed where permanently exposed to weather. Shipped promptly from Stock by Freight or Express.

3-PLY PANELS. 5/16 or 3/8 in. thick. Recommended for use as sidewall sheathing on homes and summer cottages. Use also for lining farm buildings, garages, tool sheds, etc. for draft-resistance. 3/8-in. can also be used for roof sheathing. *Not Mailable.*

74 C 3040 R—5/16 in. thick. Ship. wt. 31 lbs. . . . . 4x8-ft. Panel $3.92
74 C 3041 R— 3/8 in. thick. Ship. wt. 36 lbs. . . . . 4x8-ft. Panel 4.48

5-PLY PANELS. Heavier and thicker than 3-ply. For use as subflooring, roof sheathing, decking, linoleum base, etc.—wherever greater structural strength is desired. *Not Mailable.*

74 C 3043 R—5/8 in. thick. Ship. wt. 59 lbs. . . . . 4x8-ft. Panel $6.96

MONTHLY TERMS ON INSIDE BACK COVER.

Heatform Fireplace

EFFICIENTLY CIRCULATES HEAT

HEATFORM FIREPLACE UNITS . . . LOW AS 60.00

(A) Nationally known "Heatform" fireplace interior unit assures proper construction of any style fireplace. Combines warmth and cheerfulness of open fireplace with all the advantages of a really effective radiant heating unit for rooms up to 6500 cubic ft. capacity.

Construction is simple: just place steel fireplace unit on fire bricks, then lay stone, brick or other type of masonry around it, as shown in view (A) above. Saves time and labor. Furnace principles are utilized in scientific design. No electrical blowing system is needed in "Heatform" units. No mechanical upkeep; saves electricity. Normal gravitational flow of cold and warm air supplies ample circulation, without the need for a fan. Heat is distributed efficiently through round, superheating air flues which run directly through throat (See View (A) above). Scientific construction of heat chamber allows hot air to pass quickly through firebox into room before valuable heat is lost. A large volume of air is directed by baffle plates from the cool air intake to the lower rear heating chamber, (see view at left) and thus over the hottest portion of metal. Heat control damper has under-slung poker friction control to regulate draft into chimney flue; can be closed tightly when firebox is not in use.

Heavy steel construction—firebox of unit made of 3/16 in. thick steel—ribbed for added strength and rigidity. Ribs are individually die-formed—control expansion, contraction; help eliminate warpage. Unit is constructed so no metal parts are exposed under the chimney; lessens the danger of rusting caused by accumulation of moisture.

Unit consists of firebox, surrounding heat chambers, throat, smoke-dome and built-in damper. If ordered with cast aluminum grilles (see listings below), includes 1 top-outlet grille and 2 lower side-intake grilles. Order with or without grilles. To determine size you need, find number of cubic feet in rooms to be heated. (Multiply length x width x height in feet.) From listings below, select unit with heating capacity equal to, or greater than, your room size. *"Heat-form" is Registered U. S. Trademark of the Superior Fireplace Company.*

SHIPPING INFORMATION. Heatform Fireplace unit and accessories ship. promptly from Fact. in Baltimore, Md. *Prepaid.* For Wards Monthly Payment Plan, see Inside Back Cover.

Cu. Ft. Capacity	Firebox Dimensions Wide	Ht.	Deep	Fireplace Only	Cash Price	Fireplace with Grilles	Cash Price

(B) CLEANOUT DOOR. Install in ash pit or chimney for ash removal. 74 CP 4947 K—12-ga. steel. 8 x 8-in. opening. *Postpaid*.....$1.75

(C) ASH DUMP. Install in base of firepit. Flanges extend into bricks. 74 CP 4945 K—Steel construction. 8x4-in. opening. *Postpaid*....$1.25

Efficient Insulation Saves Fuel,

CHOOSE FROM MINERAL FIBER, SPUN ROCK,

UNITEM . . . LESS THAN 6c sq. ft.

(D) Unitem insulating material made of mineral treated wood fibers, lasts entire lifetime of average home, protects against drafts, and gives year 'round comfort. Resists fire, moisture and vermin. Non-conductor of electricity—will not flame. Lightweight—only 5 oz. per square foot installed. Much lighter than most insulation.

Unitem saves you money in these important ways. Lower initial cost, reduction of up to 40% in winter fuel bills; has low conductivity rating—effectively retards passage of heat; lower shipping charges due to light weight (only 6 lbs. per bag). One bag covers 20 sq. ft. 3 in. deep or 15 sq. ft. 4 in. deep. For best results, fill to full depth of joist or stud.

Installation is extremely simple. No special tools or skills required. Just pour from bag; no hand packing or stuffing needed. (See "How to Install Insulation" on facing page.) Recommended for insulating ceilings, walls and other places which are hard to reach.

Shipped promptly from Stock by Freight or Truck. Orders totalling over $20 may be purchased on Monthly Terms. (Page 981).

74 C 3750 R—Ship. wt. 6 lbs.....Bag, $1.19

IMPROVED SPUN-ROCK 4 3/5c sq. ft.

(E) Wards SPUN ROCK Home Insulation is made of Rock Wool, one of the most effective insulating materials known. Now offered in greatly improved form. Special spinning process develops longer, lighter fibers, which increases density. Effectively prevents escape of heat during winter, and blocks penetration of outside heat in summer.

Spun Rock is only 2/3 as heavy as standard type rock wool, so you save money on shipping charges. Greater density of material means higher efficiency in use and reduced fuel bills. So easy to install you can do the job yourself; save on high labor costs, too.

Complete installation instructions on bag—one bag covers 25 sq. ft. 3 in. deep, allowing for joists and studs. See "How to Install Insulation" on facing page.

Completely fireproof—lasts the lifetime of any building. Non-conducting, it is safe for installation around electrical wires. Shipped promptly from Stock in Albany or Baltimore, or from Factory near Newark, N.J. Pay freight from point nearest to you. Ship. wt. per bag, 26 lbs. *Not Mailable.*

74 C 3625 RF—From Stock $1.19..Factory $1.14

(F) "VISQUEEN" POLYETHYLENE PLASTIC SHEATHING. Hundreds of uses around the home and on the farm. Serves the purpose of a general, all-round sheathing paper, but can be used over and over again. Excellent for moisture-, air-, and dust-proofing subfloors, walls, ceilings. Use outdoors to protect lumber, feed, grain, mechanical equipment.

Completely waterproof—an effective vapor barrier. Made of translucent polyethylene, .002 in. thick. Light in weight, yet tough and flexible. Does not deteriorate with age. Unaffected by acids, alkalis, water, extreme temperature changes. Odorless, tasteless, non-toxic. Use also for weatherproof covers for luggage, portable appliances, etc. Roll contains approximately 250 sq. ft. 50 inches wide folded to 25-inch roll, 60 feet long.

74 C 1930 M—*Mailed* From Stock. Ship. wt. 4 lbs.....Per roll, $3.95

BUY WARDS ASPHALT SHINGLES AND ROOFING AT YOUR NEARBY WARD RETAIL STORE

(G) Freight rates on less-than-carload lots of Asphalt Shingles and Roofing are now up to 3 times the rate for full carload shipments. This makes it uneconomical for you to buy this merchandise shipped on a less-than-carload basis. For this reason Wards offer these items only through our Retail Stores. They receive roofing directly from the factory in full carload quantities, and pass the freight savings on to you. Wards stores have stocks ready for immediate delivery where you can see the styles and types of roofing available, which, of course, vary according to customs and climate. Many of these stores have a complete application service available. See listing below for your nearest Ward store offering these items.

Keeps Your Home Warmer in Winter, Cooler in Summer

ROCK WOOL BATTS, COTTON BLANKET OR KIMSUL

INVEST IN INSULATION NOW ... INCREASE HEALTH AND COMFORT, GET YEARLY DIVIDENDS IN SUBSTANTIAL FUEL SAVINGS

EFFICIENT INSULATION protects your home from heat and cold. Provides an effective barrier to keep heat inside in winter, outside in summer. During sweltering summers, your home stays up to 15 degrees cooler than outside temperature, so you get cool, restful sleep at night. In winter, this same barrier keeps heat inside, protects health by stopping drafts and keeping temperatures even throughout the house. Insulation not only greatly retards interior heat loss and saves you up to 40% on yearly fuel bill, but also increases property-value, is fire-resistant, reduces fire hazard in walls and ceilings made of flammable materials. Insulated homes have lower fire insurance rates in many areas. Easy to install yourself. Complete selection for both old and new construction.

HOW TO INSTALL INSULATION

(1) ENTIRE ATTIC. If you plan to use entire attic for living quarters, apply insulation between roof rafters.

(2) SEPARATE ROOM. Apply insulation around room on all sides and top. Costs less than (1)

(3) UNOCCUPIED ATTIC. Place insulation between joists of attic floor. Cuts insulation costs to a minimum.

(4) SIDEWALLS. Blanket and batt type insulation are best suited if applied during construction of building.

VENTILATION. For best results, install louvers pictured below for proper circulation of air above insulation.

ENCLOSED ROCK WOOL BATTS . . . LOW AS 3⁴/₅c sq. ft.

(H) Enclosed type, much easier to handle and install than "open" batts. For new construction or accessible places. Made from thick layer of fibrous Rock Wool. Phenolic resin binder holds fibers firmly together. Batts are encased in tough Kraft Paper. One side of batt covered with waterproof Kraft Paper, cemented to Batt with asphalt to resist moisture and dampness. Batt size 15 in. x 48 in. Fits standard 16 in. spacing of joists or studs (easily cut to fit 24 in.-on-center spacing).

For walls, staple or nail in place. Batts have 1½ in. wide triple-thick nailing flange on sides. For attic floors, place between joists. Coverage shown below allows for joist and studs. *Not Mailable.*

Shipped promptly from Stock or Factory near New York City. You pay freight from the shipping point.

3 IN. THICK BATTS. Bundle of 10. Coverage: 53⅓ sq. ft.
74 C 3683 RF—Ship. wt. bundle, 40 lbs. From Stock $3.10....Factory $2.79

2 IN. THICK BATTS: Bundle of 16. Coverage: 85⅓ sq. ft.
74 C 3682 RF—Ship. wt. bundle, 40 lbs. From Stock $3.75....Factory $3.25

COTTON BLANKET INSULATION . . . LESS THAN 6½c sq. ft.

(J) Combines flame-resistant cotton and highly reflective surface for very low rate of heat transmission. Insulates 3 ways: (1) Surface reflects radiant heat. (2) Millions of air cells help prevent conduction heat loss. (3) Unbroken blanket cuts down draft and air leakage. Does not settle, pack or deteriorate. Outer blanket surface forms vapor barrier.

Weighs about 4 oz. per sq. ft. Easy to install using stapler or nails. 1 inch wide nailing flange on each side. 1 carton covers 100 sq. ft. Blankets compressed for shipping, gradually expand to full 2 in. thickness after installation. *Not Mailable.* Shipped from Stock. Pay freight from Mail Order House. Choice of 2 types of blankets:

ALUMINUM FOIL COVERED COTTON BLANKET. (Shown.) Double reflective, Wards most efficient type of insulation, reflects 95% of radiant heat. Heavy, aluminum foil cover on both sides of cotton blanket gives greater year 'round comfort. In summer, home stays 10 to 15 degrees cooler. In winter, less radiant heat escapes. Ship. wt. 24 lbs. per carton.
74 C 3710 R—16-inch width. Contains 75 lineal feet.....Carton, $9.45
74 C 3712 R—24-inch width. Contains 50 lineal feet.....Carton, 9.45

REFLECTIVE COTTON BLANKET. (Not Shown.) Single Reflective Type. Reflects up to 80% radiant heat. Fluffy cotton Kraft-covered blanket has reflective aluminum coating on one side, asphalt-treated paper on the other; is uniformly thick. Ship.wt. per carton, 16 lbs.
74 C 3715 R—16-in. width. Contains 75 lineal feet.....Carton, $6.35
74 C 3717 R—24-in. width. Contains 50 lineal feet.....Carton, 6.35

KIMSUL INSULATION ... LESS THAN 4¾c sq. ft.

(K) Nationally-known Kimsul Blanket Insulation made of paper-thin, asphalt-treated wood fibers in many layers. Each ply is continuous and separate, provides protection over every inch of insulated area. Strong stitching holds plies together at correct density—no sagging, shifting or settling. Asphalt treatment makes Kimsul moisture resistant; will not rot or deteriorate. Resists fire, mold, fungus, due to chemically-treated wood fibers. Kimsul pays for itself in fuel savings. Gives year 'round comfort; prevents loss of heat in winter, keeps heat outside in the summer. Your home can be 5 to 10 degrees cooler than outside temperature on hottest summer days. (8 to 15 degrees cooler with double thick Kimsul.)

Kimsul saves installation time. Comes in compact rolls with blankets compressed to ⅕th installed length. Expands in both length and thickness for installation. Lightweight, clean, easy-to-handle. No odor, dust or irritating particles. Blanket is continuous—no joints to piece together. Easy to install with stapler or hammer and nails. Choice of 2 widths to fit standard spacings of studs and joists. Can be cut easily to fit irregular spaces between furring strips. Instructions included. *Not Mailable.* Shipped promptly from Stock by Freight or Express. Choice of two types:

ALUMINUM FOIL KIMSUL INSULATION (shown above), has aluminum vaporseal attached to form positive vapor barrier which prevents the penetration of moisture. Aluminum reflects 95% of radiant heat, thus giving additional protection from heat and cold. This extra, effective insulating value of aluminum also allows you to use lighter, thinner blankets at night, keeps temperature more constant—less variation from room to room. Has wide flanges running full length of blanket for attaching insulation to framing members. Install with staplers listed at bottom of this page, or with hammer and nails. Each roll includes complete instructions.

REGULAR KIMSUL INSULATION. Same internal construction as above, but blankets are covered with black, fire-resistant Pyrogard—a Kraft Paper scientifically treated with asphalt to resist fire and moisture, just as inner layers are treated. Blankets actually measure wider than distance between standard framings, allowing edge to be stapled to sides of framing. This provides air space on both sides of blanket. Fiber nailing strips furnished. Includes instructions. May be installed with stapler (bottom of page) or hammer and nails. Order from table below.

Catalog Number	Thickness	Actual Size Width	Actual Size Length	Roll Covers	Ship. wt.	Price Roll

LOUVERS PROVIDE PROPER VENTILATION 1.15 TO 6.60

Use louvers to prevent damaging moisture condensation on insulation. Permit circulation of fresh air. Keep buildings cooler in summer. Built-in screens keep out small birds, etc., deflect rain. Easy to install—no fitting needed. Figure square foot area of attic floor, order size to fit needs. Use 2 for cross ventilation. *Mailable.*

(L) ADJUSTABLE TRIANGLE LOUVER. Fits in gable. Adjusts from 35½ in. wide x 17½ in. high to 44½x13 in. for roof pitch. Tight sliding action. Screening furnished. Ventilates 400–600 sq. ft. Ship. wt. each 3 lbs.
74 C 3867 MO—Ea. $4.40. Pr. $8.35

NON-ADJUSTABLE TRIANGLE LOUVERS. Similar to (L) but with five rigid louvers. Ventilate 150 to 400 sq. ft. Ship. wt. ea. 2 lbs. 10 oz.

(N) ROOF LOUVER. For slanting roofs. Each ventilates 150 sq. ft. of attic floor space. Aluminum finish. Order 2 and save. Size: 12¾ by 16 in.
74 C 3851M—Heavy-gauge steel. Ship. wt. each, 4½ lbs. Each $2.20; Pair, $4.19
74 C 3861M—Rustproof aluminum. Ship. wt. ea, 2 lbs. 8 oz. Each 2.59; Pair, 4.93

AUTOMATIC STAPLERS AND STAPLE HAMMERS

Use for blanket, batt type insulation. Heavy-gauge steel, plastic hand grips. *Mailable.*

(P) STANDARD COMPRESSION STAPLER. Squeeze grip to work. Holds ¼-in. or 5/16-in. staples.
74 C 3800—Chromed finish. Ship. wt. 3 lbs....$10.50

(P) HEAVY-DUTY COMPRESSION STAPLER. Like above, fits up to ½-in. staples. For plank, tile.
74 C 3802—Ship. wt. 2 lbs. 8 oz.....$11.50
74 C 3822—Same as (P) on loan basis. Order only with insulation, plank or tile. Deposit refunded if returned in good condition in 30 days.....$11.50

(R) SUPER-DUTY STAPLER. Powerful spring action drives staples up to 9/16 in. Chromed finish.
74 C 3806—Ship. wt. 2 lbs. 12 oz.....$12.50

(T) STAPLE HAMMER. Duo-Fast; use like hammer. Holds 2 strips of staples up to ¼ or 5/16 in.
74 C 3804—Polished nickel finish. Wt. 2 lbs....$14.95

STAPLES. Use ¼ in. for batts, tagging; 5/16 in. for blanket insulation, screen wire; ½ in. for batts or blankets, plank, tile. Heavy-gauge 9/16 in. are resin coated for extra holding power. *Mailable.*

Cat. No.	Length	Ship. wt.	Box of 5000
74 C 3810	¼ in.	1 lb. 2 oz.	$2.10

74 C 3813	9/16 in.	2 lbs. 12 oz.	3.65

Aluminum Roofing and Siding

GIVES LASTING PROTECTION

26-IN. WIDE RUSTPROOF ALUMINUM SHEETS IN 3 STYLES . . . Low As 1.68 Sheet

(1) (2) (3) Rustproof, lightweight sheets are ideal for use as roofing or siding. Will outlast most farm buildings. Easy to install—just follow instructions furnished with order. Saves money 4 important ways:

FIREPROOF—Often lowers fire insurance rates.

RUSTPROOF—Never needs paint, saves upkeep costs. May be painted if desired after 3 months weathering.

LIGHTWEIGHT—Easy to apply, no need for heavy bracing.

INSULATES—Reflects sun rays in summer, keeps building cooler. Retains building heat in winter, saves fuel. Helps increase productivity, keeps crops fresh.

Three types: (1) 1¼-IN. CORRUGATED; (2) 2½-IN. CORRUGATED — for wide-spaced sheathing; (3) 5-V CRIMP—has double crimps at sides for watertight seal.

Choice of Smooth Finish—see (1), (2) or Embossed Finish to cut glare—see (3). .019-in. thick sheets are equal to 26-ga. steel; .024-in. equal to 24-ga. steel. Coverage figures allow for end and side laps. See below for Nails, bottom of page for Felt, Accessories and "How to Measure" instructions. Shipping information below. *Minimum order: 3 or more sheets.*

Enameled Aluminum Siding

CHOICE OF 6 PASTEL COLORS

EASY-TO-INSTALL PANELS . . . 34½c sq. ft.

Beautiful new finish for old or new homes. Lustrous non-chalking, baked-on enamel finish won't crack, chip, or peel—outlasts regular paint many times over; easily washed. Alodine-treated on both sides for maximum paint adhesion and corrosion resistance. Can be repainted if desired; absolutely rustproof. In White, Ivory, Gray, Green, Yellow, or Brown.

3-POINT INTERLOCKING JOINT. See (A) at right. For rapid, easy one-man installation; forms rattle-proof weatherproof seam. Panels are pre-notched—just place one lightweight panel on top of another; each fits securely onto section below. Can be applied 2 ways—over aluminum foil, using insert wedges under joints; or over backerboard for maximum insulation, firmest support and more efficient sound deadening. Installation instructions included. Shipped promptly by Freight or Truck from Factory near Pittsburgh, Pa.

(4) SIDING PANELS. Each panel 12 ft. long; has 8 in. exposed width. Carton of 25 covers 200 sq. ft.
74 C 1301F—*State color, quantity.* Single Panel. Wt. 4 lbs . . Each $2.85
25 Panels. Ship. wt. 100 lbs. Ctn. 69.00

(5) STARTER STRIP. Use at the bottom of first siding strip. Siding is applied from the bottom up. 27/16 in. x 10 ft. *State Color.*
74 C 1304 F—Ship. wt. 8 oz. Ea. $1.20

(6) WINDOW AND DOOR TRIM. Give finished effect. 6-ft. lengths. Ship. wt. each 4 oz. *State color.*
74 C 1308 F—For backerboard. . 93c
74 C 1307 F—For foil and wedges . 85c

(7) OUTSIDE CORNERS. Use with or without backerboard. 8 inches long. *State Color Wanted.*
74 C 1302 F—Ship. wt. 2 oz. Ea. 24c

(8) INSIDE CORNER. 10 ft. long. Ship. wt. 1½ lbs. ea. corner.
74 C 1309 F—For backerboard. *State color* . . . . . Each $2.4
74 C 1303 F—Use with foil, wedges. *State color* . . . . . Each $2.4

BACKERBOARD. Use under siding. 7/16 in. thick. 8 in. x 6 ft. Wt. 70 lbs. Carton covers 100 sq. ft.
74 C 1310 F—Carton $8.5

ALUMINUM FOIL. Use with wedges. 36 in. wide. Covers 500 sq. ft.
74 C 3770 F—Wt. 11 lbs. Roll $7.7

(9) WEDGES. Use with Foil every 4 ft., each joint.
74 C 1305 F—Ship. wt. 2 oz. Ea.

ZINC COATED NAILS. 1½ in. long. 56 nails to 100 sq. ft. 188 to pkg.
74 C 1306 K—Wt. 1 lb. Pkg. . . .

ALUMINUM, GALVANIZED ACCESSORIES TO COMPLETE ROOFING OR SIDING JOB

(10) GLOBE FINIAL. Fits on end of ridge roll for neat, weathertight ridge end—gives finished appearance. Available in Galvanized only.

(11) (12) (13) RIDGE ROLLS. Use to cover top of ridge for finished roofing job. Available in styles to fit all types of roofing listed above.

(14) GAMBREL ROOF JOINT. Use at gambrel hips. Flared eaves to avoid overhanging. Available in Aluminum only. 12-in. girth.

(15) SIDE WALL FLASHING. Use where side of roof joins wall of another building, porch or dormer. Install with smooth side under wall covering.

(16) END WALL FLASHING. Use where end of roofing joins wall of another building. Install smooth side under wall covering.

(17) PLAIN VALLEY. For valleys and flashing. Also for 5, 8-V Crimp as roof joint, Side and End Wall Flashing. All rolls are 14 in. wide.

Order Aluminum or Galvanized Accessories (10) to (17) at right.

ASPHALT-SATURATED FELT . . . 3.10 Roll (216 sq. ft.)

(Not shown). 30-lb. weight. Use under aluminum roofing or siding if inside of building is subject to constant moisture—chicken houses, barns, etc. Shipped promptly from Factories near York, Pa.; Buffalo, N.Y.; or Savannah, Ga. Pay freight charges from nearest point. Rates on Page 970.

Roll covers 216 sq. ft. Shipping wt. 60 lbs.
74 C 30 F . . . . . Roll $3.10

SHIPPING NOTICE

ALUMINUM ROOFING AND SIDING (1) to (3) above and Accessories (left) shipped promptly from Factories near New York City, Atlanta, Ga. or Columbus, Ohio—you pay freight from Factory nearest. See Page 970 for Rates.

Items with (*) shipped promptly from Stock. Others shipped from Factory—see above. Cat. Nos. ending in F or R *Not Mailable;* all others *Mailable.*

HOW TO MEASURE

(18) Use these easy methods to find square foot area to be roofed.

SHED TYPE: Multiply ridge length (A) by length of rafters (B).

GABLE TYPE: Multiply roof length (C) by rafter length (D). Multiply by 2.

GAMBREL TYPE: Add length (F) and (G). Multiply by roof length (H) then multiply result by 2.

HIP TYPE: Multiply length of long rafter (J) by length at eave (J). Divide by 2. Do this for each section of roof, add results for total area of structure to be roofed.

Eaves Trough in Galvanized Steel or Aluminum

QUICK, SOLDERLESS INSTALLATION...DO IT YOURSELF AND SAVE

GALVANIZED BOX-TYPE EAVES TROUGH . . . 26-GA. . . . 1.65 10-ft. length (4 in.)

15 TO 28 Rigid 26-ga. steel for extra strength, heavily galvanized to resist rust. 20% heavier than 28-ga. (below). Slip-joint connectors eliminate soldering—make installation easy. Use 5-in. trough for large buildings, 4-in. trough for smaller homes, etc. All items *Mailable* except (15) and (16). *State Cat. No., Size.* Monthly Payment Terms on Inside Back Cover.

(15) CONDUCTOR PIPE. Corrugated to resist freezing damage. *Not Mail.* Ship. wt. 7 lbs. 8 oz.
74 C 1700 R—3-in. size. Use 2 Elbows (18) to join with eaves trough. 10-ft. length.....$1.98

(16) EAVES TROUGH. Bead on outside lip for rigidity. Wts. 4 in., 7½ lbs.; 5 in., 9 lbs. *Not Mail.*
74 C 1705 R—4-in. width.....10-ft. length $1.65; 5-inch width.....10-ft. length $2.05

(17) DROP OUTLET. Fits Pipe (15) or Elbows (18), (19). 3-in. drop. *State Size wanted.*
74 C 1717—4-in. trough. Ship. wt. 1 lb. 4 oz.....79c; 5-in. trough. Ship. wt. 2 lbs....$1.10

(18) SQUARE REGULAR ELBOW 75°. Use two to bring drop outlet back flush with wall.
74 C 1720—3-inch size. Shipping weight 15 oz.....Each 63c

(19) SQUARE SIDE ELBOW 75°. For shifting conductor pipe drop along the wall.
74 C 1722—3-inch size. Shipping weight 15 oz.....Each 63c

TROUGH CORNERS. 1-piece single bead construction. Ship. wts.: 4 in., 15 oz.; 5 in., 1 lb. 12 oz.
(20) 74 C 1710—Inside Corner. For 4-in. trough.....$1.14; For 5-in. trough.....$1.28
(21) 74 C 1711—Outside Corner. For 4-in. trough..... 1.14; For 5-in. trough..... 1.28

(22) SPIKE AND FERRULE. Keeps trough from sagging. Use 1 set every 3 feet.
74 C 1782—Ship. wt. dozen, 1 lb. 3 oz.....4 in. Per Doz. 64c.....5 in. Per Doz. 88c

(23) SQUARE HANGER. Secures trough to roof eaves. Fits 4-in. or 5-in. eaves trough.
74 C 1719—Use 3 for each 10 feet of trough. Ship. wt. for 6, 1 lb. 12 oz.....6 for 84c

(24) PIPE BAND. Secures conductor pipe (15) to outside wall. Use one every 3 feet.
74 C 1714—3-in. size. Ship. wt. for three 1 lb. 5 oz.....3 for 37c

(25) SQUARE SLIP-JOINT CONNECTOR. Use to join sections. No soldering needed.
74 C 1729—4-in. size. Ship. wt. 5 oz.....Each 39c; 5-in. size. Ship. wt. 6 oz.. .Each 46c

(26) PIPE STRAINER. Fits square conductor pipe; prevents clogging. 3-in. size.
74 C 1715—Rust-resistant wire with aluminum finish. Ship. wt. 5 oz.....Each 19c

Period and Modern Fixtures for Gracious Living

FORMAL FIXTURES ADD GRACE AND ELEGANCE TO YOUR HOME . . . AUTHENTICALLY STYLED FROM FINEST MATERIALS . . . 6.95 TO 34.95

Wards finest fixtures—authentic period designs, reproduced by expert craftsmen. Sparkling styles form perfect backgrounds for gracious living in the formal mood. Matched groups permit coordinated designs throughout your home for a smart decorator-planned appearance. Use 60-W. bulbs unless otherwise stated—order bulbs separately, Page 802.

(1) 5-ARM CHANDELIER. Harmonizes with both traditional and modern settings. Slim tapered center spindle has rich polished brass finish; gracefully shaped arms are solid brass. Round shields at base of 5 bulb holders are white perforated metal. White laminated plastic and fabric shades have fashionable rattan woven texture, are washable and extremely durable. 21-in. diam., extends 18 to 36 in. on brass plated chain. For wall switch. Use 40-W. bulbs. *Not Mailable.*
83 C 3013 R—Wt. 9 lbs. $3.00 Down. Cash $29.95

(2) NEW 1-LT. HALL PENDANT. Solid Brass. Sparkling Colonial leaf design engraved in cut-glass panels. Size 9¾x6¾ in. wide. Brass plated chain. Extends to 28 in. from ceiling. Takes 40-watt bulb—see Pg. 802.
83 C 2979 L—Ship. wt. 3 lbs. $6.95

(3) 2-LT. HALL PENDANT. Solid Brass. Colonial star pattern deeply engraved in cut-glass panels. Size 6¼x6¼x11½ in. Brass plated chain extends to 27 in. from ceiling. Takes two 25-W. flame-shaped bulbs—see Page 802.
83 C 2974 L—Ship. wt. 6 lbs. $18.95

(4) 5-LT. CRYSTAL CHANDELIER. Captures charm and grace of 18th Century in sparkling crystal and gleaming silver. Genuine hand-cut drops imported from Germany under each bulb and in center enhance light and airy effect. Rich silver plated chain, canopy. Finely fashioned center column. Five crystal-clear hurricane chimneys have delicate hand-cut grape-and-vine designs. Extends from 18 to 36 in. from ceiling. Diam. 22 in. Uses flame-shaped bulbs on Page 802. Ship. wt. 21 lbs.
83C3058 MO–$3.50 Down, Cash $34.95

WARDS FIXTURES ARE UL APPROVED, EASY TO INSTALL

All Wards Fixtures are completely wired, with instructions—ready to hang. Included are handy solderless connectors that eliminate splicing and taping . . . just twist them on. Approved by Underwriters' Laboratories—assurance of tested construction.

(5) (6) 5-LT. CRYSTAL AND CHROME. Create a new atmosphere in your home with beautifully matching chandelier and wall bracket. Solid brass arms and body with gleaming chrome plated finish. Hand-blown frosted white shades have delicate hand-cut grape design, decorative crimped clear sparkling glass edges. Sparkling hand-cut prisms are imported from West Germany.

(5) 5-LIGHT DROP FIXTURE. With gleaming imported crystal beaded chain drapes running to each light. Decorative sparkling crystal spindle in smart spiral design. 19-inch diameter. Extends 20 to 44 in. from ceiling. Use 40-watt bulbs—order from Page 802. *Not Mailable.* Ship. wt. 15 lbs. Terms, Inside Back Cover.
83 C 3025 R—$3.00 Down. . . . Cash $27.95

(6) 2-LIGHT WALL BRACKET. Matches (5). Overall 10½x11 in. Extends 5 in. from wall. Convenient turn switch. Uses same bulbs as (5)—order from Page 802.
83 C 3041L—Ship. wt. 4 lbs. 8 oz. . . $11.45

(7) 3-LT. CRYSTAL SHOWER will add new sparkle to any room. Four tiers with 131 genuine imported crystal drops, hand-cut and polished by expert Old-World craftsmen. Crystal spindle and clear crystal glass sphere. Metal parts and chain have highly polished aluminum finish. Extends from 32½ to 42 in. from ceiling. 15-in. diam. For wall-switch operation.
83 C 3050 MO–Ship. wt. 13 lbs. $3.50 Dn., Cash $34.95

3-LT. CEILING FIXTURE. Same beautiful four-tiered crystal tear drop design as (7) above but without spindle and chain. Fits flush against ceiling. Extends 15 in. from ceiling. For wall-switch operation.

Pull-Down Reel Fixtures...Newest Lighting Styles

VERSATILE REEL FIXTURES, THE VERY LATEST STYLE IN HOME LIGHTING . . . MODERN OR TRADITIONAL DESIGNS

ONCE A DECORATOR'S DREAM . . . now a center of interest in America's finest homes. Reel fixtures are much more than "just another light"—they're the answer to *all-purpose* lighting in today's compact homes. One light actually replaces three conventional-type fixtures. Operating on spring-balanced reels, lights can be raised or lowered at a finger's touch. Push them high up near the ceiling for overall room lighting; lower them instantly for soft, wide-spread light over tables, etc. (See view (1) at left.) Or bring them still further down for close work such as reading or sewing. Perfect for multiple-use rooms like kitchen, dining area, living room, etc. Adapt to dozens of activities.

WARDS NOW OFFER A COMPLETE SELECTION of reel fixtures with a style for any room. All are designed and built by leaders in the lighting industry. Shop and compare—see how little it costs to have the finest in modern lighting when you buy at Wards low prices. All fixtures are UL Approved, your assurance of best construction. Prewired, ready to hang with no special tools or skills needed. Bulbs not included; order separately from Page 802.

LATEST PULL-DOWN FIXTURE

(A) The very newest style on the market today—a pull-down fixture with all the uses described above, and which operates without any visible pulley. Spring-operated reel is concealed in bell-shaped canopy — wire coils or uncoils to raise or lower fixture. Glides up or down at a touch. Wards finest quality, built for years of service. Shop and compare the styling and price; you'll agree that this is a real value in modern design.

LARGE 20-IN. DIAM. SHADE finished in light gold color on top, underside white. Three gleaming Brass plated light cups will take up to 100-watt bulbs . . . fashionably pierced for added design interest. Glass lenses provide concentrated downlight. Sparkling Brass finished trim adds to richness of appearance. Can be raised or lowered 24 to 50 in. from ceiling. Ship. wt. 14 lbs. *Mailable.*

83 C 2671MO—$2.50 Down . . . . . Cash 21.95

(B) NEW 2-LT. GOLD 'N GLASS DESIGN. Novel lantern-shaped fixture has 15½-in. diam. reflector with gleaming Goldtone finish. 9¼-in. diam. milk-white satin-finished glass bowl with 5-in. diam. focal lens on bottom for best light diffusion. Brasstone finish on pulley, canopy and trim. Black satin finish on pull-down handle. Fixture adjusts 15 to 45 in. from ceiling, adapts to many household activities. Takes two 75-W bulbs—see Page 802.

83 C 2556 M—Ship. wt. 8 lbs. *Mailable*. 15.95

(C) NEW 1-LT. BRASS 'N GLASS DESIGN. Modern styling to grace any room in your home—adds versatile lighting at moderate cost . . . also an interesting "conversation piece." 15½-in. diam. reflector with sparkling Brasstone finish. 6¼-in. diam. milk-white satin-finished glass bowl. Three decorative support rods and pull-down handle finished in satin black. Fixture raises or lowers easily from 19 to 49 in. from ceiling. Use up to 150-W. bulb.

83 C 2555 M—Ship. wt. 6 lbs. 8 oz. *Mailable*. 17.95

(D) ECONOMICAL NEW 2-LT. CASUAL. Our lowest priced reel fixture—looks like dollars more than its low price. Double shade styling adds beauty to any room. 16-in. diam. reflector top has black finish with tiny pierced design. Bottom shade is frosted glass with dot design. Reel housing is brushed brass. Adjusts easily 18 to 48 in. from ceiling. Takes two 60-W. bulbs.

83 C 2945 M—Ship. wt. 6 lbs. 4 oz. *Mailable*. 10.45

(E) 1-LT. CONE SHAPE. Sleek, tapered design gives modern directional lighting. Excellent for bedroom, study, work table, and kitchen counter lighting. Brass or Copper finish blends with any color scheme. 9⅜-in. diam. reflector with frosted glass panel in bottom for soft, diffused lighting. Tiny perforated design around bottom edge. Adjusts 19 to 56 in. from ceiling. Use 100-W. bulb. *State finish:* Brushed Brass or Brushed Copper.

83 C 2948 MO—Ship. wt. 6 lbs. *Mailable*. 16.95

(F) EARLY AMERICAN DESIGN. Solid Brass body in time-honored styling. Blends with traditional furnishings. 14½-in. steel shade finished in Maroon enamel or Brass. Graceful white frosted chimney. Bold Brass ring for easy lowering. 3-way switch for 3-way 50-100-150-W. bulb. Adjusts 29 to 55 in. from ceiling—raise or lower with fingertip. Ship. wt. 10 lbs. *Mailable.*

83 C 2930 M—Maroon shade. $2.50 Down . . . . . Cash 21.50

83 C 2928 M—Brass shade. $2.50 Down . . . . . Cash 23.50

(G) 3-LT. DRUM SHAPE. Gracefully designed in Brass or Copper finish. Tailored design adds decorator touch to library, den, dining room, etc. 14-in. diam. reflector has tiny perforated design; open top illuminates ceiling. Frosted glass bottom panel gives soft, diffused lighting. Adjusts 15 to 49 in. from ceiling. Takes three 60-W. bulbs. *State finish:* Polished Brass or Copper.

83 C 2947 MO—Ship. wt. 10 lbs. *Mailable*. 18.95

(H) CONTEMPORARY DESIGN. Advanced styling suitable for enhancing the most modern interiors. Large-size 18-in. diameter shade in Brass or Copper finish. Tapered reflector bowl with pierced design on top and bottom, focal lens in base. Wide shaped stirrup for easy raising and lowering 20 to 45 in. from ceiling. Takes to 100-W. bulb. Designed for years of care-free use. *State finish desired:* Brushed Brass or Brushed Copper. *Mail.*

83 C 2931MO—Ship. wt. 10 lbs. $2.50 Down . . . . . or Cash 24.95

INSTANT-START CIRCLINE FLUORESCENTS light immediately—no waiting or flickering. Save you money because they last longer and give much more light per watt than comparable incandescent bulbs. All fixtures below include Standard Cool White GE bulbs, designed for longer service. UL Approved, prewired and ready to hang. 60-cycle AC. For wall switch.

(J) MODERN 3-LIGHT CIRCLINE. Floods even the largest rooms with bright, diffused light. Has 3 bulbs—one each 40, 32 and 22-watt (equal to about 250 watts of incandescent light). Heavy metal base. 5½-in. bent-glass center shade. Crystal bottom ornament. 16-in. diameter overall. Extends 5½ in. from ceiling. GE bulbs. Chromed or white enameled base. Ship. wt. 13 lbs. *Mailable.* $2.50 Dn. on Terms.

83 C 3770 M—Chrome Plated. . . . . Cash 22.50

83 C 3769 M—White Enameled. . . Cash 21.50

(K) 2-LIGHT CIRCLINE. Attractive, rich looking. With glass center ornament. Two bulbs—40 and 32-watt are equal to about 200 watts of incandescent light. Chromed metal base. 16-inch diameter overall. Extends 4½ inches from ceiling. GE bulbs included.

83 C 3781M Wt. 13 lbs. . . 15.50

(L) ECONOMICAL 1-LIGHT 40-W. CIRCLINE. Gives light equal to 150-watt incandescent bulb. Chrome plated base polished to mirror brightness. 16-in. diameter overall. Extends 3¾ in. With one GE 40-watt bulb. For extra bulbs, see listings on Page 802.

83 C 3776 M—Ship. wt. 8 lbs. 9.95

(M) ATTRACTIVE, LOW - PRICED 2 - LT. CIRCLINES. With sparkling glass center ornament. Your choice of shiny chromed or white enameled base. 11⅞-in. diameter. With 32-watt outer and 22-watt inner bulbs. Give more light for your money—70% greater illumination than standard 1-light circlines or more light than a 150-watt incandescent bulb. Extend 3½ in. from ceiling. GE Bulbs included. Ship. wt. each 7 lbs. 8 oz.

83 C 3762 L—Chrome plated base 13.95

83 C 3761L—White enameled base . . . 11.95

Efficient Lighting Modernizes Kitchen or Bath

COMPLETE SELECTION OF GLEAMING WHITE FIXTURES FOR KITCHEN OR BATH . . . GIVE GLARELESS, DIFFUSED LIGHT . . . LOW AS 1.79

WARDS KITCHEN AND BATH FIXTURES are designed to give your home better lighting. Attractive glass shades reduce glare, protect your eyes from exposed bulbs. Finishes are fused on under intense heat—won't wash off, fade, crack or peel. Easy to keep sparkling clean with a damp cloth. All fixtures are for wall switch unless shown otherwise—have handy knockouts for installing pull switches (see 83 C 1390 on Page 808). Every fixture is UL Approved and easy to install. Completely wired, ready to hang in your home. Solderless connectors eliminate splicing and taping. Fixtures take 60-watt bulbs unless otherwise stated. Bulbs are not included (except on Fluorescents below)—order from Page 802. All fixtures on this page *Mailed* promptly from Stock. Terms, Inside Back Cover.

31 SMART NEW 4-LT. FIXTURE. Fashion's answer to your desire for a brighter, more colorful kitchen. Choose from popular new Copper or sparkling Chrome finish on 13½-in. diam. gallery. White glass shade has neat grayline design. Extends 6 in. *State Finish:* Copper or Chromed.

Order G.E. Bulbs in Quantity...Save 20% or More

BUY A YEAR'S SUPPLY AND SAVE . . . TAKE 20% DISCOUNT ON LIGHT BULB ORDERS OF $5.00 OR MORE; 25% DISCOUNT ON ORDERS OVER $15

GENERAL ELECTRIC BULBS STAY BRIGHTER LONGER . . . ARE PRE-TESTED FOR QUALITY. GE laboratories test bulbs throughout the entire manufacturing process as well as after finishing; independent testing services also check the efficiency of GE bulbs. This triple-check assures you of a consistently high quality product, a bulb you can depend on. Wards guarantee safe delivery of all GE bulbs—if any bulb you receive from Wards is broken on delivery, return it and we will replace it free of charge. GE bulbs are mailed to you *Postpaid*.

ALWAYS KEEP AN AMPLE SUPPLY OF BULBS ON HAND. "Bulb-snatching" from needed lights can result in serious accidents. Replacing bulbs with a too-small size can result in eyestrain and fatigue. You owe it to yourself to keep spares on hand. Larger bulbs give more light per penny cost—a 60-watt bulb gives 80% more light than a 40-watt; 100-watt gives 90% more light than a 60-watt. Standard base for 110–120-volt AC-DC unless otherwise stated. Prices include Fed. Tax. Buy more, save more on discount plan.

(1) CONVENIENT GE 12-BULB ASSORTMENT. Be prepared—don't get caught without spare bulbs on hand. Popular assortment of four 40-W., four 60-W., four 100-W. All inside frosted bulbs.

1 2 3 NEW SURFACE EXTENSION CABLE. For extra outlets. White Plastic, only ½ in. wide. Nail along baseboard, bend around corners. Plug cap in present outlet; use as many receptacles as needed—see (A). Takes 15 amps. Just strip wires, push into holes for connection. UL Approved. Nails includ.
(1) CABLE. Ship. wt. per ft. 2 oz.
83 C 5286 H—Per ft. 19½c; 15 ft.... $2.79
(2) 83 C 490—Plug Cap. Wt. 4 oz.... 65c
(3) 83 C 491—Receptacle. Wt. 4 oz... 47c

4 PLUG-IN STRIPS. Plenty of outlets, conveniently spaced. Gray metal case—completely wired. 12-ga. wires. Use with extension cord or box (5).
33 IN. LONG. 5 outlets, 6 in. apart.
83 C 155 M—Ship. wt. 1 lb. 4 oz. . . $3.45
6 FT. LONG. 4 outlets, 18 in. apart.
83 C 156 MO—Ship. wt. 2 lbs. 8 oz.. $4.45

5 END JUNCTION BOX. For permanent installation of Plug-in strip (4). For armored cable, romex, or conduit.
83 C 162—Ship. wt. 4 oz.....Ea. 65c

6 7 LUMILINE BRACKETS. Use two brackets, lumiline bulb to make (4) a light fixture. Use 2. Wt. ea. 1 oz.
(6) 83 C 161—With turn switch... Ea. 75c
(7) 83 C 160—No turn switch..... Ea. 35c

8 SOLDERLESS WIRE CONNECTORS. Twist on. Wts. for 10: 1 oz., 2 oz.
SMALL SIZE. Joins 14 to 18-ga. wires.
83 C 855.....10 for 18c; 100 for $1.29
LARGE SIZE. Joins 12-ga. wires.
83 C 856.....10 for 18c; 100 for $1.29

UL APPROVED CORD SETS for every need. EXTENSION CORD SETS (9), (10) and (11) are for regular home electric use on radios, fans, lamps, etc. Plastic-covered 18-ga. copper wires—take up to 800 watts (7 amps.). APPLIANCE CORD SETS (12), (13) and (14) are for irons, toasters, etc. Replace damaged or frayed cords, have rubber and asbestos insulation. 18-ga. copper wires, except (14) is 16-gauge for heavier loads. HEAVY-DUTY CORD SETS (15), (17) and (18) are for portable motors, refrigerators, power tools, etc. Have heavy rubber insulation for hard wear. Replace old worn-out cords now.

9 NO-SHOK EXTENSION CORD SETS. Rotary spring cap covers slots when not in use. Ivory Bakelite table tap and 2 outlets.
83 C 1289—15 ft. Wt. ea. 9 oz.. Ea. 98c; 2 for $1.85
83 C 1288—9 ft. Wt. ea. 7 oz.. Ea. 79c; 2 for 1.49

10 EXTENSION CORDS with 3-way tap of Brown Bakelite. Brown plastic cord, plug.
83 C 1287—15 ft. Wt. ea. 9 oz. Ea. 59c; 2 for $1.10
83 C 1283— 9 ft. Wt. ea. 5 oz... Ea. 42c; 2 for 79c

REPLACEMENT CORD like (10) but stripped ends, no 3-way tap. Attach to appliances with built-in leads—fans, etc. Ship. wt. ea. 5 oz.
83 C 1284—9-ft. cord.....Ea. 33c; 2 for 62c

11 EXTENSION CORD. New design with feed-thru switch in middle for controlling appliance or light. 9-ft. long. Brown plastic cord. 3-way Brown Bakelite tap on one end, plug on other.
83 C 1297—Ship. wt. 9 oz....Ea. 89c; 2 for $1.69

12 HEAVY-DUTY APPLIANCE CORD SET with off-on switch, spring cord protector. Super flexible armored switch connector. Standard size.
83 C 1258—7-ft. cord, plug. Wt. 10 oz.....98c

13 STANDARD APPLIANCE CORD SET. Permanent connector of heat-resistant compound. Spring cord protector. Std. size. No off-on switch.
83 C 1255—6-ft. cord, plug. Wt. 6 oz.....62c
83 C 1253—Miniature Set. Like (13) but prongs ½ in. between centers. Ship. wt. 6 oz.....62c

14 REPLACEMENT CORD SET. 16-ga. Eyelet ends for replacing cords built into irons, etc.
83 C 1257—8-ft. cord, plug. Wt. 7 oz.....79c

15 HEAVY-DUTY EXTENSION CORDS. For electric lawn mowers, hedge trimmers, etc. Two copper wires with heavy rubber insulation. Have plug on one end, outlet tap on other end.
83 C 1275 L—100-ft. 16-ga. Ship. wt. 7 lbs.. $6.98
83 C 1299 L— 50-ft. 16-ga. Ship. wt. 4 lbs.. 3.75
83 C 1271 L— 25-ft. 16-ga. Ship. wt. 2 lbs.. 2.29
83 C 1274 L— 15-ft. 18-ga. Ship. wt. 1 lb... 1.25

HEAVIER 3-WIRE CORDS. For grounding portable tools, etc. Meet new code requirements.
83 C 1279 L—15-ft. 16-ga. Wt. 1½ lbs.....$3.75
83 C 1270 L—25-ft. 14-ga. Ship. wt. 5 lbs... 8.95

16 11-IN. METAL REEL. With Green finish.
83 C 1277 L—Ship. wt. 2 lbs.....89c
REEL WITH 100-FT. CORD (15) ABOVE.
83 C 1276 L—Ship. wt. 9 lbs.....Set $7.85

17 HEAVY-DUTY REPLACEMENT CORDS. Stripped leads. Black rubber cord and plug.
83 C 1272—18-ga. 25-ft. Ship. wt. 2 lbs.....$1.79
83 C 1273—18-ga. 10-ft. Ship. wt. 1 lb.....79c
83 C 1267—16-ga. 15-ft. Ship. wt. 1 lb.....$1.29

18 HEAVY-DUTY GRAY CORD SETS. 18-ga. Attractive gray rubber cord and plug.
83 C 1227 —12-ft. Ship. wt. 12 oz.....98c
83 C 1228 —25-ft. Ship. wt. 1 lb. 4 oz.....$1.49

19 ELECTRIC TIME SWITCH. Automatic—for lights, small motors, etc. One "on-off" operation every 24 hours. 6½x5¼ in. 3¼ in. deep. 120-V. AC. Choose 10-amp. plug-in type or 35-amp. permanent type. Ship. wt. ea. 3 lbs. 8 oz.
83 C 549 L—10-AMP. Outlet, 6-ft. cord, plug. $9.95
83 C 544 L—35-AMP. No cord, plug..... 8.75

REPLACEMENT CORDS (20) to (23) are UL Approved—use to replace old, worn cords and reduce danger of accidents. Use 18-ga. up to 800 watts, 16-ga. to 1100 watts, 14-ga. to 1650 watts and 12-ga. up to 2000 watts.

20 HEAVY-DUTY MOTOR CORD. Heavy rubber insulation. 2 or 3 copper wires. Type "S." *State size, lgth.*

Cat. No.	Wire size	Wt. 25 ft.	25 ft.	100 ft.
83 C 1210 H	2 No. 18-ga.	2 lbs.	$1.19	$4.39
83 C 1216 H	2 No. 16-ga.	3½ lbs.	2.49	9.45
83 C 1216 H	2 No. 14-ga.	5 lbs.	4.19	15.95
83 C 1217 H	2 No. 12-ga.	8 lbs.	5.98	22.75
83 C 1216 H	3 No. 16-ga.	4 lbs.	3.39	12.25
83 C 1216 H	3 No. 14-ga.	6 lbs.	5.45	20.75

21 HEAVY LAMP CORD. Two copper wires. Brown or Ivory plastic insulation. 16-ga. cord has heavier insulation. *State length and color* (Brown or Ivory).
83 C 1211 H—16-ga. 25 ft. Ship. wt. 1 lb.....$1.29
83 C 1211 H—16-ga. 100 ft. Ship. wt. 4 lbs..... 4.89
83 C 1207 H—18-ga. 25 ft. Ship. wt. 8 oz.....59c
83 C 1207 H—18-ga. 100 ft. Ship. wt. 2 lbs.....$2.25

22 ASBESTOS HEATER CORD. Two 18-ga. copper wires.
83 C 1204 H—Wt. 25 ft. 1 lb.....Ft. 5c; 25 ft. $1.19

23 THERMOSTAT CABLE. Three 18-ga. copper wires.
83 C 1200 H— 25 ft. Ship. wt. 8 oz.....75c
83 C 1200 H—100 ft. Ship. wt. 2 lbs.....$2.75

24 AUTOMATIC CLOSET LIGHT. Fits door frame. Use 60-watt bulb. 9-ft. cord, screws included. *Postpaid.*
83 CP 1381—Ivory socket and cord. Each 98c; 3 for $2.79

25 26 HEAVY-DUTY TROUBLE LIGHTS. UL Approved. For garage, basement, etc. Rustproof. Shockproof handle and plug. On-off switch. 18-ga. wires.
(25) 83 C 1265—With 25-ft. cord. Ship. wt. 2½ lbs.. $2.49
(25) 83 C 1256—With 50-ft. cord. Ship. wt. 3½ lbs.. 3.75
(26) With 6-in. cord, plug. Use with extension cord.
83 C 1263—Ship. wt. 1 lb.....Each $1.15

27 CLAMP TYPE BULB HOLDER. Excellent for floodlight. Rubber-covered clamps, adjustable head.
83 C 3358 L—On-off switch. 6-ft. cord, plug. Wt. 1 lb..$1.49

28 PLASTIC TAPE. Replaces Friction and Rubber tape, makes neat splice. Resists oil, acids, etc. Wts. 5 oz., 3 oz.
83 C 805—60-ft. in metal can...Ea. $1.25
83 C 806—30-ft. roll.....Ea. 59c

FRICTION TAPE. Use over Rubber tape.
83 C 801—60 ft. Wt. 8 oz. Ea. 32c; 2 for 59c

RUBBER TAPE. Self-vulcanizing.
83 C 803—23 ft. Wt. 8 oz. Ea. 33c; 2 for 62c

29 "WIRING SIMPLIFIED" by H. P. Richter. Handy guide book for home wiring. 230 illustrations.
83 CP 848—128 pgs. *Postpaid*.....50c

30 FISH TAPE AND REEL PULLER. For conduit, drains. Tempered flat steel.
83 C 840—Ship. wt. 4 lbs.... 50 ft. $2.69

31 CIRCUIT TESTER. For spark plugs, fuses, wiring circuits. Neon bulb.
83 C 836—Instructions. Wt. 4 oz.....35c

32 NON-METALLIC CABLE RIPPER. Cuts outer braid only, not insulation.
83 C 838—With gauge. Wt. 3 oz.....22c

33 DOUBLE-DUTY THINWALL CONDUIT BENDER. For ½ and ¾ in. Use ¾-in. pipe for handle (not included).
83 C 846 L—Wt. 4 lbs. 8 oz.....$6.29

34 NEW ELECTRIC DRYER CORD. UL approved. Three size No. 10 wires. Rated 30 amps. Use for dryers, other 220-Volt appliances using 3 No. 10 wire or less. Third prong is "L" shaped insuring positive locking in receptacle (38). 4-foot rubber cord.
83 C 128—Ship. wt. 2 lbs.....$2.49

35 ELECTRIC RANGE CORD. UL appr. Three wire—two No. 6, one No. 8. Rated 50 amps. Use for range, motors, other 220-V. appliances. 3-ft. cord for standard installation, 6-ft. to pull appliance away from wall.
83 C 127—3 ft. Ship. wt. 2 lbs. 6 oz.....$2.49
83 C 143—6 ft. Ship. wt. 3 lbs..... 3.98

36 37 ELECTRIC RANGE RECEPTACLES. UL appr. Three wire, heavy-duty.
(36) FOR SURFACE MOUNT. Needs no box.
83 C 126—50 amps. Ship. wt. 1 lb.....$1.59
(37) FOR FLUSH MOUNT. Includes: Bakelite receptacle, brass plate, 4 11/16-in. sq. galvanized steel box and plaster cover.
83 C 136—50 amps. Ship. wt. 3 lbs.....$4.65

38 NEW ELECTRIC DRYER RECEPTACLE. UL approved. Three-wire surface type. Third slot "L" shaped for use with cord (34). Rated 30 amps. Surface mount, needs no box.
83 C 137—Ship. wt. 1 lb.....$1.59

KNOB AND TUBE WIRING NEEDS. Easily installed in barns, outbuildings, etc. Shockproof construction throughout. All are UL Approved and durably built.

39 PORCELAIN CLEATS. Assembled, complete with nails and leather washers. For 2 wire, 10, 12 or 14-ga. Use every 4 ft. Ship. wt. per 100, 19 lbs.
83 C 469 LB—10 for 64c....100 for $5.60

40 BAKELITE BUSHINGS. Fit up to No. 8 wire. Insulates ½-in. KO's in switch or receptacle box. Metal lock nut.
83 C 473—Wt. for five: 4 oz.....5 for 31c

41 PORCELAIN INSULATING TUBES. Protect indoor wire passing through studs, walls, joists. Fits ⅝-in. hole. Use one tube for each single wire. Ship. wt. per 100: 7 and 9 lbs. *State quantity*
83C465 L–3x5/16 in. 10 for 19c; 100 for $1.69
83C467 L–4x5/16 in. 10 for 22c; 100 for 1.95

42 PORCELAIN KNOBS. Leather collared. Nail type. For supporting one wire on open work. Use every 4 ft. Ship. wt. per 100: 19 lbs. *State quantity*.
83 C 470 L—10 for 35c.....100 for $3.15

ALL WARDS WIRING EQUIPMENT IS UL APPROVED. This is your assurance of pretesting by an independent.

43 WIRE HOLDER. Fastens wire to buildings. Galvanized metal base, porcelain insulators. Take up to No. 4 wire. Wts. 3, 4 lbs.
83 C 386—2-wire holder. 9 in. between spools, 11 in. long.....$1.14
83 C 387—3-wire holder. 8 in. between spools, 18 in. long..... 1.98

44 10-IN. OAK INSULATOR BRACKET. For low tension circuits.
83 C 390 LO—Wt. 2 lbs. 12 oz..5 for 29c; Wt. 50 lbs..100 for $5.29

GLASS INSULATOR for (44) above. Pin hole for 1-in. pin. Threaded to fit bracket (44). 3¼ in. high. 2 3/16-in. diam. *State quantity*.
83 C 391LO—Ship. wt. 3 lbs. 5 for 65c; Ship. wt. 68 lbs. 100 for $11.95

45 REINFORCED PORCELAIN INSULATOR. Metal saddle. Heavy duty. 2¼-in. self-aligning screw. 1-in. hole. 3 in. high. 2-in. diam.
83 C 379 L—Ship. wt. for five, 3 lbs. 2 oz.....Each 39c; 5 for $1.75

46 GLAZED PORCELAIN INSULATORS. Use for buildings or poles.
83 C 380 L—2¼-in. wood screw, ⅝-in. hole. Take up to Number 2 wire. Ship. wt. for five, 3 lbs. 8 oz.....5 for $1.59
83 C 382 L—1½-in. wood screw, 7/16-in. hole. Use for telephone wire, radio antenna, etc. Ship. wt. for five, 2 lbs.....Each 21c; 5 for 95c

47 FLANGED SERVICE HEAD. For wires entering outbuildings. Threaded ½-in. conduit. Use conduit adapter 83 C 1017, Pg. 807.
83C655–With waterproofing compound, screws. Ship. wt. 1 lb. Each 74c

48 PIPE MOUNTING INSULATOR. New insulator clamps directly on 2-in. pipe. 6½ in. overall. Holds up to size 2 wire. ⅝-in. hole Glazed porcelain finish. Metal strap. Ideal for ranch type houses.
83 C 397 L—Ship. wt. each 1 lb. 3 oz. Each 75c.....3 for $2.15

Modern Entrance Equipment for "Look-Ahead" Wiring

WARDS FUSED SERVICE ENTRANCE EQUIPMENT is UL Approved, meets REA specifications. Modern cabinets are designed for today's needs, yet "look ahead" to future requirements as well. Gray enameled steel cabinets have knockouts; are complete with wiring diagrams. Before ordering, check with your local Power Co. or REA office for requirements. Order fuses separately from Page 808.

(1) 100-AMP. ENTRANCE SWITCH COMBINATION. Serves all the demands of today's home, will meet future electrical requirements of modern homes years from now. With 100-amp. main disconnect. 60-amp. range and 30 amp. water heater or dryer circuits—12 branch circuits. 3-wire, 120–240-V. 23⅞x14¼x4¼ in.
83 C 539 MO—Surface mount. Amer. No. 10323R2B12. Ship. wt. 40 lbs. *Mail*.. $37.95
83 C 540 MO—Flush mount. Amer. No. 10323R2B12F. Ship. wt. 40 lbs. *Mail*.. 37.95

(2) NEW 100-AMP. ENTRANCE SWITCH COMBINATION. Combines all service entrance equipment in one cabinet. 100-amp. main disconnect, 60-amp. range, and three 30-amp. fused pull outs connected in parallel for water heater, dryer, air conditioner, etc. 8 plug-fused circuits. 3-wire, 120–240-V. 21x12¾x3¾ in.
83 C 593 MO—Surface mount. Amer. No. 10323R4B8. Ship. wt. 40 lbs. *Mail*... $45.95
83 C 594 MO—Flush mount. Amer. No. 10323R4B8F. Ship. wt. 40 lbs. *Mail*... 45.95

(3) 100-AMP. SERVICE COMBINATIONS. New design, with four pull-out circuits—all in one box. Four cartridge fused pull-out circuits: 60-amp. range, 60-amp. light, 30-amp. water heater or air conditioner, 30-amp. dryer, eight plug fused branch circuits. Parallel wired, grounded neutral. 3 wire, 120–240-V. 100-amp. line lugs. Flat front. 19x9 5/16x3¾ in. Order 83 C 580 M (11) where code requires.
83 C 591MB—Surface mount. American No. 103234RL8. Wt. 21 lbs. *Mail*..... $24.95
83 C 592 MB—Flush mount. American No. 103234RL8F. Wt. 21 lbs. *Mail*..... 24.95

(4) 100-AMP. SERVICE COMBINATIONS. Have 60-amp. light and range cartridge fused pullouts. Parallel wired. 3 wire. 120–240-V. 100-amp. line lugs. All cabinets below have flat fronts (except 83 C 585M has curved front). *Mailable*.

Cat. No.	Br. Circuits	Mount	Amer. No.	Size In.	Ship. wt.	Price
83 C 585 M	4	Surface	10323RL4	12½x8x2⅞	16 lbs.	$8.45
83 C 586 M	4	Flush	10323RL4F	12½x8x2⅞	16 lbs.	8.45
83 C 587 M	6	Surface	10323RL6	16⅝x9x3⅝	17 lbs.	13.25
83 C 588 M	6	Flush	10323RL6F	16⅝x9x3⅝	17 lbs.	13.25
83 C 589 M	8	Surface	10323RL8	16⅝x9x3⅝	17 lbs.	16.95
83 C 590 M	8	Flush	10323RL8F	16⅝x9x3⅝	17 lbs.	16.95

(5) 60-AMP. SERVICE COMBINATIONS. Two 60-amp. cartridge fused pullouts. Series wired, grounded neutral. 60-amp. line lugs. 4 br. circuits. Wt. 16 lbs.
83 C 517 M—Surface mount, curved front. Amer. No. 10322R4. 12½x8x2⅞ in. $8.45
83 C 518 M—Flush mount, flat front. Amer. No. 10322R4F. 12½x8x8¾ in..... 8.45

(6) 2-WIRE FUSED KNIFE SWITCH. 30 amp., 120-V. Size: 4⅝ x 3 in.
83 C 543—Fuses not included—order from Page 808. Ship. wt. 2 lbs... Ea. 85c

(7) MIDGET SWITCH. For appliances, small motors, etc. 30 amp., 120-volts. 2 pole solid neutral, one plug fuse. UL Approved. Size: 5 x 3⅛ x 2⅜ in.
83 C 533 L—American No. 8111. Ship. wt. 2 lbs. 8 oz..... Ea. $2.39

(8) SAFETY SWITCHES. Provide disconnect and fuse protection for motors, water heaters, etc. For 120–240-Volts. Use 83 C 510L for heavier appliances (220–240-V.) with no ground connection. Use 83 C 511L for 110–120 Volts only.

Cat. No.	Amer. No.	Amps.	Poles	Fuses	Neutral	Size, in.	Wt.	Price
83 C 512 L	2311	30	3	2 plug	Solid	7⅝x5⅞	6 lbs.	$2.89

100-AMP. MAIN DISCONNECT SWITCH. Like (11) but for indoor, no threaded hub top. Fuse pullout, solid neutral.
83 C 580 M—Surface mount. For 120–240-V. 3-pole, 3-wire. Amer. No. 10323. 15x8¼x4 in. Ship. wt. 14 lbs..... $16.50

GENERAL ELECTRIC FUSELESS ENTRANCE SWITCHES FOR MODERN WIRING

GE FUSELESS SWITCHES are UL Approved, meet REA specs. Fully automatic—replace fuses and main switch. No current-carrying parts exposed. Circuit breakers automatically shut off current when dangerous overload occurs—reset by flipping to "on." Available two ways: (12), (13), (14), (16) without circuit breakers; (15) with breakers. Check with local Power Company before ordering.

(12) NEW 100-AMP. ENTRANCE SWITCH CABINET. For extra convenience—has 100-amp. main breaker already wired in. Eliminates need for separate disconnect. Extremely adaptable cabinet will take 12 single-pole breakers (18) at right, or 6 double-pole breakers (19), or any combination of the two, depending on your individual requirements. Spring mounted interior assures automatic flush, trim alignment—easy to install yourself. Silver plated copper construction of all current-carrying parts prevents wattage loss due to formation of copper oxide. Cabinet is gray steel with durable bonderized enamel finish. 3-wire. For 120–240-volts. Size overall about 20⅜ x 12¼ x 4⅛ inches. Main breaker included. Order Breakers (18) and (19) separately at right. Ship. wt. 22 lbs. *Mailable*.
83 C 741MO—*State Flush (shown)* or *Surface mount*..... $4.50 Down, Cash $40.95

(13) (14) GENERAL ELECTRIC "CUSTOM DESIGNED" ENTRANCE SWITCH CABINETS. For making your own fuseless entrance assembly. Makes possible unlimited combinations of circuits, allows room for future expansion. Order single or double-pole Circuit Breakers (18) and (19) at right. Just plug in place—no wiring needed. 83 C 738M is "split-bus" design, can be used without main disconnect for service entrance equipment (one double pole 50-amp. breaker used as main for lighting, etc.). Heavy steel cabinets with gray enamel finish; all interior connections included. *State Flush mount shown on (13) or Surface mount (14)*.

Catalog Number	Circuits	Maximum Load	Size Overall of Box, Inches	No. of Wires	Ship. wt.	Price Each

(16) NEW RAINTIGHT ENTRANCE SWITCH CABINETS. Similar to cabinets at left but for outdoor use—order with Hub (17) below. Heavy steel with gray enamel finish. Take any combination of circuits you desire with plug-in Breakers at right (order separately). For 120–240-volt single-phase, 3-wire.
2-CIRCUIT. To 50 amps. Use two breakers (18) or one (19).
83 C 747 L—8x6x4⅛ in. Ship. wt. 7 lbs. *Mail*..... $5.75
4-CIRCUIT. To 70 amps. Use four breakers (18) or two (19).
83 C 748 L—11x8x4⅛ in. Ship. wt. 9 lbs. *Mail*..... $6.49
8-CIRCUIT. To 100 amps. Use eight breakers (18) or four (19).
83 C 749 L—13¼x12¼x5 in. Ship. wt. 17 lbs. *Mail*..... $12.25

(17) RAINTIGHT BOX HUB for (16). Threaded. Interchangeable.
83 C 746 L—*State* ¾ in., 1 in., 1¼ in. Wt. 4 oz..... Ea. $1.39

(18) GE SINGLE POLE CIRCUIT BREAKERS. For lights and small appliances. Plug into connections in cabinets (12), (13), (14) and (16)—need single opening. Thermal-magnetic action. For 110–120-V. Ship. wt. ea. 4 oz.
83 C 711—*State:* 15 or 20-amp..... Ea. $1.55

(19) DOUBLE POLE BREAKERS. Like (18) but need 2 adjacent openings. 120–240-volt—use for water heaters, dryers, ranges, etc.
83 C 722—20-amp. Ship. wt. 8 oz..... Ea. $3.10
83 C 723 L—30-amp. Ship. wt. 8 oz..... Ea. 3.10
83 C 724 L—40-amp. Ship. wt. 8 oz..... Ea. 3.10
83 C 725 L—50-amp. Ship. wt. 8 oz..... Ea. 3.10

20 Non-Metallic Cable Low as $3^{9}/_{10}$c ft.

21 Plastic Covered Cable Low as $7^{4}/_{5}$c ft.

33 Unarmored Ground Wire Low as $7^{4}/_{5}$c ft.

UL Approved Wire and Cable . . . Save on Coil Lots

NON-METALLIC CABLE $3^{9}/_{10}$c ft. in 250-ft. Coils (14—2)

20 Lightweight, low in cost, easy to install—these features make Non-Metallic our most widely-used cable for indoor wiring in homes, shops, barns and other buildings. For both surface and concealed work. Ideal to use because it bends easily, strips clean with convenient ripcord. Conductor color-coded to simplify tracing circuits. Copper conductors sheathed in spiral paper under heavy fiber jacket—chemically treated to resist fire, moisture and acid vapors. New, improved outer cover will not check or crack. Meets REA specifications. Coil prices apply only to exact lengths listed; for odd footage over coils, use regular "per ft." price. *State Catalog No., length wanted.*

PLASTIC COVERED CABLE $7^{4}/_{5}$c ft. in 250-ft. Coils (14—2)

21 Now offered in heavier No. 10 sizes to meet modern wiring needs. Strong and tough—designed for use indoors or outdoors, including direct burial. Ideal where moisture, ice, fungus or ammonia-laden barn air would harm other types of wiring. Resists rot, flame, mold and abrasion. Solid copper conductors insulated with flexible plastic. Flat construction with Fiberglas cord over conductors for added strength. Use with Straps (99), Page 807. Meets REA specifications. Odd footage over exact coils sold at regular "per ft." price. *State Catalog No., length wanted.*

STEEL ARMORED CABLE $6^{3}/_{5}$c ft. in 250-ft. Coils (14—2)

22 Heavier 3 No. 6 now listed to meet future wiring demands. For dry indoor locations in homes, shops, etc. Flexible interlocking electro-galvanized armor gives permanent, fully steel-enclosed installation. Copper conductors have thick rubber insulation plus moisture and fire-resistant cotton fabric insulation. Bond wire runs between paper and steel armor on sizes 14 and 12 (not needed on larger sizes). Anti-short fiber bushings included. Meets REA specifications. Footage over exact coil lengths sold at regular "per ft." price. *State length wanted.*

THIN-WALL CONDUIT $8^{3}/_{10}$c ft. per 100 ft. (½ in.)

23 Protects building wire and other cables from damage indoors or out. Welded cold-rolled galvanized steel in strong, uniform gauge. Serves as ground in continuous wiring systems. Bends easily (see Conduit Bender on Page 803). Rust-resistant. Threadless; fittings clamp on (see listings on Page 807). *Not Mailable.* Shipped promptly from Stock by Freight or Express. In 10-ft. lengths. *Be sure to state size wanted.*

Terms, Inside Back Cover.

ENTRANCE CABLE 19c ft. in. 50-ft. Coils (24)

24 25 26 Complete selection of 2 and 3-wire cables, armored or unarmored. Use outdoors or indoors to bring power from service line to meter and entrance switch—also for electric ranges, hot water heaters, dryers, etc. Use 2-wire type for lighting and other appliances operating on 110–120-volt circuits only. Use 3-wire type for electric range, heater, dryer, etc. Has heavy rubber and braid insulation. Steel Armored type protects wire from damage—has additional tough, weatherproof outer jacket over armor. Meets all REA specifications.

Note: 3-wire cable below has 2 insulated wires. Make third (neutral) wire by twisting together bare wire strands wrapped around insulated wires—see view (A) above. 2-wire cable has 1 insulated wire; make neutral (grounding) wire by twisting together bare wire strands wrapped around insulated wire.

Coil prices apply only to exact lengths listed; odd footage over coils takes regular "per ft." price. *State Catalog No., length.*

8 ga.	8 lbs.	7c	5.95	26.75
6 ga.	13 lbs.	15½c	12.49	57.25
4 ga.	19 lbs.	22c	18.95	86.95
*2 ga.	28 lbs.	30c	25.95	108.95

*No. 2 available in Black or White only; Red not available.

OUTDOOR WEATHERPROOF $2^{1}/_{10}$c ft. in 500-ft. Coils (14-ga.)

29 Use outdoors to bring power from yardpole to house . . . or use overhead between house and outbuildings. Single copper conductor with tough Neoprene jacket—resists intemperate weather, fire, corrosion, abrasion, oil, acids, alkalies. Will not festoon. Odd footage over exact coils sold regular at "per ft." price.

83 C 5215 H—Meets REA specs. *State wire size, length.*

Wire Size	Ship. wt. 100 ft.	Per Ft.	100-ft. Coil	500-ft. Coil
14 ga.	2 lbs. 8 oz.	3c	$2.25	$10.49

8 ga.	7 lbs. 8 oz.	7c	5.75	26.95
6 ga.	12 lbs.	10c	9.29	37.95
4 ga.	17 lbs.	14½c	12.45	57.50

HOW TO CHOOSE THE RIGHT SIZE WIRE

Actual wire diameters shown above; note that diameter increases as wire gauge decreases. Check table below for approved carrying capacity by type and size; use 14-gauge wire for lighting circuits only. Buying too small wire is poor economy—plan for future needs now. See table (A) for indoor use, (B) for outdoor use.

Approved Amperage Load Capacity							
	14-ga.	12-ga.	10-ga.	8-ga.	6-ga.	4-ga.	2-ga.
(A)	15 amps	20 amps	30 amps	40 amps	55 amps	70 amps	95 amps
(B)	30 amps	40 amps	55 amps	70 amps	100 amps	130 amps	175 amps

TRENCH WIRE $4^{3}/_{4}$c ft. in 500-ft. Coils (14-ga.)

30 For direct burial. Recommended for underground service entrance. Single copper conductor, covered by tough, moisture-resistant insulation. Vulcanized outer Neoprene jacket resists acid, moisture, oil—unaffected by temperature changes, ground water. Odd footage over exact coils sold at "per ft." price.

83 C 5360 H—Rated 600-V. Meets REA specs. *State size, length.*

Wire Size	Ship. wt. 100 ft.	Per Ft.	100-ft. Coil	500-ft. Coil
14 ga.	4 lbs.	6c	$4.98	$23.75
12 ga.	6 lbs.	7c	5.98	28.50
10 ga.	8 lbs.	9c	7.19	33.95
8 ga.	12 lbs.	14c	11.98	56.95

FREE . . . MODERN WIRING BOOKLET

New 32-page booklet gives valuable help in planning, selecting and installing an up-to-date wiring system for home or farm. A practical "do-it-yourself" guide for homeowners who need more adequate wiring for today's new appliances—more plug-in outlets, lights, farm and shop equipment. Plan now for future needs.

Simplified Instructions plus "how to do it" illustrations help you save money by doing your own wiring, helps save time by careful planning. Shows you how to organize the job, how to start, and basic wiring techniques. Mail coupon for your free copy.

GROUND WIRE FITTINGS: RODS, STRAPS AND CLAMPS . . . 11c to 3.39

34 COPPER CLAD STEEL GROUND RODS. Corrosion-resistant pure copper coating for long life. Meet REA specifications.
83 C 668 R—½ in. x 8 ft. *Not Mailable.* Ship. wt. 6 lbs. $2.25
83 C 669 R—½ in. x 10 ft. *Not Mailable.* Ship. wt. 7 lbs. 2.95
83 C 670 R—⅝ in. x 8 ft. *Not Mailable.* Ship. wt. 12 lbs. 3.39

35 COPPER GROUND STRAP. Fits pipe ⅜ to 1 in. in diam.
83 C 626—With screw, nut. Ship. wt. 3 oz. ¾ in. wide. Ea. 11c

36 CLAMP FOR GROUND ROD. Use to attach (34) to Nos. 4 to 14 Armored or Unarmored ground wire (32) and (33) above. Solid bronze construction resists rust and corrosion.
83 C 665—Fit ½-in. rod. Ship. wt. 4 oz. . . . . Each 27c
83 C 666—Fit ⅝-in. rod. Ship. wt. 6 oz. . . . . Each 32c

37 GALV. GROUND PIPE CLAMP. For bare or armored wire.
83 C 625—Fits ½ to 1-inch pipe. Ship. wt. 8 oz. . . . . Each 37c

Modern UL Approved Outlets, Switches and Plates

SAVE MONEY WITH DO-IT-YOURSELF WIRING NEEDS . . . EASY-TO-INSTALL SWITCHES, RECEPTACLES, OUTLETS . . . ORDER ALL YOUR NEEDS NOW

1 GE PRESSURE-LOCK DOUBLE RECEPTACLE. Less wiring time—no binding posts or tightening screws. Just strip wire, push into holes—see (A)—for positive connection. Leads and terminals totally enclosed. Takes 14, 12 or 10-ga. solid or stranded wire. With T slots, plaster ears. UL Appr., meet REA specs. Wt. 4 oz.
83 C 109—Ivory Bakelite. Ea. 39c; 3 for $1.10
83 C 108—Brown Bakelite. Ea. 35c; 3 for 98c

2 TO 4 BAKELITE RECEPTACLES. Fit standard boxes. Take up to No. 12 wire. Bronze contacts. (2) and (3) have plaster ears for wall mounting. Rated 15 amps. at 125 volts. UL Approved. Choose from 3 types:

(2) BEST QUALITY. Heavy-duty. With T slots. Back wired.
83 C 115—Ivory. Ship. wt. 4 oz. . . . . Ea. 29c; 3 for 82c
83 C 114—Brown. Ship. wt. 4 oz. . . . . Ea. 26c; 3 for 75c

(3) NO-SHOK. Cap covers slots when not in use—children can't insert hairpins, toys in current-carrying parts.
83 C 100—Ivory. Ship. wt. 4 oz. . . . . Ea. 47c; 3 for $1.35
83 C 101—Brown. Ship. wt. 4 oz. . . . . Ea. 39c; 3 for 1.10

(4) GOOD QUALITY. For lighter-duty loads.
83 C 116—Brown. Ship. wt. 4 oz. . . . . Ea. 11c; 3 for 30c
83 C 117—Ivory. Ship. wt. 4 oz. . . . . Ea. 16c; 3 for 45c

5 6 GE BAKELITE GROUNDING OUTLETS. For 3-wire appliances. Plaster ears. UL Approved.

(5) PARALLEL TYPE. For 120-V. appliances—washing machines, etc. Takes 3-prong or regular plug.
83 C 150—Brown. Ship. wt. 7 oz. . . . . Ea. 85c; 3 for $2.42
83 C 151—Ivory. Ship. wt. 7 oz. . . . . Ea. 98c; 3 for 2.79

(6) TANDEM TYPE. For 200 to 250-V. appliances only—dryers, air conditioners, etc. Use with cover plate 83 C 69 (15).
83 C 153—Ship. wt. 3 oz. See Cap below. . . . . Each $1.49
83 C 154—Armored Plug cap. Cord grip. Wt. 2 oz. 79c

7 GE MERCURY SWITCHES. Silent operation. Long life. 15 amps., 120-V. AC. "T" rated. UL Appr. Wt. 5 oz.

WITH GLOW LIGHT. Toggle glows softly in "off" position.
83 C 22—Single pole. Ivory Bakelite. . . Ea. $1.25; 3 for $3.55
83 C 23—3-way type. Ivory Bakelite. . . . Ea. 1.98; 3 for 5.59

WITHOUT GLOW LIGHT. Same silent operation; no light.
83 C 16—Single pole. Ivory Bakelite. . . Ea. 85c; 3 for $2.35
83 C 3—Single pole. Brown Bakelite . . . Ea. 79c; 3 for 1.98
83 C 17—3-way type. Ivory Bakelite. . . Ea. $1.49; 3 for 4.25
83 C 4—3-way type. Brown Bakelite. . . Ea. 1.39; 3 for 3.95

8 "QUIETTE" SWITCHES. No "snap" noise, excellent for children's rooms, bedrooms, nursery—wherever you need silent operation for lights or outlets. Modern Design Chimes Sound a Cheerful Welcome

GREET YOUR GUESTS WITH MUSIC—put an end to harsh, jangling door bells forever. Your whole family will enjoy the soothing, musical notes that sound clearly through your home. Wards full note chimes are designed to add distinctive new beauty to any room, yet their cost is surprisingly low. Choose the luxury of traditional long-tube chimes or the compact styling of short-tube or tone bar chimes. Any of Wards eight styles makes a perfect gift for weddings, birthdays, anniversaries or other occasions.

WARDS CHIMES ARE FULLY GUARANTEED. If any chime is defective in materials or workmanship within one year of purchase, it will be repaired or replaced at no charge to the customer.

COMBINATION "DO-IT-YOURSELF" CHIME KITS include Chime and Wiring Kit (A) above—transformer, bell wire, two push buttons (13) and (14). Easy to install. Wiring diagram, instructions included. Wiring Kit is also available separately at right. Use 10-volt transformer with chimes (6) and (7), 16-volt transformer with other models.

LATEST STYLES IN RICH-TONED CHIMES . . . LOW AS 2.95 (6)

1 DE LUXE WESTMINSTER MELODY CHIME. Favorite long-tube style—Wards finest chime. Plays traditional 4-note Westminster melody for front door, one note for rear door. Rich, resonant tones have adjustable volume control. French Walnut finished metal case with gleaming Brass finish trim and tubes. Sealed mechanism keeps out dust. Size overall: 7½x3⅞x42½ in. Ship. wt. Kit 13 lbs.
83 C 1617 MO—Combination Chime Kit. $2.50 Down..... Cash $21.95
83 C 1616 M—Chime Only. Ship. wt. 11 lbs.....19.95

2 DE LUXE SHADOW BOX CHIME. An outstanding design to brighten any style home. Black Syrocowood shadow box overlay gives rich contrast to polished Brass finish face panel. Sounds two melodious notes for front door, one for rear door. Three long Brass finish tubes (center tube ornamental only). Size overall: 8x3x44 in.
83 C 1615 MO—Combination Chime Kit. Ship. wt. 11 lbs.....$13.95
83 C 1614 MO—Chime Only. Ship. wt. 8 lbs. 12 oz..... 11.85

3 NEWLY-DESIGNED DE LUXE CHIME. Just designed for Wards by leading chime manufacturer. Favorite long-tube style for modern furnishings. Interwoven metal pattern in wood case with Brass finish on case and tubes. Modern leaf design in black. Plays two melodious notes for front door, one for rear. Size overall: 8 x 2½ x 41 in.
83 C 1627 MO—Combination Chime Kit. Ship. wt. 9 lbs. 8 oz.....$10.75
83 C 1626 MO—Chime Only. Ship. wt. 7 lbs. 8 oz..... 7.98

4 NEWLY-DESIGNED SHORT TUBE CHIME. Interwoven metal pattern in wood case with Brass finish on case and tubes. Leaf design. Two notes for front door, one for rear. 7¾x2½x13 in.
83 C 1607 L—Combination Chime Kit. Ship. wt. 6 lbs. 4 oz.....$9.89
83 C 1606 L—Chime Only. Ship. wt. 4 lbs. 4 oz..... 6.95

5 WESTMINSTER MELODY CHIME. Wards finest short-tube chime. Sealed mechanism plays traditional Westminster melody: four notes for front door, one for rear door. French Walnut finish metal case with Brass finish resonator tubes and trim. Size: 7½ x 3½ x 11 in.

14 PERSONALIZED PUSH BUTTON. With name card bracket.
83 C 1509—Rustproof brass. 1 13/16x2 11/16 in. Ship. wt. 3 oz.26c

15 DOOR BUZZER. Metal cover. Silver contact points.
83 C 1536—Use 10-V. transformer (21). Ship. wt. 8 oz.59c

16 ENCLOSED BELL-BUZZER COMBINATION. Pearl gray enameled metal case. Bell rings for front, buzzer for rear.
83 C 1537—Use 10-V transformer (21). Ship. wt. 12 oz..$1.25
83 C 1520—Bell only. Use 10-V transformer (21). Wt. 10 oz.75c

17 DOORBELL. Nickel plated, brightly finished gong produces sharp, clear signal. Gray enameled metal cover.
83 C 1535—Use 10-V transformer (21). Ship. wt. 10 oz...69c

18 TO 20 ATTRACTIVE PUSH BUTTONS. Ship. wt. 2 oz.
(18) 83 C 1545—Brown Bakelite case.....13c
(19) 83 C 1548—Plastic case with metal trim button.....25c
(20) 83 C 1547—Plastic pearl button, metal trim.....35c

21 TRANSFORMERS. For chimes and bells, UL Approved.
83 C 1528—16-volt. 110–120-V. AC. Ship. wt. 1 lb. 12 oz.$1.89
83 C 1529—10-volt. 110–120-V. AC. Ship. wt. 1 lb. 8 oz... 1.39

22 INDOOR BELL WIRE. About 75-ft. coil. Insulated copper.
83 C 1531—Ship. wt. ea., 8 oz. Per coil 55c; 2 coils 99c

WIRING KIT. Shown in view (A) at left. For chimes and bells—replace old equipment at a saving over individual prices. Includes transformer (21), coil of bell wire (22), front and rear door buttons (13) and (14).
83 C 1618—With 10-V. transformer. Ship. wt. 2 lbs.....$2.85
83 C 1619—With 16-V. transformer. Ship. wt. 2 lbs. 6 oz. 3.30

23 APPLIANCE PLUG. For irons, toasters, etc. Prongs ¾ in. apart. Built-in toggle switch. Black Bakelite spring cord protector.
83 C 1343—Ship. wt. 5 oz.....Each 39c

24 CURRENT TAPS. Two outlets always "on." Brown bakelite. Ship. wt. ea. 3 oz.
83 C 1335—With pull chain. 2 for 52c; 5 for $1.22
83 C 1334—No pull chain. 2 for 29c; 5 for 69c

25 BRASS SHELL SOCKETS. ½-in. threaded cap. Threaded for lamp-shade. Ship. wt. ea. 3 oz.
83 C 1375–Pull Chain 250-W. 2 for 69c; 5 for $1.65
83 C 1377–Push Switch. 660-W. 2 for 55c; 5 for 1.30

26 27 NEW EXTRA-HEAVY DUTY BRASS SOCKETS. Deluxe styling and design. Long life. Threaded cap fits lamp stem; other end threaded for lamp shade. Wt. ea. 5 oz.
(26) 83 C 1321—Push button. Ea. 95c; 2 for $1.79
3-WAY for 30-70-100-W. or 50-100-150-W. bulb
83 C 1324—Std. base.....Ea. $1.10; 2 for $1.98
(27) 83 C 1322—PULL CHAIN. Ea. 95c; 2 for $1.79

28 NEW TWIN SOCKET. Brown Bakelite.
83 C 1333—Wt. 3 oz.....2 for 29c; 5 for 69c

29 GROUNDING CORD TAP. Heavy duty. Use with (30) at right. 2 or 3-wire connection.
83 C 140—Wt. 4 oz. Each 85c; 3 for $2.42

30 3-PRONG PLUG CAP. Grounds portable power tools, etc., reduces shock danger. Use with (29) at left and 3-wire cord (20) on Page 803.
83 C 149—Ship. wt. 2 oz....Each 69c; 3 for $1.98

31 GROUNDING PLUG ADAPTER. For portable power tools, etc. UL Appr. ground connection with 3-prong plug. For standard receptacle.
83 C 141—Ship. wt. 4 oz.....Ea. 29c; 2 for 55c

32 CORD TAP. Heavy-duty. Hard rubber.
83 C 1327—Ship. wt. 4 oz. 2 for 59c; 5 for $1.35

33 SAFETY OUTLET ADAPTER. Cap covers slots of standard receptacle when not in use.
83 C 1358—Ivory. Wt. 4 oz...Ea. 42c; 3 for $1.19

34 35 QUICK-CLAMP ATTACHMENTS. Just insert wire into hole, push clamp—no stripping. Metal points make positive connection. Use with 2 No. 18-ga. plastic, rubber or rayon cord.
(34) 3-OUTLET TABLE TAP. Ivory Bakelite.
83 C 1319—Ship. wt. 2 oz.....2 for 55c; 5 for $1.29
(35) PLUG CAP. Ivory Bakelite.
83 C 1315—Ship. wt. for 2, 1 oz. 2 for 24c; 5 for 55c

36 HEAVY-DUTY PLUG CAP. Solid rubber. 10-A.
83 C 129—Ship. wt. 3 oz. Each 29c; 3 for 82c

37 RUBBER CUBE TAP. Three plug-in outlets.
83C1340–Ship. wt. ea. 3 oz. 2 for 39c; 5 for 92c

38 RUBBER PLUG CAP. For lights, appliances.
83 C 1326–Ship. wt. ea. 3 oz. 2 for 18c; 5 for 42c

39 BAKELITE PLUG CAP. For appliances, etc.
83 C 1330—Brown. Ship. wt. 2 oz...2 for 15c

40 SCREW-BASE PLUG. Fits standard socket.
83C1336–Ship. wt. ea., 3 oz. 2 for 15c; 5 for 35c

41 WEATHERPROOF OUTDOOR SOCKET. Heavily encased. Standard socket. UL Appr.
83 C 1373—Ship. wt. ea., 5 oz. 2 for 42c; 5 for 93c

42 TOGGLE SWITCH. For motors up to ¾ HP.
83 C 4702—Fits ½-in. hole. Wt. 2 oz.....45c

43 PLUG-IN NIGHT LIGHT. 7-W, GE bulb glows softly. Ivory shade. Fits any standard outlet.
83 C 1365—Ship. wt. 3 oz..Ea. 45c; 3 for $1.29

44 CANOPY SWITCH AND EXTENSION. For bent-glass type fixtures. (See Page 796).
83 C 1394—Ship. wt. 3 oz.....Complete 49c

EXTENSION ONLY. Fits switches (46) and (47).
83 C 1382—Ship. wt. 1 oz....ea. 21c; 3 for 59c

45 FEED-THROUGH SWITCH. Use as pendant or feed through switch anywhere on cord.
83 C 1347—Ivory Bakelite. Wt. 2 oz. 32c; 3 for 89c

46 47 CANOPY SWITCHES. For fixtures. Easy to attach. With pull cords. Ship. wt. ea. 3 oz.
(46) 83 C 1390—Normal duty 3-amp....2 for 55c
(47) 83 C 1391—Heavy duty 6-amp....2 for 75c

48 FUSTATS AND ADAPTERS. Take only same size fuse—can't put in oversize fuse accidentally. Take harmless current surge. Wt. Pkg. 6 oz.
83 C 765—Fustats. *State:* 15, 20, 30 amp. 4 for 49c
83 C 766—Adapters. *State:* 15, 20, 30 amp. 4 for 39c

49 CIRCUIT PROTECTORS. Button pops out shows short circuit or dangerously overloaded circuit. Remedy, then push reset button (no fuse replacement). Fits like standard fuse. *State:* 15, 20 or 30 amp. UL Approved.
83 C 750—Wt. ea. 2 oz....Each $1.35; 4 for $4.95

50 FUSETRON PLUG FUSES. Take harmless overloads—time-lag absorbs current surge from appliance motors, yet protects against short circuits or dangerous overloads. (Smaller fuses on Page 806.) *State:* 15, 20 or 30 amp. size.
83 C 770—Ship. wt. Pkg. 8 oz.....4 for 39c

PLUG FUSES. *State: 15, 20, 25 or 30 amps.*
83 C 760—Ship. wt. pkg., 5 oz.....5 for 29c

51 INSULATED STAPLES. Light Ivory color.
83 C 1400—Ship. wt. 2 oz. 2 pkgs. of 40...19c

52 CARTRIDGE FUSES. Brass contacts, fiber tube. Ship. wt. ea., 5 oz. *State amperage.*
83 C 761—30-amp. size. Tubular contacts. 2 for 19c
35, 50 or 60-amp. size. Tubular contacts. 2 for 29c
100-amp. size. Knife-blade contacts. 2 for $1.39

Rugged Powr-Kraft Motors...Fully Guaranteed

CHOOSE THE RIGHT MOTOR FOR YOUR NEEDS

A motor large enough to do the job economically will last far longer than a smaller motor operating under constant strain.

Use Split-Phase type for easy starting jobs or where full load is applied at maximum speed—washers, light power tools, etc.

Use Capacitor type for hard starting jobs—starts loads up to ⅔ heavier than Split Phase. For home workshop tools, machine shop tools, water pumps, mechanical refrigerators, etc.

Use Mill Type Capacitors for hard starting jobs on production equipment, compressors, general shop or farm equipment.

Use Repulsion Induction type on hardest starting jobs, in areas where heavily loaded circuits cause voltage drops. For deep well pumps, compressors, industrial tools, freezers, etc.

GUARANTEE. Any Powr-Kraft motor, used and cared for according to operating instructions, that proves defective in materials or workmanship within one year of purchase will be repaired or replaced free. Wards also offer expert repair service and replacement parts for any electric motor—see details, Page 958.

10 BIG REASONS WHY POWR-KRAFT MOTORS ARE YOUR BEST BUY

1. Precision-Built for Wards by the nation's leading motor manufacturers. Approved by Wards Laboratory. Thoroughly tested before shipment. Meet or exceed NEMA specifications.
2. Guaranteed for One Year . . . service and parts always available (See Guarantee, left).
3. Complete Motor Specifications on Nameplate, including type and size, RPM, voltage, amperage, current, model and serial numbers, and instructions for reversing. Tag with instructions on operation and care is included for your permanent reference file.
4. Thermoguard® Overload Protection against burnouts due to overloads or short circuits—see (A)—on motors (5), (6), and (8). Easily reset by pushing button.
5. Extra Heavy-Gauge Seam-Welded Frame—see (B)—protects windings and core.
6. Oversize Precision-Sealed Ball Bearings—see (C)—on motors (2), (4), (5), (6), (8).
7. Sleeve Bearings with Nylon Washers for vertical mounting—see (D)—on (1), (7).
8. "Formvar" Windings, Insulated with Baked-on, thermo-setting varnish for long life. Provide double protection against heat, moisture and corrosion—motor's worst enemies.
9. Drip-Proof End Brackets help prevent foreign matter from entering, damaging motor.
10. Slotted Mounting Bases fit NEMA Standards, make belt adjustment easy.

STANDARD SPLIT-PHASE ELECTRIC MOTORS . . . 13.95 and 14.95

1 ¼ and ⅓ HP Models. Compare with other nationally-known motors of similar quality selling for $16.95 and $17.75. For easy starting jobs such as light power tools, circulating fans, washing machines, exhaust fans, etc. Meet or exceed NEMA specifications. Precision sleeve bearings with nylon thrust washer—see view (D) above. Can be mounted horizontally or vertically. Large oil reservoir. Motors are now equipped with resilient rubber mounting rings for smoother, quieter operation. Cradle type slotted mounting base lets motor turn to any angle, even upside down. Long life, full power, fan-cooled motors have heavy-gauge welded steel frames and drip-proof end shields. Develop twice rated torque for starting. "Form-Var" insulated windings give double protection against heat and moisture. ½-in. diameter flat shaft extends 1½ in. Full load speed 1725 RPM. For 110–120-V. 60-cycle AC. Built-in conduit box. Easily reversed. 8-ft. cord and plug. Blue-gray enamel finish.

83 C 4505 MB—¼ Horsepower. Mounting dimensions: 3 by 4⅞ in. Ship. wt. 20 lbs. *Mailable*. . . $13.95

83 C 4506 MB—⅓ Horsepower. Mounting dimensions: 3 by 4⅞ in. Ship. wt. 22 lbs. *Mailable*. 14.95

DE LUXE FULLY-EQUIPPED SPLIT-PHASE ELECTRIC MOTOR . . . 19.95

2 ⅓ HP Model. Our finest split-phase motor. Has ball bearings and other deluxe features at price others ask for unequipped models. For jobs where maximum load is applied after motor is started—light-duty power tools, exhaust fans, washing machines, etc. Meets or exceeds NEMA specifications. Prelubricated oversize ball bearings—see view (C) above—allow motor to be used in any position. Long life, full power, fan cooled motor has heavy cast-iron base and drip-proof end shields. Develops twice rated torque for starting. "Form-Var" insulated windings give double protection against heat and moisture. Double ½-in. flat shaft extends 1½ in., allows motor to operate two tools at one time. Full load speed 1725 RPM. Easily reversed—just switch lead wires. For 110–120-V. 60-cycle AC. Handy off-on toggle switch. Heavily insulated 8-ft. cord, plug. Slotted mounting base.

83 C 4507 MB—⅓ HP. Mounting dimensions: 3x5⅛ in. Ship. wt. 26 lbs. *Mailable*. $19.95

REPULSION-INDUCTION SINGLE-PHASE MOTORS . . . low as 41.00

3 4 Highest quality heavy-duty construction—tagged far below usual retail prices. For hardest starting jobs: mechanical refrigerators, freezers, compressors, hammermills, water pumps, etc. Ideal for farm, shop or industrial use, also on REA lines. Meet or exceed NEMA, AIEE specifications. Recommended for severe climates or where heavily loaded circuits cause low voltage. Takes low starting current, frequent starts and stops—develops 4 to 5 times rated torque for starting and emergency periods. 4 high-grade carbon brushes for easier starting. Heavy copper wound, balanced armature minimizes vibration. Efficient fan cooling. Single keyway shaft. 1725 RPM, for 110–120/220–240-V. single-phase 60-cycle AC. (See Power Co. about voltage, phase, cycle, capacity.)

(3) ½ and ¾ HP. For heavy production work. Oversize steel backed babbitt sleeve bearings, diamond bored—large oil reservoir—view (D) above. Use in horizontal position. Rugged, extra-heavy steel frame. Drip-proof cast-iron end shields. Brush lifting mechanism. *Mailable.*

(4) 1 to 5 HP. For heaviest production work in shops, factories. Prelubricated, oversize ball bearings—see view (C) above—for smooth, quiet operation. Use motor in any position. Rugged steel frame and base. Drip-proof cast-iron end shields. Brush riding mechanism. *Not Mailable.*

ACCESSORIES TO MAKE YOUR ELECTRIC MOTOR EVEN MORE VERSATILE

9 10 FLOATING MOTOR RAIL AND BRACKETS. Use one motor to operate several tools. For ¼ to ½ HP motors. Just fasten rail to motor and mount one pair of support brackets beside each tool. Motor rail rests firmly on brackets—motor can be moved from tool to tool as needed. Set includes rail and one pair of brackets (see extra brackets below). Complete with hardware.

(9) 83 C 4740—Rail and Brackets. Ship. wt. 1 lb. . . . . Set 89c

(10) 83 C 4741—Extra brackets for (9). Ship. wt. 4 oz. . . . Pair 39c

11 TOGGLE SWITCH. For motors up to ¾ HP. Fits ½-in. diam. holes.

83 C 4702—On-off switch. Ship. wt. 2 oz. 49c

83 C 4703—3-way switch (on-off-reverse). Ship. wt. 3 oz. 95c

BALL BEARING CAPACITOR MOTORS . . . low as 24.95

5 6 Compare with other nationally-known motors of similar quality selling for $10 more. For medium to hard-starting jobs—machine shop and workshop tools, water pumps, sprayers, etc. Meet or exceed NEMA specs. Start ⅔ heavier loads than comparable split-phase motor.

Outstanding features include: oversize precision grease-sealed ball bearings for smoother, quieter operation—see view (C) above. Use motors in any position desired. Built-in Thermoguard®. overload protector—see (A) above—shuts off motor when overload occurs, to prevent burnout. Easily reset by pushing button. "Form-Var" insulated wire plus baked-on thermo-setting varnish protects against heat, moisture—lengthens motor life. Built-in capacitors (except external on 83 C 4598) reduce starting current by ⅓ to handle heavier loads. Silver contact points on starting switch give more positive action, longer motor life. Large fan and ample air vents provide proper cooling. Double shaft permits operation of two tools at once. Motors easily reversed—just change lead wires (instructions on nameplate).

8-ft. oil and weather-resistant cord with plug. Convenient off-on switch (except on (6). Rugged cast-iron base, heavy steel housing to take hardest use—see view (B) above. Baked-on blue-gray enamel finish. High-speed motors (3450 RPM) eliminate step-up pulleys on power tools, etc. (6) has built-in conduit box, steel base. (1½ HP looks like picture (8) above.)

Any Motor Below Available on Terms. Pay as little as 10% Down, use your motor while paying for it on Monthly Terms—see full details Inside Back Cover.

Be sure to state Catalog Number. Mailable. See Guarantee above at left.

APPLIANCE CAPACITOR 21.00

7 High starting torque motor — for replacement on stokers, refrigerators, pumps, etc. Meets NEMA specs. Starts loads ⅔ heavier than comparable split-phase motor. Diamond bored precision sleeve bearings with nylon thrust washers —see view (D) above. Easily reversed. Large oil reservoir. Cradle-type heavy-gauge steel base permits mounting at any angle. Rubber mounting rings. Drip-proof end shields keep out dust, etc. Built-in conduit box. ⅝-in. diam. keyway shaft extends 1⅞ in. 1725 RPM. For 110–120/220–240-V. AC. Mounting dimensions 3x4⅞ in. $2.50 Down on Terms. Wt. 24 lbs.

83 C 4567 MB—⅓ HP. *Mail*. . .Cash $21.00

MILL CAPACITORS 41.95 to 49.95

8 ½ HP To 1 HP Models. For extra-heavy production use on hard-starting jobs. Meet or exceed NEMA performance specifications. Fully guaranteed for one year—see Guarantee above. Have 3 to 5 times rated torque for starting or emergency periods. Precision ball bearings and large oil reservoir—see (C) above. Built-in conduit box. Internal capacitors reduce starting current by ⅓. Thermoguard® overload protector prevents motor burnout. Shuts off automatically, has handy restart button—see (A) above. ¾-in. diameter shaft extends 2¼ in. 1725 RPM. For 110–120/220–240-volts AC. Mounting dimensions: 5x5⅞ in. *Mailable.*

WARDS POWERLITE ELECTRIC PLANTS

12 Wards offer a complete line of AC and DC generating plants from portable 500-watt size to giant stationary 35,000-watt size. There's a Powerlite plant for every need.

Powerlite plants are built by manufacturer who has worldwide reputation for precision generating equipment. Engineered for dependable power when, where needed.

Powerlite plants can be used where there is no electricity, such as cottages, farms, ranches, tourist camps, mines, oil fields, etc., or for emergency standby use in hospitals, radio stations, garages, hatcheries, greenhouses, locker plants, theatres, stores, and other places where power failures would be costly. Portable plants are ideal for construction jobs, logging camps, mobile PA systems and other places where power is needed but not already available.

Find out how electrification with Wards Powerlite plants can save you money and bring you conveniences of electricity. Write today; Wards will send without cost or obligation Powerlite literature and Price List. Write Montgomery Ward in care of your nearest Mail Order House for your copy.

Easy-to-Install Thru-Bolt, Cylindrical Lock Sets

GOOD QUALITY LOCK SETS 1.35 TO 5.95

1 TO 3 Low priced Tubular Locksets, sturdily built, easy to install. All sets have polished brass finish trim. Sets include template, strike plate, screws; fit right- or left-hand doors 1¼ to 1¾ in. thick.

INSIDE, BEDROOM AND BATHROOM SETS. Available with polished brass plated steel knobs and trim, or with fluted glass knobs with solid brass trim. 2-in. diam. knobs. Bedroom and Bathroom sets have push button lock on inside, emergency release on outside. Bathroom sets have chrome plated (84 C 1242) or nickel plated (84 C 1238) inside trim. Ship. wt. ea. 1 lb. 8 oz.

FRONT OR REAR DOOR SETS. Available with regular 2⁹⁄₁₆-in. backplate or large decorative 3¾-in. backplate as shown in (3) above. Both sets have 2⅛-in. solid brass knobs, polished solid brass trim, concealed screws. With 5-pin tumbler locks in outside knobs, turn button on inside knobs. 2 keys. Ship. wt. 1 lb. 5 oz. ea.

KEYED-ALIKE FRONT AND REAR DOOR SETS. Choose regular 2⁹⁄₁₆ or large 3¾-in. backplate as shown on (3). Two lock sets use same key; 4 keys incl. Ship. wt. 3 lbs.

BETTER QUALITY THRU-BOLT LOCK SETS 1.98 TO 8.95

4 TO 6 Thru-bolt construction makes more rigid installation than Tubular Lock Sets—machine screws hold lock set securely to door. Floating hubs in latches eliminate binding. All exposed parts are rustproof solid brass or bronze, with clear plastic coating to prevent tarnishing. Your choice of three beautiful finishes: Polished Brass, Satin Brass or smart new Brushed Bronze. All sets fit right- or left-hand doors 1¼ to 1¾ in. thick. Latch case size 3x1 in. With instructions, template, strike plate and screws.

INSIDE, BEDROOM AND BATHROOM DOOR SETS. All have 2-in. diam. knobs, 2¼-in. backplates. Bedroom and Bathroom sets have in-the-knob push button locking device; emergency release from outside. Bathroom sets have chrome plated inside trim. Smooth lines go equally well with period or modern decorating. Ship. wt. 1 lb. 8 oz.

FRONT OR REAR DOOR SETS. All sets have 2⅛-in. diam. knobs with 5-pin tumbler keyway lock in outside knob; turn button on inside knob, plus separate auxiliary deadlocking feature. Rear Door sets have chrome plated inside trim, regular 2⁹⁄₁₆-in. diam. backplates. Front Door Sets in choice of regular 2⁹⁄₁₆-in. backplates or large 3¾-in. or 5½-in. decorative backplates. Sets include two keys. Ship. wt. 1 lb. 8 oz.

KEYED-ALIKE FRONT AND REAR DOOR SETS in choice of regular 2⁹⁄₁₆-in. backplate or large 3¾-in. decorative backplate. Include 2 lock sets, one for front, one for rear. Same key fits both locks. Both have 5-pin tumbler keyways. 4 keys included. Ship. wt. 3 lbs.

Easy-to-Install Garage, Barn and Residential Sliding

SIX STYLES OF MODERN, WORKSAVING, GARAGE DOOR HARDWARE SETS 8.25 TO 79.50

1 2 "SWING-UP" SPRING-TYPE SETS. Easy to install overhead door sets—require just a few tools—complete instructions included. Fully automatic—a pull of the handle and door glides up smoothly and silently. Two strong oil-tempered, heat-treated steel springs, one mounted on each side of the door, do all the heavy lifting for you. Springs have both fine and coarse adjustments to balance your door's exact weight. Door swings overhead on ball bearing rollers and full-length track. Completely inside of garage, out of the weather. Can't be blocked by snow or ice. Remains securely overhead until you are ready to lower it. A light pull is all that is needed.

Sets are for use on new or old doors. Include all necessary hardware for converting old hinge-type swinging doors into one rigid swing-up door. Allow use of every inch of space for bigger modern cars; garage need not be longer than your car. Door swings outward and upward; will clear all makes of cars with the bumper resting against the door. Sets 84C8755R and 84C8760R need only 2-in. overhead clearance; others need 2¼ in.

All hardware except zinc plated outside handle has black japanned finish and is inside of garage, protected from weather. All sets include metal weatherstrip for weathertight seal, steel bumper to stop door. With cylinder locking bolt, 2 keys (door not included). Choice of 8 or 9-ft. width for single garages; up to 16-ft. width for double garages. Shipped promptly by Freight or Truck. 10% Dn.

Catalog Number	Fits Openings Up to Height	Width	Doors Up to	Ship. Wt.	Price Set
(1)84C8755R	6½ to 7 ft.	8 ft.	100 lbs.	50 lbs.	$19.95
(1)84C8756R	6½ to 7 ft.	8 ft.	150 lbs.	75 lbs.	23.95
(1)84C8760R	6½ to 7 ft.	9 ft.	150 lbs.	78 lbs.	24.95
(2)84C8765R	6½ to 7 ft.	9–16 ft.	325 lbs.	142 lbs.	49.50
(2)84C8763R	7 to 8 ft.	9–16 ft.	375 lbs.	151 lbs.	49.50
(2)84C8766R	8 to 10½ ft.	9–16 ft.	375 lbs.	182 lbs.	79.50

3 "SWING-UP" BOX TYPE SET. For new doors or to convert your old doors into 1-piece "swing-up" overhead door. Doors swing up smoothly, quietly on roller bearing hangers in enclosed square box track. Weight of doors counterbalanced by weight box. All hardware inside, protected from weather.

Includes weight box, hangers, track, bolts, screws, instructions. Spring bolt latch with releases for each side of door. Hasp outside for padlock (padlock not included). 6½-in. overhead clearance needed. Fits door openings up to 8 ft. high by 8 ft. wide. Takes doors weighing up to 250 lbs. (doors not included). Shipped promptly by Freight or Truck.
84 C 8743 R—Ship. wt. 73 lbs.....Set $17.95

4 OVERHEAD "JAMB TYPE" SETS. Use with new or old doors. Mounts on jambs. No track, pulleys, weights or cables needed. Strong oil-tempered, heat-treated steel springs swing door up smoothly, quietly against top of opening—extends about 39 in. past opening. Adjusts easily for weight of door. Pivots on roller bearings sealed in dirt-tight unit. Black japanned rust-resistant fin.

Doors swing outward and upward, leave floor area free. Hardware completely assembled, sliding bolt lock and instructions (doors not incl.). Needs 8-in. overhead clearance. Shipped by Freight or Truck. 10% Down.
84 C 8771 R—Fits openings 6 ft. 6 in. to 7 ft. 4 in. high and from 7 ft. 6 in. to 10 ft. wide. For doors from 75 to 175 lbs. Wt. 55 lbs..Set $19.95
84 C 8773 R—Fits openings 6 ft. 6 in. to 7 ft. 4 in. high; 10 ft. 1 in. to 16 ft. wide. For doors from 175 to 350 lbs. Ship. wt. 76 lbs.Set $24.95

5 ROLL-UP TYPE SET. For 4-section doors that roll up. Doors need less space to open, close; ideal for small garages. Gives silent, trouble-free operation. All hardware except handle is inside, protected from weather.

Incl.: track; 8 hinges; ball bearing rollers; 2 springs for lifting; cylinder lock, 2 keys; instructions. For doors weighing up to 115 lbs., and up to 8 ft. wide, 7 ft. high. 12½-in. overhead clearance needed (door not included). Shipped by Freight or Truck. Ship. wt. 75 lbs.
84 C 8750 R—Only $4.00 Down...Cash $35.95

6 AROUND-THE-CORNER SET. Doors slide around the corner inside garage to either right or left wall. Entrance door can be on right or left-hand side. Can also be set with one door hinged to jamb for entrance door and others sliding past on track. Inexpensive and easy to install. Set includes all necessary hardware and instructions. For three doors up to total width of 8 feet, 8 ft. high and total weight of 450 lbs. (door not included). Black enamel finish. Shipped promptly by Freight or Truck.
84 C 8715 R—Ship. wt. 32 lbs.....$11.75

7 3-DOOR FOLDING-SLIDING SET. Two doors fold and slide back; third door hinges to jamb. Doors can be arranged to slide inside or outside garage. Set includes all necessary hardware and instructions. For 3 doors up to 2 in. thick, total width 8 ft., height 8 ft., total weight 400 lbs. (doors not included). Black enamel finish. *Mailable.*
84 C 8716 YO—Ship. wt. 12 lbs.....$8.25

84 C 8729—Wt., ea. 6 oz.....2 for 25c

STEEL JACK POSTS FOR OLD OR NEW CONSTRUCTION 5.85 TO 9.75

44 TO 46 Jack Posts stop floor sag, cracking plaster, sticking doors. Use to provide needed support under refrigerators, freezers, other heavy household furnishings. 1½-in. diam. threaded lift screws. Rust resistant. Base and top plates have holes for fastening. Approved by Wards Lab. for weights specified. To determine your needs, multiply sq. ft. area of house by 100 lbs.* Divide this figure by capacity of jack. This gives number of jacks needed. Thus, a 20x40-ft. one-floor house would total 80,000 lbs. and would require 3 jacks (44) or 4 jacks (45). *Weight is "Live Load"; includes safety factor of 2.5.

(44) HEAVY DUTY PERMANENT JACK. 32,000 lbs. capacity. One piece 2¾-in. diam. steel column has 3-in. markings for cutting guide. Post must be cut in guide marks to fit the height of ceiling. Screw adjusts 6 in. from any height from 9 in. to 8 ft., 10 in. Has Acme threads. 5x6-in. base, top plates. Ball bearing in top plate; turning bar. Instructions.
84 C 5505 R—*Not Mailable*. Ship. wt. 36 lbs. Each $9.75; Lots of 3 or more.....Each $9.25

(45) ADJUSTABLE COLUMN JACKS. For temporary or permanent use. Welded double tube construction. Outer tube, 2¾-in. diam. 2 supporting pins adjust for different heights. Embossed 5x6-in. top and base plates. Screw adjusts 6 in. Turning bar. *Mailable up to 40 lbs.*

4 FT. 10 IN. TO 8 FT. 10 IN. ADJUSTMENT RANGE. Capacity 20,000 lbs. Has Acme square cut threads for easier turning. Ball bearing in top plate.
84 C 5506 MO—Ship. wt. 37 lbs...Each $9.75; 84 C 5506 R—Lots of 3 or more....Each $9.25

4 FT. 8 IN. TO 8 FT. ADJUSTMENT RANGE. Capacity 19,000 lbs.; national fine threads.
84 C 5504 MO—Ship. wt. 32 lbs...Each $8.45; 84 C 5504 R—Lots of 3 or more....Each $7.95

(46) SHORT ADJUSTABLE SUPPORT JACK. Supports 20,000 lbs. Use under porches, cramped quarters. 2 supporting pins. Adjusts 1 ft. 9 in. to 3 ft. 5x6-in. top, base plates. *Mailable*.
84 C 5510 M—Acme threads. With turning bar. Wt. 18 lbs...Ea. $5.85; 3 or more..Ea. $5.49

47 BELL BOTTOM JACK SCREWS. For raising buildings (see picture above). Drop forged turn screws. Acme threads; malleable iron swivel cap, cast semi-steel bottom. *Mailable*.
84 C 5500 MB—Use wrecking bar (not included) for turning. *State stand height, screw diameter*.

MODERN RESIDENTIAL SLIDING DOOR HARDWARE SETS... 3.75 TO 8.75

TOP QUALITY CLOSET AND CABINET DOOR HARDWARE for residential interiors. Modernize your home with sliding cabinet and closet doors. You gain an extra 7 square feet of usable floor space in your home with the installation of each sliding door. Use the space normally taken up by swinging hinged doors for extra chairs and furnishings. Sliding doors eliminate the nuisance of doors standing ajar. For any door—panel type; flush type plywood, glazed, mirrored, etc. Outstanding quality features of these sets assure smooth, quiet operation. Each set includes all necessary track, hangers and brackets, floor guides, screws, easy-to-follow instructions for installation. All parts of sliding door sets except track have rust-resistant zinc finish.

52 TWO-DOOR CLOSET SET. For 2 sliding doors 1⅛ to 1⅜ in. thick up to 3 ft. wide that mount in up to 6-ft. door opening and by-pass each other. With one 68-in. steel track that can be cut for opening less than 6 ft. Track has adjusting springs for up and down adjustment of doors without removing the trim; painted aluminum finish. 1⅜-in. hard rubber wheels require no lubrication, give smooth, quiet operation. *Mail*.
84 C 8797 MO—Ship. wt. 12 lbs.....Set $8.75

53 SINGLE INTERIOR DOOR SET. For sliding interior door up to 1⅜ in. thick and up to 3 ft. wide that mounts in pocket inside wall. 70-inch track of aluminum painted steel can easily be cut to fit smaller opening. Equipped with special adjustable track bracket for up and down adjustment of doors without removing trim. 1⅜-in. hard rubber wheels require no lubrication, reduce friction to a minimum for smooth, dependable operation. *Mailable*.
84 C 8793 MO—Wt. 5 lbs. 8 oz...Set $5.95

54 SINGLE PLYWOOD CLOSET DOOR SET. Use for sliding interior door ¾ to ⅞ inches thick and up to 3 ft. wide, which mounts on wall surface inside closet. Installed easily and quickly. 70-inch steel track is aluminum painted. Track bracket allows for up and down adjustment of doors without having to remove trim. 1⅜-in. hard rubber wheels need no oiling, operate quietly.
84 C 8792 MO—Ship. wt. 5 lbs. 8 oz. *Mailable*.....$5.75

55 TWO- AND THREE-DOOR HARDWARE SETS FOR SLIDING CABINET OR CLOSET DOORS. Track mounts in door opening, doors by-pass each other. All sets use same track, hangers, and floor guide for both ¾-in. and 1⅜-in. doors. Available for either 2- or 3-door openings. Vertical adjustments to ⅜ in. made with positive, lock-in-place feature—no need to loosen door screws. Nylon rollers. Aluminum finished steel track—floor guide adjustable for perfect fit. No need to groove door bottom. Doors lift on and off without removing hangers. Low headroom: only 1⅜ in. required between top of door and header. *Mailable*.

2 Aluminum Low as 10¾c sq. ft.

3 Bronze Low as 16¼c sq. ft.

4 Hardware Cloth Low as 9c sq. ft.

Galvanized, Aluminum, Bronze Screen; Hardware Cloth

LOW PRICED GALVANIZED

1 Resists rust — has many coatings of electroplated galvanizing. Plated after weaving so none of protective galvanizing is rubbed off by abrasive action of looms. Lacquer applied after galvanizing adds further rust-resistant qualities. Gray finish. .011-ga. wire drawn to U.S. Dept. of Commerce Specs. 138-55 and Gov't. Specs. RRS 141A. 18x14 mesh, see actual size (A). for extremely damp climates use aluminum or bronze screen. *Mailable. State length and width.*

RUSTPROOF ALUMINUM

2 Non-rusting, non-staining solid "Alcoa" aluminum wire. Lasts longer than galvanized steel wire described at left—saves time and cost of periodic painting. Durable and lightweight; processed for strength and resistance to corrosion. More resistant to rain, salt air, smoke and extreme temperature changes than galvanized wire. Woven to U.S. Department of Commerce Specifications 138-55; and Government Specifications RRS-141A. 18x14 mesh, see actual size in view (A) at left. Use aluminum screen staples or tacks listed on Page 814 for fastening wire to frames. *Mailable State length and width wanted.*

SOLID RUSTPROOF BRONZE

3 Outwears galvanized or aluminum screen wire. Rustproof bronze all the way through. Extremely resistant to rain, snow, heat, cold, salt air, smoke, or acid fumes. Will last indefinitely with ordinary care. For permanent installation on windows, porches, breezeways, etc. Woven of extra-hard .011-gauge bronze wire drawn to U.S. Dept. of Commerce Specifications 138-55; also Gov. Specifications RRS-141A. Fine 18x14 mesh keeps smallest insects out. See actual size in (A) at left. Has transparent lacquer coating to protect finish. Use varnish periodically to keep finish bright and to prevent staining. *Mailable. State width and length.*

GALVANIZED HARDWARE CLOTH

4 First quality, full-gauge, heavy hardware cloth, galvanized in molten zinc after weaving for improved wear and resistance to corrosion, greater rigidity. Has dozens of uses: to keep rodents out of feed, etc. see (B) at right; to shield machines, ventilators, protect plants and young trees, see (C); for chicken run floors, sifting frames, etc., see (D). Double selvage edge. ¼-in. mesh has 23-gauge wire; ½-in. has 19-gauge; ⅝- and ¾-in. have 17-gauge. *State Catalog Number, mesh, length and width.* Ship. wts. given for 100-ft. roll. *Mailable* up to 70 lbs.

Powr-Kraft Wood and Metal-Turning Lathes, 10% Down

POWR-KRAFT WOOD TURNING LATHES 23.95 AND 59.95

1 SANDING ATTACHMENT. Fits (3) only. 6-in. diam. sanding disc, tilting table with miter gauge. Ship. wt. 4¼ lbs.
84 C 2066.....$4.49

2 DRILL CHUCK ATTACHMENT. Fits (3) only. Attaches to headstock. With ½-in. chuck.
84C2071-Wt.1¼lbs.$1.98

3 HOBBYISTS' LATHE. Gap-bed model with grinding wheel. 27 in. between centers. 10-in. swing over 4 in. of bed, 8-in. swing over 23 in. Cast-iron construction. ½-in. diam. unthreaded spindle. Drive pulley rides between bronze bearings with ball thrust bearing. 4-step machine pulley—speeds from 775 to 3800 RPM. With ½x4-in. grinding wheel, tool rest and guard. Bed length 37½ in. *Mailable.*
84 C 2002 MB—Wt.29 lbs.$2.50 Dn., Cash $23.95

LATHE (3) WITH MOTOR. ⅓ HP, 110–120 V., 60 cycle AC, 4-step pulley, 46 in. "V" belt.
84 C 2000 YB—Wt. 56 lbs. $4.50 Dn., Cash $44.95

4 LATHE BED EXTENSION. Fits lathe (3) only. Increases between centers capacity to 38 in. Cast iron, milled joint construction.
84 C 2011—Ship. wt. 5 lbs.....$3.29

5 HEAVY-DUTY LATHE. Production type. 31 in. between centers. 10-in. swing over entire length of bed. Cast-iron construction. ¾-in. 16-thread hollow spindle rides on ball and bronze bearings. Drives from below or behind. 4-step machine pulley—speeds from 780 to 3800 RPM. Flat and "V" type ways. Self-ejecting tailstock center. No. 1 Morse taper spur, cup center. Adjustable tool rest, built-in toggle switch. With ½x52-in. "V" belt. Bed length overall: 42½ inches. *Not Mailable.*
84 C 2004 R—Wt. 71 lbs. $6 Down...Cash $59.95

LATHE (5) WITH MOTOR, ⅓ HP, 110–120 V. 60-cycle AC motor, 4-step "V" motor pulley.
84 C 2014 R–Wt. 99 lbs. $8 Down....Cash $78.95

POWR-KRAFT METAL TURNING LATHES 329.50 AND 357.50

6 Sturdy, dependable—accurate to .001 in. Designed to operate at high speed with sustained accuracy. Headstock has pre-loaded, grease sealed New Departure ball bearings and bronze bearings at eighteen other points.

CAPACITY: Swing over bed 10 in.; over saddle cross slide 6⅛ in. Alloy cast bed 61 5/16 in. wide with 2 flat, 2 "V" ways. Machine-cut semi-steel gears. Gears for 46-thread selections—4 to 216 right or left-hand threads.

HEADSTOCK: Precision-ground steel spindle rides on New Departure ball bearings. Spindle nose diameter 1½ in....8 right-hand threads per inch. No. 3 Morse taper spindle with adapter to No. 2 Morse Taper. Maximum collet capacty ½ inch.

TAILSTOCK, CARRIAGE AND COMPOUND REST: Tailstock spindle travels 2⅜ in., graduated in 16ths, takes No. 2 Morse Taper accessories. 1 1/16-in. offset for taper turning. Carriage has power cross feed, longitudinal feed. Cross slide graduated in 1000ths, travels 6¼ in. Cross feed screw mounted in bronze bearings. Compound rest top slide graduated in 1000ths . . . travels 2¼ in., swivels 90° in both directions, locks at any angle. Carriage has 9-in. bearing surface. Takes tool holder shank ⅜x¾ in.

DRIVE: 3-step cone pulley with flat belt drive to lathe. 2-step "V" belt from "V" motor pulley to counter shaft pulley. Twelve speeds . . . from 30 to 1450 RPM.

LATHES INCLUDE: 17 change gears (6 installed); 6-in. face plate; two 60° centers; tool post holder; thread cutting dial; flat belt; motor pulley (State ½, ⅝ or ¾-in. diam. bore); wrenches, parts list, instructions. Gray finish. *Not Mailable.* 10% Down.

24 IN. BETWEEN CENTERS LATHE. 43⅛-in. bed. *State bore in motor pulley.*

84 C 2680—Use with sanding discs. Wt. 4 oz.45c

Shopsmith Mark 5...The First Modern Power Workshop

COMBINES FIVE BASIC WOODWORKING TOOLS INTO ONE COMPACT UNIT 289.50 Complete

1 Revolutionary Shopsmith Mark 5—finest, most modern and complete workshop unit ever built. Combines bench saw, disc sander, lathe, vertical drill press and horizontal drill into one compact unit with no duplication of major parts—see pictures above, individual descriptions in right-hand column. Shopsmith principle utilizes only one spindle, one table, one motor and one frame to give you greater capacity at lower cost. Infinitely variable speeds (from 700 to 5200 RPM) with exclusive Speed Dial control lets you dial correct spindle speed for sawing, routing, shaping, sanding, etc.—no guess work or time-consuming change of belts or pulleys.

Has sealed, oiled-for-life ball bearings throughout. Induction hardened spindle machined to tolerance of .0002 in. fit; maximum runout of .001 in., has 4¼-in. quill feed. Built-in ¾-HP capacitor motor gives ample power for any operation.

FREE 20-PAGE CATALOG

For more complete description of Shopsmith Mark 5, attachments and accessories, send for your free, illustrated copy of the Shopsmith 20-page Catalog. Write your nearest Ward Mail Order House today.

Aluminum-alloy table 14x18⅜ in.—integral milled fence bar for perfect alignment. One-knob control squares and locks front and rear of fence—depth-of-cut scale on both sides. Quick release lever adjusts table. Rugged frame with precision machined, satin chrome plated upper steel tubes. Takes only 19x71 in. floor space—makes any room a workshop. Makes an efficient all-purpose power tool for farm, home, repair or shops. Belts, pulleys, motor completely enclosed. Safety switch. *Guaranteed—see opposite page. Shopsmith is delivered complete—no motor to attach, no bench to build: just attach bench ends and it's ready to plug in a few minutes after delivery.

Exclusive Shopsmith Power Mount feature is the new "6th tool" that makes Shopsmith an even more complete power workshop: it permits quick, easy adaptation of Magna Jig Saw (36), Jointer (37), Belt Sander (38) or Sprayer (39) listed on opposite page. Store these compact Magna tools on the wall when not in use. Power Mount Coupling (32), below, is required to operate Magna Jointer, Jig Saw and Belt Sander. Power Mount also makes it possible for Shopsmith to be used for dual operations in such useful combinations as: saw-jointer, jig saw-disc sander, etc. You get all the advantages of infinitely variable speeds provided by speed-dial control.

Shopsmith does the work of these 5 tools:

(1) 9-In. Circular Saw. Cuts to depth of 2½ in.; to 2⅜ in. at 45°. 48 in. between blade and rip fence. Table tilts 0° to 45°.

(A) 12-In. Disc Sander. Does plain, compound, beveled sa ing. 113 sq. in. sanding area. Hairline depth control.

(B) 34-In. Lathe. 16½-in. swing over ways. Maximum tance between centers 34 in. Cup center eccentric m permits controlled offset for turning tapers.

(C) Horizontal Drill. Tops capacity of any drill pre stock length limited only by room size. Adjustable tabl

(D) 16½-In. Drill Press. Drills to center of 16½-in. circle in. between chuck and floor as floor drill press. 4¼-in. fe

Shopsmith includes: bench ends and tubes; extensi table; dual-locking rip fence; 9-in. all-purpose saw blad with 1¼ in. arbor; 12-in. sanding disc and sheet; adhesive miter gauge; drive and cup centers, tool rest; ½-in. Jacob geared chuck; Allen wrench; instructions. With built-in HP ball bearing, capacitor motor—110–120 V 60 cycle A Shipped promptly from Factories in Ft. Wayne, Ind. or Oakland, Calif., or from Stock in St. Paul, Kansas City, D ver or Ft. Worth. Order from nearest Mail Order House. 84 CP 3469 F—*Prepaid*. $10 Down, $13.50 Mo. . . . Cash $

Magna Power Tools with Twin Tube Mounting

ATTACH TO YOUR SHOPSMITH OR USE AS INTERCHANGEABLE SINGLE PURPOSE TOOLS

36 TO 39 Magna Power Tool Corporation, makers of famous Shopsmith, now give you complete flexibility in planning or adding to your workshop—helps you solve any of today's limited storage or work-space problems. These Magna finest quality power tools utilize exclusive twin tube mounting principle found on Shopsmith. All four Magna tools shown above may be used 2 ways: (1) as attachments to power mount of your Shopsmith for even greater versatility, see view at right; or (2) as single purpose belt-driven tools, see views (46) and (47) below at right. As single purpose belt-driven tools, you need one stand, one mounting base and one motor to operate your first tool. Additional tools can be added as needed, and interchanged quickly and easily. Saves you the cost of purchasing duplicate stand, mounting base and motor for each tool—eliminates need for costly additional floor space. Single-Stand (46) mounts any one of the tools shown above. Double-Stand (47) permits mounting of any two tools at the same time. If you are buying your first Magna tool, order combination unit (listed below each tool) which includes power tool, base, machine pulley and belt. Order Motor, (41), and Stand separately. To mount two tools at the same time, order Double-Stand Outfit 84 CP 3399YO, listed below (47), which includes stand, motor and two motor pulleys. When ordering second Magna tool, you need only base, belt and machine pulley—for third or subsequent tools, only belt and machine pulley are needed. Available on Terms—see Inside Back Cover.

FOR SHOPSMITH OPERATION—Jig Saw, Belt Sander (shown), Jointer or Sprayer attach easily to Shopsmith.

MAGNA 18-IN. JIG SAW 49.95

36 HEAVY-DUTY BALL BEARING MODEL. *Guaranteed one year (see below). Cuts to center of 36-in. panel; depth of cut 2 in. 11x11-in. table tilts to 45°. Special high-speed drive mechanism runs in continuous oil bath . . . operates smoothly at speeds impossible with conventional jigsaws. Built-in blower clears sawdust from workpiece. Universal chucks rotate 90° to provide clearance for long workpieces. Tubular arm can easily be pivoted to position below table surface for use of jigsaw as a saber saw or filing machine. Has adjustable blade guide, hold-down, blade tensioning device. With 5-in. plain-end blade. Can be used on Shopsmith with Power-Mount Coupling (32) on opposite page. As a single-purpose unit, use mounting base (40), stand (46) or (47) and Motor (41). Pulley, belt listed below. *Mailed Postpaid.*

84 CP 3429 M—$5 Dn. Cash . . $49.95

3-STEP JIG SAW PULLEY. *Postpaid.*
84CP3384—2, 3,4-in.diameter.$1.65

RUBBER "V" BELT. ½ in. x 53 in. long.
84 CP 3387—*Postpaid*.....$1.55

COMBINATION JIG SAW WITH BASE, 3-STEP PULLEY AND 53-IN. "V" BELT. *Mailed Postpaid.*
84CP3396YB—$6Down. Cash $57.10

MAGNA 4-IN. JOINTER 49.95

37 BALL BEARING MODEL. *Guaranteed one year (see below). Heavy cast-iron construction reduces vibration and assures smooth operation. Width of cut, 4 in. Maximum depth of cut, ⅜ in. Cutter head 2¼-in. diameter—runs on two lubricated-for-life ball bearings. Three high-speed knives are individually adjustable. Extra-long 28-in. table provides ample support for long workpieces. Width of rabbeting ledge 2⅛ in. Rigid, one-piece cast-iron fence, 3x21¾ in., adjusts to 45° either way with automatic stops, locks with single knob. Safety guard mounts front or rear of fence. Can be used on Shopsmith with Power-Mount Coupling (32) on opposite page. As a single-purpose unit, use mounting base (40), stand (46) or (47) and Motor (41). Pulley and belt listed below. *Mailed Postpaid.*

46 47 MAGNA UTILITY STANDS. Designed for mounting Magna power tools (Jigsaw, Jointer, Sprayer, Belt Sander) or can be used as utility stands. Enamel finish matches tools. Order Casters (45), above.

(46) SINGLE STAND. For mounting any one of the above Magna tools. 12¾x15½x27 in. high.
84 CP 3377 MB—*Mailed Postpaid*.....$15.95

(47) DOUBLE STAND. Uses only 1 motor to drive any 2 Magna Power tools. 12¾x31½x27 in. high.
84 CP 3378 MB—*Mailed Postpaid*.....$18.95

DOUBLE STAND COMPLETE WITH ½-HP MOTOR, TWO 4-STEP MOTOR PULLEYS. Holds any 2 Magna tools.
84 CP 3399 YO—*Postpaid.* $6 Dn.....Cash $58.60

FOR DOUBLE STAND OPERATION—Belt Sander and Jigsaw shown mounted on Double Utility Stand for simultaneous operation with 1 motor.

"Do-it-Yourself" With Powr-Kraft Saws and Sanders

POWR-KRAFT 8-IN. BENCH SAWS . . . FOR YEARS THE FAVORITES OF PROFESSIONAL MEN AND SKILLED HOBBYISTS

There's a wealth of pleasure awaiting you in the hobby of woodworking. You'll get a genuine feeling of achievement, save money too, doing your own home repairs, making furniture, etc. Most useful of all tools is the circular saw. It performs 75% of all cabinet making operations. Its main use is to rip and crosscut lumber but it also can bevel, chamfer, taper, rabbet, miter, groove, shape, dado, sand, make miter and other joints. Tilting arbor construction of saws (1) (3) (5) makes work easier, more accurate—table remains level. Blade and arbor tilt to 45°. Grease-sealed ball bearings. 8-in. combination blade. Gray wrinkle finish. Available with or without ½-HP 1725 RPM, 110–120 v., 60 cycle AC ball bearing capacitor motor 83 C 4541MB (Pg. 809).

8-IN. HOBBYISTS' SAW 42.50

1 One of our best bench saw values. Ball bearing, tilting arbor type. Two handwheel controls; one raises, lowers; other tilts blade. With motor bracket, 2-in. mach. "V" pulley, guard, splitter. 18x24½x13½ in. Specifications below. Wt. 55 lbs. $4.50 Dn.
84 C 3315MO—Saw only. *Mail.* Cash $42.50

2 TABLE EXTENSIONS. For (1). 6x17¾ in.
84 C 3316 MB—Wt. 22 lbs. *Mail.* Pr. $11.95

SAW WITH EXTENSIONS, ½-HP Motor, 40-in. belt, 4-in. motor pulley. Wt. 107 lbs.
84C3317R—*Not Mail.* $8.50 Dn., Cash $81.95

8-IN. MEDIUM-DUTY PRODUCTION SAW 49.95

3 Designed especially for hobbyists, production work. ⅝-in. diam. arbor, larger bearing surfaces. New Departure grease-sealed ball bearings. One handwheel raises, lowers, tilts blade and arbor. 13x24¾x15½ in. Spec. below. 8-in. rip-crosscut-miter blade, 4-in. motor pulley (for ½ or ⅝-in. shaft), 1¾-in. machine pulley, 37-in. "V" belt, motor bracket, guard.
84 C 3480 MO—Wt. 56 lbs. *Mail.* $5 Dn. . . . Cash $49.95

13 8-TOOTH SAFETY SAW BLADE. Chrome alloy steel, combination rip-crosscut blade. 8 teeth project above non-cutting edge of blades. This reduces major cause of accidents, teeth can't grab wood and throw it back at operator. Blade uses less power, gives longer motor life. Cuts chips not sawdust, easier to clean, reduces fire hazard. Gives smooth plane-like cut. Longer life between sharpenings. Quieter, more efficient operation. Order below.

14 HOLLOW GROUND COMBINATION SAW BLADES. Wards Master (Best) Qual. Chrome nickel steel. Hollow (taper) ground design; tapered from edge to center. Gives clearance at sides. No need to reset blade. Will crosscut, miter or rip.

15 16 FLAT GROUND SAW BLADES. Wards Master (Best) Quality Chrome nickel steel, tempered and hardened. Precision filed, set by hand. Won't bind. Combination blade looks like (14).

1/12-HP GRINDER ONLY. As described in (31) above.
84 C 5101 M—*Mailable.* Ship. wt. 9 lbs.....$16.95

32 HAND GRINDER. Heavy gray iron gear case—dustproof. High speed gear ratio; machine cut gears; adjustable tool rest; extra-long bearings. 80-grit 5x1 in. vitrified aluminum oxide wheel. Unbreakable steel handle, wood grip.
84 C 5250—Wt. 5½ lbs. $3.35

33 POLISHING HEAD. Takes polishing, brushing accessories ½ to ¾ in. thick. Height to spindle center, 5-in. Shaft ½-in. diam., 24 thread, 7⅜ in. long. Use with 1725 RPM motor, 3-in. motor pulley (not included). With 1½-in. diam. "V" pulley. Drives from behind or below.
84 C 2768—Wt. 4 lbs. . . $2.49

USE YOUR CREDIT. For details of Wards Monthly Payment Plan, see Inside Back Cover.

HEAVY-DUTY BELT DRIVEN GRINDERS, WITH OR WITHOUT MOTORS 4.95 TO 35.50

34 35 36 WARDS MASTER (BEST) QUALITY. For grinding, sharpening tools, removing paint and rust, deburring, and many other workshop jobs.

Have double shielded ball bearings on spindle for smooth, quiet operation; lubricated for life. Grinding wheels project well beyond front of housing, permit grinding across front of tool. Safety steel wheel guards to protect operator. Adjustable tool rests (6 and 8-in. grinders have extra-heavy L-shaped rests). Can be driven from below or any angle behind grinder. Heavy gray iron frame and base for minimum vibration; gray wrinkle enamel finish with bright plated trim.

Complete outfits below include ¼-HP 1725 RPM motor (for 110–120 volt 60 cycle AC); motor pulley, "V" belt.

(34) 5-IN. BENCH GRINDERS. For general use by homeowners, handymen, small shops, etc. With two 5x1-in. vitrified grinding wheels (one 100, one 60 grit). Shaft is ⅜x9 9/16 in., turned down for ½-in. arbor wheels. Base 4x5 in. 2-in. diam. pulley takes "V" or round belt.

COMPLETE OUTFIT WITH MOTOR.
84 C 5152 YB—Ship. wt. 34 lbs. $20.50

GRINDER LESS MOTOR, PULLEY, BELT.
84 C 5151 M—Ship. wt. 22 lbs. . $7.00

GRINDER HEAD WITH GUARDS. Less Wheels, Motor Pulley Belt.
84 C 5150 M—Ship. wt. 9 lbs. . . $4.95

(35) 6-IN. BENCH GRINDERS. For heavy duty garage and production work. With two 6x1¼-in. grinding wheels (one 60 grit, one 36 grit). Shaft ¾x11¼ in., turned for ⅝-in. arbor wheels. Base 4¾x6¾ in. 2-in. diam. pulley takes round or "V" belt.

COMPLETE OUTFIT WITH MOTOR.
84C5155YB–Ship. wt. 43 lbs. $25.95

GRINDER LESS MOTOR, PULLEY, BELT.
84C5154MB–Ship. wt. 22 lbs. $12.75

GRINDER HEAD WITH GUARDS. Less Wheels, Motor, Pulley, Belt.
84 C 5153 M–Ship. wt. 14 lbs. $9.75

(36) 8-IN. BENCH GRINDERS. For heavy duty work in garages, production shops. With two 8x1¼-in. wheels (one 60 grit, one 36 grit). Shaft 1x16¾ in., turned for ¾-in. arbor wheels. Base 6x9½ in. Combination "V" or flat belt pulley 4 in. wide, 2⅝-in. diam.

COMPLETE OUTFIT WITH MOTOR.
84 C 5158 YO–Ship. wt. 65 lbs. $35.50

GRINDER LESS MOTOR, PULLEY, BELT.
84 C 5157 MO–Ship. wt. 44 lbs. $22.50

GRINDER HEAD WITH GUARDS. Less Wheels, Motor, Pulley, Belt.
84 C 5156 MB–Ship. wt. 32 lbs. $17.95

GENERAL PURPOSE GRINDING WHEELS 55c TO 9.25

37 GRINDING WHEELS. Precision made, uniformly hard, perfectly balanced. Dress finished on both sides and face. Highest quality, long wearing aluminum oxide abrasive—cuts cool, fast and free. Vitrified in scientifically controlled kilns. Use EXTRA FINE GRIT for sharpening cutlery—scissors, knives, etc.; FINE for sharpening keen edged tools—axes, knives, etc., finish grinding and polishing; MEDIUM FINE for sharpening wood-cutting tools, preparing surfaces for finishing; MEDIUM COARSE for general machine shop, fast removal of stock; COARSE for grinding rough iron castings, heavy removal of stock. Wheel sizes 4, 5, 6 and 7 in. have 1-in. center hole; sizes 8, 10, 12 and 14-in. wheels have 1½-in. center hole. Shipped promptly from Stock with required bushing. Wheels 8-in. diameter or larger will be leaded to meet exact shaft size, if specified. Leaded wheels *Mailed* Promptly from Chicago Factory, others from Stock with required bushings. See safety information and table of recommended operating speeds at right. *State wheel diameter, thickness and shaft size.*

48 MACHINISTS' GOGGLES. Protect eyes—for hazardous jobs. 50 mm. hardened lenses. Adjustable headband. Fitted shields. Meet Fed. Specifications.
84 C 2780—Ship. wt. 6 oz. . $2.19

49 ⅓-CARAT DIAMOND TIPPED WHEEL DRESSER. Gives longer service than regular steel type. Insulated plastic handle. ⅜-in. steel shank.
84 C 5237—Ship. wt. 8 oz. . $4.75

50 HEX WHEEL DRESSER. Trues, shapes, removes glaze. 2 sets of high carbon steel cutters, 6 position steel bearings.
84 C 5229—Ship. wt. 2 lbs. $1.25

EXTRA CUTTER FOR (50).
84 C 5231—Wt. 12 oz. . . 4 sets 39c

Oxy-Acetylene Welding Outfits...New Air-Gas Gun

WARDS MASTER (BEST) QUALITY GAS WELDING OUTFITS 79.95 AND 99.50

Designed for heavy-duty use. Torch, cutting attachment and regulators approved by UL and Wards Testing Laboratories, after severest tests. Every part individually tested for your protection. Precision ground, hand-fitted joints prevent leakage. All parts in contact with gas are non-ferrous metals to prevent rust and corrosion.

Welding outfit will weld metal up to 2 in. thick; welding and cutting outfit will also cut steel up to 10 in. thick. New LP gas (liquid petroleum—propane and butane) cutting tips are now available, see (7) at right. Wards exclusive patented features give extra safety protection.

WELDING TORCH. Balanced equal pressure type. Non-flash mixer handles all size tips—no extra mixing chamber needed for larger sizes. Mixing chamber outside of torch handle for maximum safety. Precision fit needle valves for fine adjustments. Torch can be turned off without disturbing setting at regulators. Torch is strongly made of drawn brass, is 14 to 19 in. long with tips; ribbed handle prevents slipping.

WELDING TIPS. Nozzle-type tips have 4 times flame range of ordinary fixed tips. Swivel type—allow right or left-hand operation; won't backfire. Sizes T-1, T-3, T-5, T-7, T-9; lengths 3½, 4, 5½, 7, 8½ in. Solid drawn copper.

CUTTING ATTACHMENT. Cuts steel up to 6 in. thick. Easy lever control of oxygen flow for faster cutting. Solid drawn brass, 10½ in. long. Solid drawn copper cutting tips—far superior to usual two-piece tips. (Cutting attachment in outfit 84 C 5815MB only.)

REGULATORS. Extra large — to give top efficiency. Full 6-sq. in. diaphragm — 2½-in. gauges. Full size "Three-Inch" regulator, same as used in industry. Patented "On-Off" feature, found only in Wards regulators, indicates proper on-off position of adjusting screw. Insures longer life for your welder—safer operation.

Regulators operate under gas pressure—do not depend on springs for shut-off. Special shearing mechanism prevents dangerous build-up of pressure on low pressure side. Double cone inlet screen keeps out foreign material. Gauges are clearly marked, easy-to-read. Forged brass 2¾-in. diam.

OXYGEN regulator has 100 and 3000-lb. gauges showing pressure and cubic-foot content of tank. Acetylene regulator has 50 to 500-lb. gauges. With adapter to fit standard acetylene cylinders. Arrange for cylinders locally. *Mailed* promptly from Stock.

(1) WELDING AND CUTTING OUTFIT. Includes all items described above: welding torch, 3 welding tips, sizes T-3, T-5 and T-7, weld up to 2-in. metal; cutting attachment; 2 acetylene cutting tips, sizes C-1 and C-3, cut metal up to 6 in.; oxygen regulator; acetylene regulator with adapter; goggles; torch lighter; wrench; 2 instruction books; two 25-ft. lengths of quality welding hose. *Mailable*. Ship. wt. 25 lbs.
84 C 5815 MB—$10 Down.....Cash $99.50

OXYGEN AND ACETYLENE HOSE. 12½-ft. length, ¼-in. inside diameter. Swivel fittings.
84 C 5818—Green Oxygen. Wt. 2 lbs. 8 oz..$3.98
84 C 5819—Red Acetylene. Wt. 2 lbs. 8 oz. 3.98

WELDING OUTFIT ONLY. Same quality as (1) at left but includes welding torch; 5 welding tips, sizes T-1, T-3, T-5, T-7, T-9; oxygen regulator; acetylene regulator with adapter; goggles; torch lighter; wrench; 10 coppered steel rods; 8 cast-iron rods; 3 Tobin bronze brazing rods; two instruction books; ¾ lb. cast-iron flux; ¾ lb. brazing flux; two 12½-ft. lengths of welding hose. (Order Cutting attachment (6), above right, to convert into cutting outfit.) *Mailable*.
84 C 5810 MB—Ship. wt. 27 lbs. $8 Down..Cash $79.95

OXYGEN AND ACETYLENE REGULATORS ONLY. Same as in outfits described above. Wt. ea. 6½ lbs.
84 C 5813—Oxygen Regulator only.....$22.95
84 C 5814—Acetylene Regulator only..... 21.95

OXY-ACETYLENE WELDING ACCESSORIES AND RODS 55c TO 14.95

(2) WELDING GOGGLES. No. 5 green and clear lenses.
84 C 5835—Adjustable. Ship. wt. 8 oz.....$1.98

(3) WELDING TORCH. Described in (1). UL approved.
84 C 5812—Tips not incl. Wt. 2 lbs. 14 oz....$14.95

(4) WELDING NOZZLE TIPS. For (3) only. Copper. Swivel type. T-1 is 3½ in. long; T-3, 4 in.; T-5, 5½ in.; T-7, 7 in.; T-9, 8½ in. Wt. each 10 oz.
84 C 5811—*State size wanted*.....Each $1.75

(5) TORCH LIGHTER. 2 extra flints included.
84 C 5809—Shipping weight 3 oz.....55c

(6) CUTTING ATTACHMENT. Same as in (1) at left.
84 C 5820—Without tips. Wt. 2½ lbs.....$14.95

(7) CUTTING TIPS. Copper. Fit Ward torch (6) and outfit (1) only. No. 1 cuts to 1 in.; No. 2 to 2½ in., No. 3 to 6 in.; No. 4 (for acetylene only) to 10 in. *State No.*
84 C 5816—For Acetylene. Wt. ea. 8 oz.....Ea. $3.45
84 C 5821—For Propane. Wt. ea. 8 oz.....Ea. 3.45

(8) CAST-IRON FLUX. 1-lb. can. Shipping wt. 1¼ lbs.
84 C 5836—Welding. 55c; 84 C 5837—Brazing. 55c

(9) CAST-IRON RODS. For machinable welds. 24 in. long.

NEW TORCH-O-MATIC TRIGGER-ACTION GAS GUN OUTFIT 36.95

(13) New, fully automatic time- and gas-saving air-acetylene gun outfit, designed for fast, easy, safer soldering, brazing, preheating, etc. Generates heat up to 3000° F. Takes type MC acetylene cylinder (obtain locally) or will operate from standard size tank—you regulate pressure to job requirements. One-hand operation—just pull trigger and gun ignites itself—release of trigger shuts off gas instantly . . . no delay or gas waste. Balanced, lightweight pistol-grip gun makes it easy to aim the flame just like a target pistol.

COMPLETE KIT. Includes gun, medium combustion tube, nozzle; regulator; 300-lb. and 30-lb. gauges, 8-ft. hose, flints.
84 C 5840—Wt. 5 lbs. $4 Down..Cash $36.95

GUN UNIT ONLY. Medium combustion tube.
84 C 5841—Nozzle included. Wt. 1 lb...$19.95

COMBUSTION TUBES AND NOZZLES. Small and large size for full range of jobs. *State size.*
84 C 5842—Ship. wt. 4 oz.....Each $3.25

(14) HALIDE LEAK DETECTOR. Locates gas leaks in refrigeration work. Wt. 8 oz.
84 C 5843—Use with small size tip.....$3.45

WORK BENCH STAND 10.95

(15) STEEL WORK BENCH FRAME. Rigid construction. Adjustable in height from 26 to 35 in. Length adjusts 25⅞ to 44⅞ in. to provide large working area. Full 26-in. width across top. Legs adjust for leveling on uneven floor. Legs have bolt holes for attaching to floor. You add your own wood top (not included)—build it yourself and save. Shipped from Stock. *Mail.*
84C2951MO—Ship. wt. 34 lbs. $10.95

SAW HORSES AND BRACKETS

(16) ALL-STEEL SAW HORSE. Completely assembled, ready to use. Safe working load 450 lbs. Folds compactly for easy handling and storage. About 42 in. long, 23 in. high when unfolded. Ship. wt. each 12 lbs.
84 C 2974 M—Each $4.50.....2 for $8.50

(17) SAW HORSE BRACKETS. Stamped steel. Use standard 2x4-in. lumber (not included). Cut lumber, insert. Easy to use. Two pairs make a pair of saw horses. Ship. wt. pair 3 lbs.
84 C 2970—Pair $1.59.....2 Pair for $2.98

STURDY HOME WORKSHOP UTILITY WORK BENCH 18.95

(18) Rugged, all-purpose work bench ...designed for home workshops. Constructed to give long, dependable service—use in basement, utility room, garage, etc. Big 22x60-in. top provides ample working space for most every home job. Top is 1⅝ in. thick. Comfortable working height—33¼ in. from floor to top. Strong 2x4 legs firmly braced for added rigidity. Sturdy sections cut from kiln-dried Douglas Fir, machined smooth. Bench can be quickly assembled, easy-to-follow instructions included. With nuts, bolts and washers. Shipped promptly from Stock by Freight or Truck.
84 C 2956 R—Ship. wt. 72 lbs...$18.95

WOODWORKING VISES ON PAGE 880.

Powr-Kraft and Westinghouse Arc Welders...10% Down

FACTS ABOUT ARC WELDERS SOLD BY WARDS . . . COMPARE ANYWHERE FOR PROOF OF THEIR VALUE

Save time and maintenance costs by doing your own welding. Electric arc welders provide the fastest means of welding. Powr-Kraft Electric Welders are guaranteed against defects in workmanship and materials for one year from date of purchase and will be repaired or replaced at no charge during this period. Wards welders have Class "B" insulation which prevents temperature rise from exceeding 50° Centrigrade on Time Rating Tests—contain no flammable material. Transformers are oversize induction type with built-in reactance. REA approval on electric welders means that they are satisfactory for use on rural electric lines. Duty cycle of welders is the ratio of arcing time to total time welder is in use (20% duty cycle means actual welding time amounts to 12 minutes per hour).

NEW AC-DC WELDER 319.00

29 WESTINGHOUSE AC-DC WELDER. Single phase, 230-volt. 60-cycle Selenium rectifier arc welder. Flip of switch provides type of current needed to do most efficient job. One unit gives you all advantages of both AC and DC welding. Ideal for all types of fabrication welding using up to 3/16-in. rods. Many repair jobs require the use of special electrodes which are deposited better with DC. Overhead and vertical welding is easier with DC. For hard surfacing and build-up jobs, cast-iron welding and light gauge work, AC is more efficient.

A.C. welding current at 30 load volts: rated current 20% duty cycle, 200 amperes, welding current range 25 to 250 amperes, primary amp. rating 47. DC welding current at 25 load volts: rated current 20% duty cycle, 180 amps., welding current range 20 to 200, primary amp. rating 47. Includes Camlok receptacles and connectors, 8-ft. primary cable with 3-prong plug and receptacle. Fan cooled. Size: 36 in. high, 19⅝ in. wide, 12 in. deep. Actual wt. 200 lbs. $32 Dn.

84 C 5932 R—Wt. 205 lbs.Cash $ 319.00

ACCESSORY PACKAGE FOR (29). Consists: 25-ft. welding cable electrode lead, 20-ft. ground lead and clamp, helmet, lenses, brush, rod holder.

84 C 5931M—Ship. wt. 18 lbs... $20.00

WESTINGHOUSE WELDERS LOW AS 189.00

230-VOLT SINGLE-PHASE 60-CYCLE AC. 20% duty cycle. Built-in primary circuit breaker prevents overloads. Units include: steel case 24½x19⅝x12 in., welding helmet, manual and accessories listed below. Check power supply with electric company before ordering.

30 180-AMP. MODEL. Excellent for farm repairing, garage work, light construction, etc. Welds 20-ga. sheet metal to heavy plate; cuts up to 5/16 in. plate. Uses electrodes up to 3/16 in. Continuous output adjustment—no plugs, taps or switches to change for complete range from 20 to 180 amps. Maximum line draw 37 amps. with built in power factor correction capacitors. Power factor at rated load: 80%; arc volts 25; Maximum power used 6.8 kilowatts. Includes: 6-ft., No. 8, 3-conductor primary cable, plug and receptacle; 12-ft. No. 4 electrode and ground cables with electrode holder and ground clamp.

84 C 5933 R—Ship. wt. 135 lbs..$19 Down, Cash $189.00

295 AMP. MODEL. Similar to (30) but designed for heavier work. Cuts up to ½-in. plate. Uses electrodes up to ¼ in. Has continuous current adjustment with 2 generously overlapping ranges: 20 to 130 amps.; 30 to 295 amps. Simple flip of switch determines range; easy turn of handle selects amperage. Has built-in power factor correction capacitors. Power factor at rated load 80%; reduces installation costs. Maximum line draw 50 amps.; arc volts 25; max. power used 9.0 kilowatts. Includes: 20-ft. electrode cable with holder, 16-ft. ground cable with clamp—both No. 2 wire. 6-ft. primary with plug, receptacle.

84 C 5934 R—Ship. wt. 175 lbs. $25.50 Down, Cash $ 251.50

295 AMP. MODEL. Without power factor correction capacitors. Power factor: 75%. From Fact. in Buffalo, N.Y.

84 C 5935 F—Ship. wt. 175 lbs. $22.50 Down, Cash $ 221.50

POWR-KRAFT ARC WELDER 159.00

31 180-AMP., 230-VOLT MODEL. UL Approved. For repair shop, garage, farm, all types of home maintenance jobs. Makes welds equal in strength and soundness to those of large industrial models. Repair your own car fenders and bumpers. Make your own tools and special machinery from angles, channel, plate and pipe. Repair all farm equipment. Easy and quick to use. Welds steel and castings from 1/32 in. thick to heavy plate. Cuts up to 5/16-in. plate. Use 1/16 to 3/16-in. electrodes. Order rods at bottom of page. 24 heats give varied selection throughout range from 20 to 180 amps. 20% duty cycle. Can be used with twin carbon arc torch (43) at bottom of this page, for preheating brazing and soldering.

Use on 220-240-volt, single-phase, 50 to 60-cycle AC. Maximum line draw 33 amps. Operator safety insured by low 58-amp. secondary voltage. Arc volts 30. Added feature is special switch to improve performance on low line voltage. Conforms to REA, NEMA specifications for limited-input welders.

22¼x16¾x11-in. size case. Easily moved on two rear wheels. Welded steel frame. Includes: 8-ft. 3-conductor primary cable, receptacle; 20-ft. No. 4 electrode cable, insulated holder; 15-ft. No. 4 ground cable, clamp; helmet with No. 10 protective lens, cover lens; simplified instruction booklet. Check power supply with local electric company before ordering. Shipped promptly from Stock by freight. Ship. wt. 194 lbs.

84 C 5938 R—$16.00 Down...or Cash $159.00

EASY-TO-USE "SELFWELD" WELDER 100.00

32 POWR-KRAFT 115 OR 230-VOLT ARC WELDER. An entirely new 100 amp. machine designed for the person who has no previous welding experience. Make your own repairs, build wagons, trailers, etc. Use for both "Selfweld" process with "Selfweld" rods below and conventional welding with standard rods—requires no adjustments at any time. Makes welding almost as simple as turning on a light switch. Order Selfwelding Manual (33), below, for "do it yourself" projects. With special "Selfweld" electrodes, rods strike their own arc—will not stick to workpiece when making arc. Simply place rod on workpiece, press starting switch on electrode holder—arc forms automatically. Adjustable leg on holder keeps electrode at correct angle while it deposits a uniform weld.

WELDS ANYTHING FROM 20-GA. SHEET METAL TO HEAVY PLATE. Maximum 100 amp. output with 6 taps at about 10 amp. intervals—gives range of 50 to 100 amps. 20% duty cycle. Maximum open circuit voltage 70 volts, For 110–120 or 220–240 volt single phase 60 cycle AC. Use 40 amp. fuse for 110–120 volts or 20 amp. for 220–240 V. Use rods to 1/8-in. diam. NEMA and UL approved.

COMPACT 12x9x14-IN. STEEL BODY. Includes: 8-ft. electrode cable, holder; 8-ft. 3-wire primary cable; receptacle 7-ft. ground cable, clamp; hand shield; 3 lbs. "Selfweld" rods: 1/16, 5/64, 3/32 in.; instructions. $10 Dn.

84 C 5940 R—*Not Mail.* Ship. wt. 84 lbs...Cash $100.00

33 SELF-WELDING MANUAL. Describes "Self-welding" process in detail—handy tips on setting up welding workshop, maintaining equipment. Includes 80 illustrated plans for making home projects in metal.

84 CP 5983—Over 125 pages. *Postpaid*.....$1.00

HELMETS, CABLES AND OTHER ACCESSORIES FOR ARC WELDING 10c TO 12.95

34 WELDING HELMET. Insulated black fiber. Riveted seams. No. 10 lens.

84 C 5965 L—Wt. 2 lbs. 2 oz.....$3.95

35 PROFESSIONAL WELDING HELMET. Strong insulated black fiber gives long, dependable service. Seamless construction prevents light-leak. Order cover, protective lens below.

84 C 5966 L—Wt. 2 lbs. 12 oz....$7.75

PROTECTIVE LENS. 2x4¼ in. For (34) and (35). Ship. wt. 1 oz. ea.

No. 9—For Electrodes to 3/32 in.
No. 10—For Electrodes to 1/8 in.
No. 11—For Electrodes to 5/32 in.

84 C 5961—*State size*.....Each 95c

COVER LENS. Treated so that spatter will not stick. 2x4¼ in.

84 C 5962—Ship. wt. 1 oz...Each 10c

36 ARC WELDING LESSONS. Published by J. F. Lincoln Arc Welding Foundation. Operational information, lessons and Farm Equipment projects. Step by step analysis. 343 pages.

84 CP 5981—*Postpaid*.....$1.00

37 FARM ARC WELDING HANDBOOK. Detailed plans, instructions, illustrations on building and repairing farm tools. 456 pages.

84 CP 5982—*Postpaid*.....$2.00

38 WELDING CABLE. Tough, extra flexible. Use as electrode cable or ground cable extension. Constructed to give maximum service under severe conditions of flexing, twisting, abrasion, impact and heat. Highly resistant to moisture, oils, acids etc. Consists of many strands of 34 AWG (American Wire Gauge) annealed copper wire. Heavy rubber jacket. Order cable lugs (39), below.

84 C 5963 H—*State wire size and length wanted.*

Wire Size	Strands 34 AWG	Rated Capacity (up to 125 ft.)	Wt. per ft.	Per foot
1	2109	250 amps.	4 oz.	39c
2	1672	200 amps.	3 oz.	32c
3	1330	150 amps.	2 oz.	26c
4	1064	100 amps.	1 oz.	21c

WELDING POWER SUPPLY CABLE. No. 8 ga. 3-conductor cable color coded. For welders up to 300 amps. Maximum 40 amps. Extra-flexible tinned copper. Can be used for ranges, water heaters.

84 C 5975 H—Ship. wt. 8 oz.....Per foot 45c

39 WELDING CABLE LUGS. Fit ground or electrode cables (38) above. Wt. 1 oz. *State No. wanted.*

84 C 5964—For No. 1 cable.....Each 33c
For Nos. 2, 3, 4 cable.....Each 17c

40 WELDERS' GLOVES. Split horsehide. Welted seams. Chrome tanned. 1-pc. back and palm.

84 C 5960—Large size. Ship. wt. 1 lb....Pair $3.19

41 GROUND CLAMP. Direct contact—current does not pass through clamp. 300-ampere capacity.

84 C 5973—Jaw spread 2¾ in. Ship. wt. 1 lb...$1.95

42 WELDING "C" CLAMP. Copper plated adjustment screw—spatter won't stick. Wts. 1, 2½, 4 lbs. *State size.*

84 C 5977—2-in. opening....Ea. $1.45
84 C 5977—4-in. opening....Ea. 2.19
84 C 5977—6-in. opening....Ea. 2.95

43 ERGOLYTE TWIN CARBON ARC TORCH. For AC welding only. Automatic switch-off. Creates flame like Oxy-Acetylene torch for preheating, brazing, etc. 15¾ in. long. With two 5-ft. cables. Torch takes up to 3/8-in. cored carbons. With 4 assorted carbons, instructions.

84 C 5914—Ship. wt. 3 lbs. 8 oz....$12.95

44 ELECTRODE HOLDER. Holds up to ¼-in. rods. Handles all jobs up to 300 amps. Fiber insulated handle.

84 C 5916—Ship. wt. 1 lb. 2 oz....$2.45

45 CHIPPING HAMMER. Tough hand-forged steel. 9½ in. long overall.

84 C 5976—Ship. wt. 1 lb.....$1.95

46 WELDERS' BRUSH. Steel bristles.

84 C 5969—Ship. wt. 12 oz.....35c

47 COPPER-COATED CARBONS. Use with Twin Carbon Arc Torches.

84 C 5911—Ship. wt. ten, 1 lb. *State size.*

5/32-in. diam. 6 in. long.....10 for $1.98
¼-in. diam. 6 in. long.....10 for 95c
5/16-in. diam. 6 in. long.....10 for $1.19
3/8-in. diam. 6 in. long.....10 for 1.45

LINCOLN ELECTRODES FOR EVERY JOB

48 LINCOLN "SELFWELD" ELECTRODES. For "Self-welder" (32). Powdered iron with "matchhead tip." 8 in. long.

84 C 5994—Ship. wt. pkg. 5 lbs. 8 oz. *State diam.*

5/64 in. about 200 rods $3.95; 3/32 in. about 150 rods....$3.19

49 LINCOLN "FLEETWELD" NO. 47 MILD STEEL RODS. For vertical and overhead. *State Catalog No., Size, quantity.*

Choose from Wards Powr-Kraft, Sunbeam, Black & Decker

WARDS LIGHT-DUTY DRILL KIT 21.95

1 30-PIECE ¼-IN. POWR-KRAFT DRILL OUTFIT. Low-priced kit for hobbyists and handy men. Designed to drill, sand, polish, buff, grind, etc. Metal box stands upright or mounts on wall; keeps all accessories at your fingertips.

STREAMLINED ¼-INCH ELECTRIC DRILL. For light, intermittent duty. Guaranteed for one year.* Drill has self-oiling bronze bearings. ¼-in. capacity in steel, ½-in. capacity in hardwood. Drill housing die-cast aluminum with satin-finish. 8¼ in. long. Steel alloy gears. New key-lock ¼-in. chuck affords more secure grip—tightens or releases bit with the ease of a geared chuck. 110-120-volt, 60-cycle AC-DC. UL Approved. No-load speed 1600 RPM. Fan type ventilation. With rubber cord and plug.

FOR DRILLING, POLISHING AND SANDING. Includes: 7 carbon steel bits—1/16, 3/32, 1/8, 5/32, 3/16, 7/32 and ¼ in.; horizontal drill stand for use as bench tool; 3⅞-in. diam. rubber backing pad; 4½-in. sheeps-wool polishing bonnet; 3-in. cloth buffing wheel; twelve 4-in. assorted grit sanding discs (order extra discs separately—below (52) on opposite page); drill arbor assembly.

ADDITIONAL ACCESSORIES INCLUDE: 2¾-in. diameter abrasive wheel for grinding; 3-in. diameter wire scratch brush for removing paint; auxiliary plastic side handle; paint mixer. *Mailable.*

84 C 9265—Complete Kit. Wt. 8 lbs. $2.50 Down, Cash $21.95

2 ¼-IN. DRILL ONLY. Same as in kit (1). Guaranteed*. Sells nationally under manufacturer's own name for $19.88.

84 C 9264—Shipping weight 4 lbs. *Mailable* . . . . . Only $15.95

3 ¼-IN. DRILL. Similar to drill in kit (1) except has genuine Jacobs geared ¼-in. chuck, satin finish. Guaranteed.* Sells nationally under manufacturer's own name for $22.88.

84 C 9266—Shipping weight 4 lbs. *Mailable* . . . . . Only $18.50

*GUARANTEE AND REPAIR SERVICE

GUARANTEE ON POWR-KRAFT DRILLS: If any Wards Powr-Kraft electric drill listed on these two pages shows defects in materials or workmanship under normal use, we will repair it at no charge if it is returned within one year of the purchase date. REPAIR PARTS AND SERVICE available on all Wards electric drill and drill kits. Write to Wards Repair Service Department, nearest Mail Order House, for further information, giving Model Number.

WARDS MEDIUM-DUTY DRILL KITS 33.50

4 34-PIECE ¼-IN. POWR-KRAFT DRILL OUTFIT. For medium-duty use—has dozens of uses in home, shop or garage. Convenient metal box keeps all accessories in place—you can select the item you want quickly and easily. Box stands upright on table or bench and has knockouts for mounting on wall.

¼-IN. MEDIUM-DUTY DRILL. Guaranteed for one year.* Ball and bronze bearing construction. Capacity ¼ in. in steel, ¾ in. in hardwood. Lightweight but strong aluminum alloy die-cast housing; satin finish. Length 8¼ in. Ball bearings at points of greatest strain. Self-lubricating bronze bearings on spindle give smooth, quiet operation. Heat-treated alloy steel gears give long dependable service. Has genuine Jacobs 3-jaw geared ¼-in. chuck with key. Motor runs on 110-120-volt AC-DC. UL Approved. No-load speed 1500 RPM. Trigger lock; automatic release switch. Forced air ventilation. Cord, unbreakable plug.

FOR POLISHING, SANDING, WIRE BRUSHING. Includes 4¾-in. rubber backing pad; 5½-in. lambswool bonnet, twelve 5-in. sanding discs (order extra discs below (52) opposite page); adapter set; drum sander; 6 sanding sleeves; wire scratch brush.

ADDITIONAL ACCESSORIES INCLUDE: four high speed drill bits—1/16, ⅛, 3/16, and ¼ in.; 3 wood cutting power auger bits—⅜, ½ and ¾ in.; horizontal drill stand, auxiliary side handle. *Mailable.* Available with Palm-Grip or Spade-Grip Drill. Wt. 8 lbs. 8 oz.

84 C 9248 L—Kit with Palm-Grip Drill (shown). $3.50 Dn., Cash $33.50

84 C 9259 L—Kit with Spade-Grip Drill (5). $3.50 Dn., Cash 33.50

84 C 9258 L—Kit without Drill. Ship. wt. 4 lbs. 8 oz. 11.95

5 6 MEDIUM DUTY ¼ AND ⅜-INCH DRILLS. Guaranteed 1 year.* Ball bearings at points of greatest strain. Self lubricating bronze bearings on spindle for smooth, quiet operation. Heat treated alloy steel gears. Tough, lightweight aluminum alloy housing. All have genuine Jacobs 3-jaw geared chuck. ¼-in. drills sell under manufacturer's name for $26.50; no load speed 1500 RPM—see full description in (4) above. ⅜-in. drill has no load speed of 1000 RPM. *Mailable.* Ship. wt. ea., 4 lbs.

(5) 84 C 9234—¼ in. Spade-Grip. 10¾ in. long. $2.50 Dn. Cash $21.95

(6) 84 C 9233—¼ in. Palm-Grip. 8¼ in. long. $2.50 Dn. Cash 21.95

(6) 84 C 9257—⅜ in. Palm-Grip. 8¼ in. long. $3 Dn. Cash 27.95

WARDS HEAVY-DUTY DRILL KITS 46.50

7 34-PIECE ¼-IN. POWR-KRAFT DRILL OUTFIT. For heavy duty continuous production work. Use for drilling, sawing, buffing, grinding, etc. Box and accessories same as in Kit (4).

¼-IN. HEAVY-DUTY DRILLS have full ball bearing construction. Guaranteed for one year.* Built for continuous production workshop use. Meet Government Specifications WD-661, No. 40T3 and Mil-885. Run smoothly with minimum heating. Grease-sealed ball and needle bearings at all points of strain. Lightweight, strong die-cast aluminum housing with mirror finish. Heat-treated steel alloy gears give smooth, dependable operation. Capacity ⅜ in. in steel, 1 in. in wood. Genuine Jacobs 3-jaw geared chuck with key. 110-120-volt AC-DC. No-load speed 1800 RPM. UL Approved. With 10-ft. 3-wire cord, plug.

FOR DRILLING, POLISHING, SANDING, ETC. Includes 4¾-in. rubber backing pad, 5½-in. lambswool bonnet, twelve 5-in. sanding discs (order extra discs on opposite page—below (52).); adapter set; drum sander, 6 sanding sleeves; wire scratch brush.

ADDITIONAL ACCESSORIES INCLUDE: 4 high speed drill bits—1/16, 3/16, ⅛ and ¼ in.; 3 wood cutting power auger bits—⅜, ½ and ¾ in.; horizontal drill stand, auxiliary side handle. Available with Palm-Grip or Spade-Grip Drill. Ship. wt. ea. Kit: 8 lbs. 8 oz.

84 C 9260 L—Kit with Palm-Grip Drill. . . . . $5 Down; Cash $46.50

84 C 9261 L—Kit with Spade-Grip Drill (8). $5 Down, Cash 46.50

8 9 HEAVY-DUTY ¼-IN. DRILLS. 1-year guarantee.* Sells under maker's name for $39.50. Ball bearings throughout. Genuine Jacobs geared chuck. Full description in (7), above.

(8) SPADE-GRIP DRILL. 10¾ in. long. *Mailable.*

84 C 9236—Ship. wt. 4 lbs. $3.50 Down. . . . . Cash $34.50

(9) PALM-GRIP DRILL. 8¼ in. long. *Mailable.*

84 C 9235—Ship. wt. 4 lbs. $3.50 Down. . . . . Cash $34.50

HEAVY-DUTY RUBBER-COVERED EXTENSION CORDS. For drills on these two pages. UL Approved. With plug, single outlet. 3-wire cords meet new Electrical Code requirements for grounding portable tools. Use 14-ga. wire for ½-in. drills or larger.

83 C 1271 L—2-wire, 16-ga. cord. 25 ft. long. Wt. 2 lbs. . . . . $1.[illegible]

83 C 1279 L—3-wire, 16-ga. cord. 15 ft. long. Wt. 1 lb. 8 oz. . . [illegible]

83 C 1270 L—3-wire, 14-ga. cord. 25 ft. long. Wt. 5 lbs. . . . . [illegible]

HIGH SPEED DRILLS: Use in electric drills, drill presses. Hardened, tempered high-speed steel, precision ground for longer life. Gives long life in use on steel or wood. CARBON STEEL DRILLS: For use in hand or low speed bench drills. Use for wood or soft metals.

10 21-PC. HIGH-SPEED DRILL SET. All sizes from 1/16 to ⅜ in. by 64ths.

84 C 4513—Metal case. Wt. 2 lbs. Set $12.95

11 15-PC. HIGH-SPEED DRILL SET. Sizes 1/16 to ½ in. by 32nds. In metal case.

84 C 4512—Ship. wt. 2 lbs. 6 oz. Set $14.95

DRILL CASE ONLY. Shown in set (11).

84 C 4539—Ship. wt. 1 lb. 2 oz. $2.19

12 29-PC. DRILL SETS. Sizes 1/16 to ½ in. by 64ths. Wt. 4 lbs. 8 oz. In metal stand.

84 C 4533—High Speed Steel. . . . Set $23.95

84 C 4534—Carbon Steel : . . . . . Set 11.95

DRILL STAND ONLY as in (12). Stamped metal. Wt. 14 oz.

84 C 4546 . . . 60c

13 60-PC. WIRE GAUGE DRILL SETS. Sizes 1 to 60. Steel case 5x4¾x1 in.

84C4536—High Speed. Wt. 7½ lbs. Set $18.95

84C4537—Carbon Steel. Wt. 7½ lbs. Set 11.95

14 13-PC. HIGH-SPEED DRILL SET. Sizes 1/16 to ¼ in. by 64ths. Plastic index case.

84 C 4511—Ship. wt. 11 oz. . . . . Set $4.95

15 7-PC. STRAIGHT SHANK DRILL SETS. 1/16 to ¼ in. by 32nds. Plastic box.

84 C 4503—High Speed. Wt. 8 oz. . . . $2.79

84 C 4502—Carbon Steel. Wt. 8 oz. . . . 1.39

16 10-PC. STRAIGHT SHANK DRILL SETS. Most used sizes from 1/16 to ¼ in.

84 C 4549—High-Speed. Wt. 2 lbs. Set $3.59

84 C 4548—Carbon Steel. Wt. 2 lbs. Set 2.19

17 8-PC. BLACKSMITH DRILL SET. Wards Master (Best) Quality drills for low speed use in bench and post drills. Finest tool steel, hardened and tempered for added strength and durability. Precision ground drills for clean, easy, accurate cutting. ½-inch shank with one flat side. 4⅝ to 6 in. long. Handy roll pouch. Eight sizes: ⅛, 3/16, ¼, 5/16, ⅜, ½, ⅝, ¾ inch.

84 C 9325—For ¼, ⅜-in. drills. Wt. 1 lb. $2.49

27 SCREWDRIVER-SPEED REDUCER. Grip to start; release to stop. 5-to speed reduction with higher torque for drilling masonry, driving screws. Use with, in place of chuck. Postpd.

84 CP 9316—Fits No. 8, 10 screws $3.

28 JIG SAW ATTACHMENT. Saws lumber up to 2x4's. Cuts patterns, circles in plywood, wallboard, metal. Converts to bench saw. Sawdust blower. 6 ass'td. blades. Ship. wt. 3 lbs.

84 C 9317—Fits ¼-in. chucks . . . $9.

EXTRA BLADES. Pkg. of 6. Wt. 8 oz.

84 C 9309—For wood, wallboard $1.

84 C 9318—For metals, plastics . . 1.

29 PLANER ATTACHMENT. For wood, plastics—with or across grain. Diagonal shearing. Planes any angle. Adj. cut. 6-flute spiral cutter. Oil bearings. Cuts 1½ in. wide. Wt. 3 lbs.

84 C 9319—Fits ¼-in. chuck . . . $11.

30 SPIN-A-BRUSH. Cleans paint brushes quickly, easily. Wt. 2 lbs.

84 C 9254—Fits ¼-in. drills . . . . $2.

Wards, Other Nationally-Known Electric Saws

HIGHLY VERSATILE—PORTABLE ELECTRIC SAWS can handle almost all sawing operations the home builder might require. Ideal for on-the-spot sawing of hard-to-carry material.

TEN TIMES FASTER THAN HANDSAW OPERATION—and more accurate. Will do much to cut the time and costs in construction and remodeling.

EXCELLENT FOR CUTTING SHEATHING, FRAMING AND LARGE SHEETS OF plywood, etc. May be used also for cutting concrete, tile and metals with special blades.

SIMPLE TO USE; NO SPECIAL SKILL REQUIRED to operate these handy portable saws—can be used in much the same way you would use a carpenter's hand saw.

WARDS POWR-KRAFT, MALL, BLACK AND DECKER AND SUNBEAM CIRCULAR SAWS below all have die-cast aluminum housings; gears sealed in grease; telescoping blade guards.

SAWS ON THIS PAGE ARE UL APPROVED, (Industrial Standards); 110–120 volts AC-DC. All circular saws but (31) have depth of cut and bevel adjustments for making cuts up to 45°.

NATIONALLY KNOWN MALL SAWS 54.95 TO 88.00

31 MALL 6-IN. HEAVY-DUTY PRODUCTION MODEL. Meets professional specifications of builders, contractors, etc. For continuous everyday use. Powerful Universal-type ¾-HP motor. Practical for cutting flooring, roofing. Operates smoothly, quietly on grease-sealed, precision ball bearings. Accurately meshed helical cut gears sealed in grease chamber. Blower cools motor, keeps line free from sawdust. Well balanced loop handle, trigger switch. Lightweight but strong. 2-inch max. cut at 90°. Bevel cuts can be made with bevel shoe attachment below. No load speed 5000 RPM.

84 CP 8950 M—*Postpaid*. Only $6 Down.....Cash $59.95

BEVEL SHOE ATTACHMENT. Attaches to (31) for angle cuts.

84 CP 8951—Max. cut at 45° is 1 11/32 in. *Postpaid*.....$7.00

32 MALL 7-IN. MODELS. Choose from two models: Ball and sleeve bearing saw for intermittent work in home workshops, etc., or Full Ball Bearing Model for all jobs except continuous production work. Both have max. depth cut of 2⅜ in. at vertical, 2 in. at 45°. Cut rough 2-in. lumber at 45°. Bevel calibrated at 15°, 30°, and 45°. Big ¾-HP motor. No load speed 5000 RPM. Helical-cut gears. Heavy-duty trigger-switch on easy-to-grip handle. 7-in. rip-crosscut blade. Order steel case separately. *Mailed Postpaid*.

BALL AND SLEEVE BEARING MODEL. Actual wt. only 8¾ lbs.

84 CP 8952 M—Only $5.50 Down on Terms.....Cash $54.95

FULL BALL BEARING MODEL. Actual wt. only 8¾ lbs.

84 CP 8962 M—Only $7 Down on Terms.....Cash $69.95

84 C 8917 M—STEEL CASE FOR SAWS ABOVE. Wt. 11 lbs.. 5.75

33 MALL 8½-IN. BALL BEARING MODEL. Medium-duty, large capacity saw. Grease-sealed precision ball bearings for long service. For all work except continuous production. More than adequate capacity for most cuts needed by builder—cuts up to 3 1/16 in. at 90°—to 1⅞ in. at 45°. Enclosed helical cut gears in grease-sealed chamber. Propeller-type cooling system with blower fan. Heavy-duty trigger switch in easy-to-grip handle. Lightweight but strong—balanced for easy control. Powerful 1-HP motor. No load speed 4500 RPM. Cut adjusts at 90° from 1 11/16 to 3 in.; maximum cut at 45° is 1⅞ in. Order steel case separately.

84 CP 8956 MB—*Postpaid*. $9 Dn.....Cash $88.00

84 C 8916 M—STEEL CARRYING CASE for (33). Wt. 15 lbs. 6.75

BLACK & DECKER SAWS 64.50 TO 96.50

34 35 HEAVY-DUTY MODELS. Designed for all around use; rugged enough for production work. Operate smoothly and quietly on full-size self-lubricating ball bearings. Tough alloy steel gears heat-treated and hardened. Blade guard designed so blade may be seen from either side; fan keeps cutting line free of sawdust. Efficient propeller-type cooling system.

Handle easily; trigger switch gives instant starting. Has lightweight yet strong die-cast aluminum housing. Automatic telescoping blade has retracting handle. With rubber-covered 3-wire cord, plug. *Mailed Postpaid*. Each with crosscut-rip blade.

(34) 6½-INCH MODEL. Cut adjusts at 90° from 0 to 2 5/32 inches. Maximum depth cut at 45° is 1⅞ inches.

84 CP 8978 M—*Postpaid*. $6.50 Down on Terms.....Cash $64.50

(35) 7⅜-INCH MODEL. Cut adjusts at 90° from ⅛ to 2 7/16 inches. Maximum depth cut at 45° is 1¾ inches.

84 CP 8977 M—*Postpaid*. $8.50 Down on Terms.....Cash $84.50

8¼-INCH MODEL. Cut adjusts at 90° from 0 to 2 13/16 inches. Maximum depth cut at 45° is 2 1/16 inches.

84 CP 8976 M—*Postpaid*. $10 Down on Terms.....Cash $96.50

BLACK & DECKER SABER SAW 54.50

36 VERSATILE SABER SAW. Does the work of a jig saw, saber saw, keyhole saw plus most band saw operations. Makes curved, straight or irregular cuts. Does ripping, coping, jig and scroll sawing, etc. Follows patterns perfectly as cutting line is always visible. Air stream from motor-cooling fan blows dust from in front of blade. Makes pocket cuts without needing drilled "entrance" hole. Cuts in places often inaccessible to circular or hand saws.

Compact, lightweight—fits in the palm of your hand. Rapid feeding speeds are possible. Powerful motor 115 volts AC-DC. Self-lubricating bronze bearings. Cuts wood, metal, plastic, rubber, leather, etc. Max. cut 1½ in. No-load speed 3750 strokes per min. With 5 blades, toggle switch, 3-wire cord, plug.

84 CP 8979—*Postpaid*. Only $5.50 Down.....Cash $54.50

*POWR-KRAFT SAW AND SANDER GUARANTEE

If any Wards Powr-Kraft Saw or Sander listed on these two pages marked with * shows defects in material or workmanship under normal use, we will repair it at no charge if returned within one year of purchase date.

POWR-KRAFT 6½-IN. SAW 39.95

37 REVOLUTIONARY NEW "SLIP-CLUTCH" MODEL. Guaranteed.* Sells Nationally for $54.95. Big 6½-in. blade gives capacity of most 7-in. saws. Cuts 2-in. rough lumber at 45° bevels. Revolutionary "slip-clutch" allows blade to stall under overload while motor continues at full speed, virtually eliminates motor burn outs. Prevents kick backs. For intermittent duty in home workshop or light carpentry. 1-HP motor has ball bearings on commutator, self-lubricating bearings elsewhere. Helical-cut gears. Cut adjusts 0 to 2¼ in. at 90°; to 1⅞ in. at 45°. Bevel adjustment calibrated at 15°, 30°, 45°. Adj. rip guide. Propeller-type blower keeps motor cool. 6½-in. comb. blade, wrench, 10-ft. 3-wire cord. AC-DC.

84 C 8937 M—Wt. 13 lbs. Only $4 Down....Cash $39.95

84 C 8919 M–STEEL CARRYING CASE for (37). Wt. 11 lbs. 5.98

SUNBEAM 6½-INCH SAW 57.50

38 6½-INCH PORTABLE MODEL. Handles any cutting job performed by 7-in. saws. Cuts up to 2⅛ in. at 90°; 1¾ in. at 45°. Easily handles dressed 2x4's. Big 1¼-HP motor gives more power than other saws this size, has greater torque for sustained cutting. Smooth running sleeve and needle bearings; precision ball bearing on armature. Heavy-duty switch on loop handle. Forced air cooling. Easily visible guide in foot insures accurate cuts. With 6½-in. combination rip-crosscut blade, wrench, 7-ft. rubber-covered 3-wire cord, plug.

84 CP 8922 M—*Postpaid*. Only $6 Down....Cash $57.50

RUBBER-COVERED EXTENSION CORDS. Use proper cord to supply power to saws operated at a distance from source of electricity. UL Appr. 3-wire cords meet new code requirements for grounding power tools.

15-FOOT, 3-WIRE. 16-gauge cord with plug, outlet.

83 C 1279 L—Ship. wt. 1 lb. 8 oz.....$3.75

25-FOOT 3-WIRE. 14-gauge cord with plug, outlet.

83 C 1270 L—Ship. wt. 5 lbs.....$8.95

25-FOOT 2-WIRE. 16-gauge cord with plug, outlet.

83 C 1271 L—Ship. wt. 2 lbs.....$2.29

For a complete selection of portable saws and sanders send for Wards Power Tool Catalog. Coupon on Pg. 822.

BLADES, CUT-OFF WHEELS FOR PORTABLE SAWS

39 CARBORUNDUM "MX" CUT-OFF WHEEL. Silicon carbide abrasive. 84CP5244 for quick cutting of non-metallics such as brick, tile, etc.; 84CP5243 for metallics such as steel, brass, copper, bronze, aluminum, and cast iron. Cloth-reinforced wheels. 3/32 in. thick. *State diam. and hole size.*

40 COMBINATION SAW BLADES. Wards Master Quality. Crosscut-rip-miter. Flat ground, heat-treated and tempered steel, hand-filed and set. *State diam.*

41 NAIL-CUTTING SAW BLADES. Wards Master Quality. For cutting lumber having occasional imbedded nails. Heat-treated steel, hand-filed and set. *State diam.*

42 43 CARBIDE-TIPPED BLADES. Wards Master Qual. Stay sharp 25 times longer than ordinary blades. Tungsten carbide tips silver brazed to blade, diamond wheel ground to close tolerances. Cut transite, Formica, Plastics. *State diam.*

44 "SAFETY" COMBINATION 8-TOOTH SAW BLADES. Wards Master Quality. Safer from kickback, need less sharpening. *State diameter.*

45 PLYWOOD BLADES. Wards Master Quality. Have 180 finely set teeth—cut plywood, flooring, wallboard without splintering. *State diameter.*

**Universal Holes fit Thor, Skilsaw, Cummings, Wappat and all Mall saws except (31) (32).

NOTE: All 6, 6¼-in. blades with ½-inch square holes fit Ward saws 84-8926 and 84-8927.

Wards, Atkins and Disston Taper-Ground Saws

TAPER-GROUND saw blades are less likely to bind. Cutting edge of taper-ground blade is same gauge (thickness) along cutting length. Rest of blade is accurately ground so it tapers evenly from butt (handle end) to point and from tooth to back of saw. This makes a faster, easier cutting saw—needs little set. Saws (1) to (6) taper ground.

ATKINS, DISSTON 6.95, 8.95

1 ATKINS NO. 65 HAND SAW. 5-gauge taper-ground highly polished Silver Steel blade (see description of Taper-Ground Blades at left)—heat treated and tempered to take and retain a keen cutting edge. Tooth edge breasted (slight outward curve) for easier cutting, less binding. Teeth are set and double-bevel filed. Blade is securely attached to hardwood handle which has weatherproof lacquer finish. *Mailed Postpaid.*

84 CP 3910 L—*State type of saw wanted.*
CROSSCUT—26-in. blade. 8 teeth per inch..... $8.95
RIP—26-in. blade. 5½ teeth per inch..... 8.95

2 DISSTON HAND SAWS. 26-in. taper-ground steel saw blades (see description of Taper-Ground blades at left) are tempered and hardened to take and retain a keen cutting edge; highly polished finish. Teeth set and double-bevel filed. Blade is securely attached to hardwood handle which has weatherproof lacquer finish. *Crosscut* saws have 8 teeth per inch; *Rip* saws have 5½ teeth per inch. *State Crosscut or Rip on order. Mailed Postpaid.*
84 CP 3900 L—Disston D-7. 4-ga. taper blade.. $6.95
84 CP 3902 L—Disston D-23. 5-ga. taper blade.. 8.95

WARDS MASTER QUALITY 3.49, 4.25

3 4 CHOICE OF PLASTIC OR HARDWOOD HANDLE. Wards very best quality. 4-gauge taper-ground from teeth to back and from butt to point (see description of Taper-Ground Blades at left). Chrome nickel alloy steel blade, scientifically heat treated, hardened and tempered to take and retain a keen edge. Tooth edge breasted (slight outward curve) for easier cutting. Teeth properly set and double-bevel filed. Straight back ship pattern, full ribbon polish finish. Handles shaped to fit hand comfortably. Saws properly balanced to lessen wrist strain.

(3) WITH PLASTIC HANDLE. Won't warp, unaffected by weather. 26-in. taper-ground blades.

Buy the Best...Buy Wardmastr Thin-Wall Socket Sets..

1 7.75 14 Pc. Set

WARDMASTR SOCKET SETS ARE FINEST QUALITY. Offer latest time- and labor-saving features, yet cost far less than other comparable professional quality sets.

FULLY GUARANTEED AGAINST BREAKAGE. Wards will replace, free, sockets or any other parts which become broken due to defects in workmanship or materials.

FINEST QUALITY ALLOY STEEL. Contains Chrome for greater hardness and rust-resistance, Molybdenum for strength and durability, Nickel to prevent cracking.

ALL PARTS ARE "HOT-FORGED" (not just the sockets). "Hot-Forging" causes grain structure of metal to follow contour of parts, increases density and strength.

DELUXE FEATURES INCLUDE: universal ball-joint on handles and extensions for positi lock; countersunk drive end on sockets for easy fitting of handles.

THINNER SOCKET WALLS. Increased strength (due to hot-forging process) permits th ner socket walls—sockets get into even the tightest places easier.

REVERSIBLE RATCHETS ARE HOT-FORGED from one piece of alloy steel for rugge more dependable service. Instantly reversible feature saves time on the job.

WIDE SELECTION OF SETS in ¼, ⅜, ½ and ¾-inch drives. All parts have hea chrome plating. Standard sizes; parts fit any brand set of same drive size.

22 89.00

MALL ELECTRIC IMPACT TOOL 89.00

22 A fast-working portable tool with Mall "torkhammer" action. Powerful rotary impacts for tightening or removing operations. Has all the power and stamina for nut-running 7/8-in. nuts and bolts with 1/2-in. shank diameters easily and quickly. Universal-type electric motor is reversible and will not stall—slip clutch permits motor to run free even if drive spindle stalls. Motor operates on 110–120-volt 60-cycle AC-DC. UL Approved. Ball and needle bearings placed at all points of strain. Free spindle speed is 1900 RPM. Impact hammer is mounted on anti-friction bearings for longer, smoother-action, and less friction wear. Lightweight, yet plenty tough—weighs only 7 lbs. Aluminum alloy housing.

FORCED VENTILATION keeps motor cool under continuous operation. Contour pistol-grip and trigger switch for balanced control and instant power response—easy-to-operate. Size of tool overall—about 11 in. long and 3 in. wide, ideal for work in close quarters. 1/2-in. drive. With 10-ft., 18-gauge heavy-duty rubber cord; 3-conductor cord has extra grounding wire. Jacobs tap chuck listed below easily adapts tool to many added operations such as to drilling, reaming, tapping, extracting broken screws or studs —driving wood augers, wire brushes, hole saws, or screwdrivers. Alloy steel sockets listed below.

84 CP 9281—*Postpaid.* $9 Down.....or Cash $89.00

23 JACOBS TAP CHUCK. Tough alloy steel; heat-treated and hardened for extra strength. Converts 1/2-in. drive impact tool into power-drive for drilling, reaming, etc. Capacity for 3/16 to 1/2-in. taps. Accommodates round shanks .194 to .381 in., square shanks from .118 to .360 in. With chuck wrench.
84 CP 9370—*Mailed Postpaid*.....$12.84

24 IMPACT SOCKETS. Tough alloy steel. 1/2-in. drive. 7/16, 1/2, 9/16, 5/8, 11/16, 3/4, 13/16 and 7/8-in. sizes.

New "Functional-Design" Wardmastr Wrenches

NEW WARDMASTR "FUNCTIONAL DESIGN" WRENCHES . . . HANDLE JOBS ORDINARY TOOLS CAN'T REACH

WARDMASTR THE NEWEST NAME IN FINE HARDWARE designates Wards top quality. It is your assurance of the finest available at a savings. All Wardmastr items feature the very finest in design, construction and workmanship, yet cost less than most other nationally-known brands. The wrench sets listed below and other selected hardware items in this catalog including pliers and screwdrivers on opposite page are the first of the new Wardmastr line — others will be introduced soon . . . watch for them.

1 TO 4 WARDMASTR "FUNCTIONAL DESIGN" WRENCHES get into places usually considered inaccessible . . . achieve a versatility never before possible. Box wrench heads are tapered, slightly recessed for fast slide-on fit and precision broached at 10° angle. New "straight-handle" design (Patent Pending) gets into confined spaces that ordinary flat wrenches can't reach. Basic strength is centered where needed most—at base of wrench head. Exceed rigid Fed. Specs. GGG-W-636 for strength—tested up to 1½ times stronger than other name-brand wrenches. Longer handles for extra leverage. Forged of special alloy steel, chromium over nickel plated. Polished heads, distinctive electro-etched name panels. All sizes matched, perfectly balanced. Sets in plastic zipper pouches. Fully guaranteed—will be replaced free if found defective.

SHORT BOX END WRENCHES 2.39 4-Pc. Set

29 ALCOHOL TORCH FUEL. 1-pt. can.
84C6020—For (26), (27), (28). Wt. 1 lb.

WARDS MASTER QUALITY PRECISION-MADE TAP AND DIE SETS 5.95 TO 38.50

Professional-type sets of tough steel construction. Hardened and tempered cutting teeth for longer wear, easier cutting. Designed to cut accurate and uniform internal or external threads. Taps and dies machined from tool steel. Dies held firmly in guide stock by tapered screws, assuring correct alignment of die on work. All sets include taps, round dies, strong tap and reamer wrench. With polished rust-resistant finish.

30 40-PIECE COMBINATION SET. 17 CUTS. With hardened, tempered cutting edges. Has adjustable die stock. Set includes carbon steel taps, round 1-in. split dies, T-tap, thread gauge, screwdriver. Unbreakable plastic carrying case—lightweight for easy handling, recessed to hold parts.

Size of cuts: NC (USS) ¼-20, 5/16-18, ⅜-16, 7/16-14, ½-13, NF (SAE) ¼-28, 5/16-24, ⅜-24, 7/16-20, ½-20. Machine Screws 4-36, 6-32, 10-24, 8-32, 10-32, 12-24, ⅛-inch pipe.
84 C 5535—Wt. 4 lbs. $2.50 Dn...Cash $20.50

31 25-PIECE COMBINATION SET. 11 CUTS. Complete set includes strong adjustable tap wrench, five matching 1-inch solid round dies and five taps with hardened, tempered cutting edges, solid die stock. Packed in sturdy, recessed hinged wooden box for easy carrying and storage.

Cuts cleanly, accurately the following threads: NC (USS) ¼-20, 5/16-18, ⅜-16, 7/16-14, ½-13; NF (SAE) ¼-28, 5/16-24, ⅜-24, 7/16-20, ½-20, ⅛-inch pipe.
84 C 5526—Ship. wt. 6 lbs.....$11.45

13-PIECE SET. 5 CUTS. Construction is similar to set (31) listed above but has different cut sizes as follows: NC (USS) ¼-20, 5/16-18, ⅜-16, 7/16-14, ½-13.
84 C 5525—Ship. wt. 4 lbs.....$5.95

32 22-PIECE SET. 8 CUTS. With two adjustable die stock—1-in. and 1½-inch split type dies. With matching hardened and tempered taps. Set comes in sturdy, recessed wooden box for easy storage and handling. Size of cuts: NC (USS) ¼-20, 5/16-18, ⅜-16, 7/16-14, ½-13, 9/16-12, ⅝-11, ¾-10. With screwdriver.
84 C 5536 M—Wt. 12 lbs. $2.50 Dn.....Cash $22.75

40-PIECE SET. 18 CUTS. Construction similar to set (32) listed above but with different cut sizes as follows: NC (USS) ¼-20, 5/16-18, ⅜-16, 7/16-14, ½-13, 9/16-12, ⅝-11, ¾-10; NF (SAE) ¼-28, 5/16-24, ⅜-24, 7/16-20, ½-20, 9/16-18, ⅝-18, ¾-16, ⅛-inch pipe. Also with recessed wooden box.
84 C 5537 M—Wt. 17 lbs. $4.00 Dn.....Cash $38.50

WRENCHES, ADAPTER 29c TO 9.95

33 ADJUSTABLE "T" HANDLE WRENCHES. Steel jaws and shell—hardened and tempered. Centered top. *State size.*
84 C 5540—Ship. wts. 3, 5, 9 oz.

Size	Fits Taps	Mach. Screw Sizes
0	3/32 to 3/16	No. 1 to No. 10
1	3/16 to 9/32	No. 10 to No. 16
2	9/32 to ½	No. 14 to No. 20

34 HEXAGON ADAPTER. Adapts dies for use with any ½-in. drive handle; rotates 1-inch open box wrench; 1-inch 6 or 12-pt. box wrench. 3 screws hold 1-inch round dies in place.
84 C 5539—*Mallable.* Ship. wt. 5 oz.....95c

Do Your Own Repairs with Wards Plumbing Tools

RATCHET SOLID DIE SETS 23.95 TO 34.95

(35) (36) ARMSTRONG-BRIDGEPORT DROP-HEAD RATCHET SEGMENTAL DIE SETS. Self-feeding dies cut U. S. Standard taper right-hand threads. Rust-resistant chrome plated cap. Quick change die heads, guides in one unit. Die heads snap into positive-action ratchet. Detachable handles. Large chip pockets help prevent clogging. ½ pint cutting oil. *Mail.*

(35) 3 AND 4-HEAD SETS. "Kalorized" dies for added strength and toughness. Lead-threads on throat, starts easily over burrs.

EXTRA LARGE DIES FOR SET (36) ONLY. Ship. wts. 3½, 4¼ lbs.
84 C 6237—*State size.* ¾ in. $6.75.....2 in. $9.95

SOLID DIE SETS 8.45 TO 19.50

(37) DROP-FORGED SOLID DIE SETS. Fast-cutting, accurate dies of tough, drop-forged tool steel cut U. S. Standard Taper right-hand threads. Interchangeable dies cut uniform threads, are held in place by strong plate. Individual guide rings included for each size, except on largest size where stock itself acts as a guide. Lead threads pull die onto pipe for easier start. Guide rings machined to exact sizes. Strong malleable iron stocks with detachable handles. Handles are knurled for firmer grip, easier handling. *Mailable.* Ship. wts. 8 lbs. 4 oz., 14 lbs.

84 C 6220 M—Stock with 3 dies (½, ¾, 1 in.).....$12.75

84 C 6221M—Stock with 5 dies (½, ¾, 1, 1¼, 1½ in.)..... 19.50

(38) ECONOMY DIE SET. For the handyman or home mechanic. Solid die stock with two drop-forged, hardened tool steel dies. Threads ½ and ¾-inch pipe. Cuts U. S. Standard taper right-hand pipe thread. Individual guide ring for ½-inch pipe; die stock forms guide for ¾-inch pipe. Leading threads on throat pull die onto pipe or rod—gives easier start. Integral handle is slotted for easier storage. *Mailable.*

84 C 6246 M—Stock with 2 dies (½, ¾-in.) Ship. wt. 5 lbs...$8.45

ADJUSTABLE DIE SETS 15.45 TO 28.50

(39) ARMSTRONG-BRIDGEPORT TWO-PIECE ADJUSTABLE DIE SETS. Professional quality. Widely used by skilled plumbers, pipe fitters, etc. Two-piece, drop-forged "Kalorized" tool steel dies are self-feeding, need little pushing effort. Long wearing; cut iron and brass pipe stock quickly and easily; make tight, leakproof joints. These sets can be adjusted to cut under or oversize, shallow or deep. Cut U.S. Standard Taper right-hand threads. New threads can be matched with old threads for precise fitting. Stock itself acts as guide for complete accuracy. Individual guide bushings center stock. Die-stock of malleable iron. Detachable handles for added convenience. With wrench and ½ pt. cutting oil. *Mailable.*

84 C 6295–EXTRA CUTTER. Wt. 4 oz.98c

PIPE VISES 3.45 TO 32.95

(46) CHAIN PIPE VISE. Wards Master (Best) Quality. Flat link steel chain. Tempered steel jaws take any shape stock, grip tightly without marring. 2-pc. replaceable pins lock in slot under drop-forged steel base. Easily mounted on posts.
84 C 6285—Takes ⅛ to 2-in. pipe. Ship. wt. 4 lbs.....$5.75

(47) (48) SELF-LOCKING PIPE VISES. Lakeside (Better) Quality. Open sideways. Tough malleable iron frame. Replaceable tool steel jaws. Milled teeth. Ship. wts. 9 lbs., 4 lbs.
(47) 84C6279M–MEDIUM-DUTY. Takes ⅛ to 2½-in. pipe.....$6.95
(48) 84 C 6275—LIGHT-DUTY. Takes ⅛ to 1¼-in. pipe..... 3.45

(49) ARMSTRONG INTEGRAL VISTAND. Heavy-duty professional type. Rugged malleable iron construction. 3-tools-in-1: vise, stand, pipe-bender. Hinged with frictionless disc, double pitched feed screw grips work tightly without defacing. Slots for ¾-in. pipe bender. 3-point suspension legs. Takes ⅛ to 2½-in. pipe.
84 C 6280 MO—Ship. wt. 42 lbs...$3.50 Down.....or Cash $32.95

PLUMBERS' FURNACES 15.95 AND 16.95

(50) WARDMASTR GASOLINE FURNACE. Our finest quality. For melting lead, etc. 1-gallon capacity. Steady fixed flame. ⅛-in. coil. Heavy seamless drawn reservoir, bottom. Automatic check valve. 6½-in. flame shield.
84 C 6117 M—Ship. wt. 12 lbs. *Mailable*.....$16.95

(51) WARDMASTR PROPANE PLUMBERS' FURNACE. Finest qual. Instant lighting. High-speed melting efficiency. No regulator required; replaceable orifice block. Fits Propane tanks with 3-in. flange valve; procure tank locally. All brass. Clean flame—fuel cannot spill. Wt. 11 lbs.
84 C 6133 M—Porous bronze filter. *Mailable*.....$15.95

(52) CAST-IRON MELTING POT. For (50) or (51) above.
84 C 6121—6-in. diam. Holds 12 lbs. Wt. 2¾ lbs.....89c

(53) LADLE. About 4-in. Holds 4 lbs. of molten metal.
84 C 6120—Ship. wt. 1 lb. 4 oz.....59c

COPPER TUBING, FLARING TOOLS 1.45 TO 7.39

(54) FAUCET SEAT DRESSER. Redress faucets. Reamer, 4 cutters.
84 C 6321—Ship. wt. 12 oz...Set $1.49

(55) FAUCET RESEATER SET. Fix leaky faucets. Reamer, 12 seats, 3 bibb screws, 3 taps, 6 washers.
84 C 6322—Ship. wt. 12 oz.....$2.98

(56) TUBE CUTTER. For cutting tubing to 1-in. diam. Sliding "spring-lock" safety reamer. Wt. 12 oz.
84 C 6289—Pocket size.....$1.49

(57) HEAVY-DUTY FLARING TOOL. Ball-bearing action. Malleable iron bridge. Hardened steel sizing bar. For heavy-wall tubing with outside diameters ⅜, ¾, ⅞, 1⅛ in.
84 C 6324—Ship. wt. 5 lbs.....$7.39

(58) COPPER TUBING KIT. Complete kit includes all tools listed below in handy metal carrying box. Cuts tubes up to 1-in. outside diam. Flares ¼ to ⅝ in. O.D. Bends tubes ¼, 5/16, ⅜, ½, ⅝, ¾-inch outside diam. Rust-resistant. Ideal for home owner or handyman. Wt. 6¾ lbs.
84 C 6330—Complete Kit.....$6.95

TUBE CUTTER ONLY. Spring action.
84 C 6323—Ship. wt. 8 oz.....$1.89

FLARING TOOL. Self-aligning.
84 C 6327—Wt. 2 lbs. 2 oz.....$3.29

BENDING SPRING SET. Set of 6 sizes as listed in kit (58) above.
84 C 6326—Wt. 2 lbs. 6 oz.....$1.45

AUGERS, SEWER RODS, FORCE CUPS 29c TO 11.95

(59) 3-FT. CLOSET AUGERS. One-pc. flexible wire coil spring. Slides in brass tube—rubber covered. Remove obstructions.
84 C 6317 M—½-in. Music Wire Coil. Ship. wt. 3 lbs.....$2.89
84 C 6318 M—7/16-in. Spring Wire. Ship. wt. 3 lbs..... 1.69

(60) FLAT STEEL SEWER RODS. For cleaning pipes. Will lie flat. Carbon steel. Revolving split ball spear point on all but 25 ft.
84 C 6310—25 ft. long, ¼ in. wide. Ship. wt. 1 lb. 4 oz.....95c
84 C 6311 M—50 ft. long, ½ in. wide. Ship. wt. 7 lbs.....$5.45
84 C 6312 M—50 ft. long, ¾ in. wide. Ship. wt. 11 lbs..... 7.39
84 C 6313 M—75 ft. long, ¾ in. wide. Ship. wt. 15 lbs..... 9.75
84 C 6314 M—100 ft. long, ¾ in. wide. Ship. wt. 18 lbs..... 11.95

(61) WASTE LINE AUGERS. Flexible coiled piano spring steel. Galvanized to resist rust. Adj. sliding aluminum handle.
84 C 6306 L—15 ft. ⅜-in. diam. Ship. wt. 5 lbs.....$2.65
84 C 6307 L—25 ft. ⅜-in. diam. Ship. wt. 8 lbs..... 3.98

(62) AUGER DRIVE HANDLE. Pistol-grip, bronze geared crank.
84 C 6308—Use with (61) above. Ship. wt. 2 lbs.....$7.75

(63) DRAIN, TRAP, AUGER. 5/16-in. diam. Galv. spring steel coil. 2 wood handles, steel hook. Ship. wt. 1 lb. 2 oz.
84 C 6305—6 ft. long...65c

(64) VACUUM PLUNGER. New force cup principle—creates 15 lbs. per sq. in. vacuum. For badly clogged sinks where extra-strong suction required. 16-in. hdl. 6-in. cup.
84 C 6320–Wt. 1¼ lbs.$1.45

(65) RUBBER FORCE CUP. 24-in. hdle; 6-in. cup. Ship. wt. 2 lbs. 2 oz.
84 C 6319 L.....29c

Preformed Wire Rope...Heavy-Duty Hoists

PREFORMED WIRE ROPE—2 TYPES 12½c TO 42c Ft.

Wire Center

Hemp Center

(1) (2) All Wards Wire rope is guaranteed to meet or exceed Government Specifications RR-R-571A. Improved Plow Steel, 6 strands by 19 wires each—114 helically laid wires. Use only where regular right hand lay is recommended. Safe working load is ⅕ of breaking strain. Not recommended for drilling.

PREFORMED AND INTERNALLY LUBRICATED. Preforming reduces wire fatigue and internal friction—gives greater flexibility. Internal lubrication coats each wire with a protective agent against temperature changes. Lubricant resists internal rust and friction.

(1) WIRE ROPE WITH WIRE ROPE CENTER. Strong construction because of wire center, yet flexible due to preforming. Use for earth moving equipment, shovels, logging, mining, etc. Shipped promptly from Factory near Chicago. Prepaid on 200 lbs. or more.

84 C 9629 F—*State diameter and number of feet wanted.*

Diam. In.	Drum Diameter Recom.	Drum Diameter Minimum	Breaking Strength	Ship. wt. 100 Ft.	1 to 99 Ft. Per Foot	100 Ft., up Per Foot
⅜	17 in.	9 in.	13,120 lbs.	25 lbs.	19c	17½c

MONTHLY PAYMENT PLAN. Little as 10% Down on orders of $20 or more. See Page 981.

ALL WARDS CHAINS MEET OR EXCEED U.S. GOVERNMENT SPECIFICATIONS 3½c TO 84c Ft.

All chains listed below have been tested for maximum strength and are guaranteed either to meet or exceed rigid Government Specifications RR-C-271A. All Wards chains are tested in these four important ways: (1) Breaking strength, (2) Weight, (3) Material and (4) Overall workmanship. Recommended working load on all chains should be no more than 25% of breaking strain stated below.

32 PORCH SWING CHAIN. Bright galvanized steel—resists rust. 5-ft. ladder, 2½-ft. branches. With "S" hooks, ceiling hooks. Ship. wt. 3 lbs. 8 oz.
84 C 9623. Pair $1.49

33 COPPER PLATED SASH CHAIN. Resists rust. Woven links. Continuous grain running lengthwise with links. High quality, dependable service. No. 8—breaking strain 350 lbs. Ship. wt. 100 ft., 4 lbs.
84 C 9609 H....Ft. 4c

GALVANIZED SASH CHAIN. 100 ft. of chain with 28 hooks, spirals. Enough for 12 windows. Wt. 4 lbs. 4 oz.
84 C 9608.....$2.98

34 HEAVY BRASS SAFETY CHAIN. For furnace, closet and sink-stopper chain, etc. Won't rust or corrode, cannot kink. Size 2–0. Ship. wt. per ft. 2 oz.
84 C 9605 H....Ft. 6c

35 SINGLE JACK CHAIN. For hanging pictures, signs, etc. Size 16 breaking strain is 30 lbs.; size 14 is 55 lbs.
84 C 9604 H—Ship. wt. per ft., 2 oz. *State size wanted.*
Size 16. 1 to 49 ft...Per ft. 3½c; 50 ft. or more....Per ft. 3c
Size 14. 1 to 49 ft...Per ft. 4c; 50 ft. or more....Per ft. 3½c

36 TWIST LINK WELL CHAIN. Galv. steel. No. 3 is 9/64-in. stock, 10½ links per ft.—breaking strain 830 lbs. No. 2-0 is 3/16-in. stock, 9¾ links per ft.—breaking strain 1430 lbs.
84 C 9611 H—Ship. wts. 3 oz., 5 oz. per ft. *State size wanted.*
Size 3. 1 to 49 ft..Per ft. 12½c; 50 ft. or more..Per ft. 11½c
Size 2-0. 1 to 49 ft..Per ft. 17c; 50 ft. or more..Per ft. 16c

37 WELDLESS WIRE CHAIN. Double loop pattern. Size 2-0, 10-ga., 6½ links per ft., breaking strain 1200 lbs. Rustproof galvanized finish. Ship. wt. per foot, 4 oz. *State length.*
84 C 9613 H—1 to 49 ft. Per ft. 6½c; 50 ft. or more..Per ft. 6c

38 WELDLESS WIRE CHAIN. Single loop pattern. Tough drawn wire galvanized to resist rust. Lays flat.
84 C 9614 H—*State size and length wanted.*

Size	Wire Gauge	Breaking Strain	Links Per ft.	Wt. Per ft.	1–49 ft. Per Ft.	50 ft., up Per Ft.

David White Levels and Transits...Only 10% Down

David White surveying instruments have an international reputation for precision, accuracy, and high quality. Only the finest of materials are used and they are manufactured with highest degree of skilled craftsmanship. Their long tradition of precision workmanship, combined with most recent developments in the field of optics, results in surveying instruments that meet the highest standards of the engineering profession the world over. Anyone can learn to survey accurately with a David White without previous experience—each instrument includes a FREE simplified instruction manual.

NEW 10-POWER FARM LEVEL 39.95

1 Reliable David White instrument at an unusually low price. For landscape work, erecting small buildings, etc., where extreme accuracy is not required. Erecting type 10-in. telescope. Fixed cross hairs. Color corrected lenses. Graduated 2½-in. spirit level. 4½-in. diam. circle graduated in degrees, numbered in quadrants (0–90–0). Reinforced base, leveling and clamp screws. Rust-resistant finish. With plumb bob, tripod, hardwood box. *Mailable.* Ship. wt. 14 lbs.
84 C 6451YO—$4.00 Down. .or Cash $39.95

CONVERTIBLE FARM LEVEL 69.95

2 Practical combination instrument for running precise levels or taking vertical angles from the same set-up. Lay out farms, roads, irrigation, small buildings, etc. Level transit has 10-power, 10-in. telescope—image appears right side up. Cross hairs fixed in focus. Color-corrected lenses for brighter image. .874-in. objective lens; gives 50% larger, brighter field. Rack and pinion adjustments on top of instrument for more critical focusing. 2½-in. graduated spirit level.

Vertical angles are laid or read off on 2¼-in. vertical arc, graduated in degrees and numbered both ways. Fixed pointer on vertical arc, 4½-in. horizontal circle graduated in degrees with vernier to 10 minutes; with clamp and tangent screw. Reinforced base has leveling and clamp screws, shifting center for smoother leveling. Gray-crackle enamel finish. Rust-resistant alloy standard and base. With plumb bob, tripod, hardwood carrying case, easy-to-follow instructions. Ship. wt. 14 lbs. *Mailable.*
84 C 6453 YO—$7.00 Down...or Cash $69.95

3 3-IN. JEWELED COMPASS. Marked in degrees, quadrants. Reversed East-West markings. Brass case. Fits (1), (2) only.
84 C 6464—Ship. wt. 12 oz.....$12.50

BUILDERS' LEVEL 149.50

4 Exceptionally accurate Dumpy Level—meets the precision needs of contractors in laying out buildings, road work . . . also for farm use. Dustproof 25-power, erecting type 12-in. telescope with color corrected lens.

Telescope, vertical supports, horizontal bar and vertical spindle all of sturdy 1-pc. construction. 4-in. horizontal circle graduated in degrees, engraved in quadrants. Vernier reading to 5 minutes. 5-in. spirit level graduated 60 to 120 seconds. All-steel rust-resistant center. 4 leveling screws. With plumb bob, tripod, carrying case, instructions. *Mailable.* Wt. 26 lbs.
84 C 6460 YO–$15.00 Dn...Cash $149.50

2-IN-1 LEVEL TRANSIT 195.00

5 David White's most popular instrument, designed for heavy-duty contractor's work. Level converts to transit. Dustproof 25-power erecting type 12-in. telescope with color corrected lens. Vertical arc 4¼-in. diameter, reading to degrees. Easy-to-read 5-minute vernier. Standards cast integral with standard base. Extra-heavy leveling head with shifting centers, trivet style. Horizontal circle 4¼-in. radius, silvered. Divided to degrees, numbered from 0 to 90 in quadrants, and vernier to 5 minutes. Ball bearing race, steel center and end thrust adjustment. With plumb bob, tripod, hardwood case, complete operating instructions. *Mailable.* Ship. wt. 20 lbs.
84 C 6463 YO—$19.50 Dn.Cash $195.00

6 JEWELED COMPASS. Marked in degrees, quadrants. Reversed East-West markings. Case. Fits (5).
84 C 6472—*Mailable.* Wt. 1 lb...$17.50

PROFESSIONAL SURVEYORS' TRANSIT 625.00

7 Extremely accurate—meets specifications of Engineer Corps, U. S. Army. Recommended for precise survey work. 20 power, internal focusing, 10½-in. telescope—image appears right side up. 1.33-in. diameter lens gives large, clear field. Stadia wires fixed, 1:100 ratio. Coated, color corrected lenses increase image brightness. Horizontal limb is 5½-in. diameter, graduated to ½ degrees. Two opposite double-direct reading verniers to 1 minute. Vernier sealed with glass covers. Two spirit levels. Covered leveling screws.

Vertical circle 4½-in. diameter, graduated to ½ degrees. Double-direct reading vernier to 1 minute. 3¾-in. gold plated compass needle; moisture-proof compass box. Hand fitted hard bell metal center. With trivet points, sunshade, plumb bob, magnifying glass, adjusting pins, screw driver, oil can, brush, waterproof cover, fitted mahogany case, split leg tripod. Shipped promptly by Express from Factory in Milwaukee, Wisconsin. Ship. wt. 28 lbs.
84 C 6458 F—Only $62.50 Down on Terms.....or Cash $625.00

ENGINEERS' LEVEL 305.00

8 Popular among highway, irrigation engineers. Designed to withstand rough usage, and still remain in good adjustment. 35 power achromatic telescope 16 in. long. Large 1.61-in. lens. Exceptionally accurate—read 1/100-ft. graduation at 1200 ft. Coated lenses for better image contrast. Dustproof object slide. Bronze level bar. 8-in. spirit level, graduated 20 seconds. Non-friction metal center. Four covered nickel silver leveling screws. With sunshade, adjusting pin, mahogany carrying box, split leg tripod. Shipped promptly by Express from Factory in Milwaukee, Wisconsin. Ship. wt. 23 lbs.
84 C 6454 F—$30.50 Down..or Cash $305.00

LEVELING RODS . . . SURVEYING AIDS 95c TO 17.95

9 ECONOMY LEVELING ROD WITH METAL TARGET. 3-pc. wood rod extends to 8 ft. 8 in. Graduated in ft., in., ⅛ in. Vernier reading to ⅛ in. *Mailable.*
84 C 6465 M—Wt. 3 lbs....$9.75

10 BUILDERS' LEVELING ROD WITH METAL TARGET. Top quality—for architects, contractors. Two 6-ft. maple sections extend 11 ft. Rod 1 in. thick, graduated in ft., in., ⅛ in. Vernier reading to 1/64 in. Bright enameled oval target. Ship. wt. 6 lbs. Requires 10 lbs. postage.
84 C 6469 YO—*Mailable*...$17.95

11 RANGE POLE. Sturdy 1½-in. diameter tubular steel. Two 4½-ft. sections assemble to 8½ ft. Each alternate foot of pole is japanned red and white; easy to see. Ship. wt. 5 lbs.
84 C 6473 M—*Mailable*...$9.95

12 MARKING PINS. Steel, 3/16 x 14 in. Red and white. Wt. 2 lbs.
84 C 6468—Set of 11.....$3.45

13 HAND SIGHTING LEVEL. Accurate up to 1/20°.
84 C 6470—Ship. wt. 6 oz..$2.25
84 C 6461—Case. Wt. 3 oz...95c

14 STEEL BAND CHAIN TAPE. 100 ft. long, 5/16 in. wide. Alloy steel. White metal graduations. With reel, handle.
84 C 6466—Ship. wt. 5 lbs.$16.95

15 BRASS PLUMB BOBS. Removable cap, steel point. Ship. wts.: ½, ¾, 1 lb., 1 lb. 10 oz.
84 C 6471—*State ounce size.*

12 oz..... 2.19; 18 oz..... 3.19

16 ENGINEERS' FIELD BOOK. Ruled, reference. 85 pages.
84 C 6474—Ship. wt. 12 oz..$1.49

HOME FIRE ALARM . . . FIRE EXTINGUISHERS COMPLETE WITH CHARGE 95c TO 28.95

CLASSES OF FIRES. Extinguishers are rated according to types of fires against which they are most effective: Class A, wood, rubbish, textiles, paper fires; Class B, oil, gasoline, grease, or other flammable liquids; Class C, electrical fires. Chemicals which put out one type of fire may encourage another or endanger the user—check your needs carefully before buying or using an extinguisher. All extinguishers except (18) are Underwriters Laboratories and Factory Mutual approved.

17 EDWARDS HOME FIRE ALARM. Mount signal unit in or near bedroom, mount detectors in ceiling near furnace, in storage areas or garage and connect with bell wire. When temperature rises above 140°F alarm bell rings. Test by pressing test button. UL listed detectors are reusable, cover area upto 400 sq. ft. Order extra detectors separately below. Includes: signal unit, 2 detectors. Instructions. For 110–120 volts 60 cycle AC. *Mailed Postpaid.*
84 CP 8618—$2 Down....Cash $19.95
EXTRA DETECTORS. For (17).
84 CP 8619—*Postpaid*.....Ea. $3.50

18 BLAZE-OUT EXTINGUISHER. For all small fires. 16-oz. of carbon tetrachloride charged with CO_2, shoots 12-ft. stream. Wt. 1 lb. 8 oz. ea.
84 C 8601—Each 95c.....3 for $2.75

19 20 CARBON DIOXIDE EXTINGUISHERS. For Class B and C, or small Class A fires. CO_2 won't damage furniture or fabrics. For use in kitchens and acetone fires. Does not conduct electricity—charge won't freeze. Easy to use, no pumping required—just direct on fire and squeeze grip. Recharge at any local carbonic plant. *Not Mailable.*

(19) 2½-LB. SIZE. With wall bracket.
84 C 8620 R—Ship. wt. 13 lbs.....$17.50

(20) 5-LB. SIZE. With wall bracket. $3 Dn.
84 C 8621 R—Ship. wt. 19 lbs.....$28.95

21 QUICK-AID PRESSURE VAPORIZING LIQUID TYPE. For Class A, B, C fires. See "classes of fires" above. 150 lbs. of pressure expels 30-ft. stream when grip is squeezed—no pumping necessary. 1-quart size. Pressure gauge quickly shows condition of charge. Handy wall bracket included. *Mailable.*
84 C 8604 M—Ship. wt. 9 lbs.....$14.95

22 23 QUICK AID VAPORIZING LIQUID TYPE. For Class A, B, C fires. 2-way pump throws 20–30-ft. stream. Won't freeze or injure fabrics. *Mailable.*

(22) 1-QUART SIZE. With wall bracket.
84 C 8606 M—Ship. wt. 9 lbs.....$9.95

(23) 1½-QUART SIZE. With truck bracket.
84 C 8603 M—Ship. wt. 10 lbs.....$12.75

24 REFILL for (21) (22) (23). 1 quart.
84 C 8607—Ship. wt. 4 lbs.....95c

25 NEW PUSH BUTTON PYRENE FIRE EXTINGUISHER. For Class A, B, C fires. 1-pint of Pyrene under pressure, shoots stream 15 ft. Won't freeze, not harmful to fabrics. Do it Yourself or Hire it Done...Either Way Wards Help You

IF IT IS PLUMBING OR HEATING WARDS HELP YOU 7 WAYS

1. FREE "HOW-TO-DO-IT" BOOKLETS. Help you decide how much to do yourself; help you plan, select, install. Clear, simple language and illustrations. Thorough and to the point. Three subjects: a) "Plumbing Simplified"; b) "Running Water for Farm and Country Home;" c) "Kitchen Planning." Use coupon below, or pick up booklet desired at any Ward Catalog Office.

2. COMPLETE OWNERS' GUIDES FOR SPECIFIC MERCHANDISE. Details of installation, operation, maintenance. Clear, concise and thorough. Included with Ward merchandise. (Also, free on request, if you want more information on item before purchasing. Write your nearest Ward Mail Order House, indicating Guide wanted.)

3. TOOL LOANING SERVICE. Nearly any man handy with tools can install Ward plumbing and heating equipment. Wards loan tools for installing Ward equipment. Order sets needed, in usual way. Remit deposit indicated below (or include in Monthly Payment Order). Refunded (or credited) in full upon return of tools within 60 days. All you pay is transportation one way.

81 C 2480 RV—For Steel Pipe to 1 in. and Copper Tube. Ship. wt. 95 lbs... $80.00
81 C 2481 RV—For Steel Pipe to 2 in. and Copper Tube. Ship. wt. 150 lbs... 100.00
81 C 2482 RV—For Cast-Iron Soil Pipe. Ship. wt. 56 lbs..... 45.00
81 C 2483 MV—For Warm Air Furnace Installations. Ship. wt. 13 lbs.... 20.00

4. ENGINEERING SERVICE. Ward engineers will advise you on the layout, selection and installation of Ward equipment for *Water Supply, Plumbing, Heating, Ventilating and Central Air Conditioning*—whether for new system, or modernization or extension of old. Write the Engineering Service Dept. at nearest Ward Mail Order House (except on air conditioning) requesting estimate blank. Outline proposed project in letter. On Central Air Conditioning, customers in Wards St. Paul territory write St. Paul, all others to Chicago, Wards Engineering Dept.

5. CONVENIENT PLANNING BLANKS. You don't need to be a draftsman to use them. Free on request. Use as basis of Engineering Dept. estimates or independently. ("Kitchen Planning" booklet, coupon below, includes special planning blank.)

6. SIMPLICITY IN MERCHANDISE DESIGN. Ward engineers insist on maximum practicable simplicity, for ease of planning and installation. Outstanding examples of this simplicity are the *Forced Warm Air Heating Systems* with 4½-in. aluminum pipe and the soldered-joint *Copper Plumbing Drainage System* on Page 852. Almost any man handy with tools can install them with very little help.

7. QUALITY, SAFETY, ECONOMY MAINTAINED. Ward equipment, made by the leading manufacturers, must conform to generally recognized codes, to industry standards, and to the strict requirements of Wards own modern testing laboratory. Wards will not yield on these points even for simplicity, or for false economy. All Ward merchandise is guaranteed—satisfaction or your money refunded.

PAY AS CONVENIENT...CASH OR BY THE MONTH

SPECIAL DEFERRED HEATING TERMS. To enable you to install heating improvements during the off-season, Wards offer special terms on this equipment. Order any time after April 15, with *no down payment*.

Up to Oct. 1 you have your choice of paying cash in full with *no carrying charge*, or starting regular Monthly Payments.

For scale of Monthly Payments, see Inside Back Cover of this Catalog or inquire at a Ward Catalog Office. If you prefer, you may arrange financing through your local bank, or other suitable agency.

ONLY $5 DOWN, $5 MONTHLY ON MANY ITEMS. Special terms apply to Water Heaters, Water Softeners, Kitchen Sinks, Garbage Disposers and Evaporative Coolers. Pay as little as $5 Down if price is not over $200; pay $10 Down if price is over $200. You may take as long as 24 months to pay balance on the higher priced items in these groups.

REGULAR MONTHLY PAYMENT PLAN. Other plumbing, heating and ventilating equipment 10% Down; balance Monthly. See Inside Back Cover for details of Wards convenient Monthly Payment Plan.

REPAIRS...SERVICES

Repair Service and Parts. See Page 958 for complete information on this important subject.

Warehouse and Factory Shipping. In addition to nine regular Mail Order Houses, Wards ships many items from warehouses and factories, often saving you transit time and reducing freight charges.

Save More at Catalog Offices. Delivery charges often less when you order and call for merchandise there. Save money order fees, letter postage, too. Get special booklets; see swatches. Check Metropolitan Delivery, too, for savings. See Pages 954, 955.

CENTRAL AIR CONDITIONING AT MODERATE PRICES

Make your home, office or shop doubly comfortable by cooling it in the Summer as well as heating it in the Winter. In addition to cooling, summer air conditioning has many advantages:

Filtered air means less dust and dirt—keeps house cleaner. House is quieter, more restful because windows and doors are kept closed. Low humidity reduces mildew, rust and dampness.

Wards Central Air Conditioner is available in 2-, 3- or 5-ton sizes for houses up to 8 rooms (or equivalents in other type buildings). Can be installed in any of 3 ways: 1) in conjunction with furnace of present forced-air heating system, using same ductwork and with cooling and heating controlled by same thermostat; 2) as separate unit with separate duct work and controlled independently of heating system; 3) as free-standing unit, without ducts, grill and register mounted on unit.

Picture (B), left, shows unit ready for connecting ducts. Picture (A) shows free-standing unit with grill and register attached; method often used in offices, stores, shops.

Wards will furnish a complete list of equipment and materials with prices and layout. Write to Wards Engineering Dept. at Chicago. (St. Paul customers write to St. Paul.) No charge.

FACTS ABOUT WARD WINDOW FANS . . . HOW TO DETERMINE SIZE OF WINDOW FAN

Window Fans offer an effective method of cooling, ventilating, freshening bedrooms, kitchens, offices, apartments—any area of moderate size, or where it would be impractical or too costly to install built-in ventilating and cooling equipment.

Ward Window Fans are designed for easy, quick installation. Require no special tools or skill. Easily moved to different location at any time. Small sizes (7), (8) also make quickly-installed exhaust fan for kitchens, bathrooms—install in upper window sections. (Built-in Kitchen Fans on opposite page.)

Fans on this page are smartly designed with attractive steel frame and grill. Shadow-Gray baked-on enamel finish—blends with any decorating scheme. Automatic Timer (A) optional on some fans—attaches easily to fan; permits automatic shut-off up to 20 hours after fan is started. No getting up at night to shut off fan. Just set it and forget it.

NAFM capacities given on Ward fans are *Certified* by National Association of Fan Mfrs.—include only air moved *through* fan. NEMA-rated capacities include air circulated *around* fan as well as through it. Instructions included. See "How to Determine Size" below.

How To DETERMINE SIZE WINDOW OR ATTIC FAN. In South, change air every 1 to 1½ minutes; in North, every 2 or 3 minutes. Multiply length by width by height of each room to be cooled (in feet) and total. Do not include basement. Divide by minutes per air change. Order fan of equal or greater cubic foot per minute capacity.

MONTHLY TERMS ON INSIDE BACK COVER

BIG, HOME-COOLING ATTIC FANS . . . CAPACITIES CERTIFIED 72.95 TO 98.50 Until March 31

30 31 In only 1 or 2 minutes a Ward Attic Fan drives out the day's accumulation of hot air; draws in cool, fresh night air. With the following important features.

AIR MOVEMENT CAPACITIES CERTIFIED by National Association of Fan Mfrs.—see "Facts . . ." at top of opposite page.

DEPENDABLE TORRINGTON FAN. Rotates slowly. Quiet. Four steel blades.

HEAVY 1-PIECE STEEL FRAME. Steel brackets firmly support motor and blades.

QUIET, RUBBER-MOUNTED MOTOR. With built-in control for protection against overload. No radio or TV interference. For 110- to 120-volt, 60-cycle AC.

Either type fan requires wall louvers or shutters, or open windows in attic or upper story for escape of hot air. In addition, ceiling grill or shutter is required for most installations—see (33) at right. Small views above show typical installations of (A) Upright Fan, and (B) Ceiling Fan. See "How to Determine Size" on opposite page. Ceiling Fans (31) are about 18 in. deep. Order fans from table at top of next column. Instructions. 10% Down.

Catalog Number	Fan Size, In.	Overall Inches	Motor HP	Capacity, CFM	Ship. wt., lbs.	Cash Until Mar. 31	Cash After Mar. 31

FORCED-AIR OIL- OR GAS-FIRED FURNACES 229.50 TO 539.50

(C) For Basement Installation. Centrifugal blower balanced and rubber mounted for smooth, quiet operation. Adjustable speed. Blower motor 1800 RPM, for 110- to 120-volt, 60-cycle AC. Fiberglas filters. Automatic humidifier. Steel cabinet has smooth gray hammered-effect baked-on enamel finish.

Oil-fired furnaces have cylindrical fire chamber. This feature and "wrap-around" radiator provide a large surface for heat transfer giving high efficiency. Welded into 1-piece, smoke-tight unit. Precast sectional firebrick combustion chamber.

Gas-Fired Furnaces have heating element designed for maximum heat transfer. Element, radiator, combustion chamber welded 1-piece unit. Additional facts below.

Furnaces with "R" at end of Cat. No. shipped from Albany Stock. No. 81 C 6268T shipped from Baltimore. "F" at end of Cat. No. means shipped from Factory in central Ohio. Allow Factory 1 week plus transit time. Pay freight from shipping point.

BOILER WITH BURNER FOR OIL OR GAS 279.00 TO 389.50

(A) Includes Controls. Highly efficient vertical type steel boiler. Insulated, gray enameled jacket. Oil burner is modern high-pressure atomizing gun type. Approved by UL. Dependable motor for 110- to 120-volt, 60-cycle AC. Gas burner (not shown) has all safety features for dependable operation; certified by AGA.

Oil-Fired Combination includes: boiler, oil burner, burner nozzle, stack switch, limit control, wall thermostat and automatic draft regulator. Gas-Fired Combination includes: boiler, gas burner, limit control, draft diverter, reducing flue collar, wall thermostat and necessary fire brick and cement.

Hot water combinations also include temperature-pressure gauge with boiler. Steam combinations also include low water cut-off. Boilers 81 C 7027 R, 7030 F, 7033 R and 7036 F shipped unassembled. Others completely assembled, except to attach burners. Steam boilers shipped promptly from York, Pa. (allow transit time) Factory. Pay freight from there or Mail Order House, whichever is nearer. Burners, controls and hot water boilers shipped from Stock. Order from table below. Instructions included. *Deduct 5% from prices shown if ordered before June 30.*

Oil-Fired Furnaces. Burn No. 1 or No. 2 fuel oil efficiently. Approved by Underwriters' Laboratories (UL). Automatic gun type burner is quiet, efficient. Precision air-oil mixing cuts fuel costs to minimum.

Insulated burner nosepiece prevents nozzle clogging. Stainless steel ignition electrodes, high voltage transformer assure quick, safe starting. Controls included are: automatic fan and limit control; room thermostat; automatic draft regulator; safety stack switch. With complete, easy-to-follow instructions. Buy early and save. *Deduct 5% from prices if ordered before June 30.* Order furnace from table below.

Gas-Fired Furnaces. For Natural Gas from city mains only. Approved by AGA. All have high efficiency, single-port burner. Precision gas-air mixing for better combustion. Flame retention sleeve holds flame close to burner opening for quiet ignition, extinction. Complete instructions included.

Flame spreader gives proper heat dispersion. Included are: automatic fan and limit control; room thermostat; automatic safety pilot; gas pressure regulator; automatic magnetic gas control valve; transformer; cock for hand shutoff; draft diverter. *Deduct 5% from prices if ordered before June 30.*

TYPICAL LOW COST OF COMPLETE SYSTEMS . . . FORCED WARM AIR PERIMETER SYSTEM FOR 5-ROOM HOUSE . . . 346.69 with Gas-Fired Furnace

5-ROOM GAS-FIRED FORCED AIR SYSTEM. Includes: 1 Gas-Fired Forced Air Furnace (68,000 BTU output) with Controls (see (C), above); 1 Plenum Chamber (20x20 in.); 1 Plenum Chamber (16x20 in.); 6 Take-Offs.

9 lengths Round Pipe (10 ft. by 4½-in. diam.); 24 Pipe Connectors; 12 Pipe Hangers; 2—45° Angles; 2—90° Elbows; six—180° Elbows; 5 Elbow Boots; 1 End Boot.

1 Starting Collar (18x8 in.); 3—32-in. lengths of Square Duct (18x8 in.); 3 Duct End Caps (18x8 in.); 1 Metal Sheet (32x96 in.); 1 Floor Grill (10x30 in.); 2 lengths Vent Pipe (5-in. diam.); 2—vent pipe Els. 6 Floor Diffusers.

Completes 6 separate warm air runs. See diagram at left for typical installation.

Total Price $346.69

6-ROOM GAS-FIRED FORCED AIR SYSTEM. Like above except with 7 Floor Diffusers and necessary additional fittings to complete 7 separate warm air runs.

Total Price $360.87

5-ROOM OIL-FIRED FORCED AIR SYSTEM. Includes: 1 Oil-Fired Forced Air Furnace (80,000 BTU output) with Burner and Controls; 1 Plenum Chamber (20x20 in.); 1 Plenum Chamber (16x20 in.); 6 Take-Offs; 9 lengths Round Pipe (10 ft. by 4½-in. diam.)

24 Pipe Connectors; 12 Pipe Hangers; 2—45° Angles; 2—90° Elbows; six 180° Elbows; 5 Elbow Boots; 1 End Boot; 1 Starting Collar (18x8 in.); 3—32-in. lengths of Square Duct (18x8 in.); 3 Duct End Caps (18x8 in.); 1 Metal Sheet (32x96 in.); 1 Floor Grill (10x30 in.); 2 lengths Vent Pipe; 2—90° Elbows for vent pipe; 1 Oil Storage Tank (275 gals.); 1 Oil Tank Installation Kit; 1 Oil Tank Gauge; 1 Oil Line Filter; 6 Floor Diffusers. Completes 6 separate warm air runs.

Total Price . . . . . $507.7[illegible]

6-ROOM OIL-FIRED FORCED AIR SYSTEM. Like above except with 7 Floor Diffusers and necessary additional fittings for 7 runs.

Total Price . . . . . $521.5[illegible]

HOT WATER BASEBOARD PERIMETER SYSTEM FOR 5-ROOM 1-STORY HOUSE . . . 559.50 with Gas-Fired Boiler

5-ROOM GAS-FIRED HOT WATER SYSTEM. Includes: 1 Gas-Fired Boiler (72,000 BTU input) with Controls (see (B), above); 2 lengths Vent Pipe (5-in. diam.); 2—90° Vent Pipe Elbows; 1 Room Thermostat; 1 Hot Water Circulating Pump; 1 Compression Tank; 1 Combination Filler and Relief Valve; 163 ft. of Steel Pipe with assorted Elbows, Tees, Couplings, Nipples, Unions, Valves, Bushings and Plugs for connecting system. Finned Steel Heating Elements 1-in. pipe size (2—4-ft. lengths, 6—6-ft. lengths, 1—8-ft. length) with equal lengths of Front and Back Baseboard Panels and Panel End Pieces and Corner Pieces; 1 Convector Cabinet Radiator (for use in kitchen or bathroom where wall space may be insufficient for baseboard units). System provides total radiation of 210 sq. ft.

Total Price $559.50

6-ROOM GAS-FIRED SYSTEM. Like above except with additional Heating Elements, Panels, Pipe, etc. Total radiation 245 sq. ft.

Total Price $599.50

5-ROOM OIL-FIRED HOT WATER SYSTEM. Includes: 1 Oil-Fired Boiler (A, above) with Burner (1 GPH nozzle size), Combustion Chamber and Controls; Automatic Draft Regulator; 1-Oil Storage Tank (275 gals.); 1 Tank Installation Kit; Tank Gauge; Oil Filter; [illegible] lengths Vent Pipe (8-in. diam.); 2—90° Vent Pipe Elbows; 1 Room Thermostat; 1 Circulating Pump; 1 Compression Tank; 1 Combination Filler and Relief Valve; 163 ft. of Steel Pipe with assorted Elbows, Tees, Couplings, Nipples, Unions, Valves, Bushings and Plugs for assembling system; Finned Steel Heating Elements 1-in. pipe size (2—4-ft. lengths, 6—6-ft. lengths, 1—8-ft. length) with equal lengths of Front and Back Panels, End Pieces and Corner Pieces; 1 Convector Cabinet Radiator. Total radiation of 210 sq. ft.

Total Price . . . . . $65[illegible]

6-ROOM OIL-FIRED SYSTEM. Like above except with additional Heating Elements, Panels, Pipe, etc. Total radiation 245 sq. ft.

Total Price . . . . . $65[illegible]

Equipment for All Needs

GAS-BURNING WALL HEATERS 57.95 TO 109.50

(D) (E) Especially well suited for heating compact areas, such as small cottages and apartments, motel units, offices, small shops.

Vented circulating type—provides gentle circulation of warmed air. Single heaters (D) excellent for heating an addition of 1 to 2 rooms or added home shop or garage, which would be beyond the capacity of the central heating plant; or where extensions of central system would be impracticable or too costly.

Dual heaters (E) are for walls between two rooms—will heat up to 3 rooms. When the house or space to be heated exceeds the capacity of one Wall heater, write to Wards Engineering Service Dept. giving full details with sketches before ordering. Approved by AGA. Fit into 2x4-in. stud wall. Heaters project 4¾ in. from wall.

Safety pilot stops ALL gas if pilot light dies. No exposed flame. Drilled-port cast-iron burner. Steel combustion chamber porcelain enameled inside and out. Shadow gray porcelain enameled steel front panel with louvers. For venting use Oval Pipe (K), Oval Pipe Adapter Set (L) plus other Metalbestos fittings listed below on this page.

Needs no electric connections. *For Natural Gas from city mains or Liquefied Petroleum (bottled) gas only.* Write for prices of heaters for manufactured or mixed gas. Gas inlet tapped ⅜-in. pipe size.

Heaters 81 C 5775, 5776 and 5777 require wall opening 41½ in. long by 14⅜ in. wide; all others 49 in. long by 14⅜ in. wide. "F" at end of Catalog Number means heater shipped to you from Factory near Clarksburg, West Virginia. Pay freight from there. Others shipped from Stock in Albany House. Allow Factory 1 week extra plus transit time. Order early and save. *Deduct 5% from prices if ordered before June 30.*

MORE COMPLETE LISTINGS OF WARDS HEATING EQUIPMENT in free Heating Circular. Send coupon at bottom of page. For help in planning or selecting equipment write Engineering Service Dept. at nearest Ward House.

AUTOMATIC GAS-BURNING FLOOR FURNACES 84.95 TO 119.50

(G) Self-generating—no connection to any other electrical source required. Automatic controls provide clean, even, economical heat. Approved by the American Gas Association. Excellent for heating small homes.

Suspend through opening in floor; furnace is out of sight except for grill. No basement needed—can be cleaned and serviced from above. One furnace heats up to 4 rooms. Floor grill serves as heat register and cold air return. Outside casing is galvanized steel.

Safety pilot shuts off ALL gas to burner and pilot if pilot flame goes out. Drilled port cast-iron burner. Heavy rust-resistant steel combustion chamber with observation cap. Brown enamel finish on steel floor grill.

Includes draft diverter and instructions. Vent pipe not included (see Page 866). Gas inlet ½ in. For natural or mixed gas from city mains or for liquefied petroleum (bottled) gas. Heating capacities stated are for average house with outdoor temperature as shown in table. Complete specifications in table below. No.'s 81 C 5846, 5847 and 5848 shipped promptly from Factory in Pittsburgh, Pa.; pay freight charges from there; see Page 970. *Deduct 5% if ordered before June 30.* Special Terms below.

INSTALL IN OFF-SEASON; PAY LATER

Wards offers especially liberal terms on heating equipment during the "heating installation" season from April 15 to October 1.

Order a new furnace, boiler, piping system or whatever you need to complete or modernize your heating system and pay nothing until Oct. 1. Then start regular monthly payments. Take up to 18 months on orders totaling $90 or more. Minimum monthly payment $5. See table of Monthly Payments on Inside Back Cover.

Wards regular Monthly Payment Plan applies before Apr. 15 and after Oct. 1, with 10% Down; the balance monthly. Make your own installation and save. See Wards helps Page 845.

FREE HEATING CIRCULAR

Contains a wide selection of Wards Heating Equipment as well as valuable information to help plan and install a new system or modernize present system.

Includes: Warm Air Furnaces, Diffusers, Registers, warm air Pipe and Fittings; Boilers, Baseboard, Slim Tube and Convector Radiators for hot water or steam systems; Conversion Burners; Controls; Accessories; Portable Electric Heaters and Stoves for space heating. Many helpful diagrams for planning.

For your free copy send coupon, at right, to nearest Ward Mail Order House or ask for one at a Ward Catalog Office.

Easy-to-Install Copper

BASIC COPPER SYSTEM. For 1-story house. Includes: one 20-ft. length of 3-in. diam. copper pipe (1); 3x1½-in. Tee (2); Sanitary T with Right or Left side inlet (right shown); Picture (3); 3-in. Eight Bend (4); 3x3-in. Y Branch (5); 3-in. Cleanout with Plug (6); Closet Bend with Flange (7); Drum Trap with Cover (8) and Roof Flashing (14). Ship. wt. 63 lbs.

81 C 4474 R—Right T Inlet... $79.95
81 C 4473 R—Left T Inlet.... 79.95

(15) CAST-IRON PIPE ADAPTER. Connects 4-in. cast-iron pipe to 3-in. copper pipe. Solder and calk joint.
81 C 4457—Ship. wt. 4 lbs.... $3.60

(16) STEEL PIPE ADAPTER. Connects 1½-in. threaded steel pipe to 1½-in. copper pipe.
81 C 4466—Ship. wt. 4 oz.....$1.10

MAKING SOLDER JOINT

1) Cut pipe to required length with hack saw. *Make cut square.* 2) File inside and outside of pipe end to remove burrs, slivers. 3) Brighten outside of pipe end and inside of fitting with steel wool or abrasive cloth. 4) Brush soldering flux around brightened pipe end and inside fitting. 5) Assemble and heat joint uniformly with blow torch. 6) When flux boils apply wire solder to joint crack. When filled, solder will show around joint. Wipe off excess solder. A pound of solder makes about 48 1½-in. joints; 25 3-in. joints.

FREE PLUMBING BOOKLET

Serves as a guide for planning, selecting and installing plumbing. Send coupon on Page 845.

COMPLETE BASIC SYSTEM 79.95

LIGHTWEIGHT. Easy to lift, assemble.

SIMPLE SOLDER JOINTS. No calking.

FAST INSTALLATION. Less labor cost.

FITS 2x4 PARTITION. No wall furring.

Copper drainage system is excellent for the "do-it-yourself" installer; also saves time of hired labor. Pipe and fittings are lightweight, about ⅓ as heavy as iron—easy to lift, join and adjust.

In many cases, parts of system can be pre-assembled on floor or work bench for easier handling, then lifted easily into position.

Joints quickly made with wire solder and blow torch—see below, at left. No calking irons, lead, pots, joint runners required. Soldered joints can easily be made strong, durable and water-tight. To fit pipe simply cut to desired length with hack saw.

Copper stack has no protruding hubs. Fits into standard 2x4-in. stud partition—no wall furring or special deep partitions required. Copper pipe has smooth, full-flowing waterways to resist clogging; corrosion. Never rusts.

Use pipe and fittings listed below for stack; waste and vent lines. Also for horizontal runs above ground as in crawl space under house or suspended drain in basement. Do NOT bury under ground. Pass through basement wall or foundation with cast-iron soil pipe—then continue sewer line to septic tank or street with solid fiber or cast-iron pipe.

Join 3-in. diam. copper pipe to 4-in. diam. cast-iron pipe with adapter (15). Adapter (16) connects 1½-in. diam. copper pipe to 1½-in. diam. threaded steel pipe. See sketch (A), on facing page, for joining copper to fiber pipe. Basic System, left. Check local code.

(1) COPPER PIPE. Use 3-in. diam. for stack; 1½-in. for waste, vent lines.

81C4405R	20-ft. Lgth.		Per Foot	
State size	Ship. wt.	Price	Ship. wt.	Price
3-in.	34 lbs.	$36.95	27 oz.	$1.98
1½-in.	16 lbs.	15.90	13 oz.	85c

(2) SANITARY TEE. In three sizes.
81 C 4452—*Please state size.*

Run Size	Branch	Ship. wt.	Price
3 in.	3 in.	3 lbs.	$4.10
3 in.	1½ in.	2½ lbs.	4.10
1½ in.	1½ in.	1 lb.	95c

(3) SANITARY TEE WITH SIDE INLET. Size 3 in. Inlet 1½ in. (on right or left as you face stack). Ship. wt. 4½ lbs.
81 C 4458—Right Inlet.....$7.75
81 C 4459—Left Inlet..... 7.75

(4) EIGHTH BEND. Turns line 45°.
81 C 4451—*Please state size.*
3-in. diam. Ship. wt. 1½ lbs.....$4.20
1½-in. diam. Ship. wt. 10 oz.....60c

(5) 45° Y BRANCH. See Cleanout below.
81 C 4453—*Please state size.*

Run Size	Branch	Ship. wt.	Price
3 in.	3 in.	3 lbs.	$4.35
3 in.	1½ in.	2½ lbs.	4.35
1½ in.	1½ in.	1 lb.	1.05

(6) CLEANOUT WITH PLUG. Fits 45° Y Branch (5) above.
81 C 4456—*Please state size.*
3-in. diam. Ship. wt. 1½ lbs.....$4.55
1½-in. diam. Ship. wt. 12 oz..... 1.20

(7) CLOSET BEND WITH FLANGE. Diam. 3 in. Extend to stack with piece of copper pipe for desired rough-in.
81 C 4460—Ship. wt. 3 lbs.....$7.50

(8) DRUM TRAP WITH COVER. Rough brass finish. Size 4 by 5 in. Side outlet 1½-in. diam. Bottom inlet tapped 1½ in.
81 C 4461—Ship. wt. 5 lbs.....$10.70

(9) QUARTER BEND. Turns line 90°.
81 C 4450—*Please state size.*
3-in. diam. Ship. wt. 1½ lbs.....$2.95
1½-in. diam. Ship. wt. 12 oz.....65c

(10) 90° STREET EL. Fits (8). Size 1½ in.
81 C 4462—Ship. wt. 12 oz.....$1.25

(11) MARVEL COUPLING. Joins 1½-in. copper pipe to lav. trap; tub waste.
81 C 4463—*Please state size.*
1½ by 1½ in. Ship. wt. 8 oz.....98c
1½ by 1¼ in. Ship. wt. 8 oz.....98c

(12) DOUBLE SANITARY TEE. For bathrooms back-to-back. All openings 3-in.
81 C 4465—Ship. wt. 4 lbs.....$8.15

(13) COUPLING. Connects copper pipe.
81 C 4464—*Please state size.*
3-in. diam. Ship. wt. 8 oz.....$1.40
1½-in. diam. Ship. wt. 4 oz.....39c

(14) COPPER ROOF FLASHING. Size 3 in.
81 C 4470—Ship. wt. 2 lbs.....$2.55

Cast-Iron Drainage System

COMPLETE BASIC SYSTEM 32.50 3-in. Size

All pipe and fittings close-grained cast-iron; uniform thickness. Coated inside and out with black asphaltum. Calk joints with oakum and calking lead.

Cast-iron pipe is used for drainage stack, drains under basement floor, runs through foundation or basement wall and lines to septic tank or sewer. Required in some areas—check code.

(19) TAPPED SANITARY TEE. *State size.*

Weight	Run	Branch	Ship. wt.	Price
Service 81 C 4721M	2 in.	1½ in.	6 lbs.	$1.33
	3 in.	1½ in.	8 lbs.	1.70

First Quality Fiber Pipe...Easy to Install...Enduring

Typical Changeovers

COMPLETE BASIC SEPTIC SYSTEMS 62.95 AND 90.95

See picture at right. Includes septic tank (12); perforated fiber pipe (11) and crosses (10) for minimum drain field. See drain field requirements at bottom of page. Order extra pipe, crosses as needed.

System Cat. No.	Tank, Gals.	Pipe, Ft.	No. of Crosses	Wt. Lbs.	Price
81 C 4786R	300	100	3	488	$62.95
81 C 4787R	500	150	4	693	90.95

PERFORATED AND SOLID FIBER PIPE FOR DRAIN FIELD, SEWER LINES, ETC.

1 TO 11 Fiber Pipe is easier to install because the lightweight, longer sections (7, 7½ or 8 ft.) are easier to handle, require fewer, simpler joints. No calking or cementing necessary (when joining lengths). Easy to cut odd lengths with saw.

Formed of wood fibers into a solid, seamless tube and thoroughly impregnated with coal tar pitch, for a tough, waterproof, long-lasting, lightweight, unified pipe.

Tests show crush strength exceeds that of farm or "field" tile. Unaffected by acids or usual chemicals in soil or waste. Occasional freezing, or heat to 212°F, will not permanently affect pipe. Both types, Perforated (11) and Solid (1), have 4-in. inside diameter. Total length of your order made up of 7-, 7½- and 8-ft. lengths, at random; no choice. Minimum order 7 ft. of 1 type. *One coupling included with each length.*

Sketch (A), left, shows how to join 3-in. copper pipe (C) and fiber pipe (1). Solder adapter (15), facing page, to copper pipe. Calk fiber adapter (7) to (15) using lead seal (17). Insert (1) into (7). To join 4-in. cast-iron pipe (D) to fiber pipe, see Sketch (B). Calk adapter (7) to (D) with Seal (17) and insert (1) into (7).

1 SOLID FIBER PIPE. (Shown below.) For tight, house-to-sewer or house-to-septic-tank lines, storm drains, etc. Also sub-irrigation conductor and other non-pressure uses outside house. Tapered ends for special root-proof, self-sealing joints.

When joining tapered ends with coupling (8) no calking necessary. To join cut ends use (6) or (7) below, and calk. See sketches A and B and information above to join to copper or cast-iron pipe. Inside diam. 4 in. Check local code before using.
81 C 5002 R—Ship. wt. per ft. 2 lbs. 14 oz.....Per Ft. 38c

2 TO 5 FIBER-TO-FIBER FITTINGS. No calking necessary.
(2) 81 C 5019 M—Tee. 3 hubs. Ship. wt. 3 lbs. 12 oz. $2.80
(3) 81 C 5012 M—⅛-Bend. 1 hub. Ship. wt. 2 lbs. 2 oz..... 1.55
(4) 81 C 5014 M—¼-Bend. 1 hub. Ship. wt. 3 lbs. 6 oz..... 2.65
(5) 81 C 5013 M—Wye. 2 hubs. Ship. wt. 5 lbs. 4 oz..... 3.59

6 JOINING SLEEVE. Joins 2 cut ends of Pipe (1), or cut end to 4-in. iron soil pipe spigot end. Calk both sides.
81 C 5016 M—Fits 4-in. pipe. Ship. wt. 3 lbs. 8 oz.....62c

7 ADAPTER. Joins taper end of Pipe (1) to soil pipe spigot; calk spigot side. Also joins cut end to taper end. Calk cut end.
81 C 5018 M—Fits 4-in. pipe. Ship. wt. 3 lbs.....90c

8 EXTRA COUPLING. Joins taper end to taper end. No calking.
81 C 5011M—Fits 4-in. pipe. Ship. wt. 1 lb. 6 oz.....31c

9 EXTRA SNAP-COUPLING. Fits perforated pipe (11) and cross (10), below. See picture at right.
81 C 5026 M—Ship. wt. 13 oz.....15c

10 COMPLETE CROSS. For connecting drain field branches; see picture at right. Fits snap-coupling (9) above.
81 C 5027 M—18 by 18 in. Ship. wt. 7 lbs.....90c

11 PERFORATED FIBER PIPE. For septic tank drain field (see picture, right). Also used as footing drains for buildings; draining land; sub-irrigation. Coupling (9) slides onto pipe and cross for firm connection; keeps pipe in line; checks silting. Write Wards Engineering Dept. if more information needed. Table below, left shows amount needed for drain field.
81 C 5006 R—Wt. per ft. 2¼ lbs.....Ft. 26c

STEEL SEPTIC TANK 38.50 300 Gal.

12 Heavy coat inside and out of acid-, rust-resistant asphaltum. No chemicals needed. Inlet and outlet fit 4-in. pipe. For added capacity connect two or more tanks. Shipped promptly from Albany Stock or from Factories near Buffalo, New York or Boston, Massachusetts—whichever is nearer to you.

750-Gallon. For larger installations. Diam. 58 in.; ht. 77 in. From Factory near Boston only.
81 C 4785 F—Ship. wt. 500 lbs..... $94.50

500-Gallon. For farm or suburban home; usually adequate for 5 persons. Diameter 52 in.; height 60 in. Ship. wt. 375 lbs.
81 C 4782 R—From Stock.....$53.95
81 C 4782 F—From Factory..... 48.95

300-Gallon. For limited use as with small home or summer cottage and not more than 4 persons. Diam. 46 in.; ht. 48 in. Ship. wt. 270 lbs.
81 C 4781R—From Stock.....$38.50
81 C 4781F—From Factory..... 34.50

GREASE SEPARATOR 21.95

13 Traps grease before it can enter waste lines; clog house drain. Use with sewer main or septic tank. (Excessive grease impairs operation of septic tank.) Install under sink or in basement drain line.

Cast iron—heavy casting for long service. Capacity: 16 lbs.; for normal requirements of 6 people. Flow rate, 7 gallons per minute. Outlet and inlet threaded for 1½-in. pipe. Size overall 13 by 12½ by 10½ in.

Automatic lockup when capacity is reached. Baffles prevent solids from escaping; sewer gas from entering. *Not Mailable.*
81 C 4795 R—Ship. wt. 75 lbs.....$21.95

DRAIN FIELD PIPE NEEDED

Table shows minimum perforated pipe (11) needed for drain field in various soils.

Perforated Pipe Needed	Per Person (Minimum Total, 100 Ft.)
Nature of Soil	
Clean coarse sand or gravel....	15 feet
Fine sand or light loam.....	20 feet
Fine sand with some clay or loam	30 feet
Clay with some sand or gravel..	80 feet
Heavy clay.....	Unsuitable

Free Plumbing Booklet. Helps you plan, select and install. Send coupon, Page 845.

10% Down for items on these pages, the balance monthly. Details on Inside Back Cover.

PLUMBING NEEDS . . . CALKING LEAD . . . SOLDER

14 PLUMBERS' OAKUM. Tarred jute. Use under (22), (23); 1 oz. to each 1-in. of pipe diam. in each joint. Ship. wt. 5 lbs. 8 oz.
81 C 4955 L—Carton 5 lbs....$1.59

15 THREAD CUTTING OIL. Makes cutting easier. In ½-pint can.
81 C 2317—Ship. wt. 1 lb.....30c

16 DRAIN PIPE CLEANER. Frees clogged drain lines. Shipped by Freight, Truck or Express only.
81 C 2305R-Wt. 1¼ lbs...2 cans 45c

17 LEAD SEAL. To seal soil pipe joints. Needs no heating.
81 C 2312—Wt. 1 lb. 8 oz.....55c

18 PIPE COMPOUND. For steel pipe threads. 1-lb. can.
81 C 2315—Wt. 1 lb. 4 oz.....30c

19 BLACK WIRE PIPE HOOKS. Six-in. Two sizes: for ½-in. pipe; for ¾-in. pipe. Box of 10. *State size.*
81 C 4299—Ship. wt. box 1 lb..30c

20 21 PIPE TAPE. Holds pipe to joists, etc. Holes fit ¼-in. bolts. Tape width ¾ in.
(20) Steel. Ship. wt. 1 lb.
81 C 4297—10-ft. Roll.....35c
(21) Copper Plated. Wt. 10 oz.
81 C 4295—10-ft. Roll.....55c

22 23 CALKING LEAD. Use 1 lb. per 1-in. soil pipe diam. per joint, over oakum (14). Melt bar and pour in; or pound wool type in cold. Ship. wt. 5 lbs.
(22) 81 C 4954 M—Wool.....Pkg. $1.75
(23) 81 C 4950 M—Bar. Abt. 5 lbs.... 1.20

24 GRAPHITE PACKING. Valves, faucets.
81 C 2321–Stranded. Wt. 2 oz...Pkg. 10c

25 PIPE STRAPS. Hold pipe to joists, etc.
81 C 4298—Galvanized. *State size.*
½ in. Ship. wt. 8 oz.....Dozen 10c
¾ in. Ship. wt. 10 oz.....Dozen 15c
81 C 4296—Copper. Dozen. *State size.*
½ in. Wt. 4 oz..40c; ¾ in. Wt. 6 oz...59c
⅜ in. Ship. wt. 3 oz.....35c

26 "NOKORODE" SOLDERING PASTE. Noncorrosive flux. Use with solder (27).
81 C 2307—Ship. wt. 3 oz....2-oz. can 13c

27 SOLDER FOR COPPER PIPE TUBING. Joins copper pipe (or "tubing") to copper "sweat" fittings. Solid ⅛-in. wire; 1-lb. spool. See "Making Solder Joint", facing page.
81 C 4947—Ship. wt. 1 lb. 4 oz...Spool 97c

28 SEAL STICK. Seals threaded pipe joints. Neat; easy to use.
81 C 2314—Ship. wt. 2 oz.....13c

29 PLUMBERS' WIPING SOLDER. Bar weighs about 1½ lbs.
81 C 4951—Ship. wt. 1 lb. 8 oz...Bar $1.18

FOR A DRY BASEMENT . . . SUMP PUMP 52.50

30 It's always an emergency when you need a basement sump pump. Damage from a single flooding might be more than the cost of this top quality pump. Use also to drain laundry tub wastes, etc. from basement into overhead sewer pipe leading to septic tank.

Vital parts of brass, bronze or stainless steel—last longer. Non-clogging semi-enclosed water impeller will pass any object that comes through the 5/16-in. holes in the heavy brass protective screen. Screen easily cleared of larger debris without removing pump.

Fully automatic switch control, with neoprene displacement bells on stainless steel wire, provides positive action; no float, rod, guides to stick or leak.

Stainless steel shaft and brass water-lubricated pump bearing prevent sticking. Top-suction type pump pulls water down; less sand, grit reach bearing.

Heavy-duty ⅓-HP motor with overload burnout protection; grease-sealed ball thrust lower bearing; for 110- to 120-volt, 60-cycle AC. Rubber-covered 8-ft. cord, plug. Use 18-in. tile or concrete pipe for pit (sump).

Capacity, gals-per-hr.: 3510 at 5-ft. discharge head; 3120 at 10 ft.; 2520 at 15 ft.; 1740 at 20 ft. Discharge opening 1½-in. pipe size. Pump ht. 39 in.; for pit to 2 ft. deep. Instructions. Cover listed below.
81 C 3637 R—Ship. wt. 57 lbs. $5.50 Down..Cash $52.50

31 COVER FOR PUMP ABOVE ONLY. Cast aluminum. Keeps out debris; avoids risk of open pit.
81 C 3636 M—Diam. 20 in. Fits 18-in. hole. Ship. wt. 7 lbs. $7.85

Top Quality Pipe and Fittings for Water, Gas, Oil, Air

WARDS STEEL PIPE MEETS OR EXCEEDS U.S. STANDARDS

(1) (2) WARDS STEEL PIPE IS TESTED AT 1000 LBS. water pressure per sq. in. Meets Federal Spec. WWP-406; A.S.T.M., A-120-47; U.S. Navy 44 P10h and 44-P-10k. Use *Galvanized Pipe* for water supply and drainage; *Black Pipe* for steam or hot water heating and for gas, oil and air lines. Both ends of standard 21-ft. lengths are threaded. One coupling furnished with each full length.

Pipe Size	Outside Circum.	Outside Diam.
⅜ in.	2⅛ in.	11/16 in.
½ in.	2⅝ in.	⅞ in.
¾ in.	3¼ in.	1 1/16 in.
1 in.	4⅛ in.	1⅜ in.
1¼ in.	5¼ in.	1 11/16 in.
1½ in.	6 in.	1 15/16 in.
2 in.	7½ in.	2 7/16 in.
2½ in.	9 in.	2 15/16 in.
3 in.	10 15/16 in.	3 9/16 in.

Cut-to-order length takes per ft. price; no coupling; threading extra. Thread charge in Table is PER END. "Pipe Size" is nominal inside diameter. For outside CIRCUMFERENCE, wrap paper around pipe and mark at overlap. Or take outside DIAMETER with calipers. Find correct pipe size, as indicated by your measurements, in table at left.

Use with galvanized malleable iron fittings (6) to (16) listed below.

NEW, STRONGER, "100-LB." PLASTIC PIPE

(17) 100% Pure DuPont "Alathon 25" Polyethylene. One man can make installation for 2-pipe jet pump in half the time steel pipe and fittings take. For all cold water lines.

Pipe made only with pure, virgin DuPont "Alathon 25" polyethylene resin—no re-ground or scrap. Wards Laboratory will not approve cheap types for pressure water systems. Approved for up to 100 lbs. operating pressure, up to 120°F. Test pressure 200 lbs. Don't be misled by thick pipe that may only attempt to compensate for weaker material—check the pressure ratings.

Tests indicate Ward pipe will give many years' service under usual ground conditions. (Do not expose to oil.) Remains flexible to 70°F below zero. Undamaged by sunlight.

Fittings (18) to (22) listed in separate tables below. Join to any standard steel pipe fittings with adapter (20) and stainless steel draw clamp (included). Easy to splice with coupling (18) or reduce 1 size with (19). Easy to cut. Can be curved, but for sharp turn use El (22) or Tee (21). Sizes same as steel pipe. Order in any continuous length up to full coil.

For setting deep well jets down to 70 feet use 1 clamp for each joint; below 70 feet, 2 clamps. Maximum depth setting for 1½-in. size, 130 feet; other 160 ft. Extra clamps below. Well Cap on Page 860 recommended with 2-pipe jet pumps.

INSTALL IT YOURSELF . . . WARDS HELP

Nearly any man who is handy with tools can plan and install plumbing. Wards will loan you tools to install Ward equipment. See Page 845 for details. Send handy coupon on Page 845 for free copy of "Plumbing Simplified" booklet or pick one up at any Ward Catalog Office.

PLUMBING ONLY 10% DOWN. If cash is not convenient, use your credit at Wards to purchase plumbing needs. Details on Inside Back Cover.

NON-CORRODING COPPER TUBING

(23) (24) Seamless—smooth for free flow. Can be connected to steel pipe, with adapter. For water, steam, oil, gas or air. Flexible types bend around turns, if not too sharp. Rigid type for new construction. Size is inside diam. (1½-, 3-in. SIZES, Page 852.) Sweat- and flare-fittings below.

First Quality Fittings for Bathtub and Shower Stall

SHOWER BATH FITTINGS FOR TUB, STALL OR UTILITY INSTALLATION

1 TO 4 BUILT-IN TYPE. Exposed parts polished chromium plated brass. Fit ½-in. supply and riser pipes (not included). Arm same as (8). With or without Shower Head (12).

(1) NEW SINGLE-VALVE TUB FILLER AND SHOWER COMBINATION. Single handle controls water temperature and volume. Raise diverter button for shower; returns automatically to tub position.
81 C 1547 W—WITH SHOWER HEAD (12). Ship. wt. 6¼ lbs.. $23.75
81 C 1672 W—WITHOUT SHOWER HEAD. Ship. wt. 4¾ lbs... 19.95

(2A) 2-VALVE TUB FILLER-SHOWER. Diverter button on spout.
81 C 1546 W—WITH SHOWER HEAD (12). Ship. wt. 11 lbs... $22.75
81 C 1660 W—WITHOUT SHOWER HEAD. Ship. wt. 9 lbs.... 18.95

(2B) 2-VALVE TUB FILLER-SHOWER. Lighter. Diverter lever.
81 C 1545 W—WITH SHOWER HEAD (12). Ship. wt. 7¾ lbs... $15.75
81 C 1666 W—WITHOUT SHOWER HEAD. Ship. wt. 6 lbs. 4 oz. 11.95

(3) NEW SINGLE-VALVE SHOWER ONLY. Single-lever control.
81 C 1549 W—WITH SHOWER HEAD (12). Ship. wt. 4¼ lbs... $15.75
81 C 1673 W—WITHOUT SHOWER HEAD. Ship. wt. 2 lbs. 12 oz. 11.95

(4) 2-VALVE SHOWER ONLY. (No tub filler.) Conventional type.
81 C 1548 W—WITH SHOWER HEAD (12). Ship. wt. 7½ lbs... $15.75
81 C 1671 W—WITHOUT SHOWER HEAD. Ship. wt. 6 lbs..... 11.95

5 6 ADAPTER TUB SHOWERS. Quickly convert to tub-shower combination. Mount on wall surface. Exposed parts polished chromed brass. Swivel heads. Diverter on spout. With screws, instructions.

(5) ON-TUB TYPE. For leg-tub or built-in tub with supply pipe holes *in tub*. Remove old faucet, replace with new, set 58-in. adjustable riser tube, attach adjustable wall flange. Connection centers 3⅜ in. apart. Order also Shower Curtain Frame (24) below.
81 C 2067 MO—Ship. wt. 6 lbs. 4 oz. $19.95

(6) WALL-MOUNT TYPE. For built-in tub with faucet on wall and with removable spout. With 52-in. adjustable riser tube and adjustable wall flange. Spout back tapped ¾-in. pipe size.
81 C 2066 MO—Ship. wt. 6 lbs. 8 oz. $15.95

7 LOW-PRICED UTILITY SHOWER. Brass. Head chromed; balance rough nickeled. Mounts on wall surface. Connect ½-in. supply pipes (not included) from top to centers 3 in. apart. Galvanized steel 27-in. riser pipe included. With soap tray, wall brackets, union connections.
81 C 1664 MW—Handles marked. Ship. wt. 8 lbs.. $7.50

SHOWER BATH ARM, HEADS, DRAIN

8 SHOWER ARM. Polished chromium plated brass. Fits on ½-in. tapped shower head. Flange covers wall connection.
81 C 2054 W—Shipping weight 1 lb. ..... $1.

9 SHOWER FLOOR DRAIN. Cast brass. Exposed strainer polished chromium plated. Top diam. 3½ in. *State* pipe size.
81 C 2065 W—For 1½-in. Pipe. Ship. wt. 1 lb. ..... $1.
For 2-in. Pipe. Ship. wt. 1 lb. 3 oz. ..... 1.

10 SHOWER FLOW REGULATOR. Chromium plated brass fits between shower arm and head. Temporarily shuts off flow without changing adjustments (use when soaping). No a shut-off valve. Fits any standard shower fitting.
81 C 2061 W— Shipping weight 8 oz. ..... $1.

11 TO 13 SHOWER HEADS. Polished chromed brass. Swivel joints. Self-cleaning. Liming inhibited. Tapped ½-in. pipe size to fit standard shower arms or Regulator (10).

(11) 81 C 2050 W—SPRAY NOT ADJUSTABLE. Ship. wt. 13 oz.. $1.

(12) ADJUSTABLE, from soft-flood to needle spray.
81 C 2051 W—Shipping weight 1 lb. 8 oz. ..... $1.

(13) SPEAKMAN ANYSTREAM—ADJUSTABLE, soft-flood to needle.
81 CP 2053 W—*Postpaid*. ..... $

BATHTUB WASTE-OVERFLOWS

14 TO 16 FOR BUILT-IN BATHTUBS. All brass. Exposed parts heavily chromium plated; polished. Meet all codes.

(14) CLEAN-EASY LEVER POP-UP TYPE. Stoppages easily, quickly cleared from inside tub, without tools. Tubing seamless 17-gauge. Ship. wt. 7 lbs.
81 C 1784 W—Standard Height. $10.95
81 C 1785 W—For cast-iron 14-in. Tub. 10.95

(15) (16) CHAIN-AND-STOPPER TYPE. With heavy beaded chain; rubber stopper. (Cut tubing for tubs 14 in. high.)

(15) Heavy 17-gauge seamless tubing.
81 C 1775 W—Ship. wt. 6 lbs. $6.50

(16) Lighter 20-gauge seamless tubing.
81 C 1780 W—Ship. wt. 3 lbs. 12 oz... $5.50

FAUCETS FOR BUILT-IN AND LEG -STYLE BATHTUBS

17 18 TWO-VALVE FOR BUILT-IN TUBS. Mount in wall. Exposed parts polished chromium plated. Cast brass bodies. Handles marked H and C. Easy to install.

Tailpiece unions connect to ½-in. pipes. Valve centers 8 in. apart. Seats renewable. Instructions included.

(17) BEST QUALITY. Heavy brass body, spout, escutcheons. Attractive design. Spout in line with handles.
81 C 1655 W—Ship. wt. 7½ lbs. $13.50

(18) ECONOMY. Lighter construction. Handles above spout. Fits ½-in. nipples (not included; see Page 854). Shipping weight 4 lbs. 12 oz.
81 C 1665 W. $7.95

19 NEW SINGLE-VALVE FOR BUILT-IN TUBS. Similar to (1) above, except tub filler only. Single lever controls temperature, flow. Brass spout.
81 C 1662—Ship. wt. 4½ lbs.... $13.50

20 TWO-VALVE FOR LEG-STYLE TUBS. Mounts on tub. Cast brass. Exposed parts polished chromium plated. Ribbed spout for spray hose, etc. Connection centers 3⅜ in. apart. Fits ¾-in. supply pipe. (See 21 below.)
81 C 1650 W—Ship. wt. 2¼ lbs.. $3.89

21 BENT TAILPIECES, COUPLING NUTS. Brass. Use with Bathtub Faucet (20) for easier, faster hook-up. Fit ½-in. supply pipe.
81 C 2098—Ship. wt. 6 oz. Pair $1.19

SHOWER CURTAIN RODS AND FRAME

22 23 RODS FOR BUILT-IN TUBS. Polished chromium plated in. brass tube. For built-in tubs up to 5½ ft. Can be if desired. Each has 2 heavy flanges.

(22) CURVED FOR CORNER STYLE TUBS. Curve 30 in. deep.
81 C 2056 MOW—Ship. wt. 5 lbs. 8 oz. ..... $

(23) STRAIGHT, FOR RECESSED STYLE TUBS. Also for clothes
81 C 2055 MOW—Ship. wt. 2 lbs. 8 oz. ..... $

24 FRAME FOR LEG TUBS. Use with Shower Adapter. Polished chromium plated ⅝-in. brass tubing. One connects to shower arm; other end to adjustable 36-in. ceil support. Frame 37 by 27 in. With screws, instructions.
81 C 2068 MO—Shipping weight 7 lbs. ..... $10.

FAUCETS FOR UTILITY SINKS, LAUNDRY TUBS, ETC.

25 26 FAUCETS FOR UTILITY SINKS. Brass, with rough nickel plated finish.

(25) WITH HOSE THREAD ON SPOUT. Shank threaded. *State when ordering.*
81 C 1600 W—½-in. Pipe Size. Ship. wt. 1 lb. ..... $
¾-in. Pipe Size. Ship. wt. 1 lb. ..... 1.

(26) WITHOUT HOSE THREAD. Shank threaded for ½-in. pipe supply pipe connection.
81 C 1603—Shipping weight 1 lb. ..... 1.

27 28 LAUNDRY TUB MIXING FAUCETS—BOTTOM CONNECTION. Fit shelf-type tubs with proper holes. Swivel spout. Connect at bottom to ½-in. supply pipes. Hose thread on spout. Ship. wt. 4 lbs.

(27) DELUXE. Polished chromium plated brass finish.
81 C 1646 W—Connection centers 3 to 3½ in. apart. ..... $

(28) STANDARD. Rough chromed brass finish.
81 C 1644 W—Connection centers 3 to 3½ in. apart. ..... 1.

29 LAUNDRY TUB MIXING FAUCET—TOP CONNECTION. Nickel plated rough brass. Clamps to shelf-type tub (with mounting block—block not included). Swing spout. Connects at top to ½-in. supply pipes. Connection centers 3¼ in. apart. Hose thread on spout. Union connections included.

76 77 78 SINK STRAINERS. Chromium plated brass tailpieces 4 in. long, fit 1½-in. trap or waste connector. (76) and (77) have stainless steel 4½-in. tops; fit 3½-, or 4-in. holes.

(76) BASKET TYPE. Stainless steel basket lifts out to empty. Closable to fill sink for dishwashing, etc.
81 C 1760 W—Ship. wt. 2 lbs. 4 oz. $3.19

(77) LARGE FLAT TYPE. Stainless steel strainer.
81 C 1768 W—Ship. wt. 1 lb. 8 oz. $2.19

(78) SMALL FLAT TYPE. Chromed brass 3-in. top.
81 C 1766 W—Fits 2- or 2½-in. hole only. Wt. 1 lb. $1.25

Pumps and Complete Water Systems for Deep Wells

LOW-PRICED JET SYSTEM 102.50 ⅓-HP

(A) A dependable, compact, ready-to-connect, automatic water system. Supplies water to suburban homes, farms at city pressures. Tank 13½-gal. Balanced, efficient bakelite impeller.

Galvanized cast-iron jet body with brass venturi and jet nozzle. Horizontal pump is easier to prime; keeps seal moist and tight. Pump, tank and automatic controls all mounted on heavy galvanized steel tank. Ready to install.

Tank discharge ¾ in. Requires 1-in. tail pipe from foot valve to jet. For 2-pipe systems only. Size: 31x13x27 in. Includes: Pump; tank; 3600-RPM motor; automatic pressure switch; pressure regulating valve; pressure gauge; air charger; 1-in. foot valve; 2-pipe jet (Picture 2). See "Capacities . . ." below.

For 3-In. Diam. or Larger Wells With Lift to 60 Ft. With ⅓-HP motor for 110- to 120-volt, 60-cycle AC only. Requires 1-in. suction pipe and ¾-in. pressure pipe, pump to jet.
81 C 3563 R—Ship. wt. 101 lbs. $10.50 Down. . . .or Cash $102.50

For 4-In. Diam. or Larger Wells With Lift to 70 Ft. With ½-HP motor for 110- to 120- or 220- to 240-volt, 60-cycle AC. Requires 1¼-in. suction pipe, 1-in. pressure pipe, pump to jet.
81 C 3564 R—Ship. wt. 110 lbs. $12.50 Down. . . or Cash $122.50

WARDS BEST JET SYSTEM 141.50 2-Pipe, ½-H.P.

(B) For Wells Down to 70 Ft. Compact ready-to-connect, top-quality automatic system. Large (30-gal.) vertical tank. Pump, tank and automatic controls mounted on sturdy galvanized steel base. Pump same as (C) described at right, above. Motor ½-HP for 110- to 120- or 220- to 240-volt, 60-cycle AC.

All-brass jet; patented, *non-clogging* (automatic clean-out) pressure switch with hand shut-off at pump; 100-lb. pressure gauge. Tank discharge 1 in. Require 1-in. tail pipe from foot valve to jet. Size 19x27x39 in. high. See "Capacities . . ." below.

With 2-Pipe Jet For 4-In. Diam. or Larger Wells. Two-pipe jet, Picture (2) at right, below, included. Requires 1¼-in. suction pipe and 1-in. pressure pipe, from pump to jet.
81 C 3557 R—Ship. wt. 180 lbs. $14.50 Down. . . . . Cash $141.50

With 1-Pipe Jet For 2-Inch Diameter Wells. Well adapter and 1-pipe jet, Picture (1) at right, below, included. Well casing serves as pressure "pipe" inside well. Requires 1¼-in. suction pipe and 1-in. pressure pipe, from adapter to pump; also 1-in. suction pipe, from well adapter to jet in well. Capacities will be about 10% less than ½-HP size with 2-pipe jet.
81 C 3562 R—Ship. wt. 190 lbs. $14.50 Down. . . . . .Cash $144.50

CAPACITIES (A) (B) (2 pipe) at minimum operating pressure:

Motor			30 ft.	40 ft.	50 ft.	60 ft.	70 ft.
⅓-HP	20 lbs.	Gal. per hr.	450	330	290	180	. . . . .
½-HP	25 lbs.	Gal. per hr.	760	715	450	375	330

DEEP-WELL AUTOMATIC JET PUMPS . . . FOR WELLS TO 120 FEET 87.50 ⅓-HP TO 137.50 1-HP

(C) (D) Pump (C) is horizontal type in ⅓- and ½-HP; Pump (D) is vertical type in 1-HP only. All give "city" pressures. Order stand for Pump (D) below.

Both types have Wards patented, non-clogging pressure switch with automatic clean-out wire; starts pump at 20 lbs., stops it at 40 lbs. (limits adjustable). Manual shut-off. Automatic air charger. Pressure gauge. Automatic control valve for better maintenace of pressure and prime.

Rotary seal (no stuffing box) reduces shaft wear and drag on motor, compensates for pressure differences, prevents water from oozing. Wards superior Bakelite impeller—smoother, more perfectly balanced.

Special heavy duty motors have grease-packed, sealed ball bearings. Automatic protection against burnout; automatic re-set. Stainless steel shafts. Each pump includes Owner's Guide with complete, easy-to-follow instructions.

Table shows capacities in gallons per hour at avera minimum operating pressure. Jet not included; order sep rately correct size from bottom of opposite page. When s lecting jet, be sure to use depth *after* draw-down (level which water drops and remains steady during operati

Note: Single-pipe jets are available for use with ⅓ and ½-HP pumps in 2-in. diam. wells. For informa and prices, write Wards Engineering Service Dept., sta *inside well diameter and HP of pump you plan to use.*

A Ward jet pump can be operated without tank, b tank should be used; see Page 855. A 42-gal. tank is ge erally adequate for use with ⅓- and ½-HP pumps. U 82-gal. size or larger with 1-HP pumps.

All motors for 60-cycle AC only. The ⅓-HP is for 11 120-volt; the ½-HP for 110- to 120- or 220- to 240-volt; 1-HP for 220- to 240-volt only. Terms 10% Down.

EVERPRIME MULTI-STAGE JET SYSTEMS FOR EXTRA-DEEP WELLS 198.50 ½-HP

(E) Automatic 2-pipe jet water system for depths to 300 ft. Fits any 4-in. or larger diameter well. Stays primed permanently. After original prime, system maintains prime automatically—even if water level in well drops below foot valve or power fails. Ideal for wells with low capacity or large fluctuation in water level. Won't lose prime if well water contains air or gas.

Efficient multi-impeller system provides larger capacities; greater depth range. No pressure control valve is required. Balanced bronze impellers designed for high efficiency.

Heavy-duty drip-proof motor. Ball bearings sealed in grease—require no lubrication for years. Built-in overload protection on ½- and 1-HP motors; automatic overload protective relay on 2-HP motors. All motors for 110- to 120-volt or 220- to 240-volt single-phase 60-cycle AC. Stainless steel shaft. All-bronze stuffing box on 2-HP; rotary seal on others. The ½-HP is 32 in. high; others 60 in. The ½- and ⅓-HP are 20x35 in. overall at floor; 2-HP, 20x37 in.

Wards patented non-clogging pressure switch has au matic cleanout wire; prevents failure due to lime or sa Set 30 to 50 lbs. on 2-HP pumps; 20 to 40 lbs. on others. T pressure can be set up for high delivery heads—see ma mum pressure in table. Automatic air charger preve tank from waterlogging. Galvanized heavy steel tank flanged to pump for rigidity, compactness. Tank capacity HP system, 42 gals.; others 82 gals. Discharge tapping ¾ i

System includes: pump, motor, tank, pressure switc air charger, pressure gauge, 2-pipe jet, instructions. Orde from table below. F after Cat. No. means shipped prompt from St. Louis Factory. Pay freight from there or Wa House, if nearer. Write for prices of 1-pipe systems for 2- an 3-in. wells or with 120 or 220-gal. tanks. Pay only 10% Down.

SUPERIOR QUALITY PISTON-TYPE DEEP WELL HEAD 154.50 ½-HP

(F) Requires properly installed well pipe, rod, couplings and cylinder—not included; see Pages 854 and 860. Use steel pipe and couplings. Mount over well. Completely automatic. Fifty-five 5-in. strokes per minute. Hardened crankshaft and crank pins; precision cut gears, large cross head guides for long service. Oil pump and distributor give positive lubrication to all moving parts. Automatic Air Pump; provides air cushion for system.

Built-in Equalizer Cylinder eases load on down stroke—smoother, quieter operation. Wards patented non-clog pressure switch with automatic cleanout wire starts pump at 20 lbs. pressure; stops it at 40 lbs. Limits adjustable. Relief valve relieves at 65 lbs.

Large air chamber. Check Valve is built in. Costlier Timken Bearings for smooth, long life. Heavy-duty motor for 110- to 120- or 220- to 240-volt, single phase, 60-cycle AC. Automatic protection against overload burnout. Double V-Belt drive adjustable. Use Tank (55), Page 855, and Air Volume Control (14), Page 860.

Tapped and bushed for 2- or 2½-in. pipe. Discharge tapped for 1-in. pipe. Rod threaded to fit 7/16-in. steel or ⅝-in. wood rod. Overall above floor, 27x14x23 in. high.

Important: Use either HP only with combination of cylinder size and well depth neither of which is greater than shown below for that HP. Shipping Information next Page.

Pumps and Complete Water Systems for Shallow Wells

LOW-PRICED JET SYSTEM 94.50 ⅓-HP

(G) Compact, economical, ready-to-install unit. For maximum lift of 25 ft. at sea level; 1 ft. less for each 1000 ft. above. Self-priming after first prime. Easy to install. Fits space only 13¾ by 20¾ by 22¼ in. high.

Galvanized 13½-gal. tank for water storage and automatic operation. High-efficiency pump with bakelite impeller, diffuser plate and built-in jet delivers big capacities as shown in the following table:

Lift or depth to water	Delivery Capacity in Gallons Per Hour					
	⅓-HP			½-HP		
	Discharge Pressure					
	20 lbs.	30 lbs.	40 lbs.	20 lbs.	30 lbs.	40 lbs.
5 ft.	500	460	260	930	880	530
10 ft.	430	400	230	820	785	440
15 ft.	360	340	180	700	690	360
20 ft.	300	280	150	590	585	290

Heavy-duty, grease-sealed ball-bearing motor for 110- to 120-volt, 60-cycle AC. Built-in protection against overload burnout. Automatic pressure switch starts pump at 20 lbs.; stops it at 40. Wards exclusive air charger prevents water-logging. Foot valve 1 in. Sturdy welded-steel base. Instructions included. For details of Monthly Terms see Inside Back Cover.

WITH ⅓-HP MOTOR. Tapped for 1-in. suction pipe.

81 C 3507 R—Ship. wt. 99 lbs. $9.50 Down . . . Cash $94.50

WITH ½-HP MOTOR. Tapped for 1-in. suction pipe.

81 C 3508 R—Wt. 105 lbs. $11.00 Down . . . . Cash $109.50

DETERMINING PUMP TYPE AND SIZE

PUMP TYPE. Use Deep Well Jet System (A), (B) or (E) or Pump (C), (D) or (F) for lift of more than 25 ft. Shallow Well Systems on this page are for 25-ft. lift at sea level (1 ft. less for each 1000 ft. above sea level).

PUMP SIZE. Water needs determine capacity of pump. Allow for future. Estimate your requirements from following totals of average daily use.

Each person, 50 gals. (bath, closet, etc.); each milk cow, 35 gals.; each dry cow or steer, 12 gals.; horse, 12 gals.; 100 chickens, 4 gals.; each hog, 4 gals.; each sheep, 2 gals.; ½-in. hose, 200 gals.-per-hr.; ¾-in. hose, 300 gals.-per-hr. Divide total daily water use by 4 to determine per-hour capacity needed.

CONSIDER STAND-BY PUMP

Users of large amounts of water, where service interruptions might prove serious, should consider an extra pump. Some farms, ranches, etc., alternate two pumps.

WARDS DEEP WELL JETS

Same as Picture (2), opposite page. For 2-pipe installation only with Ward Jet Pumps (C) and (D). Precision machined all-bronze jet, venturi. Install submerged with up to 1 pipe length (21 ft.) between jet and foot valve. For Pump No. 81 C 3606 with 4-in. diam. well, order also two 1¼- by 1½-in. bushings from Page 854 for use on companion flange under pump and on foot valve.

Find No. of your pump in Col. 1 below; find lowest water level of your well in Col. 2. Be sure to use depth after draw-down (level to which water drops and remains steady during operation). Order corresponding JET, *stating Jet Cat. No. and size* from Col. 3.

CONVERTIBLE JET SYSTEM 106.50 ⅓-HP

(H) Complete, compact unit for maximum lift of 25 ft. at sea level; 1 ft. less for each 1000 ft. above. Self-priming after first prime. Easy to install. Capacities for shallow well use are shown in table below. Easy to convert to deep well system with Conversion Kit below, plus 1- or 2-pipe jet of correct size. Capacities after conversion will be same as (B) on opposite page, for pump of same HP.

Lift or Depth to Water	Delivery Capacity in Gallons Per Hour					
	⅓-HP			¼-HP		
	Discharge Pressure					
	20 lbs.	30 lbs.	40 lbs.	20 lbs.	30 lbs.	40 lbs.
5 ft.	555	535	340	1050	1000	680
10 ft.	465	430	290	910	810	490
15 ft.	385	365	240	765	750	450
20 ft.	320	300	170	625	600	360

System includes balanced, efficient Bakelite impeller; special design Rotary Seal—no "water oozing," no lubricating necessary, less shaft wear; heavy duty grease-packed, sealed ball bearing motor; all-bronze built-in jet and venturi; Wards patented, non-clogging pressure switch, with automatic cleanout wire; exclusive air intake control that automatically provides correct air supply in ratio to water; galvanized steel tank—all on steel base.

WITH ⅓-HP MOTOR. For 110- to 120-volt, 60-cycle AC. Tank 20-gallon. Suction and discharge both tapped 1-in. pipe size. Requires 1-in. pipe from pump to well. Overall: 21 by 27 by 28 in. high. As little as $11 Down on Terms. Details on Inside Back Cover.

81 C 3535 R—Ship. wt. 150 lbs. . . . . Cash $106.50

WITH ½-HP MOTOR. For 110- to 120- or 220- to 240-volt, 60-cycle AC. Tank 30 gallon. Tapped for 1¼-in. suction and 1-in. discharge. Requires 1¼-in. pipe from pump to well. Overall: 22 by 27 by 39 in. high. Only $13 Down on Monthly Terms. Details on Inside Back Cover.

81 C 3537 R—Ship. wt. 180 lbs. . . . . Cash $126.50

CONVERTIBLE JET PUMP ONLY 86.50 ⅓-HP

On steel base. Same pump as in System (H) above, but without tank. Use with any size pneumatic tank; Page 855.

WITH ⅓-HP MOTOR: For 110- to 120-volt, 60-cycle AC. Tapped for 1-in. suction and ¾-in. discharge. Overall: 10 by 21 by 15½ in. high. "Shipping Information" below.

81 C 3530 R—Ship. wt. 75 lbs. $9.00 Down, or Cash $86.50

WITH ½-HP MOTOR. For 110- to 120- or 220- to 240-volt, 60-cycle AC. Tapped for 1¼-in. suction and ¾-in. discharge. Overall: 10 by 22 by 15½ in. high. "Ship. Info." below.

81 C 3532 R—Ship. wt. 80 lbs. $10.00 Down . . . . Cash $98.50

CONVERSION KIT 7.25

Converts Systems 3535, 3537 and Pumps 3530, 3532 above to deep well service. Includes automatic air charger with tubing, tools for removing jet and venturi, jet plug, pressure control valve parts, instructions.

Jet NOT included; order suitable size from Table at left, below. Capacities produced after conversion will be same as shown on opposite page for pump or system of same type and horsepower. "Shipping Information" below.

81 C 3733 R—Ship. wt. 3 lbs. 12 oz. $7.25

INSTALL IT YOURSELF . . . GET FREE BOOKLET

Save up to half the total cost of your water system by installing Wards top quality equipment yourself.

Send for Wards free booklet "Running Water For Farm and Country Home". Tells how to plan and install. Write to nearest Ward Mail Order House for your copy, or ask for one at a Ward Catalog Office. (List of offices on Page 954.) Wards loan tools to install Ward equipment—see Page 845.

HOW TO SAVE EVEN MORE AT WARDS

Wards policy is to save you money with low prices for quality merchandise. You may often make additional savings on transportation, etc. Check Metropolitan Delivery and Catalog Office services. See Pages 954 and 955.

PISTON TYPE SYSTEMS 75.95 TO 99.50

(J) 400-Gal.-Per-Hour System. Delivers constant volume from any depth to 25 ft. at sea level; 1 ft. less for each 1000 ft. above sea level. Install over well or offset. (Offset to 600 ft. with increased pipe sizes). Following features: (1) Heavy ¾-in., all-bronze Valve Deck. Rubber valves. Smooth-running. (2) Exclusive Ward Air Intake control valve automatically provides correct air supply in ratio to water pumped. (3) Exclusive Ward patented Non-clog Pressure Switch. (4) Seamless Brass Cylinder for smooth operation; non-corrosive. (5) Pressure Relief Valve automatically relieves at 65 lbs. (6) Positive Splash Lubrication—moving parts run in oil. Oil level gauge. Heavy forged steel crankshaft.

Heavy-duty, capacitor ¼-HP motor with built-in protection against overload burnout, for 110- to 120-volt, 60-cycle AC only.

Wards patented piston of Neoprene, a tough, resilient synthetic; outwears usual piston leathers. Valve silencers. Pump provided with special ½-in. tapped connection so that drinking water may be drawn directly from the well.

Heavy galvanized 20-gal. tank on sturdy, welded-steel base. Timken Taper roller bearings on BOTH sides of crankshaft for quieter, longer service. Tapped for 1-in. suction and ¾-in. discharge pipes. Brass 1-in. foot valve. Overall: 14 by 44 by 27 in. high. Only $10 Down on Terms. See Inside Back Cover for details of Monthly Payment Plan.

81 C 3525 R—Ship. wt. 167 lbs. . . . . Cash $99.50

(K) 275-GAL.-PER-HOUR SYSTEM. Leather piston washers. With ¼-in. all-bronze valve deck. Rubber valves, bronze springs. Three oilite main bearings; forged bronze connecting rod. Brass ¾-in. foot valve. Tapped for ¾-in. suction and discharge. Pump mounted on heavy, galvanized 15-gal. tank. Overall: 13 by 40 by 29 in. high. $9 Down.

81 C 3505 R—Shipping weight 137 lbs. . . . . Cash $85.50

(L) TANKLESS 275-GAL.-PER-HOUR PISTON PUMP. No tank required; 1-gal. air chamber. Pump starts each time faucet is turned on. On sturdy steel base. Otherwise like (K) above. Suitable for cottages, cabins, other installations with limited water requirements. May be located under sink. Overall: 13 by 31 by 21 in. $8 Down on Terms.

81 C 3500 R—Ship. wt. 92 lbs. . . . . Cash $75.95

WARDS MONTHLY PAYMENT PLAN

You may purchase your pump or water system at Wards for as little as 10% Down on Terms, the Balance in convenient Monthly Payments. See Inside Back Cover. Check Ward services, Pages 954, 955.

Hand Pumps . . . Accessories for Water Systems

HAND PUMPS 4.55 TO 29.50

1 2 3 Painted cast iron. Heads swivel. Long handles. (1) and (2) have rubber grips. *Not Mailable.*

(1) WINDMILL FORCE PUMP STANDARD. For hand, jack, windmill operation. For wells to 200 ft. Stroke adjusts 6, 8 or 10 in. Spout shutoff; hose clevis; tapped 1¼-in. pipe opening (with plug). Needs cylinder; rod and pipe from cylinder to base plus 23 in. Has tappings for 1¼-, 1½-, 2-in. drop pipe.
81 C 3815 R—Ship. wt. 83 lbs. $26.50

(2) FORCE PUMP STANDARD. For wells to 100 ft. Hose clevis. Stroke 6 in. Requires cylinder; rod and pipe from cylinder to base plus 23 in. Tapped for 1¼-in. pipe.
81 C 3813 R—Ship. wt. 70 lbs. $22.50

(3) LIFT PUMP STANDARD. For wells to 50 ft. Stroke 6 in. Requires cylinder; pipe from cylinder to base plus 23 in.; rod (29), cylinder to base plus 42 in. Tapped for 1¼-in. pipe.
81 C 3810 R—Ship. wt. 60 lbs. $18.95

SET-LENGTH LIFT PUMP. For water not lower than 29 ft. Includes Standard (3); cylinder (35); 4 ft. of pipe and rod.
81 C 3811R—Ship. wt. 85 lbs. $3.00 Down. . . .or Cash $27.50

4 5 HORIZONTAL SUCTION FORCE PUMPS. Painted cast iron. Maximum lift 22 ft. Direct action. Large air chamber. Deliver water on push and pull. *Not Mailable.*

(4) PORTABLE UTILITY TYPE. For pumping out ditches, cellars, etc.; filling tanks. Delivers 1000 gallons per hour at 30 strokes per minute. Hardwood handle. Cylinder 5 in. Suction and discharge tapped for 2-in. pipe (or hose). Turret head discharges in any direction. Strainer included.
81 C 3820 R—Ship. wt. 69 lbs. $3.00 Down. . . .or Cash $27.50

(5) HEAVY-DUTY. For small water system with pneumatic or gravity tank. Delivers 385 gallons per hr. at 100 lbs. pressure; 30 strokes per minute. T-handle; 1-in. steel shaft. Forces water as high as 230 ft. above pump. Cylinder 3 in. Tapped 1¼-in. suction; 1-in. discharge.
81 C 3821R—Ship. wt. 65 lbs. $3.00 Down. . . .or Cash $29.50

6 7 KITCHEN PUMPS. For lift to 22 ft. deep. Cylinder 3 in. Tapping for 1¼-in. suction pipe.

(6) Won't freeze with handle up. Sanitary swivel cap.
81 C 3800 M—Pail Hook. Ht. 13 in. Ship. wt. 14 lbs. $4.55

(7) Force Pump. Will pump to pressure tank. Spout with hose thread; removable for attaching faucet.
81 C 3803 M—3-in. brass cylinder. Ship. wt. 21 lbs. . . . $11.50

8 FREEZE-PROOF HYDRANT. Dependable. Ideal for watering and fire protection. Hose thread on spout. Iron lever. Brass hose connection. Brass rod through stuffing box and valve with renewable nylon seat.

Dig hole about 2 ft. in diam. to below frost line. Connect hydrant to underground pipe. Fill about 2 ft. with crushed stone or gravel; then dirt. Tapped for ¾-in. supply pipe. Have spout 28 in. above ground.
81 C 4047 RW—*Not Mailable. State size wanted.*
For frost line to 4 ft. Ship. wt. 22 lbs. $11.85
For frost line to 5 ft. Ship. wt. 24 lbs. 12.25

HOLE BORER . . . JET PUMP WELL CAPS

9 WELL AND POST HOLE BORER. Self-cleaning blades of high-carbon steel. Drills holes of 7- to 14-in. diameter. Handle ¾-in. steel; 48 in. long. Bores to 30 ft. depth with extensions (10), below.
81 C 3922 MO—Ship. wt. 17 lbs. $8.50

10 BORER EXTENSION. Steel. Attach 1 or more to Borer (9) above. Length 48 in.
81 C 3923 M—Ship. wt. 5 lbs. $1.60

11 12 SANITARY WELL CAPS FOR JET PUMPS. For 2-pipe, off-set jet pump installations only. Rubber gasket and draw bolts make tight seal. Keeps out dirt, surface water, small animals. Tapped hole for ½-in. vent for gaseous wells (plug included). Required in some states for Grade A milk rating. Makes easier, quicker seal. Two types:

(11) CAPS FOR STEEL PIPES. Cast iron. Pipes fit holes.

14 AUTOMATIC AIR VOLUME CONTROLS. For pneumatic tanks.

NO-TUBING AIR-ELIMINATION TYPE. For all deep well piston pumps including Wards 3581, 3582, 3583 and Ward shallow well pumps 3525, 3615 only if originally with air volume control.
81 C 4000—Threaded 1¼-in. pipe size. Ship. wt. 1 lb. 8 oz. . . . . $4.[illegible]

WITH 32-INCH TUBING; AIR ADDITION TYPE. For all shallow well pumps using this type control (including older model Ward 3505).
81 C 4001—Threaded 1¼-in. pipe size. Ship. wt. 2 lbs. 8 oz. . . . . $2.[illegible]

15 AUTOMATIC PUMP SWITCH. Two-pole type. Starts at 20 lbs.; stops at 40 lbs. (adjusts to 80 lbs.) For up to 2-HP 110- to 120-volt; 220- to 240-volt; ½-HP DC. Hand shut-off lever.
81 C 4004—Fits ¼-in. pipe. Ship. wt. 1 lb. 12 oz. . . . . $[illegible]

16 PUMP PRESSURE GAUGE. Tapped ¼-in. pipe size.
81 C 4005—Registers 0 to 100 lbs. Ship. wt. 12 oz. . . . . $1.[illegible]

17 PUMP RELIEF VALVE. Inlet threaded ½-in. pipe size.
81 C 4006—Relieves at 65 lbs. Ship. wt. 8 oz. . . . . $1.[illegible]

18 AUTOMATIC WATER SYSTEM AIR CHARGER. Use with any deep or shallow well pump with pneumatic tank up to 120 gals. Gives air charge to tank with pump operation. Prevents waterlogging.

Requires 1¼-in. tapped opening in tank; ⅛-in. tapping on suction side of pump. With 4-ft. copper tubing and compression fittings.
81 C 4077—With instructions. Ship. wt. 3 lbs. 8 oz . . . . . $[illegible]

26 27 WELL POINTS. Brass 60-gauze screens. Galv. steel shell. (26) for sandy soil; (27) for heavy gravel. *State pipe size and length less point.*

(25) FOR SHALLOW WELLS with hand pumps. Cast iron. For 1¼-in. suction pipe.
81 C 3916—Ship. wt. 3 lbs. 4 oz. $1.25

Kitchen Sinks for Custom- or Home-Built Cabinets

GUARANTEED FIRST QUALITY . . . SAVE EVEN MORE ON KITCHEN IMPROVEMENT . . . INSTALL ONE OF THESE SINKS YOURSELF

Any of the sinks listed below can be installed easily either on a single "free standing" cabinet, or worked into a continuous cabinet arrangement. Also for replacement of old top on cabinet of suitable size and construction. Choose porcelain enameled steel; porcelain enameled cast iron; or solid stainless steel. *All three are resistant to household acids and stains.*

Each of sinks (A), (B), (C), (D), (E) has basins, drainboards and splashback all in one seamless piece of the same material. Flat Rim Sinks (F) to (J) are designed to be built into a sink top covered with formica, vinyl or linoleum. Sinks (G), (H) and (J) have back ledges, with holes for mounting faucets. For type without ledge (F), faucet is mounted on cabinet or wall. Order your Flat Rim Sink with stainless steel rim included; for neat, watertight installation.

Fittings are NOT included with any sinks on this page. Order fitting sets from Page 863 or individual pieces, Page 857. (Cabinet sinks on Pages 862, 863.)

In selecting sink consider family needs, space and location. Also best size for aligning cabinets. Hang wall cabinets first for more working space; reduces risk of damage to floor cabinets. If sink is centered under window, it simplifies aligning if sink is wider than window.

For other tips to help you improve your kitchen cabinet and sink installation get Wards Free Kitchen Planning Booklet. Pick one up at Ward Catalog office or write the nearest Ward Mail Order House; helps you choose the right equipment, arrange sink, stove, and refrigerator. Convenient planning chart included.

If kitchen improvements will require changes in plumbing supply and drainage system you may wish to borrow tools to do the job. Wards loan tools for installation of Ward equipment; see Page 845 for details. Buy all your needed equipment in one convenient order and pay by the month; see Inside Back Cover. Pay while you enjoy your complete cabinet kitchen.

SOLID SATIN FINISH STAINLESS STEEL 77.50 TO 104.50 Without Faucet

(A) (B) ONE-AND TWO-BASIN SINK TOPS. Rugged, solid 20-gauge stainless steel. Lightweight—easy to handle for installation. Won't chip or break.

Never needs scouring—easy to clean with soap and water to keep smooth, polished appearance. Four-inch splashback protects wall. Raised edge on all sides checks dripping. Sturdy, durable work surface. Undersides sound-deadened.

Both 25 in. front to rear. Each has two drainboards, ribbed for drainage. Order fitting sets as specified—Page 863—or individual fittings Page 857. Also order 1½-in. trap from Page 857. Bolts for fastening included. Choose from two efficient, popular sizes.

(A) 54-INCH SIZE, ONE-BASIN SINK TOP. Measures 54 in. across front. Basin 16 by 18 in.; 6⅞ in. deep. Drainboard 17 by 23 in. Order Fitting Set 81 C 1505 R from Page 863, or make up your own set.

81 C 75 RW—Ship. wt. 55 lbs. $5 Down.....Cash $77.50

(B) BIG, EFFICIENT 66-INCH SIZE, TWO BASIN SINK TOP. Generous work surface more convenient—helps to get work done faster. Large size generally preferred where space allows. Each basin 16 by 13½ in.; 6⅞ in. deep.—clean vegetables in one while you do dishes in the other. Each drainboard 17 by 23 in. Order Fitting Set 81 C 1508 RW (Page 863). $5 Down.

81 C 80 RW—Ship. wt. 60 lbs.....Cash $104.50

CONVENIENT TERMS. You may purchase any Ward Kitchen Sink, Water Heater, Water Softener, or Garbage Disposer priced from $45 to $200 for as little as $5 Down. Other plumbing 10% Down. See Inside Back Cover.

IMPORTANT SHIPPING INFORMATION. "W" after Catalog Number means item is shipped from Detroit Warehouse. If nearer, to reduce time and transportation cost. Order from usual Ward Mail Order House. Save even more—see Pages 954, 955 for important information.

PORCELAIN ENAMELED STEEL 24.50 TO 48.95 Without Faucet

(C) (D) (E) Heavy smooth coat of stain- and acid-resistant white titanium porcelain enamel. With 3-in. backsplash. Front to rear, 25 in. Order Fitting Sets with Faucet (D), Page 863 or individual pieces, Page 857, plus 1½-in. trap, Page 857.

(C) 42-INCH SIZE. ONE BASIN, 1 DRAINBOARD. Measures 42 in. across front. Basin 20 by 16 in., 6 in. deep. Only $2.50 Down. Ship. wt. 58 lbs.

81 C 151 RW—WITH LEFT-HAND DRAINBOARD. (Shown).Cash Price $24.50

81 C 152 RW—WITH RIGHT-HAND DRAINBOARD. (Not Shown.)..Cash 24.50

(D) 54-INCH SIZE. ONE BASIN, 2 DRAINBOARDS. Measures 54 in. across. Large basin 20x16½ in., 6 in. deep. Each drainboard 14¾x21⅜ in.

81 C 163 RW—Ship. wt. 75 lbs. Only $3 Down.....or Cash $29.95

(E) 66-INCH SIZE. TWO BASINS, 2 DRAINBOARDS. Generous work surface more convenient—helps to get work done faster. Measures 66 in. across front. Each basin 15 by 16½ in., 6 in. deep. Each drainboard 14¾ by 21⅜ in. Large size preferred where space allows.

81 C 164 RW—Ship. wt. 80 lbs. Only $5 Down.....or Cash $48.95

LEDGELESS PORCELAINED 13.45

(F) ONE BASIN. No Faucet Ledge. White titanium porcelain enamel is acid- and stain-resistant. Fitting Set, Page 863; 1½-in. trap, Page 857. Center outlet diam. 3½ in. Basins 6 in. deep. With or without stainless steel rim. *Not Mailable.*

PORCELAIN-ENAMELED STEEL. Strong 14-gauge. Lightweight, easy to handle for installation. Size overall: 24 by 18 inches.

81 C 52 RW—WITH RIM. Wt. 28 lbs.$13.45

81 C 1 RW—WITHOUT RIM. Wt. 24 lbs. 9.95

PORCELAIN ENAMELED CAST-IRON. Solidity preferred by some. Overall: 30x18 in.

81 C 55 RW—WITH RIM. Wt. 72 lbs. $19.95

81 C 31 RW—WITHOUT RIM. Wt. 69 lbs. 15.95

PORCELAINED LEDGE SINKS; STAIN-, ACID-RESISTANT 11.95 TO 54.50 Untrimmed

(G) (H) Ledge 3½ in. wide; 4 holes. Connection centers 8 in. apart. Fittings not included—order set, Page 863, or parts, Page 857. Also, order 1½-in. trap, supply pipes, Page 857. *Sinks Not Mailable.*

(G) ONE-BASIN, STEEL. Strong 14-ga. Basin 20x16 in., 6 in. deep. Overall: 24x21 in. Ship. wts. 28, 24 lbs.

81 C 54 RW—WITH STAINLESS STEEL RIM.$15.95

81 C 7 RW—WITHOUT RIM..... 11.95

ONE-BASIN, CAST IRON. Similar appearance to (G). Basin 21 by 16 in. by 8 in. deep. Overall: 24 by 21 in. Ship. wts. 89, 85 lbs.

81 C 56 RW—WITH STAINLESS STEEL RIM.$26.95

81 C 35 RW—WITHOUT RIM..... 22.95

(H) TWO-BASIN, STEEL. (General description, left.) Strong 14-ga. Basins 13x15 in., 7¼ in. deep. Overall: 32x21 in. Wts. 44, 39 lbs.

81 C 53 RW—WITH STAINLESS STEEL RIM.$22.95

81 C 5 RW—WITHOUT RIM..... 18.95

TWO-BASIN, CAST IRON. Two sizes:

Overall: 32 by 21 in. Each basin 13 by 15 in. by 8 in. deep. Ship. wts. 120, 116 lbs.

81 C 57 RW—WITH STAINLESS STEEL RIM.$41.50

81 C 39 RW—WITHOUT RIM..... 36.95

Overall: 42 by 21 in. Each basin 15 by 18 in. by 8 in. deep. Ship. wts. 150 and 140 lbs.

81 C 58 RW—WITH STAINLESS STEEL RIM.$54.50

81 C 45 RW—WITHOUT RIM..... 49.50

STAINLESS STEEL 43.50 Without Faucet

(J) TWO-BASINS. Lightweight for easy installation—yet strong and rigid. Polished satin finish—smooth, and easy to clean. Resistant to all household acids and stains. No scouring; clean with soap and water. Sound deadened. Fittings not included—order set, Page 863. Order 1½-in. trap, supply pipes, Page 857. *Not Mailable.*

81 C 63 RW—WITH STAINLESS STEEL RIM..$43.50

81 C 61 RW—WITHOUT RIM..... 38.95

Overall: 32 BY 21 IN. Heavier 18-ga. Each basin 13½x16 in. by 7 in. deep. Ship. wts. 31, 27 lbs.

81 C 64 RW—WITH STAINLESS STEEL RIM..$61.50

81 C 62 RW—WITHOUT RIM..... 56.95

STOP "SAVING" GARBAGE...SUPERIOR DISPOSER $5 DOWN

(K) CONVENIENT, TIME-SAVING, SANITARY. No other modern appliance gives so much for so little. Just scrape the garbage down the drain. No handling. No messy cans. No odor. No bother meeting collection schedules. No vermin attraction.

Compare these Ward features with any:

"OMNIVEROUS." Yes, it chews up almost anything—bones, fruit pits, cobs, paper napkins, as well as softer kitchen wastes.

EASIER, HANDIER CONTROL. No opening doors, no stooping, no fumbling with pull cord. Install wired-in, permanent switch where *most convenient to you.* Turn on cold water and flick switch. Scrape food wastes into opening. No complex water switch.

CONTINUOUS FEED. No stopping, no waiting.

HUSKY, HEAVY-DUTY CONSTRUCTION. Light enough for easy installing, only 33 lbs. (packed), yet no skimping.

NON-JAMMING. No need for reversing switch or special un-jamming tools.

FINEST SURGICAL STEEL ALLOYS make cutting parts, shredding compartment hard, keen, enduring. Housing thick aluminum.

SPECIAL ¼-HP MOTOR. Permanently sealed lubrication. Automatic overload burnout protection; simple hand re-set. For 110- to 120-volt, 60-cycle AC. Approved by UL.

BIG CAPACITY. Holds 2 qts. Fast grinding.

NO ODOR. NO MESS. SELF-CLEANING. Top closure serves also as sink stopper.

LOW COST. No more a day than clock.

FOR OLD OR NEW SINK. 3½- or 4-in. opening.

EASY TO INSTALL IT YOURSELF. Usually old trap can be used. Takes 9½- by 14½-in. space. Instructions included. Do NOT use with grease trap. Check local codes. Order switch and wire separately; see Index.

FOR SEWER OR SEPTIC TANK CONNECTION. (Septic tank not smaller than 500-gal.) *Mailable.* Ship. wt. 33 lbs. $5 Monthly.

81C480 MBW–$5 Dn., or Cash Price $64.95

HOW TO SAVE EVEN MORE;

USE THESE WARD SERVICES

Aside from Wards low every day prices for quality merchandise, there are many ways to lower total costs.

SHOP AT A WARD CATALOG OFFICE if there is one near you (see Pages 954, 955). No letter postage; no remittance fees; often substantial transportation savings on called-for orders.

USE LOW-RATE METROPOLITAN DELIVERY where available—see Pages 954, 955.

INSTALL IT YOURSELF. Wards loan tools, tell you how. See Page 845.

BUILD UP FREIGHT SHIPMENTS to 100 lbs. for full use of minimum charges.

You Can Plan and Install Your Own

FLEXIBLE—USE SINGLY; IN GROUPS; WITH CUSTOM CABINETS

Wards matched steel units blend with steel stove, sink, refrigerator. Fire- and vermin-proof. Heavy steel, superior construction assure lasting rigidity; smooth, quiet operation. Cabinets bonderized and finished inside and out with two coats of baked-on White enamel; durable and easy to clean. Double-wall, insulated, sound-deadened doors and drawer fronts. Stainless steel handles.

Nine selections in guaranteed first quality cabinet sinks—equally suitable as free-standing units or in continuous cabinet groups.

DE LUXE SINK CABINETS (1, 2, 3, 4, 5) AND STANDARD (6, 7, 8, 9) are the same basic construction. Differ in drawers and arrangement. Five easy ways to assemble cabinet kitchen with Ward Steel units:

1. WITH INDIVIDUAL TOPS. Choose Formica or Vinyl bonded to steel. Formica in Red, Yellow or Green Moonglo or Gray mother-of-pearl pattern—some shown on Page 784. Vinyl marbleized black only.

2. WITH STRAIGHT CONTINUOUS TOPS. Formica only. Order next page.

3. WITH STRAIGHT OR L- OR U-SHAPE CUSTOM STEEL TOP. Formica only. Write Wards Engineering Dept. for prices. Submit exact plan on chart included with free Kitchen Planning booklet—see Page 945.

4. WITH STRAIGHT OR L- OR U-SHAPE PLYWOOD CUSTOM TOPS. Formica. Order 25 in., front to rear, Page 780; order sinks, cabinets here.

5. WITH LOCALLY MADE CUSTOM TOPS. Order sinks, cabinets here.

STAINLESS STEEL SINKS ON DE LUXE CABINETS . . . $5 DOWN

1 2 THE TREND IS TO STAINLESS STEEL. The smooth, rich, satin finish is beautiful and sanitary—and easy to keep that way. Never needs scouring—just clean with soap and water; merely wipe up most spots. Highly stain- and acid resistant. Solid material, through and through—no surface coating.

Top is a single rigid, tough unit of basins, drainboards and splash back formed of 20-ga. stainless steel, coated on under side with sound deadening material. Raised edges prevent dripping. Splashback 4 in. high. A truly work-saving, luxurious, enduring sink.

De Luxe steel cabinets, with baked-on white enamel finish. See general description at left. See Small open views at far left.

Top 25 in., front to rear. Height: at front 36 in.; at back 40 in., including splashback. Fittings are not included. Order suitable fitting set from opposite page; also, order 1½-in. sink trap and supply pipes Page 8[illegible]

54-INCH CABINET SINK WITH 1 BASIN, 2 DRAINBOARDS

1 General description above. Each drainboard 15 by 21 in. Basin [illegible] by 16½ in. and 6 in. deep. Overall: 54 in. wide across front.

Solid Alcoa Tank

WARDS BEST GAS WATER HEATER

FOR MODERN LIVING . . . STRONGEST 10-YEAR GUARANTEE

ONLY SOLID ALUMINUM ALLOY TANK Has All These Features.
CONTINUOUS OPERATION At Modern High Temperatures.
TANK CAN NEVER RUST OUT; Never Discolor or Taint Water.
TWO TEMPERATURES AT ONCE; Fast Recovery Rate.

(A) Now—a fully automatic water heater to meet the demands of the truly modern home—a heater that will deliver abundant hot water continuously at the high temperature needed for automatic washers and dishwashers. The Alcoa *solid* aluminum alloy tank makes this possible. Now you can forget hot water rationing.

No CONSTANT BOTHERING WITH THERMOSTAT. With simple Duo-Temp Control (listed separately at right below) this Water Heater delivers water at 180° for automatic washer, 130° for faucets, *at same time.* Strongest guarantee we've seen—see opposite page.

UNUSUALLY HIGH RECOVERY RATE. Keeps pace with today's heavy need for hot water; heats more water per hour than most water heaters—see table; compare with any. Recovery rate in table is gallons raised 60° or 100° F, as stated, in 1 hour. Approved by *AGA.*

COMBINATION THERMOSTAT, SAFETY-PILOT. Minneapolis-Honeywell. Automatically stops ALL gas flow to BOTH burner and pilot if pilot ever goes out. Adjustable from 120° to 180°F.

INTERNAL FLUE WITH EFFICIENT BAFFLE DESIGN. Water surrounds flue for maximum heat transfer; minimum waste of heat.

"CONTROLLED FLAME" BURNER. Improved efficiency. Cast iron with drilled, raised ports. Stainless steel burner pilot. Both quiet.

Steel jacket with baked-on white enamel finish, contrasting gray top, bottom. Insulation between jacket and tank 1½-in. fiberglas—holds heat. Pressures: test 300 lbs.; working 127½ lbs. Connections: Gas ½ in.; Water ¾ in. (connectors on Page 855). Requires relief valve and vent pipe—Page 866. Vent pipe 4 in. for 40 gal.; 3 in. for others. With draft diverter and drain valve. *State on order type of gas used.* Only $5 Down, $5 to $7 Monthly—see Inside Back Cover.

1- and 10-Year Gas Water Heaters

GLASS-LINED AND GALVANIZED TANKS

WARDS LOWEST PRICE; 1-YEAR MODEL WITH GALVANIZED STEEL TANK

(B) Automatic dependable service. Approved by AGA. Thermostat with safety cut off. Stops flow to burner *only* if pilot light goes out. Recovery rate in table is gallons raised 60° or 100°F., as stated in 1 hour.

Galvanized steel tank. Steel jacket with baked-on white enamel finish, contrasting gray bottom. Insulation 1-in. fiberglas.

Drilled-port cast-iron burner. Connections: water ¾ in. gas ½ in. (connectors, Page 855). Order relief valve and 3-in. vent pipe, Page 866. Drain valve with hose thread on spout, draft diverter and instructions incl. $5 Down.

For Natural or Mixed Gas from mains only. (Not for *bottled gas, or butane-, propane-air gas mixtures*).

WARDS BEST GLASS-LINED 10-YEAR MODEL

(D) GLASS CAN'T RUST OR CORRODE. Distinctive features for long life, thrifty operation, fast heating, abundant hot water. Approved by AGA.

COMBINATION THERMOSTAT, SAFETY-PILOT. Stops gas flow to BOTH burner and pilot if pilot flame goes out, for maximum safety. Recovery rate in table is gallons raised 60° or 100°F as stated, in one hour.

INTERNAL FLUE WITH BETTER BAFFLE DESIGN. Water surrounds flue for maximum heat transfer. Less heat wasted. Segment type baffle; removable; easy to clean.

BETTER BURNER DESIGN. Cast iron, with smoothly drilled side ports—more efficient; ports don't clog.

Concealed, accessible controls. Steel jacket with baked-on white enamel. Insulation 1½-in. fiberglas. Pressures: test 300 lbs.; working, 127½ lbs. Connections: gas ½-in.; water ¾-in. (connectors, Page 855). Use 3-in. vent pipe on 20-, 30-gal.; 4 in. on 45- and 60-gal. sizes. Order relief valve, Page 866. Drain valve, draft diverter, instructions included. $5 Down.

Wards Five- and Ten-Year Electric Water Heaters

FOUR SIZES...GLASS LINED AND GALVANIZED TANKS

TABLE TOP MODEL—GLASS-LINED

TANK GLASS LINED—Glass Can't Rust or Discolor Water.
PORCELAIN ENAMELED work Surface, Splashback.
10-YEAR PROTECTED—See Full Details of Plan Below.

(G) Fits into most standard cabinet kitchens. Extra work area. Top resists household acids, and stains; will not scorch. Standard height of kitchen cabinets, stoves, sinks (36 in.). Tank stores 35 gallons. Simple and functional modern styling. Approved by UL.

White porcelain enameled 4-inch splashback protects wall. Seamless, continuous with table surface. No cracks to trap dirt. Easy to clean. Thick fiberglas insulation.

High-temperature safety control prevents overheating if thermostat fails. Thermostat adjustable from 120° to 180°F. Pressures: test 300 lbs.; working 127½ lbs.

Cold water diffuser; incoming cold water doesn't cool heated water.

Nickel-chrome alloy elements. Double-element heater (81 C 2831) can be connected for full or limited input, as required by local power company—consult them. Single-element heater wired for full input only. Wattages meet NEMA standards; others available—write if interested. All for 220- to 240-volt AC.

Top slides off for easy access to all connections. Water pipe size ¾ in. Drain valve with hose thread included. Width 24 in.; depth 25 in.; front height 36 in. Order safety relief valve, Page 866.

Tank, Gals.	Element, Watts Lower	Element, Watts Upper	Wt. Lbs.	Catalog Number	Down	Cash Price
35	1500	None	245	81 C 2830 R	$5.00	$117.50
35	750	1500	245	81 C 2831 R	5.00	127.50

10-YEAR SMALL SIZES . . . GLASS-LINED

(H) (J) For apartments, doctors' and dentists' offices, cottages. Approved by UL. Covered by 10-Year Protection Plan (below). Insulated with 2-in. mineral wool. Steel jacket; white-baked-on enamel finish.

Element 1250-watt. Automatic, thermostatic control. For 110- to 120-volt, 60-cycle AC only. Water connections, ½ in. Outlet box on side. Diam. 16 in. Relief valve required; order from Page 866. *Not Mailable.*

(H) WITH 15-GAL. TANK. Height 34¾ in. Ship. wt. 82 lbs.
81 C 2847 R—Pay $5 Down, or.....Cash 47.95

(J) WITH 6-GAL. TANK. Height 16½ in. Ship. wt. 50 lbs.
81 C 2846 R—Pay $4 Down, or.....Cash 39.95

5-YEAR MODEL . . . GALVANIZED TANK

(K) Efficient. Automatic. Abundant hot water for many years under usual conditions. Protection Plan below.

Extra heavy galvanized steel tank. Steel jacket with white baked-on enamel. For 220- to 240-volt AC. Approved by UL. Test pressure: 300 lbs.; working pressure 127½ lbs. Fiberglas 3-inch insulation. Cold water diffuser saves fuel. Prevents incoming water from cooling heater. Thermostat adjustable from 120° to 180°F. Heat trap conserves hot water.

Electrical and water connections accessible—heater can be placed against wall to save space. Drain valve with hose thread on spout. Requires relief valve; from Page 866. Instructions included. Pay $5 Down on Terms.

Tank Size	Element Watts Upper	Element Watts Lower	Wt. Lbs.	Size In.	Catalog Number	Cash Price

WARDS BEST ELECTRIC . . . 10-YEAR GLASS-LINED

EXTRA THICK FIBERGLAS INSULATION. Holds Heat.
GLASS LINING . . . Can't Rust or Discolor Water.
10-YEAR PROTECTION . . . See Full Details Below.

(L) No matter what your home hot water requirements, if you use electricity, one of these should meet them. Top quality, designed to give long, economical service. Approved by UL. Fiberglas insulation 3 in. thick on sides; 4 in. thick on top and bottom. Jacket with baked-on white enameled finish. Pressures: test 300; working 127½ lbs.

IMMERSION TYPE ELEMENTS OF NICKEL CHROME ALLOY. Assure efficient heat due to complete immersion. Two elements (except No. 81 C 2835 which is single-element) can be connected to operate either at the same time or one after the other (for full or limited input), as required by power company—consult them. If they require wattages not listed below, write Wards. Wattages in table meet standards of NEMA. All heaters listed for 220- to 240-volt AC. Single element heater (81 C 2835R) wired for full input only.

HEAT TRAP CONSERVES HOT WATER. Also, cold water diffuser prevents incoming water cooling heated water. Thermostat adjustable from 120° to 180°F.

CAN BE PLACED AGAINST WALL AND STILL BE SERVICED . . . saves room space. Complete instructions included. Important: order safety relief valve from Page 866. Electrical and ¾-in. water connections, drain valve with hose thread are all easily accessible.

SAVE ON DELIVERY

Always check Wards Metropolitan Delivery and Catalog Office Will-Call Service for possible savings on transportation charges. See Pages 954 and 955. Complete your shopping without even leaving your home.

IMPORTANT SHIPPING INFORMATION. Water heaters with "F" at end of Cat. No. (except for manufactured gas) shipped promptly from Albany stock or Pittsburgh fact.—pay freight from ship. point. Water heaters for manufactured gas from factory only. Send all orders to Wards at Albany. Consult Wards Engineering Service on any plumbing or heating problem; Pg. 845.

FACTS ABOUT WATER HEATERS . . . SIZE TO CHOOSE

Wards Automatic Water Heaters have water storage tanks of three types: Solid Aluminum alloy; Glass-lined steel; and Galvanized steel. No water heater of any type should be operated without a safety relief valve to protect against excessive temperature or pressure, if controls fail. Required by code in localities.

WARDS GAS WATER HEATERS. (A) has Alcoa tank; (B) (E) and (F) galvanized tank; (C) (D) glass-lined. Rapid recovery permits smaller storage tank. Gas from city mains is usually manufactured, natural, or mixed. (Butane- or propane-air-gas mixtures also may be delivered through mains.) Gas in steel cylinders or tanks is called bottled or liquefied petroleum gas (LPG).

Recovery rate is amount water raised by 60° or 100° F, as stated, in one hour. For example: If water comes from pump or main at 60° and heater will deliver 35 gals. water at 60° rise, it will heat 35 gallons up to 120° F. You can set your thermostat higher than 120°, but longer time will be required. If you use water faster than heater can raise it to the temperature fixed by thermostat setting, it will fall behind.

WARDS ELECTRIC WATER HEATERS. (G), (H), (J), (L) are glass lined. (K) has galvanized steel tank. Some power companies offer special rate; sometimes limited to specific hours. See Power Co. before ordering. Recovery rate slower than gas, requiring larger storage tank.

TO CHOOSE SIZE. (See table, below.) Count each child age 6 or younger as 2. If you have young children, do laundry at home (especially with automatic washer) select larger size. For adult family with laundry sent out, smaller size than indicated may suffice.

Family	Electric	Gas
2 to 3	30 to 35 gals.	20 to 30 gals.
3 to 4	50 gallons	30 to 45 gals.
4 to 7	80 gallons	45 to 60 gals.
7 to 9	80 gallons	[illegible] gallons

TERMS, INSIDE BACK COVER

Water Softeners Laundry Tubs Water Heater Need

WATER SOFTENER PAYS FOR ITSELF 61.50 TO 157.50

SAVE UP TO $100 a year on soap, etc.

$5 DOWN, $5 TO $8 Month on Terms.

FREE WATER ANALYSIS on request.

1 2 Tests show savings up to $100 a year on soap, fabric life, plumbing repairs, etc. with soft water.

Adequate rental softener service costs $6 or more per month for average family. At Wards, $5 Down; $5 to $8 Monthly buys your own Softener.

Ward Softeners are THREE-PURPOSE:—Resinous Zeolite softens water, clarifies, and removes moderate iron content in one operation. Baked-on 2-coat white enamel tank finish. Use any regenerating salt. Softeners shipped from Chicago Factory. Allow Factory 1 week extra. Wards will test water free; *write for free container.*

(1) SINGLE-VALVE SOFTENER. Quick, easy regeneration. Extra-heavy steel tank, galvanized inside and out.

FACTS ABOUT WARDS BATHROOM CABINETS

CABINET CONSTRUCTION. Bodies all steel. T kinds of construction are: 1) Seamless Draw smooth, no seams or cracks; inside corn slightly rounded—dust-tight, easy to clea 2) Spot-welded—tight, visible seams; squa inside corners. Both types sturdy.

All Ward Bathroom Cabinets have baked-o white enamel finish, inside and out.

RECESSED OR SURFACE

Basic type are RECESSED and SURFACE-MOU Choice depends upon bathroom construc appearance desired, price and perman Size depends on space, family's size and n All have approved decorator styling.

Recessed or built-in cabinet has mirror face close to wall with cabinet inside wall. quires cutting hole in wall, or in new cons tion, building in before finishing (picture (2) low, left). Type generally preferred.

Each Ward Recessed Cabinet has blade slot. All Ward Recessed Cabinets 4½ deep; require 3½-in. hole in wall. Instruc screws included.

Surface Mount cabinets are quickly insta by attaching to wall surface. Easily move desired. Entire cabinet projects into room. small picture (2) below, left.

MIRRORS; THICKNESS AND TYPE

Mirrors used on Ward cabinets are of 3 (see table below): Average thickness is: GLASS ¼ in.; DOUBLE-STRENGTH WINDOW 5/32 in.; SINGLE-STRENGTH WINDOW GLASS Plate Glass Mirrors are the best—more fully selected, ground and polished; gi reflection; greater breakage resistance of each is specified in individual descrip

All mirrors on Wards Cabinets have spo on backing for added protection against spoilage. Mirrors are mounted with either less steel frame or stainless steel clips. Both firmly. Full length mirror on cabinet (H) is white rubber channel for protection ag shock. Shape of mirror is matter of pers preference.

THREE DOOR DESIGNS

HINGED DOORS. Open to 90°. Hinged as shown. Rubber bumpers, except (E).

SLIDING DOORS. In both Surface (D) cessed (M) (V). Increasingly popular in homes. Doors do not interfere with head no bumping.

HINGED DOORS WITH SHELVES ON BACK. Sur cabinets (H) and (J) show how shelves are back of mirror for additional, more conve storage space. Many uses.

TWO DOOR PULL TYPES

WARDS LARGE SPECIAL DESIGN. Shaped for secure finger tip control. Pull is 3 in. w gives better grip than usual small pull. Us most of Wards Bathroom Cabinets. Chro plated. Projects ⅜ in. below mirror.

SMALL DESIGN. Stainless steel. Tab 1½ in. projects ⅜ in. below mirror.

LIGHTING OF CABINETS

Cabinets (K) to (P) include built-in side (L) to (P) have Fluorescent fixtures 21 in. with two 15-watt bulbs. (K) has Incand fixtures. Lighted cabinets wired, ready stall; junction box on top. Light switch hand bracket; outlet in right-hand brac shaver, etc. All approved by Underw Laboratories (UL). For separate cabinet and bulbs, see Index.

INSTALL IT YOURSELF AND SAVE. Write for free Plumbing Simplified booklet. Save even more—see Pages 954 and 955.

FIRST QUALITY STAINLESS VITREOUS CHINA CLOSETS

Each of Wards water closets below is solid, smooth white vitreous china. (Colored china closets, Page 873.) Stain- and acid-proof; easy to clean. Top quality. Glazed trapways for thorough disposal. Large water areas for less soiling. Water seals prevent gas back-up. Each of Wards Water Closets styled to harmonize with Ward lavatories and tubs.

Tank bolts to bowl; forms a single unit. Tank back is glazed; may be set away from wall. Rough-in specification on closets (16),(17) and (18) is 12 inches. Rough-in means the *shortest* distance allowable from finished wall to center of closet outlet; may be greater.

Brass flushing mechanism with chromium plated flush lever handle included. Seat and supply pipes, screws, bolts, setting compound NOT included—order separately: seats Page 872; supply pipes Page 856.

THREE CLOSET TYPES AT 31.95, 34.25 AND 44.50 Without Seats

16 SIPHON WASHDOWN TYPE. Positive flushing, but not as quiet as (17) and (18); requires more water. Trapway 1½ in.; efficient disposal. Tank top 21 by 8 in. Height about 29 in. See general description above. Only $3.50 Down on Monthly Terms.
81 C 810 R—Shipping weight 92 lbs.....Cash Price $31.95

17 REVERSE TRAP TYPE. Reverse-trap flushing with minimum water. Trapway 2 inches. Larger water area than (16) but not as large as (18). Deep water seal. Tank top 21 by 8 in. Height overall approximately 29 in. See general description above. Pay only $3.50 Down; see Inside Back Cover for credit details.
81 C 820 R—Shipping weight 97 lbs.....Cash Price $34.25

SAVE ON TRANSPORTATION, LETTER POSTAGE AND MONEY ORDER FEES. Order and pick up merchandise at a Ward Catalog Office. Experienced clerks will help you order. Try this convenient way to shop. For list of offices, see Pages 954–955. Check delivery services there, also.

MONTHLY PAYMENT PLAN on Inside Back Cover of Catalog.

18 SIPHON JET CLOSET. Wards quietest. Most thorough cleansing with minimum water. Largest trapway—2¼-in. Largest water area. Deep water seal. Tank top approximately 21 by 8 in. Height about 29 in.
81 C 830 R—Ship. wt. 100 lbs. $4.50 Down. (See Inside Back Cover).....or Cash $44.50

19

Closet Tank Liner

PREVENT TANK DRIPPING WITH PLASTIC FOAM LINER

19 Prevents dripping due to condensation of moisture in air even in high humidities. Lasts indefinitely. Kit contains: 1 piece for bottom; 1 for back; 2 front and side pieces; 1 extra piece to use in case of spoilage; adhesive; applicator stick; instructions. Easy to install. Clean tank. Cut out bottom, fit ides and back, apply adhesive and place in position. Not necessary to remove working parts.
81 C 2369—Ship. wt. 3 lbs.....Complete Kit $3.19

First-Quality Colorware in Iron or Steel, by Set or Piece

MODERATELY PRICED...VARIOUS TUB AND LAVATORY STYLES

(W) Steel Recess Tub

(X) Steel Corner Tub

(Y) Regular Iron Recess

(Z) Low Iron Recess

THESE FACTS WILL HELP YOU SELECT COMPLETE BATHROOM SETS OR INDIVIDUAL PIECES

COLOR OR WHITE. Wards offers a wide selection of first-quality, finely-styled bathroom equipment at moderate prices. Choose any of the four decorator-approved colors shown on the opposite page, or white from Pages 870, 871.

All sets and individual pieces listed below are offered in all four colors. For example, the cast-iron tub is shown only in Gray (D) but you may order this set or tub in Blue, Green or Coral, as well as Gray. Sets are offered only with recess tubs. Both recess and corner tubs are listed individually.

ORDER SET OR INDIVIDUAL PIECES. If you don't see the Set you want, make up your own by ordering fixtures and fittings individually.

IF YOU ARE MAKING UP YOUR OWN SET for full-bath, half-bath, or powder room, you may wish a Vanity Lavatory, with custom-built cabinet. Colored basins and tops below harmonize with Ward bathtubs and closets.

CHOICE OF MATERIALS. Three types of tubs: 1) Porcelain enameled steel, standard; 2) Porcelain enameled cast iron, standard; 3) Porcelain enameled cast iron in new "Low-Narrow" style. Lavatories in Sets are China or Iron as stated. Individual lavatories in both China and Iron.

Sets and pieces in color are listed below; White fixtures and pieces on Pages 870 and 871. Small pictures at left show the various bathtub types.

RECESS TUB fits room (or recess) same width as tub length. Back and both ends unfinished; walls or partitions required at back and BOTH ends.

CORNER TUB has only one end finished, so walls are required at drain end and back only. All tub styles, sizes and colors are offered with openings in waste-overflow (drain) at either your left (as pictured) or right, as you face tub. (Faucet to be installed in wall above tub, same end.)

THREE BASIC MATERIALS ARE USED IN BATHROOM FIXTURES—Steel, Cast Iron and Vitrebus China. Bathtubs are either steel or cast iron. For Lavatories all three materials are used. Closets are made only in vitreous china.

STEEL FIXTURES are formed by huge presses from tough sheets, thick for rigidity. Their lighter weight makes handling and installing easier.

CAST-IRON FIXTURES are molded of molten iron; sand-blasted and ground smooth. These heavy castings have a solidity preferred by some.

Exposed surfaces of both steel and cast-iron fixtures have glass-like porcelain enamel fused on at intense heat to give a hard, smooth, stain-resistant surface. Steel tub sound deadened. Steel tub has raised flanges, cast-iron tub beaded edges, at top on wall sides, for building in tightly.

VITREOUS CHINA FIXTURES are molded of fine clay; then fired into a solid, uniformly hard, non-porous material, with a smooth, luxuriant glaze, impervious to all usual household acids and stains. China lavatories have molded-in overflows; no annoying rust.

For most convenient, economical shopping at Wards, see Pages 954, 955.

SETS COMPLETE WITH FITTINGS 179.95 TO 242.95

(A) TO (D) ALL IN 4 COLORS WITH STEEL OR IRON TUB. All first quality throughout. Read also general facts above.

If none of these popular sets meets your needs it is easy to make up your own from separate listings on this page.

Self-Propelled and Easy-Pushing Rotary Mowers

Rotary mowers are lightweight, easy to maneuver in close places. One-piece revolving blade cuts grass and weeds cleanly, leaves no stems sticking up on lawn. Dry grass cuttings and leaves are finely chopped to help mulch lawn; no raking needed. Trim close to trees, shrubbery—eliminates most hand clipping. Multiple wheel suspension gives smooth cut, even on inclines and rough ground. Work equally well forward or backward (except (F) which is self-propelled); no need to turn mower at end of every swath. Gasoline mowers have 2 or 4-cycle engines. 4-cycle engines operate more smoothly, do not require mixing oil with gasoline, are more economical to operate. 2-cycle engines have fewer moving parts, require less maintenance; oil and fuel mixture provide continuous lubrication. *Shipped promptly by Freight, Truck or Express.*

18-IN. GASOLINE ROTARY MOWER 64.50

OUR LOWEST PRICED gasoline rotary mower
1.6-HP CLINTON lightweight 2-cycle engine
LIGHTWEIGHT rustproof aluminum frame

(A) LAKESIDE (BETTER) QUALITY. Nationally known Clinton engine with automatic governor control, shock-type clutch. Rope starting. New aluminum alloy frame design and improved muffler reduce engine noise. Beveled spring steel blade creates suction, lifts grass for smoother cut—height of cut adjusts from 1 to 3 in. Puncture-proof semi-pneumatic rubber tires. Adjustable tubular steel handle with plastic grips. Wheels are not power driven. Ship. wt. 57 lbs.

84 C 8308 R—Only $6.50 Down on Terms..Cash $64.50
84 C 8158—EXTRA BLADE for (A). Wt. 3 lbs..... 1.95

17-IN. GASOLINE ROTARY MOWER 69.50

SIDE DISCHARGE throws grass cuttings clear
1¾-HP CLINTON 4-cycle gasoline engine
RUGGED LIGHTWEIGHT rustproof aluminum frame

(B) WARDMASTA. Our finest quality. Grass cuttings are thrown to side, out of operator's way—won't clog blade. Nationally known Clinton engine with governor control, shock-type clutch; rope starting. Aluminum frame has removable front guard for cutting heavy growth. Beveled spring steel blade; cut adjusts from 1¼ to 3 in. Semi-pneumatic rubber tires. Tubular handle, plastic grips. Wheels not power driven. Ship. wt. 55 lbs.

SELF-PROPELLED GASOLINE AND ELECTRIC REEL-TYPE POWER MOWERS

18 TO 24-IN. REEL-TYPE GASOLINE MOWERS 89.50 TO 134.50

NATIONALLY-KNOWN BRIGGS & STRATTON 4-CYCLE ENGINE with automatic recoil starter for quick, easy starting.
MOWER PULLS ITSELF; ALL YOU DO IS GUIDE IT. V-belt drive from engine to jack shaft; non-slip roller chain drive to reel.
FIVE HEAT-TREATED CRUCIBLE STEEL BLADES firmly attached to sturdy 6-in. diam. reel. Height of cut adjusts ⅞ to 1⅞ in.
AUTOMATIC CLUTCH ENGAGES REEL AND WHEELS by advancing throttle control; disengages when speed is reduced.
FULL FLOATING TUBULAR STEEL HANDLE is welded into one-piece unit, has plastic grips. Stands upright for storing.
CLOSED-TYPE CAST-IRON WHEELS with wide diamond tread puncture-proof semi-pneumatic tires; chrome plated hub caps.

(G) 18-IN. WIDTH CUT. WARDMASTA. Our finest quality. For small to medium size lawns. Rugged cast-iron frame. Cutting reel riveted firmly to four steel spiders. Self-adjusting ball bearings in reel; spring lid oil cups. Powered by 1.6 HP Briggs & Stratton model 6BS engine with automatic recoil starter—uses about 1 pt. of fuel per hour. 1-qt. fuel tank. Maximum speed about 3 miles per hour. Wheels run on plain bearings. Wide diamond tread tires won't mar lawn. Sectioned hardwood roller. Actual weight 101 lbs. Ship. wt. 121 lbs. *Not Mailable.*

84 C 8114 R—$9 Down....Cash $89.50

21-IN. WIDTH CUT. WARDMASTA. Our finest quality. For medium to large size lawns. Rugged malleable iron frame withstands hard use. Cutting reel is riveted to five malleable iron spiders. Self-adjusting ball bearings in reel; Alemite oil fittings for easy lubrication. Powered by 1.6 HP Briggs & Stratton model 6BS engine with automatic recoil starter—uses about 1 pt. of fuel per hr. 1-qt. fuel tank. Maximum speed approx. 3¾ miles per hour. Ball bearing wheels. Wide diamond tread tires won't mar lawn. Actual weight 119 lbs. Ship. wt. 137 lbs. *Not Mailable.*

84 C 8125 R—$11.50 Down, Cash $112.50

24-IN. WIDTH CUT. WARDMASTA. Our finest quality. For extra large lawns, estates, golf courses, etc. Easier to operate because of dual drive to cutting reel and wheels—mower will move under own power with reel disengaged. Handle on mower base starts and stops reel. Rugged malleable iron frame withstands hard use. Cutting reel riveted to five malleable iron spiders; mounted in self-adjusting tapered roller bearings. Briggs & Stratton engine model 6B with automatic recoil starter develops 2 HP; uses 1 pint of fuel per hour. 2-qt. fuel tank. Max. speed about 4 miles per hr. Ball bearing wheels. Actual wt. 148 lbs. Ship. wt. 173 lbs. *Not Mailable.*

84 C 8124 R—Only $13.50 Down, Cash $134.50

17-IN. ELECTRIC MOWER 69.50

QUIET RUNNING ⅓ HP electric motor
SELF PROPELLED—you just guide it
STEEL FRAME keeps blades aligned

(H) WARDMASTA. Powered by Westinghouse ⅓-HP 1725 RPM electric motor. Easy to operate—all you do is guide it. Steel frame keeps blades aligned for smooth cutting. Five 17-in. crucible steel blades are heat treated, oil tempered to retain keen cutting edge; attached to 6-in. diam. reel. Adjustable cast-iron cutter bar. Cut adjusts ¾ to 1½ in. Gears are fully enclosed. Positive non-slip guarded chain drive. Tubular steel handle with convenient on-off switch, rubber grips. 10½-in. diam. wheels with semi-pneumatic, ribbed rubber tires. Rubber covered roller. With 100-ft. 16-ga. extension cord as shown. Ship. wt. 97 lbs. *Not Mailable.*

84 C 8116 R—Only $7 Down, Cash $69.50
17-IN. ELECTRIC MOWER ONLY. Without cord.

WARDS GUARANTEE to have repair parts available for any Ward Hand or Power Mower for at least 10 years from date of purchase. See Wards new Riding Mower listed on Page 880. For details of Wards Monthly Payment Plan, see Inside Back Cover.

Rubber and Plastic Garden Hose Guaranteed

GREEN RUBBER HOSE 5.19

1 GUARANTEED 5 YEARS. Eclipse (Good) Quality. Vulcanized construction. Good resistance to harmful effects of sun, oil, abrasion but not as well as Rubber and Neoprene hose at right. See terms of Wards Hose Guarantee at top of opposite page.

Three layer construction: (1) Inner layer of smooth seamless black rubber tubing, ½-in. inside diameter. (2) Braided Rayon cord center layer. (3) Tough corrugated rubber cover.

Built to withstand 7 times ordinary city water pressure, handles up to 350 lbs. per square inch. Full-flow brass couplings for standard fittings. Ship. wts. 6 lbs., 12 lbs. *Mailable.*

84 C 7910 M—*State length.*
25-ft. length.....$2.85
50-ft. length..... 5.19

RED RUBBER HOSE 6.98

2 GUARANTEED 10 YEARS. Lakeside (Better) Quality. Heavier and more resilient, costs less per year of service than hose at left. More resistant to sun, oil and abrasion. Highly flexible. See guarantee on opposite page.

Three layer construction: (1) seamless rubber inner tubing, ⅝-in. inside diam. (2) Center layer of tightly braided tough rayon cord—same as used in finest auto tires. (3) Corrugated, natural rubber outer layer—highly flexible for easier handling.

Withstands 9 times ordinary city water pressure, up to 450 lbs. per sq. in. Full-flow rustproof brass couplings. *Mailable.*

84 C 7916 MB—*State length.*
25 ft. Ship. wt. 8 lbs.....$3.98
50 ft. Ship. wt. 15 lbs..... 6.98
75 ft. Ship. wt. 23 lbs..... 9.98

USE WARDS CONVENIENT MONTHLY PAYMENT PLAN ON GARDEN NEEDS. Terms available on orders of $20 or more—see Inside Back Cover.

GREEN NEOPRENE HOSE 8.95

3 GUARANTEED 15 YEARS. Wards Master Quality. Our finest rubber hose. Superior 5-layer construction with rugged Neoprene cover. Built like a truck tire. Greater resistance to sun, oil, abrasion. Withstands exposure to extreme weather. Corrugated to give longer service under rough use. Resists oils, abrasion from scuffing, dragging. See Hose Guarantee at top of opposite page.

Superior five-layer construction: (1) Inner layer of seamless rubber tubing, ⅝-in. inside diameter. (2) Layer of tire-tough, tightly braided Rayon cord. (3) Second layer of natural rubber. (4) Additional layer of Rayon cord—increases tensile strength. (5) Outer layer heavy Green Neoprene rubber. All layers vulcanized into single unit. Built to withstand 18 times ordinary city pressure—up to 900 lbs. per sq. in. Full-flow brass couplings have same diameter as hose—for greater capacity.

84 C 7925 M—*State Length. Mail.*
50-ft. length. Ship. wt. 18 lbs.....$8.95
75-ft. length. Ship. wt. 27 lbs..... 12.95

SPRINKLERS AND SOAKERS 1.19 TO 3.69

4 5 SPRINKLER-SOAKERS do 2 jobs—tiny holes give rain-like spray for sprinkling (see (A) or soaking (B). For all hard-to-get-at places. Tough green plastic resists sun—won't rot, fade. *State length.*

(4) 1-TUBE SPRINKLER-SOAKER. Sprays 20 ft. wide area. Use high pressure for sprinkling, low for soaking. Wts. 1½, 3 lbs.
84 C 7977—25 ft. $1.19.....50 ft. $1.89

(5) 3-TUBE SPRINKLER-SOAKER WITH REEL. Sprays up to 25-ft. wide area. Turn up for sprinkling, down for soaking. Brass couplings—sprinklers can be joined together. Metal storage reel. Wts. 3 lbs. 8 oz., 5 lbs.

84 C 7979—25 ft. $2.19.....50 ft. $3.39
84 C 8066—REEL ONLY. Wt. 1 lb. 8 oz...59c

6 CANVAS GROUND SOAKER. Soaks lawns, etc. without injury to plants. Porous—water seeps through. *State length wanted.*
84 C 7976—Wts.: 1 lb. 4 oz., 2 lbs. 8 oz.
30-ft. length $2.39.....50-ft. length $3.69

Sprinkling Action

Soaking Action

NEW WARDMASTR LAWN SPRINKLERS 1.49 TO 8.69

7 TO 10 WARDMASTR brand name designates Wards new line of top quality sprinklers. Feature the very finest in design, construction and workmanship, yet are priced lower than other nationally advertised quality brands. All are professional type used in parks, etc. Streamlined graceful lines; round bases with curved edges won't mar lawns; easy to move to new position. Baked-on two-tone blue enamel finish with sparkling, rust-resistant chrome plated trim over brass. Fit standard garden hose connectors.

(7) SPINNER SPRINKLER. Sprays fine, rain-like drops. Covers 36-ft. diam. area—6 gal. per min. 3½ in. high.
84 C 8001—Ship. wt. 1 lb. 4 oz..$1.49

(8) WHIRLING GLOBE SPRINKLER. Sprays evenly over 30-ft. diam. area at rate of 7 gals. per min. Chrome plated 5¾-in. diam. globe. 10 in. high.
84 C 8003—Ship. wt. 1 lb. 4 oz..$2.98

(9) TWIN NOZZLE REVOLVING SPRINKLER. Chrome plated brass nozzles adjustable for sprays or streams. Covers 48-ft. diam. area at rate of 5 gals. per min. Brass bearings. 6¼ in. high.
84 C 8004—Ship. wt. 2 lbs.....$3.59

(10) IMPULSE-TYPE ALL PURPOSE SPRINKLER. Fingertip adjustment for any watering need—small to large areas; any degree to a full circle; fine spray or stream. Covers maximum of 76-ft. diam. at 7.4 gals. per minute. Excellent for flower bed edges, odd shaped areas. Operate at min. pressure of 20 lbs. per sq. inch. Precision machined brass head with chrome plated trim. 6⅝ in. high.
84 C 8005—Ship. wt. 2 lbs.....$8.69

IMPULSE-TYPE SPRINKLER HEAD ONLY. Same as on sprinkler (10) above. Use with overhead or underground sprinkling systems. Threaded to fit ½-in. steel or plastic pipe.
84 C 8006—Ship. wt. 12 oz.....$5.50

"WALKING" AND OTHER PRESSURE OPERATED SPRINKLERS 2.19 TO 25.95

11 SQUARE SPRINKLER. Gets into corners. Sprays 25x25-ft. sq. area. Wt. 1 lb. 12 oz.
84 C 8036—Use alone or in series.....$2.69

12 WATER FEEDER. Connects to hose, sprinkler or sill cock—fertilizes as you sprinkle.
84 C 8038—Use cartridges below. Wt. 8 oz. $1.89

FERTILIZER CARTRIDGE. For (11); (12) above. 15% nitrogen, 5% phosphoric acid, 5% potash.
84 C 8044—Box of 20. Ship. wt. 1 lb....Box 90c

13 3-ARM BRASS SPRINKLER. Each arm sprays 3 streams. Covers 45-ft. diam. Rust resistant brass arms and bearing. Green finish.
84 C 8015—Ship. wt. 2 lbs. 4 oz.....$2.19

14 RAIN KING AUTOMATIC SPRINKLER. Finger tip control sets distance, spray automatically. Sprays 5 to 50-ft. diam. circle. Brass bearings, stainless steel parts. Chromium plated.
84 CP 8051—*Postpaid.* Green enameled..$9.75

15 NEW OSCILLATING SPRINKLER—reaches corners. Adjustable back and forth motion lets one side of area absorb water while other side is saturated. Sprays 40x50-ft. area.
84 C 8042 M—"Oilite" bearings. Wt. 5 lbs. $7.49

16 AUTOMATIC "WALKING" LAWN SPRINKLER. Saves you time and labor. Guides itself, develops its own "walking" power over a path determined by where you lay your hose. Front wheel rides on top of hose to guide sprinkler; back wheels grip turf. Sprinkles large area with minimum of attention. Lays down from 150 to 300 gallons of water per hour. Creeps 20 to 40 ft. per hour depending on water pressure and adjustment or adjusts to stay in fixed position. Nozzles adjust for mist-like, heavy, or rain-drop type spray. Six oil-retaining bronze bearings. Stainless steel drive screw and thrust flange. Solid rustproof brass fittings. Order automatic shut-off (17) separately, below. Wt. 29 lbs. *Mailable.*
84 C 8058 MB—$3 Down.....or Cash $25.95

17 AUTOMATIC SHUT-OFF. For Automatic "Walking" Sprinkler (16) above. Automatically shuts off and stops sprinkler when it reaches valve. Can be installed at any hose coupling.
84 C 8059 M—Ship. wt. 4 lbs. *Mailable*.....

18 SPRINKLER-IRRIGATOR. Sprays 35x35-ft. sq. sprinkler; or waters sub-surface roots. 3-way valve for root irrigation, sprinkling or shut-off.
84 C 8037—Aluminum tube, with steel spike. Wt. 3...

Give 5 to 10 Years of Satisfactory Service

WARDS HOSE GUARANTEE. Given ordinary care and used for the purpose intended, plastic and rubber hose on these 2 pages are guaranteed for number of years stated. If any Ward Hose fails to give service stated, we will replace it, charging only for the service you received. *Remember, too, that storing your hose on a reel* will conserve the extra built-in years of its life—see reels at bottom of page.

WHICH SIZE PLASTIC HOSE SHOULD YOU BUY? The larger the inside diameter (see illustrations at right), the more water hose will handle—afford less restriction to water pressure. ¾-in. size is recommended for greenhouses, estates, golf courses, large gardens, ½-in. size for average size lawns, sprinklers etc.; 7/16-in. size for small lawns, gardens, etc. All hose sizes have standard couplings.

PLASTIC HOSE 2.98 50 ft.
